This catalog serves as an explanation of the offerings of Gwynedd Mercy University and is not a contract with the student. The administration reserves the right to change courses, expenses or requirements as the need arises.

Gwynedd Mercy University is committed to maintaining a positive learning, working, and living environment that is free from unlawful discrimination and harassment. Gwynedd Mercy University does not discriminate against any applicant for admission to or employment at the University because of race, religion, age, gender, sexual orientation, gender identity, national origin, disability, color, marital status, veteran status, genetic characteristics, or any other characteristic protected by federal, state or local law (“Protected Classes”). This includes, but is not limited to, admissions, financial aid, educational services, and student programs and activities, as well as to all terms and conditions of employment including, but not limited to, recruitment, selection, hiring, placement, transfer, promotion, training, compensation, benefits, discipline, and termination. The University will not tolerate unlawful acts of discrimination or harassment based upon Protected Classes, or related retaliation against or by any employee or student.

This policy applies to all University faculty, administrators, staff and students. Persons who lodge discrimination or harassment complaints or participate in the investigation of such a complaint are protected from retaliation (e.g., adverse action or consequences) for those actions. Retaliation will not be tolerated at Gwynedd Mercy University. Although discrimination and harassment described and prohibited by this policy include a wide range of behaviors, certain discriminatory conduct is addressed elsewhere. For example, sexual harassment is addressed in the University’s Sexual Misconduct Policy. Individuals who violate this policy shall be disciplined or subjected to corrective action, up to and including termination or expulsion.

Non Discrimination Statement
As a recipient of Federal funds, Gwynedd Mercy University is required to comply with Title IX of the Higher Education Amendments of 1972, 20 U.S.C. § 1681 et seq. (“Title IX”), which prohibits discrimination on the basis of sex in educational programs or activities, admission and employment. Under certain circumstances, Sexual Misconduct constitutes sexual discrimination prohibited by Title IX. In addition, the University complies with Section 304 of the Violence Against Women Reauthorization Act of 2013 (“VAWA”). Inquiries concerning the application of Title IX and VAWA may be referred to the University’s Title IX Coordinator or to the U.S. Department of Education’s Office for Civil Rights. Gwynedd Mercy’s Title IX Coordinator is Robert Wood and he may be contacted by phone at Ext. 21140 or by e-mail at wood.r@gmercyu.edu. He may also be visited in person at his office, which is located at Connelly Faculty Center, Room #114.
Academic Year 2019-2020
(On ground programs only)

Fall 2019

Accelerated X1 Begins (8/19-10/9) August 19
University Assembly August 21
Saturday Classes Begin August 24
Regular Classes Begin August 26
Labor Day (University Closed) September 2
Last Day to Drop/Add Regular Classes September 3
Deadline for January 2020 Graduation Application September 3
Fall Break (No Classes) October 14, 15
Accelerated X2 Begins (10/16 – 12/10) October 16
Spring 2020 Registration November 4
Last Day to Withdraw from Regular Classes November 11
Thanksgiving Holiday (University Closed) November 27, 28, 29
Last Day of Regular Classes December 9
Final Exams December 10-14
Deadline for May 2020 Graduation Applications December 16

Spring 2020

Accelerated X3 Begins (1/6 -2/25) January 6
University Assembly January 7
Regular Classes Begin January 9
Graduation- No Ceremony January 15
Last Day to Drop/Add Regular Classes January 15
Spring Break (No regular classes) March 2-6
Accelerated X4 Begins (3/19-4/30) March 9
Summer and Fall 2020 Registrations March 30
Last Day to Withdraw from Regular Courses April 3
Easter Holiday (University Closed) April 9-13
Last Day of Regular Classes April 27
Final Examinations April 28- May 2
Commencement May 9

Summer 2020

SUMMER SESSION May 4- August 14
Memorial Day (University Closed) May 25
Independence Day (University Closed) July 4
SUMMER SESSION I May 11- June 22
Memorial Day (University Closed) May 25
SUMMER SESSION II June 27- August 7
Independence Day (University Closed) July 4
Graduation- No Ceremony August 15

Course add/drop/withdrawal/registration deadlines and University closures will differ for students enrolled in the School of Graduate and Professional Studies)

GENERAL INFORMATION

Mission Statement
Gwynedd Mercy University is a Catholic University rooted in the tradition of the Sisters of Mercy. Our learning community prepares students for successful careers and meaningful lives in a global society.

Core Values: As a Mercy University committed to academic excellence, we value:

- **Integrity** in Word and Deed
- **Respect** for the Dignity of Each Person
- **Service** to Society
- **Social Justice** in a Diverse World*

*With a special focus on the Critical Concerns of the Sisters of Mercy: Earth, Immigration, Racism, Non-Violence, Women

UNIVERSITY STUDENT LEARNING OUTCOMES
Continuing at successively higher levels across their college studies, students should prepare for twenty-first-century challenges by gaining or becoming:

1. **Knowledge of Human Cultures and the Physical and Natural World**
   - Through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts
   - **Focused by engagement with big questions, both contemporary and enduring**

2. **Intellectual and Practical Skills, including**
   - Inquiry and analysis
   - Critical and creative thinking
   - Written and oral communication
   - Quantitative literacy
   - Information literacy
   - Teamwork and problem solving
   - **Practiced extensively, across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance**

3. **Personal and Social Responsibility, including**
   - Civic knowledge and engagement—local and global
   - Intercultural knowledge and competence
   - Ethical reasoning and action
   - Foundations and skills for lifelong learning
   - **Anchored through active involvement with diverse communities and real-world challenges**
4. Integrative and Applied Learning, including
   • Synthesis and advanced accomplishment across general and specialized studies
   Demonstrated through the application of knowledge, skills, and responsibilities to new settings and complex problems

5. Immersed in the Critical Concerns of the Sisters of Mercy of the Americas for:
   • Women – Advocating for the lives/rights of women.
   • Earth – Encouraging sustainable practices
   • Racism – Urging a dismantling of institutional racism.
   • Immigration – Supporting persons who have been displaced.
   • Non-violence – Promoting peaceful discourse/discernment/decision-making.

PROGRAM STUDENT LEARNING OUTCOMES

General Education
1. Express an appreciation and understanding of a variety of aesthetic, literary, cultural and ideological traditions.
2. Engage meaningfully in a community of scholarship through inquiry, research and the communication of ideas.
3. Evaluate historical, political, economic and scientific data while recognizing the interrelatedness of events and processes.
4. Demonstrate an understanding of the impact of technology on society.
5. Reflect upon the relationship of the Divine to the human experience.
6. Examine and understand the dynamics of individual and group behavior.
7. Demonstrate an understanding of quantitative reasoning.
8. Engage in constructive activities of service to the community in light of the Gospel tradition as experienced through the Mercy charism that shapes the University.

First Year Experience
1. Academic: Student will develop skills, such as informational literacy and oral and written communication, necessary for academic success.
2. Mercy: Students will understand the relevance of the Mercy heritage in the Catholic tradition and the Critical Concerns of the Sisters of Mercy.
3. Community: As part of a community of learners, students will connect to University resources and campus life in order to make informed decisions.

