

How to get a device to connect to GMercyU's WiFi

Connecting to the Griffin-Link

If you are using a Windows Computer:

Step 1.) Go down to the bottom right of the screen and click on the Wi-Fi symbol to pull up the list of available networks.

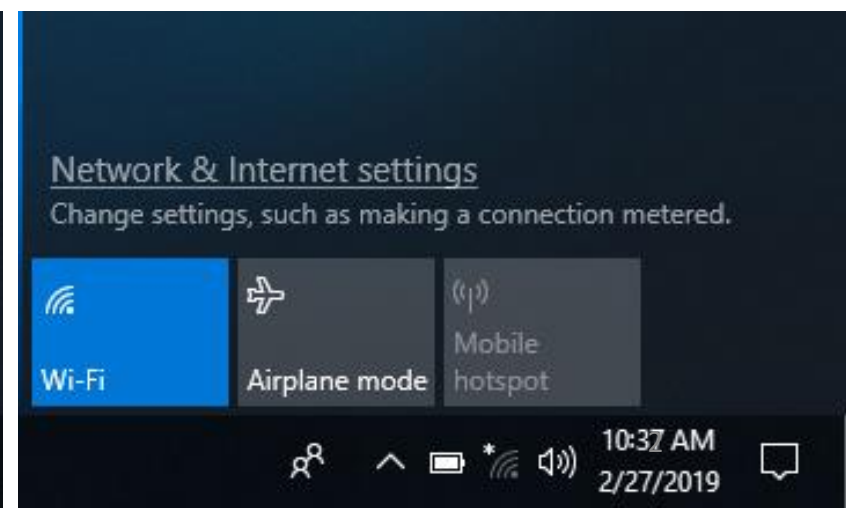

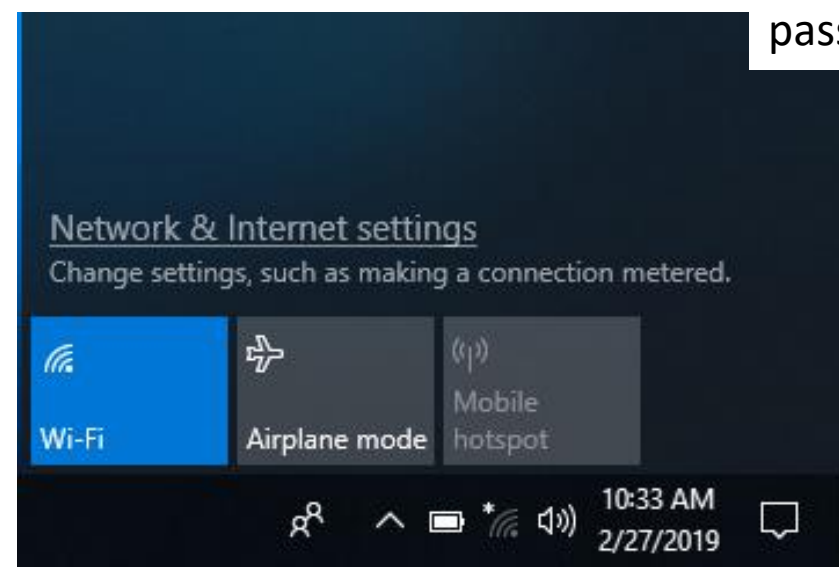

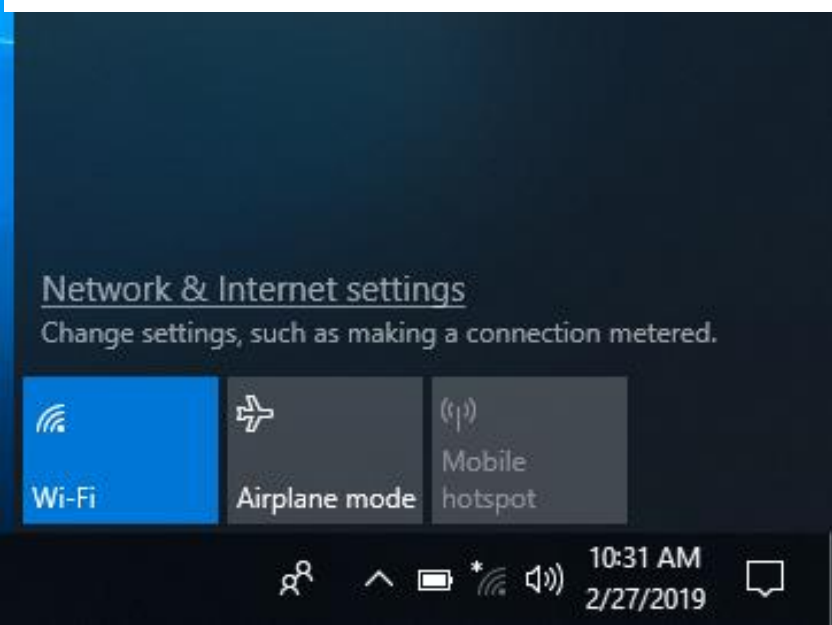

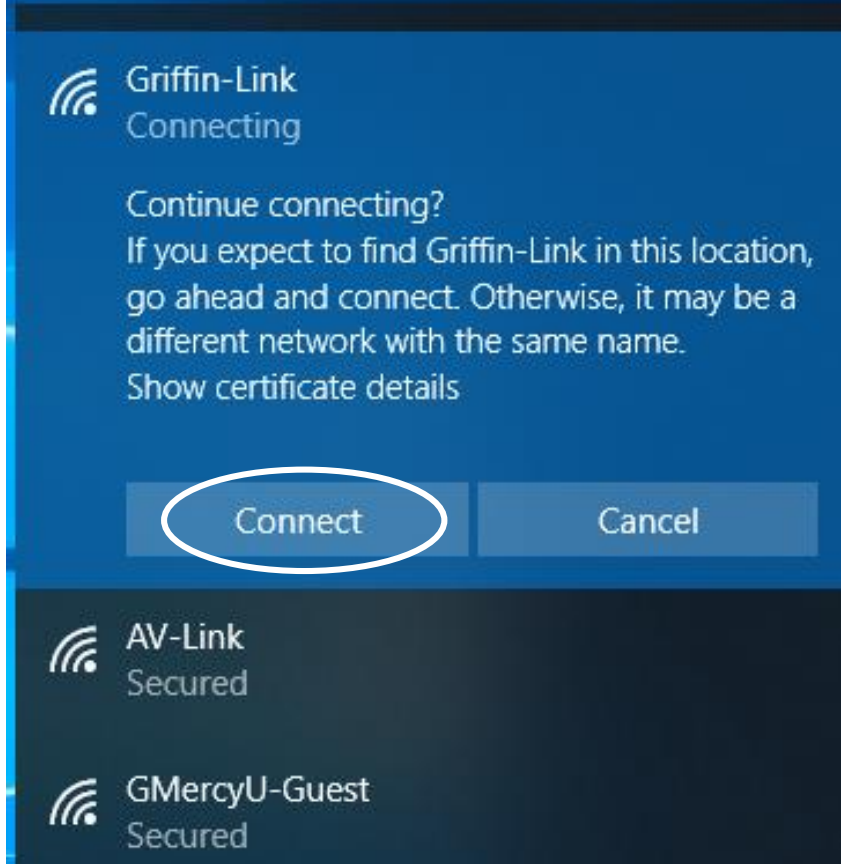

Step 2.) Click on the “Griffin-Link”.