Honors
1. Improved communication skills, both oral and written.
2. A sense of the interconnectedness of knowledge.
3. An understanding of human freedom and responsibility to the community.
5. Knowledge of Western Culture, both American and European.
6. Improved research skills.
7. Improved critical thinking.
8. A sense of mankind’s spiritual, ethical, and moral heritage.
School of Arts and Sciences

Behavioral and Social Gerontology
1. To provide students with a liberal arts education that will prepare them to engage in and contribute to a democratic society.
2. To be inspired by the Mercy charism so they have a transformational impact on society.
3. To become knowledgeable about the aging process, the needs of the aging population, and effective means of meeting identified needs.
4. To become prepared to work with the aging population through courses designed to be practical and skill-oriented.
5. To be prepared to enter graduate school by developing a firm foundation in theory, research methods, and independent study.

Biology
1. Communicate scientific information in a variety of formats to audiences of varying scientific sophistication in an appropriate scientific style.
2. Recognize, articulate, analyze, and synthesize the fundamental principles of molecular, cellular and organismal biology, including genetics, biochemistry, ecology, etc., and relate to them the foundational principles of chemistry, physics, and mathematics.
3. Plan and implement a strategy to answer a scientific question. Graduates will demonstrate the ability to collect data using appropriate laboratory and field techniques, instrumentation, and methodology and to retrieve data from the scientific literature and from on-line databases. Graduates will demonstrate the ability to analyze and interpret data to produce meaningful conclusions.
4. Apply ethical judgment in the review of experimental design, implementation, presentation, and collaboration as well as in the application of scientific technologies and to recognize ethical conflicts when they occur.

Computer Information Science
1. Possess effective communication skills in technology in a variety of formats.
2. Work effectively in a team environment to accomplish a common goal.
3. Understand the professional, ethical, security, and social impact that computers and technology have in society.
4. Demonstrate problem-solving abilities for analyzing a technical problem through finding and implementing a solution.

Communication
1. Demonstrate media literacy by analyzing the rationale for genre, convention and wider contexts for particular types of produced communication.
2. Identify and analyze the convergent connections between communication industries -- such as journalism and public relations -- and discursive practices.
3. Develop skills appropriate to professional fields of communication ranging from core competencies in writing and speaking to the use of mediotechnologies.

Criminal Justice
1. Elucidate the various criminological theories and utilize them to explain various types of criminal behavior, including both violent and non-violent crimes.
2. Discuss the historical environment behind problematic behavior that has had a negative effect on minorities, and how the criminal justice system has addressed the correlates that lead to the perpetuation of such actions.
3. Analyze ethical decision making, becoming familiar with the major moral and social systems, and their relevance to issues in both criminal justice and in larger societal settings.

4. Identify the purposes and philosophies of the American correctional system, including its use of various punishments and correctional behavior, and articulate the key features of each.

5. Explain the various procedures in the investigation of criminal behavior, understanding the systematic arrangement and theoretical reasoning behind each legal and practical step.

6. Analyze the adversarial legal system in the United States, including the various courts, constituents, and procedures, and explain how they have shaped the legal system as it currently stands in this country.

**English**

1. Demonstrate skillful reading through close textual analysis, developing interpretations and applying a spectrum of literary theories to British, American, Continental European, and non-western literature.

2. Write papers of literary interpretation and analysis, using appropriate scholarly sources, both print and online and observing matters of format and documentation required by the MLA Handbook.

3. Identify, access, and evaluate authentic research materials and resources in their field.

4. Demonstrate knowledge of the development of the English language from Anglo-Saxon times to the present.

5. Display competence in oral and written communication by effectively using language to inform, analyze, and persuade.

**History**

1. Effectively read, reflect upon, and respond appropriately to historical information.

2. Ask pertinent questions about the human past that lead to solving current human problems.

3. Identify, evaluate, analyze, and interpret primary and secondary sources.

4. Critically assess differing, and often conflicting, interpretations of historical events and intellectual movements.

5. Become responsible, thoughtful, and compassionate citizens in the global world of the twenty-first century through the study of history.

**Human Services**

1. Articulate sociological and psychological theory and be able to apply these theories in understanding individuals and society.

2. Possess and be able to apply beginning human service skills.

3. Demonstrate basic understanding of social agency administration and funding requirements.

4. Utilize research for the purpose of understanding client populations and program evaluation.

5. Practice in an ethical manner.

**Mathematics**

1. Solve a variety of mathematical problems using numerical, algebraic, logic, geometric, and probabilistic techniques.

2. Think logically, to analyze, and to deal with abstractions.

3. Communicate ideas, both mathematical and non-mathematical, in written and oral formats.

4. Recognize relationships between mathematics and real-world situations in business, life sciences, physical sciences, and social sciences, and be able to model them using the language of mathematics.
2. Demonstrate an understanding of the significant role that mathematics has played and continues to play in society, and will conduct research and new applications in the field.
3. Conduct research and apply new applications in the field.
4. Use mathematical tools provided by current technology and to determine when the use is appropriate.

**Philosophy**
1. Develop a historical sense of philosophy and trace the lines of influence among major philosophers and philosophical traditions.
2. Understand various intellectual traditions that have contributed to philosophical inquiry.
3. Apply ethical theories to particular situations and events.
4. Search for and examine selfhood, leading to intellectual development and growth.
5. Express one’s own philosophical position in debate and in writing.
6. Understand the individual’s relation to other humans and the community at large.
7. Formalize some basic philosophical arguments using the tools of logic.
8. Write scholarly philosophy papers and demonstrate familiarity with research methods, materials, and resources.

**Psychology**
1. Analyze from different perspectives the impact of physiology, cognition, social interaction, group situations, interpersonal relations, attitudes, opinions, group conflicts, language and communication on human behavior.
2. Identify and articulate the characteristics of normal development throughout the life span in terms of physical, cognitive, psychological and psychosocial development.
3. Identify abnormal personality development and psychopathology, as well as articulate the process of diagnosis, prognosis and appropriate treatment of behavioral disorders.
4. Understand key concepts in statistics and research methodology and be able to use their acquired knowledge and critical thinking skills.
5. Engage in basic therapeutic counseling skills that allow them to interact appropriately in a supervised professional setting.

**Social Work**
1. Prepare students to think critically about social issues through a liberal arts based curriculum and a strengths-based, person-in-environment generalist social work education.
2. Prepare students to work with a diverse population of clients utilizing social work professional skills and knowledge as a mean to understand social and economic injustice and promote positive social change.
3. Produce graduates who will identify with and practice within the values and ethics of the social work profession with particular attention to diverse and at-risk populations in an effort to promote social and economic justice.
4. Prepare students to utilize research-informed practice skills and conduct practice-informed research so they are able to further influence social policy and programs.
School of Business

Accounting
1. Effectively prepare clearly written business communications.
2. Apply knowledge and skills to make appropriate business decisions.
3. Apply ethical and moral decision-making principles to business situations.
5. Use appropriate technological skills required for business professionals.
6. Find, evaluate, and apply sources of information relevant to business issues and situations.
7. Prepare, present, and interpret financial statements using Generally Accepted Accounting Principles (GAAP).
8. Demonstrate proficiency with Generally Accepted Accounting Principles.
9. Demonstrate proficiency with taxation issues, returns, and planning.
10. Demonstrate proficiency with measures used to evaluate and manage businesses.

Finance
1. Effectively prepare clearly written business communications.
2. Apply knowledge and skills to make appropriate business decisions.
3. Apply ethical and moral decision-making principles to business situations.
5. Use appropriate technological skills required for business professionals.
6. Find, evaluate, and apply sources of information relevant to business issues and situations.
7. Recognize the roles of financial markets and describe the responsibilities of market participants.
8. Demonstrate an understanding of financial markets and institutions.
9. Display an understanding of investment options and analysis.
10. Display an understanding of financial management of institutions.

Human Resource Management
1. Effectively prepare clearly written business communications.
2. Apply knowledge and skills to make appropriate business decisions.
3. Apply ethical and moral decision-making principles to business situations.
5. Use appropriate technological skills required for business professionals.
6. Find, evaluate, and apply sources of information relevant to business issues and situations.
7. Identify and define the major elements impacting Human Resource Management.
8. Apply the laws that relate to the human resource function.
10. Examine the relationship between the Human Resource Manager and the strategic planning process.

Management
1. Effectively prepare clearly written business communications.
2. Apply knowledge and skills to make appropriate business decisions.
3. Apply ethical and moral decision-making principles to business situations.
5. Use appropriate technological skills required for business professionals.
6. Find, evaluate, and apply sources of information relevant to business issues and situations.
7. Identify and define the major elements impacting management.
8. Demonstrate proficiency in the four functions of management.
9. Describe and apply the theories of motivation.
10. Discuss the role of the manager in the strategic planning process.

**Marketing**
1. Effectively prepare clearly written business communications.
2. Apply knowledge and skills to make appropriate business decisions.
3. Apply ethical and moral decision-making principles to business situations.
5. Use appropriate technological skills required for business professionals.
6. Find, evaluate, and apply sources of information relevant to business issues and situations.
7. Demonstrate ability to appropriately apply marketing strategic process to business applications that present marketing challenges.
8. Construct a marketing mix strategy by applying marketing theory to a practical situation.
9. Critically reflect on ethical issues within the profession of marketing.
10. Construct a strategic marketing plan.

**Sports Management**
1. Effectively prepare clearly written business communications.
2. Apply knowledge and skills to make appropriate business decisions.
3. Apply ethical and moral decision-making principles to business situations.
5. Use appropriate technological skills required for business professionals.
6. Find, evaluate, and apply sources of information relevant to business issues and situations.
7. Demonstrate ability to appropriately identify and define major concepts as they relate to sports management.
8. Identify and discuss implications related to Title IX legislation.
9. Demonstrate proficiencies in sport finance and facilities management.
10. Analyze the challenges faced by the athletics administrator.

**School of Education**

**Education**
1. Demonstrate knowledge of the theoretical, philosophical and ethical perspectives that affect current educational trends in the United States.
2. Demonstrate competence in the use of a variety of research-based best practices incorporating technology.
3. Actively engage in meaningful, sequential, and developmental field experiences in which learning of content is integrated with students’ synthesis of this content knowledge.
4. Demonstrate mastery of PDE professional competencies through course requirements/products, lesson presentations and field experiences.
5. Engage in co-curricular/extra-curricular activities and service learning opportunities that support program curriculum.
School of Graduate and Professional Studies

Business Administration (AS)
1. The student will be able to prepare effective and clearly written business communications.
2. The student will display appropriate quantitative problem solving abilities in the context of a business problem.
3. The student will be able to apply ethical and moral decision-making principles to business situations.
4. The student will demonstrate proficiency in the business areas of accounting, management, marketing and economics.

Business Administration (BS)
1. The ability to clearly and effectively prepare written business communications.
2. Business students will apply knowledge and skills to make appropriate business decisions.
3. The student will be able to apply ethical and moral decision-making principles to business situations.
4. The student will demonstrate decision-support tools required for business professionals.
5. The student will demonstrate the ability to find, evaluate, and apply sources of information relevant to business issues and situations.

Applied Psychology (BS)
1. Analyze the impact of physiology, cognition, social interaction, group situations, interpersonal relations, attitudes, opinions, group conflicts, language and communication on human behavior.
2. Understand and articulate the application of psychological principles across professional settings including mental health care, schools, general healthcare, social services and corporate environments.
3. Identify the impact of psychology on societal issues including race, gender, religion and social inequality and articulate the role of advocacy to affect policy and societal change.
4. Understand key concepts in statistics and research methodology and be able to use acquired knowledge and critical thinking skills to complete comprehensive and critical analysis of original research studies in the field – demonstrated through class discussion, presentations, and research papers.
5. Engage in basic therapeutic counseling skills that allow you to interact appropriately across a variety of supervised professional settings.
6. Engage in critical thinking concerning the application of psychology and ethical issues relevant to this evolving field of study.

Nursing (RN to BSN) (Suspended 2018)
1. Synthesize knowledge from the humanities, natural and behavioral/social sciences with current nursing knowledge as a basis for nursing practice.
2. Formulate nursing decisions which reflect consistency with moral, ethical and legal principles.
3. Use current professional standards to evaluate nursing practice of self and other members of the nursing team.
4. Collaborate with other health care providers and consumers in promoting the health and well-being of individuals, families and communities.
5. Demonstrate responsibility and accountability for direct and/or indirect nursing interventions and their outcomes.

6. Refer individuals, families and groups to appropriate community resources.

7. Use evidence-based nursing practice to improve the health of individuals, families and communities.

8. Communicate effectively with diverse groups and disciplines.

9. Function as a leader within nursing and interdisciplinary health teams in a variety of settings.

10. Use the role of advocate to facilitate access to healthcare.

11. Create a healing environment through the therapeutic use of self when caring for individuals, families, and communities.

12. Analyze the nursing care environment through the use of technological knowledge and skills.

Frances M. Maguire School of Nursing & Health Professions

Medical Laboratory Science

1. At the completion of the junior year of study, students will be able to articulate the basic principles and/or perform basic laboratory procedures in anatomy and physiology, general, organic and biochemistry, immunology, biology, microbiology, molecular biology or genetics and mathematics.

2. At the conclusion of the senior year of study, students are clinically competent in all areas of medical laboratory practice and are able to perform, with skill and accuracy, a wide range of medical laboratory technology procedures.

3. At the conclusion of study, MLS students will demonstrate: Reasonable care which is the legal obligation of a health care worker to perform services that meet the common standard of practices in medical laboratory science.

4. At the completion of studies, MLS students will demonstrate: The ability to effect changes in the MLS profession by being aware of the current issues in the health-care system and understand the impact of these issues on the MLS practice and the delivery of competent patient care.