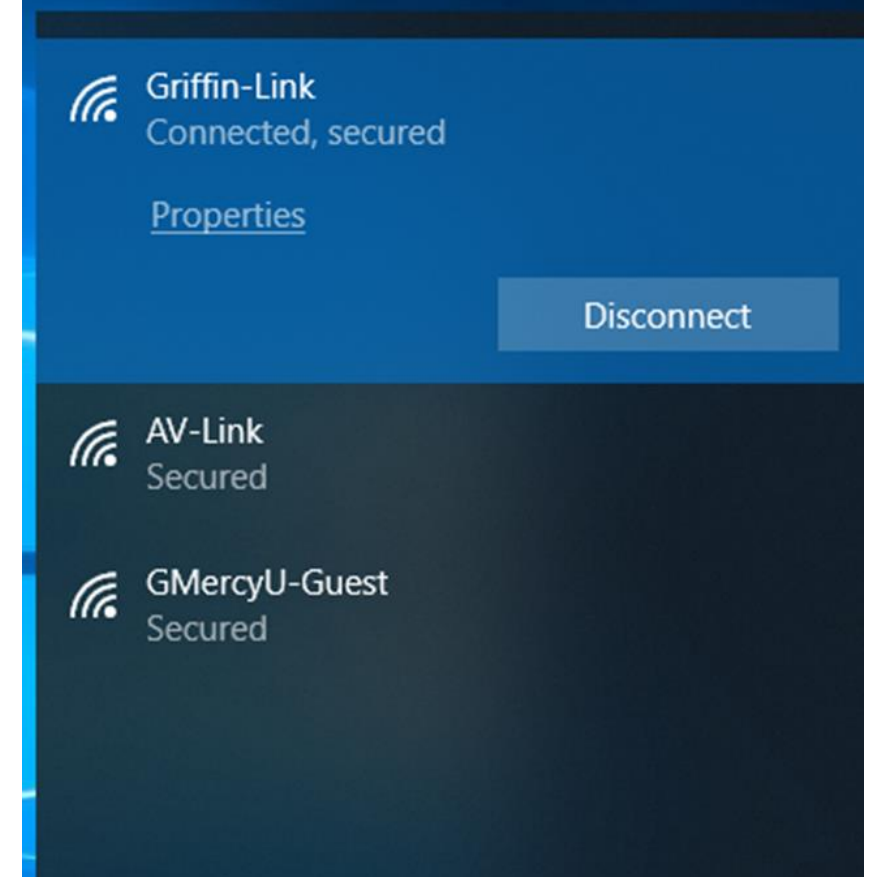

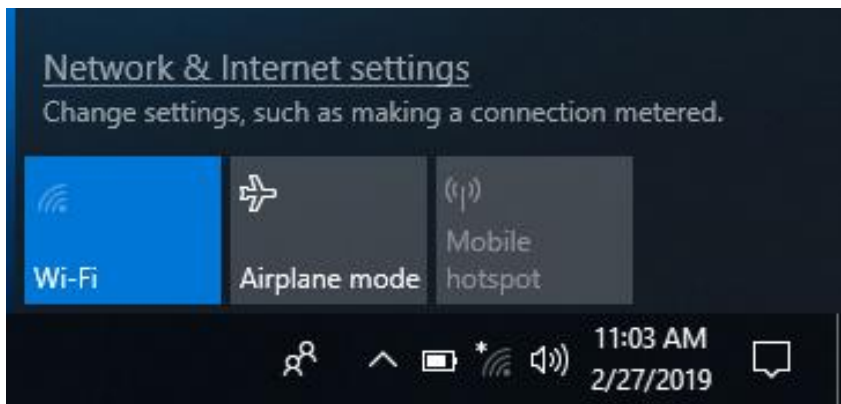

Step 3.) Make sure the “**Connect automatically**” option is checked and click “**Connect**”.

Step 4.) Enter your GMercyU **username** and **password** for the portal, if you changed your password recently be sure to put the new password in and click “**OK**”.

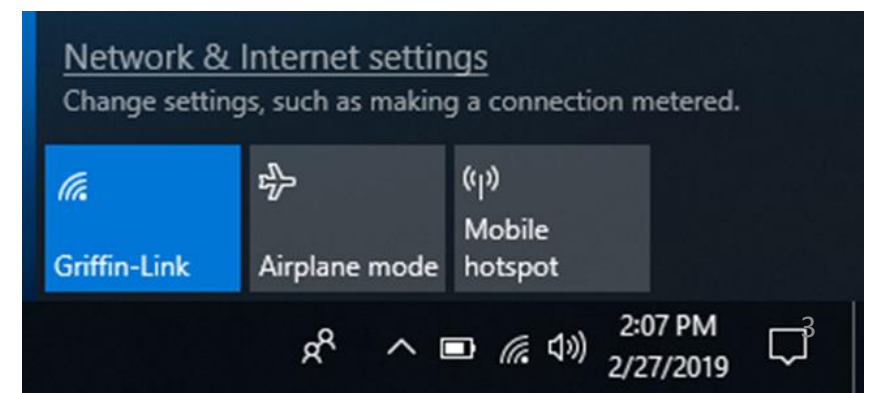

Step 5.) Click the “**Connect**” button.

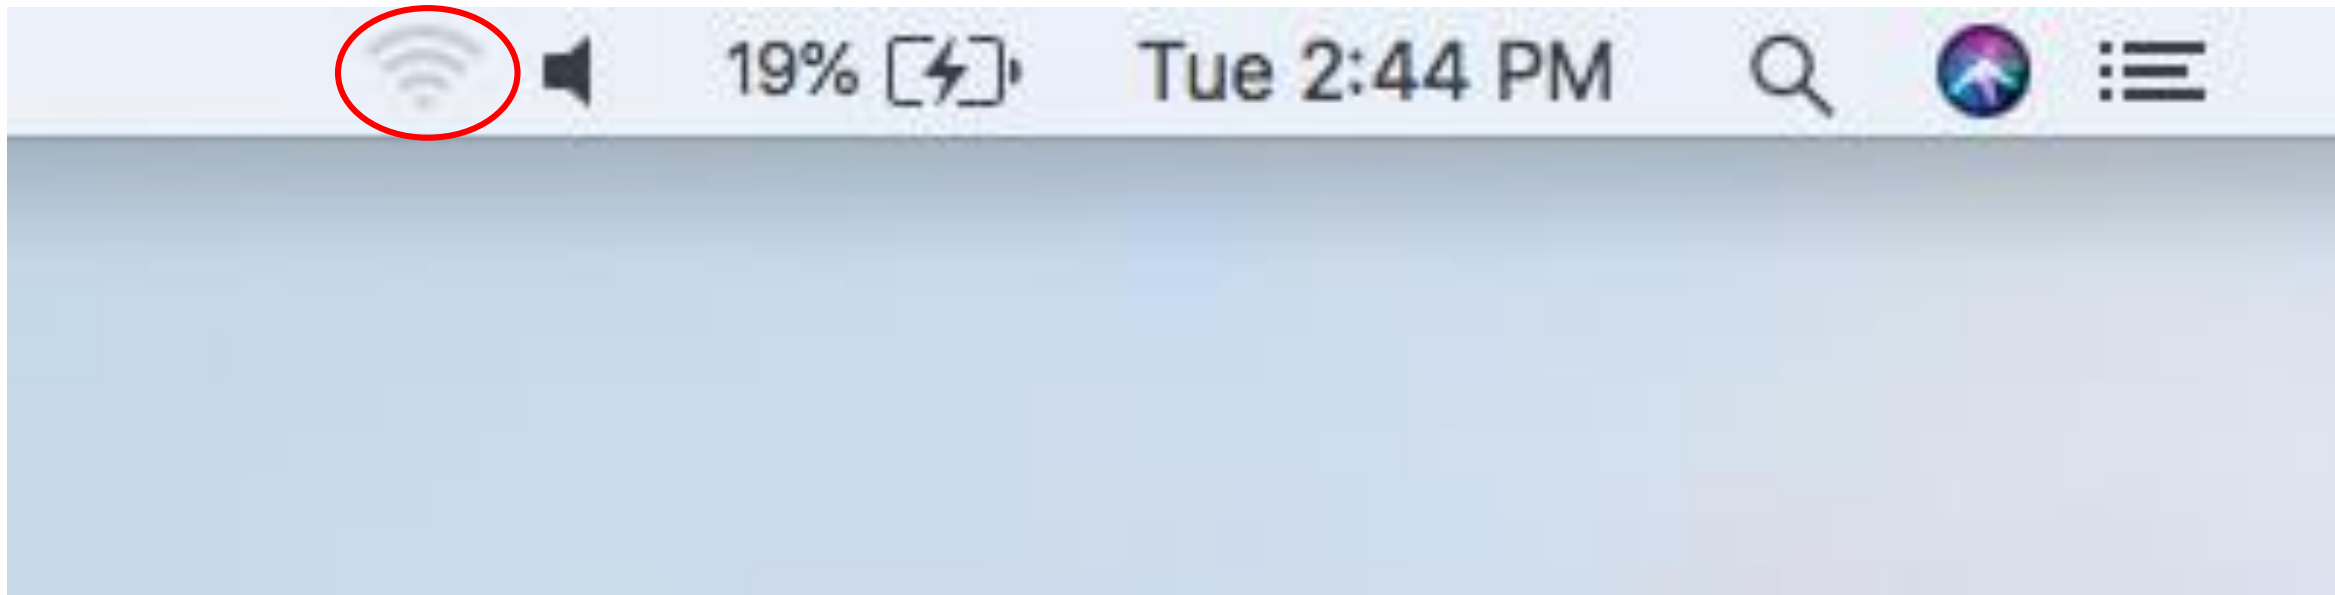

Step 6.) You should now be connected to the Griffin-Link.