5. Successfully completing the first three years of study with a minimum GPA of 2.8 (3.0 preferred) and a minimum science and math GPA of 2.8 (3.0 preferred).

6. Be accepted into a NAACLS accredited affiliate Medical Laboratory Science program for the senior year of study.

7. Successful completion of the year of professional study at the NAACLS accredited Medical Laboratory Science program.

8. Upon graduation, successfully passing the ASCP national registry examination of Medical Laboratory Science on the first attempt.

9. Achieve gainful employment as a Medical Laboratory Scientist within one year of graduation.

Nursing (BSN)

1. Synthesizes knowledge of nursing and the liberal arts and sciences as a basis for professional nursing practice.

2. Utilize professional judgment to formulate nursing decisions which reflect professional standards consistent with moral and ethical and legal principles.

3. Engages in reflective evaluation of self and other members of the healthcare team in
accordance with the prevailing standards of care.
4. Collaborates with other health care providers and consumers in promoting the health and wellbeing of individuals, families, and communities.
5. Demonstrates responsibility and accountability in the use of the nursing process to deliver person centered care.
6. Utilize inter and intra professional communication and collaboration skills to deliver evidence-based care to promote the health and safety of individuals, families, and communities.
7. Applies leadership concepts, skills, and values to effectively implement patient safety and quality improvement initiatives in a variety of healthcare settings.
8. Creates a supportive environment through the therapeutic use of self when caring for individuals, families, and communities.
9. Demonstrates skills in using patient care technology, information systems, and communication devices that support safe nursing practice.
10. Integrates knowledge of social and cultural factors to deliver culturally sensitive care.
11. Advocates for social justice including a commitment to the health of vulnerable populations and the eliminations of health disparities to improve the human condition.
12. Articulates the value of pursuing practice excellence and lifelong learning to facilitate personal and professional development.

Occupational Science
1. Acquire, as a foundation for professional study, a breadth and depth of knowledge in the liberal arts and sciences and an understanding of issues related to diversity and disability.
2. Discuss the components of human occupation from physical, psychological, sociological, and cultural perspectives.
3. Identify, describe, and apply major tenets from the discipline of occupational science to human health and disability.
4. Report perceived occupational injustices for persons limited in the capacity or opportunity to engage in meaningful occupations.
5. Apply philosophical tenets of occupational science to other disciplines and professions aimed to promote health and well-being of others.
6. Examine programs that promote occupational justice for individuals, groups, and populations, especially the underserved.
7. Develop intellectual and practice skills that support the philosophical and practical tenets of occupational therapy.

Radiation Therapy Technology
1. Demonstrate empathic patient centered care
2. Perform and complete the required radiation therapy simulation, treatment and dosimetry competencies required during the clinical rotations.
3. Apply radiation safety principles.
4. Demonstrate the ability to think critically and exhibit problem solving skills.
5. Communicate effectively, both orally and in writing, with diverse groups and disciplines within the University and health care facilities.
6. Demonstrate appropriate professional behaviors.
7. Upon graduation pass the ARRT national certification exam on the 1st attempt.
8. Of those pursuing employment, students will be gainfully employed within 12 months’ post-graduation.
9. Successfully complete the program, maintaining an overall GPA of 3.0 or better during their studies.
10. At the completion of the program students will demonstrate satisfaction with their education.
11. After graduation employers will be surveyed to assess if they are satisfied with the graduate’s performance.

Radiologic Technology
1. At the completion of the sophomore year of study: Articulate the basic principles and/or perform basic laboratory procedures in anatomy and physiology, physics for allied health and mathematics.
2. At the conclusion of the junior and senior year of study: students are clinically competent in all areas of general diagnostic radiologic technology practice and are able to perform, with skill and accuracy, a wide range of diagnostic radiography and fluoroscopic procedures.
3. At the conclusion of study, students will demonstrate: Reasonable care which is the legal obligation of a health care worker to perform services that meet the common standard of practices in Radiologic Technology.
4. Demonstrate the ability to effect changes in the Radiologic Technology profession by being aware of the current issues in the health-care system and understand the impact of these issues on the Radiologic Technology practice and the delivery of competent patient care.
5. Successfully completing the first two years of the program with a minimum overall GPA of 2.8.
6. Be accepted into a JRCERT accredited affiliate Radiologic technology program for the junior and senior years of study.
7. Successful completion of the two years of professional study at a JRCERT accredited School of Radiologic Technology.
8. Upon graduation, successfully passing the ARRT national registry Examination in Radiography on the first attempt.
9. Achieve gainful employment as a Radiologic Technologist as a staff technologist, advanced modality technologist or in another area such as application specialist, sales, education, information technology or administration and/or continue education in an advanced modality within one year of graduation.

Respiratory Care
1. Integrate knowledge from the humanities, natural and behavioral/social sciences with the current practice of respiratory care.
2. Know, apply and analyze the principles and concepts of respiratory care to function in the health care setting.
3. Use current professional standards to include clinical practice guidelines and evidence-based medicine in practice of respiratory care.
4. Perform clinical procedures and modalities to practice as a competent respiratory therapist.
5. Utilize current respiratory care technology effectively and efficiently.
6. Demonstrate the characteristics, traits and qualities of a professional respiratory therapist.
7. Demonstrate clarity and accuracy in oral and written communications.
8. Function as a health care team member by collaborating with other health care providers and consumers in promoting the health and well-being of individuals, families and communities.
Affirmative Action Statement
Gwynedd Mercy University is committed to maintaining a positive learning, working, and living environment that is free from unlawful discrimination and harassment. Gwynedd Mercy University does not discriminate against any applicant for admission to or employment at the University because of race, religion, age, gender, sexual orientation, gender identity, national origin, disability, color, marital status, veteran status, genetic characteristics, or any other characteristic protected by federal, state or local law ("Protected Classes"). This includes, but is not limited to, admissions, financial aid, educational services, and student programs and activities, as well as to all terms and conditions of employment including, but not limited to, recruitment, selection, hiring, placement, transfer, promotion, training, compensation, benefits, discipline, and termination. The University will not tolerate unlawful acts of discrimination or harassment based upon Protected Classes, or related retaliation against or by any employee or student.

Alternative Instructional Equivalencies (AIE)
While Gwynedd Mercy University is committed to an outcome-based approach to curriculum and assessment in accordance with its accreditation by the Middle States Association of Colleges and Schools and other discipline based national accrediting associations, it also complies with and endorses the requirements of the Pennsylvania Department of Education on what constitutes a semester credit hour of instruction (22 PA. Code Chapter 31-21-31.22). The standard states that “a semester hour represents a unit of curricular material that can normally be taught in a minimum of 14 hours of classroom instruction, plus outside preparation or the equivalent as determined by the faculty.” The institution also supports the federal regulations for credit hours as specified in the Higher Education Opportunity Act as: “One hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time.”

At Gwynedd Mercy University, a three credit course represents 42 hours of classroom instruction or its equivalent, not including final examination or homework as normally interpreted. The following guidelines are intended to assure compliance with the standard across the various course delivery formats offered by the institution, a consistency in when and how the equivalency is applied across formats, and the maximum opportunity for faculty to exercise academic freedom in meeting the extant standard while achieving the goals, objectives, and outcomes of the specific course.