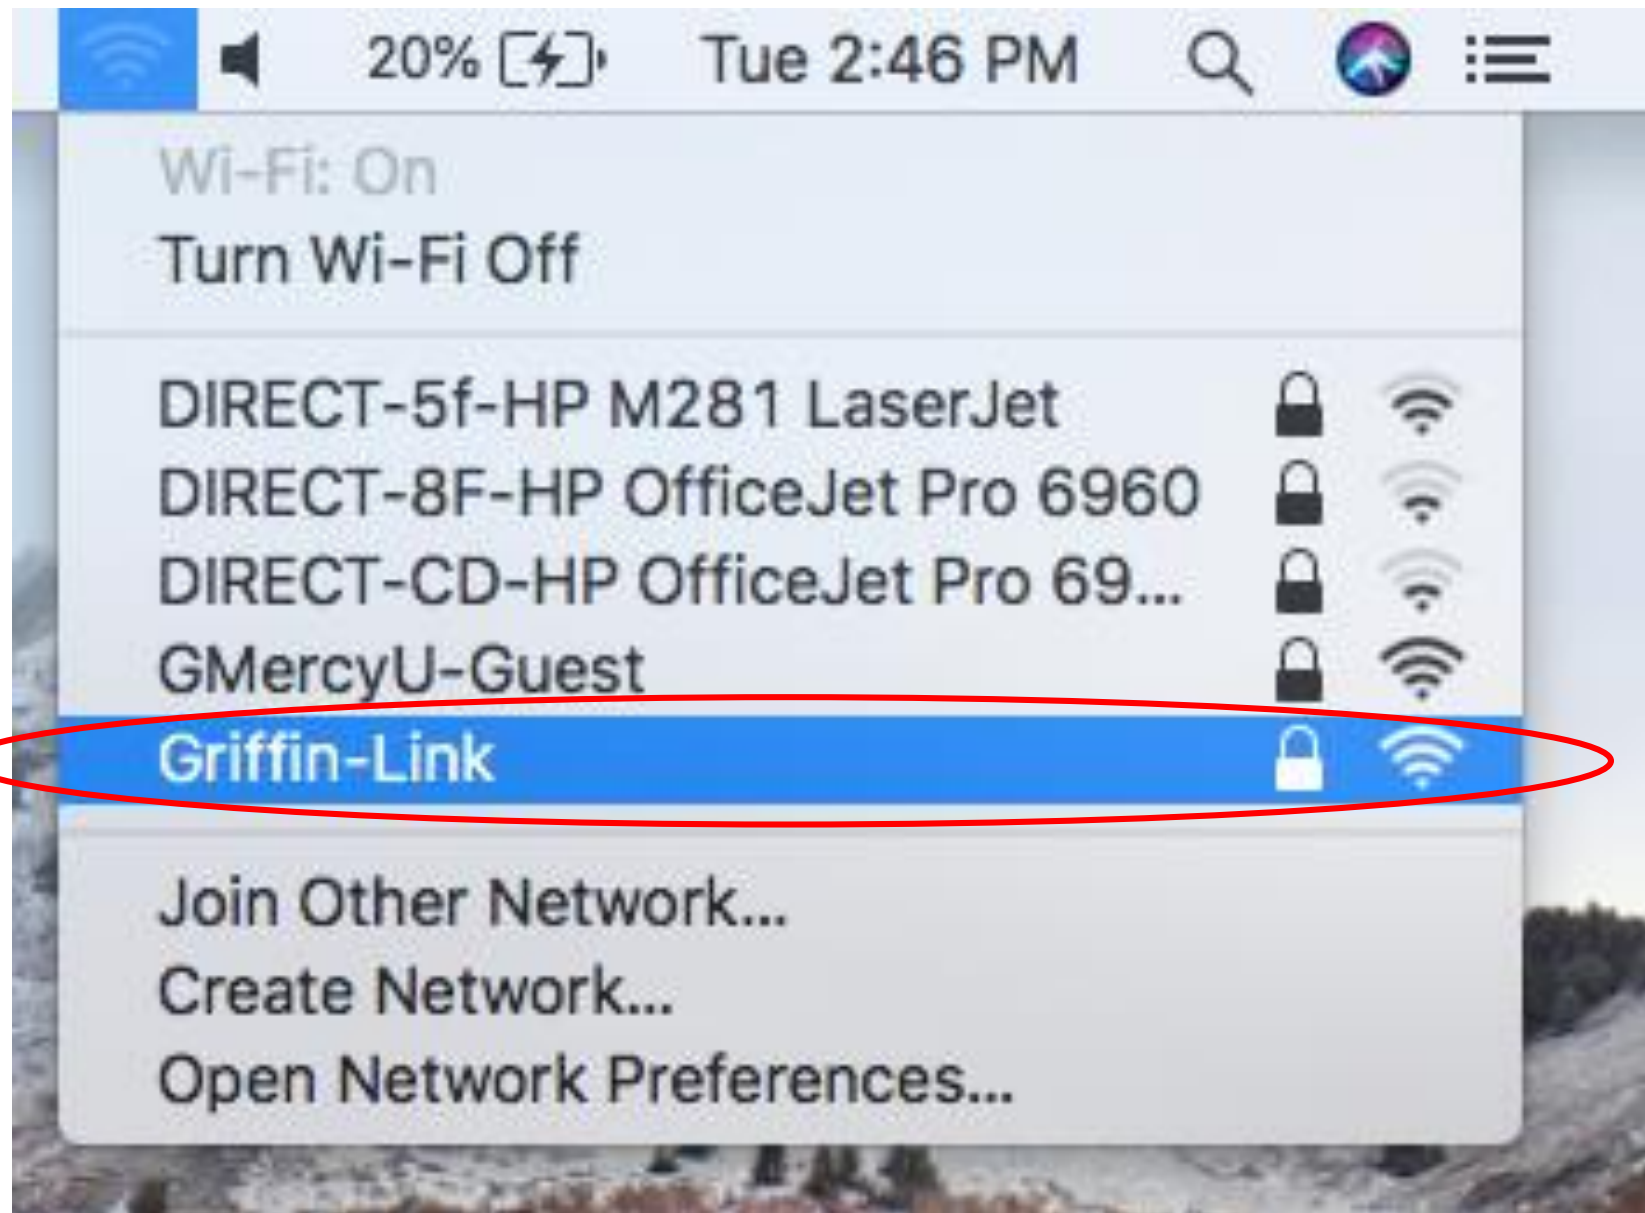

If you are using a Mac (Apple) Computer

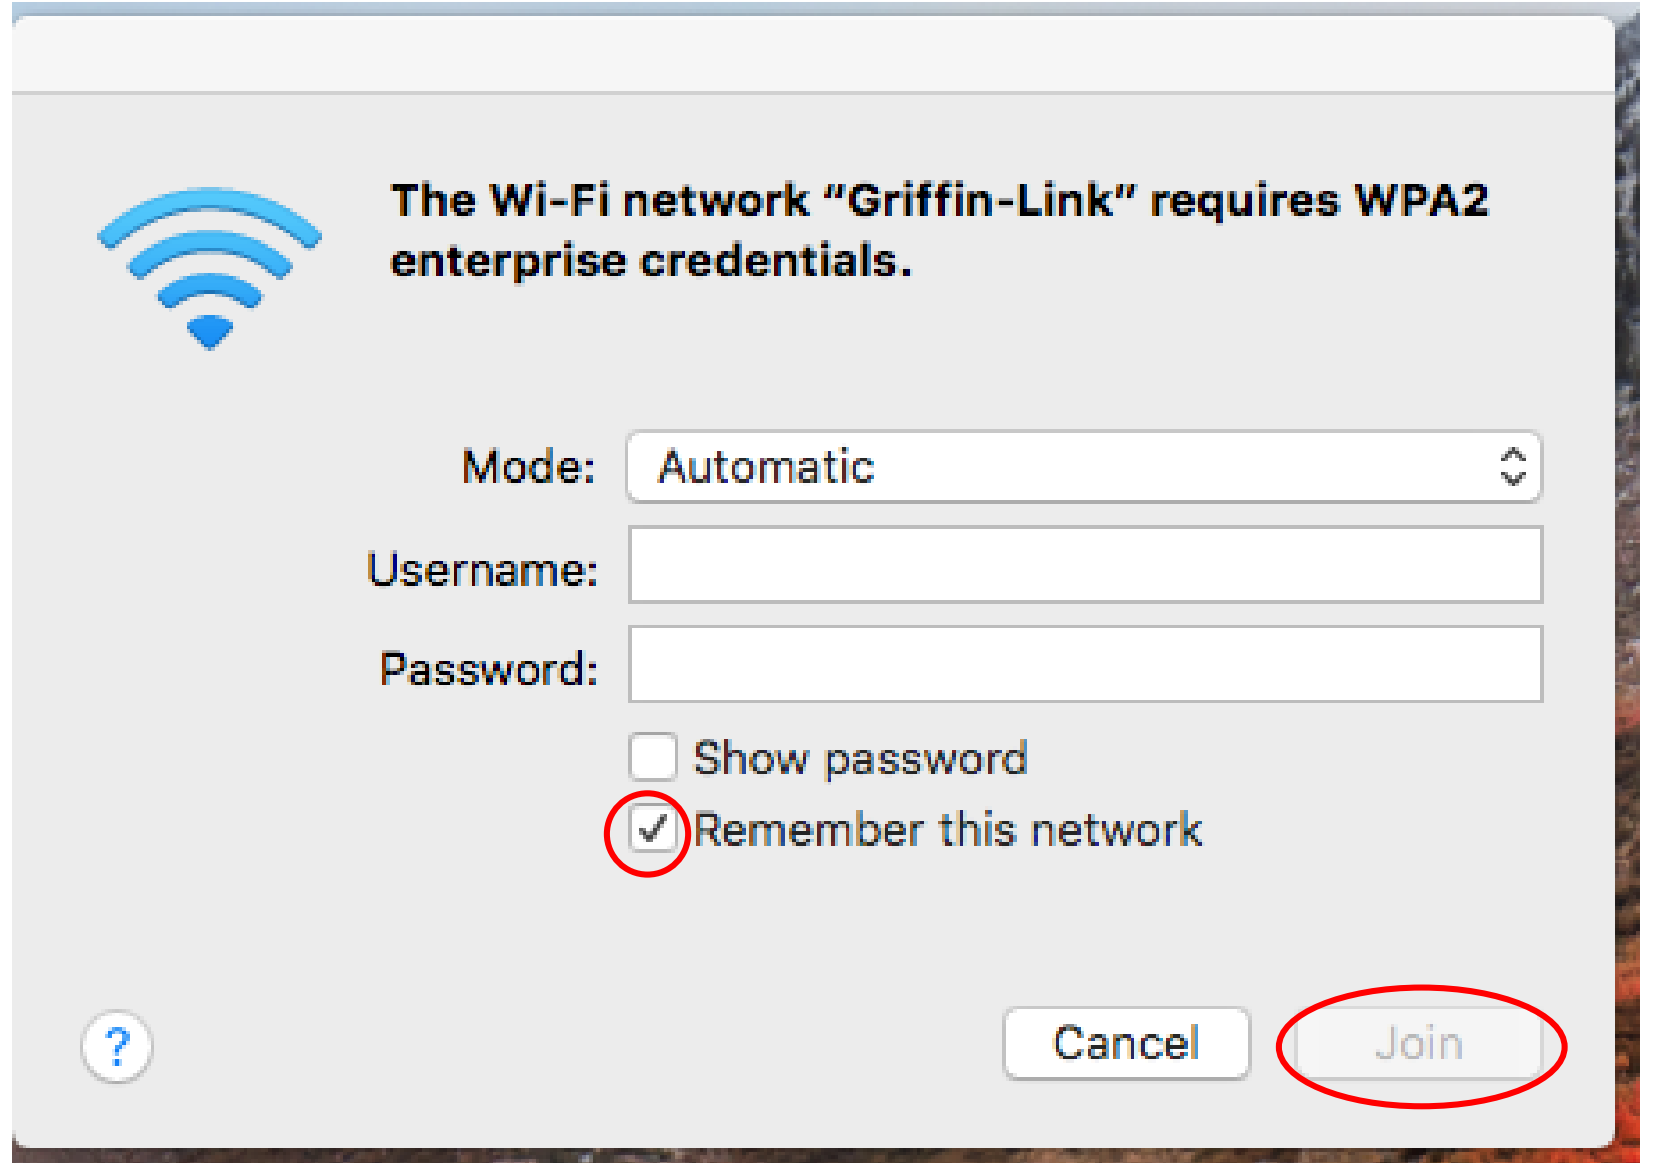

Step 1.) Go up to the top right-hand of the screen and click on the Wi-Fi symbol to pull up the list of networks and options.

Step 2.) Find “**Griffin-Link**” in the list of networks and click on it.

Step 3.) Enter your username and password for the portal, if you changed your password recently be sure to put the new password in. Make sure the “**Remember this network**” option is checked and click “**Join**”.

The Wi-Fi network “Griffin-Link” requires WPA2 enterprise credentials.

Mode: Automatic

Username:

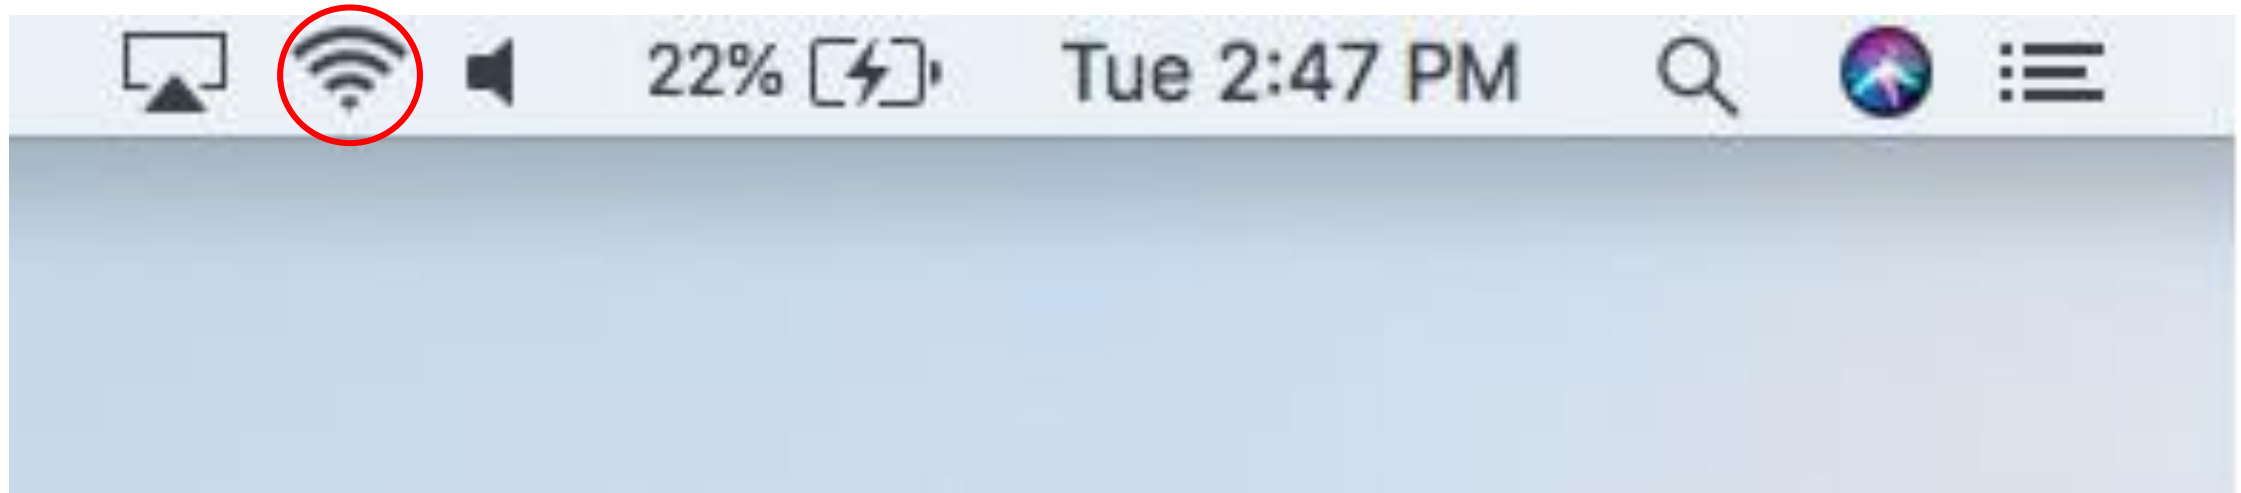

Password:

☐ Show password

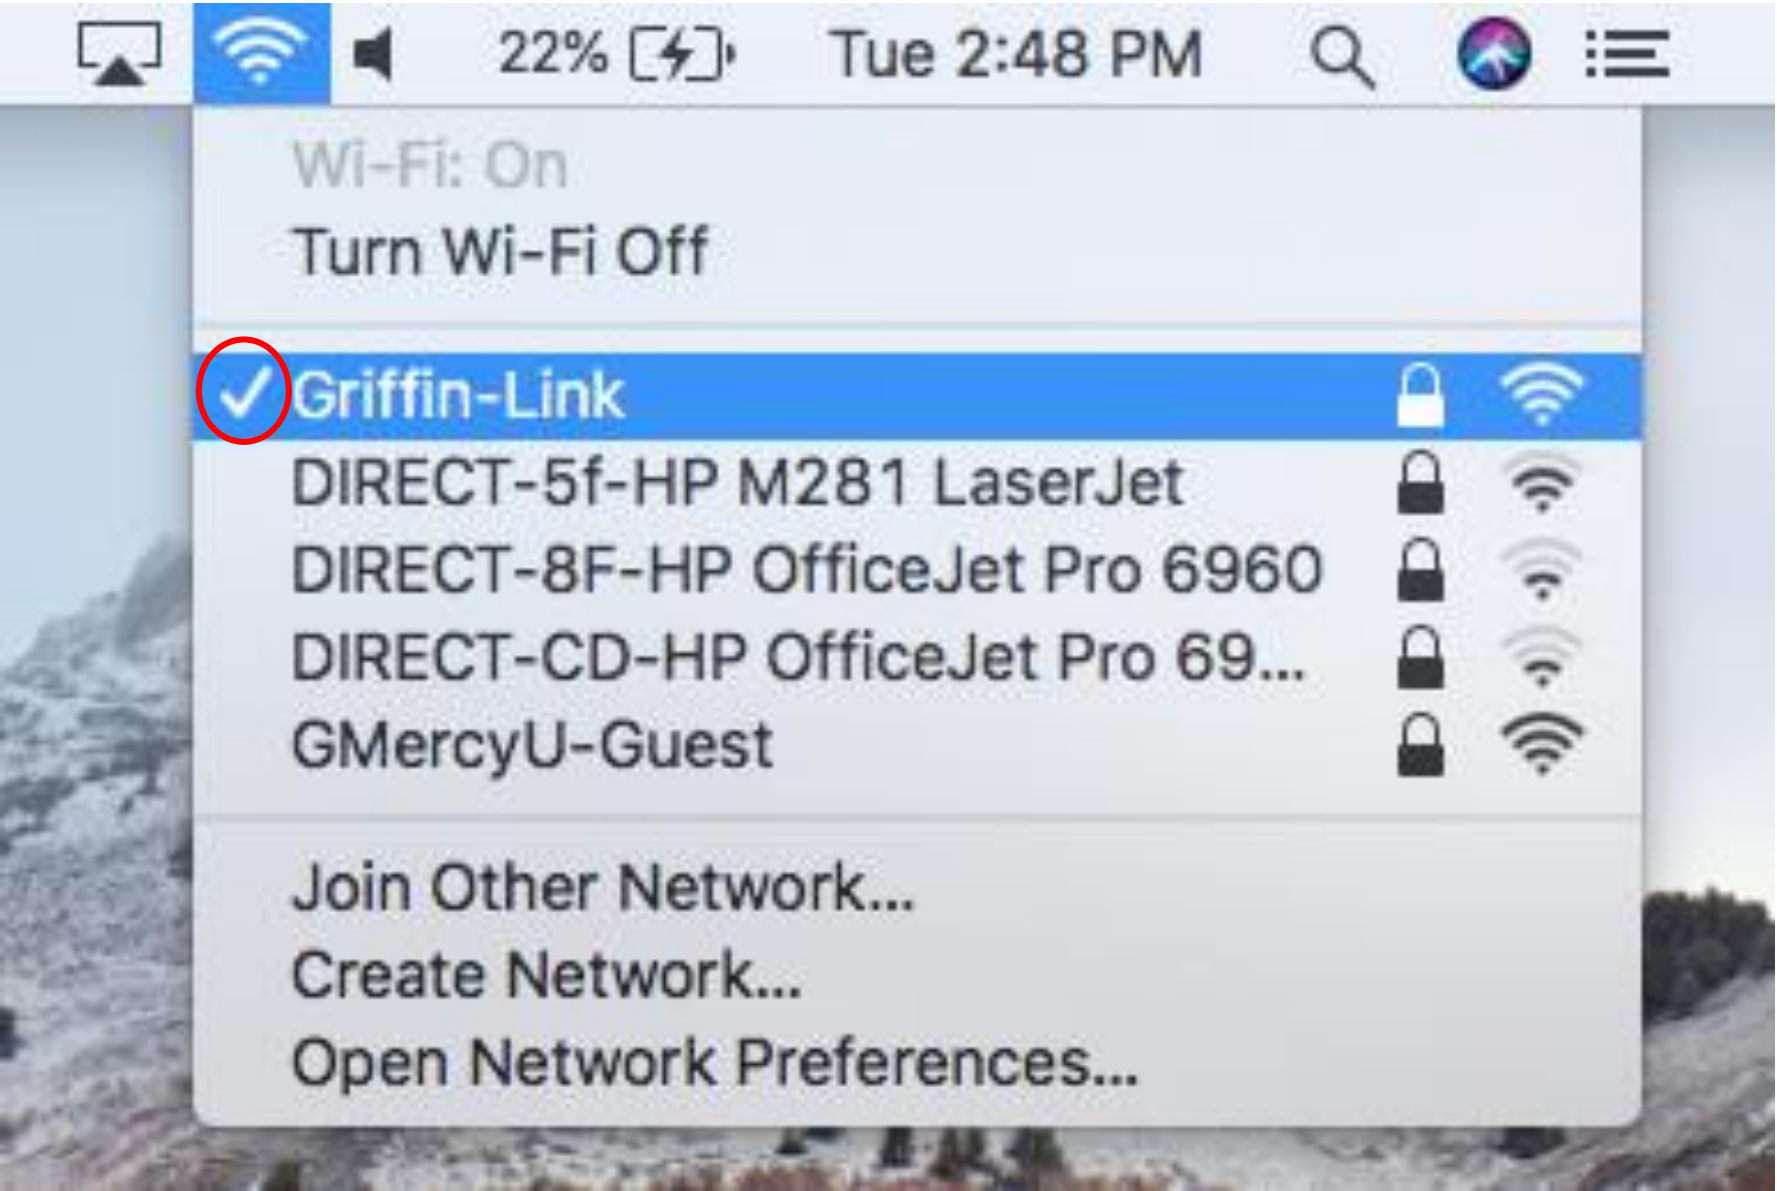

☒ Remember this network

A blue Wi-Fi signal icon is located to the left of the network name. A blue question mark icon is in the bottom left corner. The 'Join' button is circled in red.

Step 4.) In a few seconds the Wi-Fi symbol at the top right-hand of the screen will become filled-in and stay that way. That means you have successfully connected to the Griffin-Link. To double check this click on the Wi-Fi symbol again.

Step 5.) If you have successfully connected to the Griffin-Link you should see a check mark next to the Griffin-Link.

If you are using a Google Chromebook

1.) Sign in to the Chromebook with the account designated as the owner.

2.) At the bottom right, select the Wi-Fi icon  .

3.) Connect to the “**Griffin-Link**” with your GMercyU **username** and **password** for the portal, if you changed your password recently be sure to put the new password in. Remember there are certain security certificate options that need to be filled out on Chromebooks and Android devices the settings are:

EAR Method: **PEAP**

PHASE 2 Authentication: **MSCHAPV2**

CA Certificate: **Don't Validate** or **Unspecified**

User Certificate (if you have the option): **Unspecified** or **Don't Validate** ⋮

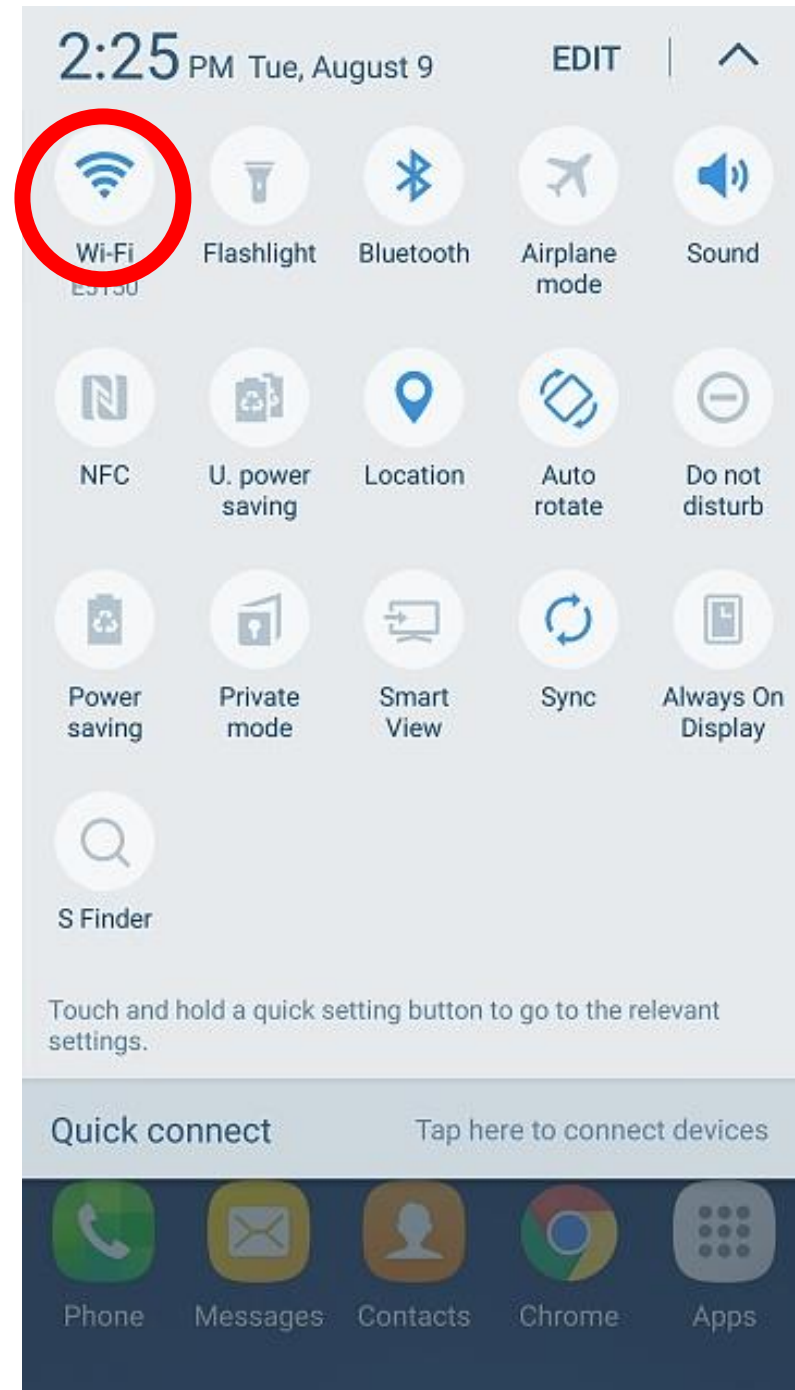

You can ignore Anonymous Identity

You should now be connected to the Griffin-Link.