Traditional Semester Format
Ordinarily, courses offered within a traditional semester format will meet the 14 hours of classroom instruction per credit hour (i.e., 42 hours for a three-credit course, 56 hours for a four-credit course, etc.). However, if a class or classes in a course must be cancelled due, for example, to the closing of the University for Inclement Weather or the illness or other appropriate unavailability of the faculty member, then additional structured instructional activity (or activities) would be required to meet the equivalency standard. For example, if classroom instruction turns out to be 38 hours face-to-face, the faculty will determine the appropriate “out of classroom” instructional activities for the additional four hours required to meet the semester standard. Wherever possible, this contingency should be explained in the syllabus and documented accordingly.

Accelerated and Online Formats
There are a number of outcome based formats at the university in which “face-to-face” instructional time is less than the 14 hours per one semester credit, but meet the equivalency standard set forth in the regulation. In these alternative formats, the face-to-face instructional time and the additional outside of classroom alternative instructional activities (“Alternative Equivalent Instruction” or AIE)
must meet the one semester credit hour per 14 hours’ classroom instruction or its equivalent as determined by the faculty (i.e., 42 hours for a three-credit course; 56 for a four-credit course, etc.). For example, if a three-credit course in a seven-week format meets face-to-face for 28 hours, an additional 14 hours of structured, alternative equivalent instruction activities (AIEs) are required; for a five-week course that meets 20 hours face-to-face, an additional 22 hours of alternative equivalent instruction activities would be needed. Online courses require 42 hours of appropriate alternate equivalent online instruction activities to meet the minimum threshold. The syllabus for the course should reflect the type of AIE’s to be utilized.
ADMISSION

Traditional Enrollment

The selection of candidates is made by the Admissions Committee whose decision is based on an evaluation of the qualifications of each applicant for a particular program of study. The student is notified of the action of the Committee as soon as possible after the requirements listed below have been met.

First-time Students

Applicants must submit the following:

1. Online application found at gmercyu.edu/undergraduate-application
2. Evidence of high school graduation, which can be demonstrated through an official transcript or a copy of their General Educational Development (GED) test results or certificate. The high school transcript should show satisfactory completion of (or current enrollment in) at least 16 units in prescribed and elective subjects:
   - English 4 units
   - Mathematics 3 units
   - Science 3 units
   - History 1 unit
   - College preparatory electives 3 units
3. Scores achieved on the SAT of the College Entrance Examination Board or the American College Testing Program (ACT). Students who graduated three or more years prior may have this requirement waived.
4. Applicants may be asked to submit an essay or personal statement during the application review process. In addition, a student may be asked to participate in an interview.

Letters of Recommendation are not required but are recommended. The written letter of recommendation should discuss the applicant’s character and promise as a university student, and should be sent from the principal, a teacher or a guidance counselor in the school from which the applicant is enrolled or recently graduated.

See Academic Information for placement assessments in English and Math.

SAT and ACT Requirements

For students seeking admission to the University as freshmen, the University will review applications based on the Critical Reading and Mathematics scores. Students may decide to take the ACT test instead of the SAT test. Over the past few years, our admitted student’s average SAT score range has been between 970 and 1160 and an ACT range of 18-23. (SAT score is a reflection of the new SAT or SAT test taken after 3/1/2016.)

Advanced Placement Students

Applicants who have completed work in Advanced Placement Programs in high school may submit the results of the Advanced Placement Examination of the University Entrance Examination Board. College credit will be awarded for a satisfactory examination score of 3 or higher. Students awarded such credit in English or mathematics will not be required to take the placement test in that area. (Refer to Placement Program for College English and Mathematics).
Transfer Students
Applicants who have completed course work at another college and have maintained a cumulative G.P.A. of 2.0 or higher may file an application for admission with advanced standing. Once accepted to the University, all transfer students must maintain a cumulative grade point average of 2.0 prior to matriculation to Gwynedd Mercy University. Courses in which an applicant has earned a grade of C or better will be evaluated as possible credits to be transferred toward a Gwynedd Mercy University degree. Lower division courses will not be credited, on transfer, in substitution for similar courses given at upper division levels at Gwynedd Mercy University. A limited number of exceptions may be granted at the discretion of the Dean of the School. At least 45-50 of the credits, depending upon the program, required for a bachelor degree and 30 of those required for an associate degree must be earned at Gwynedd Mercy University.

Student’s applying for the University’s nursing program should have maintained a GPA of 3.0 or higher on a 4.0 scale. In addition, other major programs may require a cumulative GPA greater than 2.0. Please contact the Admissions Office should you have any questions.

Applicants for advanced standing must present the following:
1. Online application found at gmercyu.edu/undergraduate-application
2. Evidence of high school graduation which can be an official high school transcript or a copy of their General Educational Development (GED) test results or certificate. Candidates with more than 24 college credits do not need to submit their high school transcript; however, the Office of Admissions may request the transcript as part of the candidate’s application review.
3. An official transcript of credits from all colleges previously attended. No applicant may disregard previous college attendance. Failure to make full and truthful disclosure of all information requested will result in disqualification of the application (or revocation of admission).
4. A copy of the catalog of the college/university from which the student is transferring, if requested.

Letters of Recommendation are not required but are recommended. The written letter of recommendation should discuss the applicant’s character and promise as a student and should be sent from a college faculty member or employer.

All accepted transfer students who have not successfully completed a college-level English composition course or a college-level mathematics course with a grade of C or better must take the respective placement assessment(s).

Students who have previously earned a four-year college degree are exempt from taking the placement assessments.

The time in which a transfer student completes the program of study will vary since it may be necessary to fulfill curricular requirements out of normal sequence.

Re-admission
A student who has been accepted to Gwynedd Mercy University is expected to continually progress to complete a degree. A student who does not attempt any credits during two consecutive semesters (fall and spring semesters only) will be considered withdrawn from the program of study and will need to submit an online application for readmission, if continuation of study is desired. For students enrolled in the School of Graduate and Professional studies, a student who is out of enrollment for the period of 1 year (365 days) will need to submit an application for program re-admission.

All applications for readmission will be reviewed and approved by the respective School Dean.
Academic Amnesty Policy
Undergraduate students who seek re-admission into one of the programs within a school following a two-year consecutive absence from Gwynedd Mercy University may petition their respective Dean to have their GPA reset at the time of readmission subject to the requirements of the specific academic program. Students are afforded one opportunity for academic amnesty.

Approval of academic amnesty requires both the approval of the Dean and the Vice President for Academic Affairs. If academic amnesty is approved, the GPA will be reset to 0.00 and the notation of “Academic Amnesty” will be recorded on the student’s transcript. Once enacted, the reset GPA cannot be reversed or modified. All prior courses and grades will remain on the student’s academic record and transcript. Gwynedd Mercy University courses completed prior to re-admission with a grade of C or above will be reviewed by the appropriate department in the same manner as courses transferred from colleges/universities outside of Gwynedd Mercy University to determine if and how the credits should be applied. Grades earned in these courses will not be calculated into the GPA. Loss of course credit(s) resulting from academic amnesty will not, under any circumstances, constitute grounds for a tuition refund. Students who are granted academic amnesty must meet all degree requirements for graduation at the time of re-application for admission.