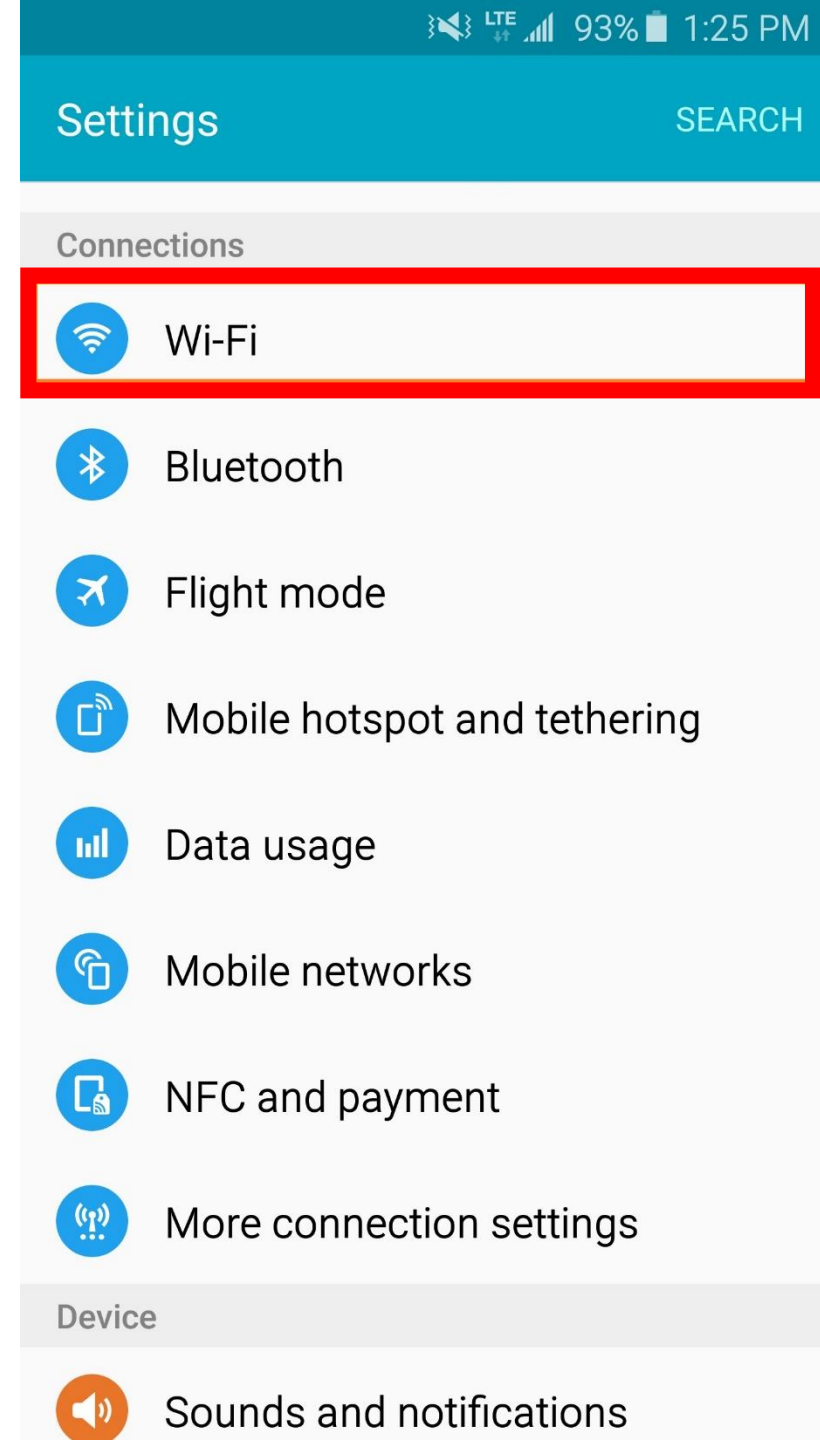

If you are using an Android phone

*As there are many makers of Android phones your phone's menus and icons may look a little different.

Step 1.) Swipe down from the top of the screen and press and hold for a few seconds on the Wi-Fi icon  (if you choose the swipe down method skip to step 3) or go to settings  (you can access settings through the apps icon ).

Step 2.) Go to “**Connections**” and press on “**Wi-Fi**”.

Step 3.) Reconnect to the Griffin-Link with your GMercyU **username** and **password** for the portal, if you changed your password recently be sure to put the new password in.

Remember there are certain security certificate options that need to be filled out on Chromebooks and Android devices the settings are:

EAR Method: **PEAP**

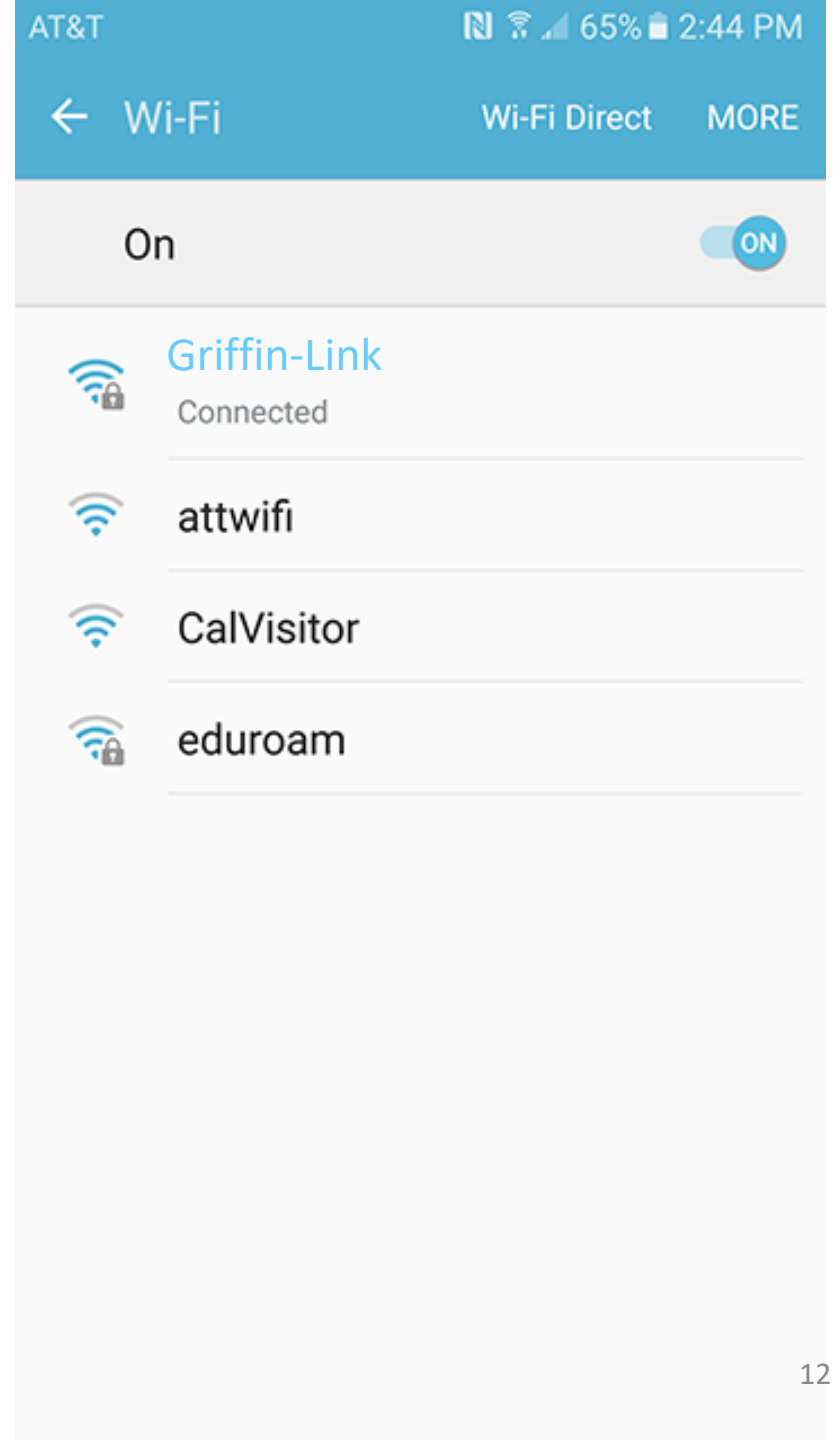

PHASE 2 Authentication: **MSCHAPV2** (for newer Android devices this option is in Advanced Settings at the bottom)

CA Certificate: **Don't Validate** or **Unspecified**

User Certificate (if you have the option): **Unspecified** or **Don't Validate**

You can ignore Anonymous Identity

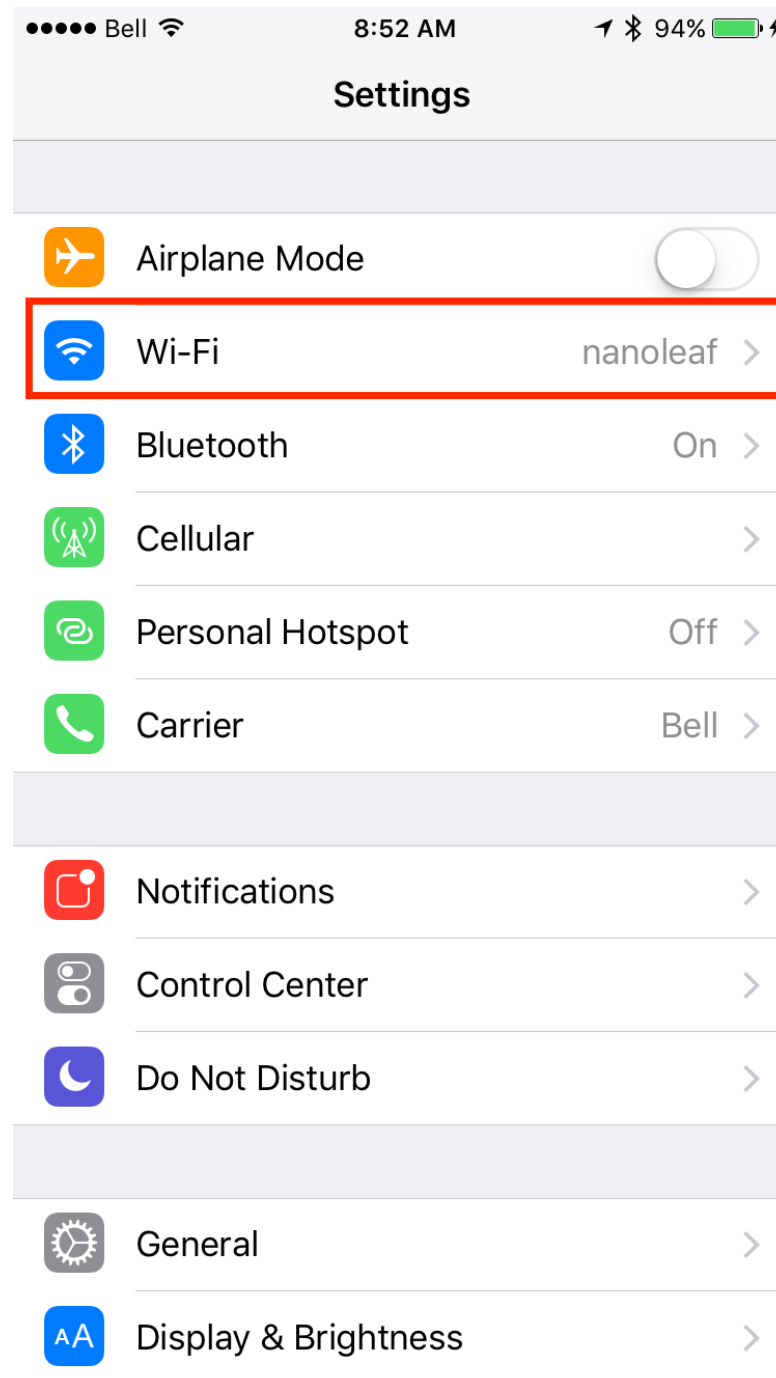

You should now be connected to the Griffin-Link.

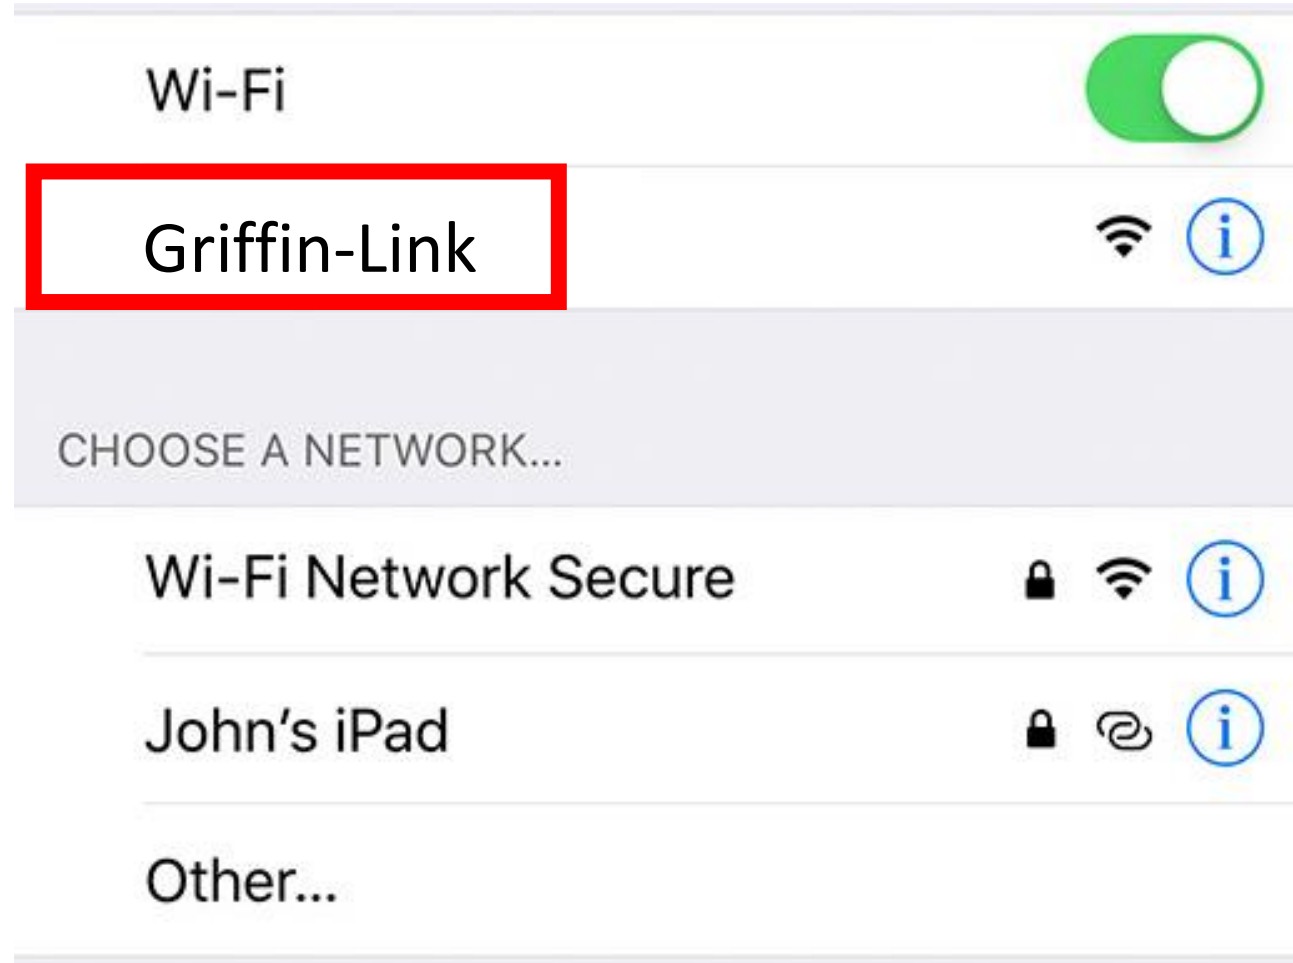

If you are using an iPhone

Step 1.) Go to settings  .

Step 2.) Click on “Wi-Fi” (you may have to click  Settings and go back to settings first to get to the main settings menu).

Step 3.) Once in Wi-Fi settings click on the “**Griffin-Link**”. Enter your GMercyU **username** and **password** for the portal, if you changed your password recently be sure to put the new password in.

Step 4.) Next click “Trust”.

Step 5.) You should now be connected to the Griffin-Link. You can confirm this because there will be a check mark next to the “Griffin-Link”.