International Students Admissions Policy
Gwynedd Mercy University has established the following criteria for international students who seek admission:

1. The online application, found at gmercyu.edu/apply, is required of all applicants.
2. SAT or ACT scores are required for a. first-time students who wish to be considered for GMercyU’s merit-based scholarships, and b. first-time students who are interested in Accounting; Biology; Computer Information Science; Mathematics; Psychology; Nursing and the following Health Professions: Occupational Science; Respiratory Care; and Radiation Therapy. SAT or ACT scores are not required for international first-time students who are interested in all other programs, and who do not wish to be considered for GMercyU’s merit-based scholarships.
3. First-time international students who submitted SAT or ACT scores are eligible for all merit scholarships awarded by Gwynedd Mercy University. International first-year students without SAT or ACT scores will automatically be considered for the International Student Scholarship, if they meet the minimum 3.0 high school GPA requirement.
4. English language minimum test scores of 79 on the Internet-based TOEFL or 6.0 on the IELTS test or the equivalent is required for admission into undergraduate programs. TOEFL or IELTS scores lower than the minimum will be considered on a case-by-case basis.

Students whose native language is English are not required to submit language scores. In addition, international applicants who score a minimum 500 evidence-based reading and writing score on the SAT or 22 composite score on the ACT are exempt from submitting TOEFL scores.

Students who meet academic requirements for admission but need to improve their English language skills will be admitted on a conditional basis and referred to our English language school partner. Students will be allowed to start their programs after meeting the requirement for English proficiency.

Note: While students are participating in the ELS program, they may reside on campus at Gwynedd Mercy University. Please contact the Office of International Programs for details.

A course-by-course evaluation by World Education Services (www.wes.org) or Educational Credential Evaluators (www.ece.org) is required of all transcripts from high schools and universities outside of the United States.

5. All international students who do not have transferrable college credit for English and mathematics are required to take and pass the University’s English and mathematics placement assessments. Students must be proficient enough to place into Developmental Writing or College English.
6. Applicants who have had nursing education outside of the U.S. must have transcripts evaluated by CGFNS (www.cgfns.org).

7. International students who apply to education, nursing and health profession programs must have the ability to obtain the background screening required for placement in a clinical/school setting.

8. To enroll as a graduate-level international student at Gwynedd Mercy University, please contact the Office of International Programs at isl@gmercyu.edu before starting your application to get specific instructions on how to apply to GMercyU’s graduate programs.

9. Upon acceptance to the University, international students must submit proof of ability to pay for their studies.

Visiting Students
A student who enrolls in classes for credit to be transferred to another institution in which he or she is regularly enrolled is classified as a non-matriculated student.

Home-Schooled Students
All home-schooled students must complete and submit all application materials required of traditional applicants, in addition to a transcript from a home-school accrediting body. An interview may also be requested.

University Studies
New students who are undecided on a major or do not meet the initial requirements of their academic program of choice may be admitted as a University Studies student. University Studies students will have an opportunity to work with the Career Development staff to further explore their academic and career options, and partner with a professional academic advisor who will regularly meet with them to review their interests and academic progress. Students also will be provided with academic and personal encouragement through tutoring sessions and student success workshops, all with the goal of ensuring University Studies are able to pursue their program of interest.

Non-Matriculated Students
Non-matriculated students may take up to 9 credits of course work on a part-time basis at Gwynedd Mercy University. After completing these 9 credits, students must contact the Admissions Office for advice about matriculation; that is, to work toward one of the degrees offered in the University. If the student does not intend, at any time, to work toward a degree, the admission requirement will be waived. Students who intend to matriculate in health professions, business, or nursing programs should apply as soon as possible but are required to do so once they have earned 9 credits.

Program Specific Admissions Requirements

BS in Nursing – First-time Degree Students
Applicants desiring to enter the Bachelor of Science in nursing degree program (i.e. those students who are not already a Registered Nurse (RN)) must have completed within the 16 required high school units, chemistry, biology, geometry, algebra I and algebra II. Grades of “A’s” and “B’s” in the sciences are expected. Students also must have earned at least 1030 (Reading and Math) with at least a 500 on the Math portion of the SAT. Please note that admission to this program is limited.
BS in Nursing – Transfer Students
Transfer applicants desiring to enter the Bachelor of Science in nursing degree program (i.e. those students who are not already a Registered Nurse (RN)) must have completed within the 16 required high school units, chemistry, biology, geometry, algebra I and algebra II. These credits may also be earned at the University level. Recent college work, particularly in the sciences, is recommended for transfer students applying to the nursing program; grades of “A’s” and “B’s” in the sciences are expected.

BS in Nursing- Second Degree Students
Students wishing to enter the ABSN (Accelerated BSN Program) or the Weekend BSN Program in Nursing are required to have a bachelor degree in another field. The following criteria and prerequisite courses are required to be considered for admission:
- GPA of 3.0 or greater.
- All science courses require a “B” or better.
- All science pre-requisite courses must be completed within the past 7 years to be considered transferable.
- Anatomy & Physiology I + Lab component. Lab component must be done in a classroom or online with a kit.
- Anatomy & Physiology II + Lab component. Lab component must be done in a classroom or online with a kit.
- Microbiology + Lab component. Lab component must be done in a classroom or online with a kit.
- Chemistry for the Health Professions I+ Lab component. Lab component must be done in a classroom or online with a kit.
- Organic Chemistry I and II + Lab components or Organic Chemistry I + Lab component and Biochemistry. Lab component must be done in a classroom or online with a kit.
- Principles of Nutrition (taught by a Registered Dietician)
- *Statistics – must be completed within the past 10 years to be considered transferable
- *Developmental Psychology (must cover across the lifespan) - must be completed within the past 10 years to be considered transferable

Candidates accepted for the BSN Program must have documented proof of the following additional requirements prior to clinical courses.

1. Certificate of health from a nurse practitioner or a family physician is necessary. Completed health forms are uploaded to the Complio site/American DataBank Website (See # 11 and 12). Students without completed health forms will not be permitted in any health agency.
2. Cardiopulmonary Resuscitation (CPR) Certification or re-certification is required before beginning clinical practice experiences in any health care facility. Copies must be submitted to the nursing office in Maguire Hall to be placed in the student’s file.
3. Health Insurance Coverage: Students must carry health insurance while in the nursing program. This health insurance can be obtained through the University if the student does not have personal coverage. A copy of the health insurance must be submitted to the Frances M. Maguire School of Nursing and Health Professions Office by the beginning of the junior year.
4. All students enrolled in the Frances M. Maguire School of Nursing and Health Professions are required to carry liability insurance through the University. A fee for this insurance will be charged to the student’s account.
5. Child Abuse History Clearance: (Matriculation is conditional pending receipt of clearance) All students enrolled in the Frances M. Maguire School of Nursing and Health Professions are required to have a Child Abuse History Clearance. This is accomplished by completing a Child Abuse History Clearance Form obtained through the BSN community portal. The form is to be mailed with a ten dollar ($10.00) money order (no cash or personal checks).
6. Criminal Record Check: All students enrolled in the Frances M. Maguire School of Nursing and Health Professions are required to have a Criminal Record Check. This is accomplished by completing a Request for Criminal Record Check form. Forms are available online at: www.epatch.state.pa.us. A copy of the form must be submitted to the Frances M. Maguire School of Nursing and Health Professions office before the first day of class.

7. FBI Fingerprint Check: All students in the BSN programs of the Frances M. Maguire School of Nursing and Health Professions are required to submit an FBI Record check indicating “NO RECORD”. Any changes to your background check must be reported to the Frances M. Maguire School of Nursing and Health Professions. If students fails to do so, they will be dismissed from the Frances M. Maguire School of Nursing and Health Professions.

8. Drug Screening: All students must present yearly results from drug screening to participate in clinical experiences. Information on drug screening requirements is given in the Nursing Student Guidebook. Students are responsible for the cost of the test.

9. Tuberculosis Screening: All students must present yearly results from a tuberculosis screening in order to participate in clinical experiences. Information on PPD screening is given with orientation materials. Students are responsible for the cost of the test.

10. Flu Shot: All students must have a flu shot by November 1st of each year.

11. Students entering 200 level courses are required to submit all health and background requirements as indicated no later than the due dates identified in the written information provided on the Gwynedd Mercy University Complio/American Data Bank website. Failure to achieve 100% compliance with all requirements by the required due date may result in the withdrawal from nursing courses in the Fall 2019 semester. Continued noncompliance by the end of the Fall 2019 semester, will result in the student being unable to register for Spring 2020 semester nursing courses.

12. Students entering 300 or 400 level courses are required to submit all health and background requirements as indicated no later than the due dates identified in the written information provided on the Gwynedd Mercy University Complio/American Data Bank website. Failure to achieve 100% compliance with all requirements by the required due date will result in the student being required to withdraw from their registered nursing courses.

13. Non-Academic Criteria: All students in the Bachelor of Science in nursing program must meet the Frances M. Maguire School of Nursing and Health Professions non-academic criteria for admission and for retention in the nursing program. Refer to Technical Standards (pages 126-128).

Biology Program and Medical Laboratory Science
Biology and Medical Laboratory Science applicants are required to have units in biology, chemistry, algebra I, algebra II and geometry or equivalent within the required 16 high school units. Biology students are required to have an SAT score of at least 1080 with a Math score of at least 500.

Health Professions Degree Programs
Applicants for these programs are required to have:
1. Proficiency in mathematical skills requisite for the study of science;
2. Units in high school biology and additional science courses as required by specific programs:
   a) Occupational Science
   b) Radiation Therapy; Math (Algebra, Calculus or Trigonometry) and Science (Biology and Physics recommended).
   c) Radiologic Technology: geometry; algebra; chemistry; physics or anatomy and physiology
   d) Respiratory Care: chemistry or physics
3. Science and mathematics courses evaluated by program director.
In addition, the Health Professions faculty has specified non-academic criteria, technical standards, which all applicants/students are expected to meet in order to participate in the health programs. These criteria include the following areas:

1. Observations;
2. Communications;
3. Motor functions;
4. Intellectual-conceptual, integrative, and quantitative abilities; and
5. Behavioral and social attributes.

Refer to the specific academic program admission requirements.

Occupational Science
There are three modes of entry into the Occupational Science major totaling no more than 20 undergraduate students per cohort per year. First, up to 15 students will be eligible for entry as first-year (freshmen) students. High school seniors must achieve a 3.1 high school GPA on a 4-point scale, 1080 combined Math & Reading SAT with a Math score of at least 500, or at least a 22 on ACT with no subsection under 20. Second, a select number of undergraduate students at GMercyU can apply to change their major to the Occupational Science. Current GMercyU students who would like to apply for a change of major to Occupational Science, need to complete a change of major application and email it Dr. Thomas Mernar, Program Director of Occupational Science and Occupational Therapy Programs at mernar.t@gmercyu.edu between April 1st and May 1st. To be eligible for a change of major to Occupational Science, students must have completed 24 or more credits at Gwynedd Mercy University by the end of the spring semester, maintained a cumulative GPA of a 3.1 or greater, submitted the change of major application to Dr. Thomas Mernar between April 1 and May 1, and completed an in-person interview with a Division faculty member in May/June. Having earned an overall GPA of 3.1 or greater does not guarantee acceptance of a change of major to Occupational Science. Third, pending availability, a limited number of students from other academic institutions may be eligible to transfer directly into the Occupational Science major if they have completed 24 or more credits, maintained a cumulative GPA of 3.1 or greater, completed an application that includes a written essay, and completed an in-person interview with a Division faculty member. No more than 35 credits can be transferred into the general education and prerequisite requirements required of an Occupational Science major. CLEP or AP credits are not accepted as fulfillment of any prerequisite course.

Radiation Therapy
Gwynedd Mercy University and the Radiation Therapy Bachelor of Science degree programs are open to all individuals of any race, color, religion, gender, age, disability, national origin, and any other protected class. The program has a rolling admission policy and admission decisions are based on academic performance, experience and achievement of the applicant. Completed applications are reviewed on a first come, first serve basis. Admission to the program is limited due to clinical placement.

First-time Students
The requirements for a first-time student entering the University include the following admission criteria:

- All applicants complete an online application, found at www.gmercyu.edu/apply
- Evidence of high school graduation which can be an official transcript or a copy of their General Education Development (GED) tests results. The high school transcript must show satisfactory completion of High School Math (Algebra, Calculus or Trigonometry) and Science (Biology and Physics recommended)
- Have a combined Math and Verbal component of the SAT exam of 1080 or higher, or an ACT score of 22 or higher
- Submit a letter of recommendation concerning the moral character of the perspective student from the school from which the applicant is enrolled or graduated from or other professional
source.

- A shadow experience observation, spending a minimum of four hours, in a radiation therapy department to include a written report on the observation and its impact on the decision to enter into the profession. Additionally, the therapist facilitating the shadow experience is required to complete an evaluation form on applicant.

**Transfer students**

- The college transfer student needs to meet the admission criteria of the University and the Radiation Therapy Program.
- Complete an online application.
- Applicants must be proficient in math and science with college courses in Anatomy & Physiology I & II, with a lab (online labs not accepted), an upper level Math (both with a transfer grade of “C+” or higher), English 101, Computer Science and Public Speaking/ Communication classes, with an overall GPA of 3.0 or higher.
- Submit a letter of recommendation concerning the moral character of the perspective student from the school from which the applicant is enrolled or graduated from or other professional source.
- A shadow experience observation, spending a minimum of four hours, in a radiation therapy department to include a written report on the observation and how the experience impacted the decision to enter into the profession. Additionally, the therapist facilitating the shadow experience is required to complete an evaluation form on the applicant.

Once the requirements for admission are met, the applicant will be scheduled for an interview with a radiation therapy program faculty. During this process, various policies and procedures will be reviewed.
EXPENSES – 2019-2020

Full Time Undergraduate Students
(12 to 18 credits per semester)

Tuition per year-Nursing and Health Programs $35,800
Tuition per year- Other Programs $33,800
Tuition Full Time Accelerated BSN Program per credit $810
Tuition- Overload (over 18 credits per semester) is charged at the part time rate for each program
Comprehensive Fee per Year $780

Part Time Undergraduate Students
(1 to 11 credits per semester)

Tuition per credit- Nursing and Health Programs $745
Tuition per credit- all other Programs $630
Comprehensive Fee per credit $17

Undergraduate Students at the School of Graduate and Professional Studies

Associate in Business Administration per credit $285
Bachelors in Business Administration per credit $490
Allied Health Pre-requisites per credit $350
Applied Psychology per credit $490
Course Fee per credit $17

Room Charges per year

Loyola Hall Single Room $6,520
Loyola Hall Standard Double $5,520
Siena Hall Single Room $7,400
Siena Hall Deluxe Double $6,400
St. Brigid Hall Single Room $7,400
St Brigid Hall Deluxe Double $6,400
Alexandria Hall Single (standard double) $6,820
Alexandria Hall Single (deluxe double) $7,400
Alexandria Hall Single Premium $7,800
Alexandria Hall Deluxe Double $6,400
Alexandria Hall Premium w/living room double $6,800
Meal Plans per year

- 19 meal plan $6,950
- 15 meal plan $6,450
- 10 meal plan $6,180

All resident students are required to participate in a meal plan. Non-resident students may choose to participate in any plan.

Other Fees:
- Submission of Admission through the Common Application $20
- Acceptance Deposit (non-refundable) $125
- Acceptance Deposit Accelerated BSN, Weekend Nursing (non-refundable) $500
- Bad Check Fee $50
- Challenge Examination request fee, per course $140
- Course Related fees $25-100
- Credit by Challenge examination/Life experience per credit $140
- Credit- for Registry/license/credential Health Professions (30 cr) per credit $10
- Graduation (payable in semester of graduation) $165
- Late Payment Fee $100
- Medical Laboratory Science Fee (Senior Year) $1,500
- Occupational Therapy Program Fee (Senior Year, per semester) $150

Radiography Affiliate Program Tuition Costs per Program
(Not invoiced by Gwynedd Mercy University)

- Einstein Medical Center, Philadelphia PA $18,200
- St. Christopher’s Hospital for Children, Philadelphia PA $17,600
- Crozer Chester Medical Center/ Widener University, Upland PA $31,500
- York Hospital/Wellspan Health, York PA $21,000
- Shore Medical Center, Somers Point NJ $21,000
- St. Francis Medical Center, Trenton NJ $13,800
- Medical Laboratory Science Affiliate Tuition Costs per Program (Senior Year) $1,500
- Pennsylvania Hospital, Philadelphia PA $13,000
- St. Christopher’s Hospital for Children, Philadelphia PA $15,000
- Reading Hospital and Medical Center, Reading PA $6,500

Radiologic Technology Fee (Junior and Senior Year) $1,500
Respiratory Care (professional membership) $50
Respiratory Care Clinical Fee (student pays vendor) $140
Nursing Portfolio (BSN students) per credit hour $140
Portfolio Application Fee (non-refundable) $140

Comprehensive Fee
The comprehensive fee contributes toward the costs of providing computer/technology access, activities, use of facilities, and the other resources and services generally available to all students.

Graduation Fee
The graduation fee is payable in semester of graduation. The fee must be paid by all students whether the student participates in the formal graduation ceremony or not.

Security Deposit
This is a one-time fee charged to all resident students refundable after graduation or withdrawal from resident hall provided that all financial obligations have been met (including parking or library fines, damage or penalty fees, etc.).

Request for Transcripts
The Family Educational Rights and Privacy Act of 1974, as amended, prohibits the release of educational records by institutions without the specific written consent of the student. Students or alumni may request copies of their transcripts by writing to the Registrar’s Office. Official copies will be sent directly by the University only to an official address, such as another college, business firm or a government agency. There is a $5.00 charge for each transcript. There is no charge for copies sent between divisional offices at Gwynedd Mercy University. Transcript requests are processed in the order received and require 2 to 3 days to process. Specific deadlines should be mentioned when requesting the transcript. A student who has not satisfied all financial obligations in any department of the University will not be able to receive transcripts. Checks accompanying requests should be made payable to: Gwynedd Mercy University. Students can visit the Registrar’s web page on www.GMercyU.edu for instructions on receiving a transcript.

Refund Policy
To be eligible for tuition refund a student must officially withdraw by completing a withdrawal form available in the Office of Academic Affairs. The amount of the refund is based on the date of the withdrawal form is recorded in the Registrar’s Office. Not attending class does not automate an official withdrawal.

To be eligible for a refund of room and board a student must officially notify the Office of Residence Life. The amount of the refund is based on the date of the withdrawal is verified by the Office of Academic Affairs. Refunds are established by Residence Life and are included in your housing contract.

No refunds will be issued until at least ten days after the drop/add period. The refund date is established by the Bursar’s Office and posted to the Bursar’s web page. This includes refunds for overpayment and excess financial aid.

Return of Title IV Funds for Students With Title IV Federal Financial Aid
The Financial Aid Office is required by federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a payment period or semester. The federal Title IV financial aid programs must be recalculated in these situations.

If a student leaves the institution prior to completing 60% of a payment period or semester, the financial aid office recalculates eligibility for Title IV funds. Recalculation is based on the percentage of earned aid using the following Federal Return of Title IV funds formula:

Percentage of payment period or term completed = the number of days completed up to the withdrawal date divided by the total days in the payment period or semester. (Any break of five days or more is not counted as part of the days in the semester.) This percentage is also the percentage of earned aid.

Funds are returned to the appropriate federal program based on the percentage of unearned aid using the following formula: Aid to be returned = (100% of the aid that could be disbursed minus the percentage of earned aid) multiplied by the total amount of aid that could have been disbursed during the payment period or semester.

If a student earned less aid than was disbursed, the institution would be required to return a portion of the funds and the student would be required to return a portion of the funds. Keep in mind that when Title IV funds are returned, the student borrower may owe a debit balance to the institution.

If a student earned more aid than was disbursed to him/her, the institution would owe the student a post-withdrawal disbursement, which must be paid within 120 days of the student’s withdrawal.

The institution must return the amount of Title IV funds for which it is responsible no later than 30 days after the date of the determination of the date of the student’s withdrawal.

Refunds are allocated in the following order:

- Unsubsidized Federal Direct Loans
- Subsidized Federal Direct Loans
- Federal Perkins Loans
- Federal Parent Direct (PLUS) Loans
- Federal PELL Grant for which a return of funds is required
- Federal Supplemental Opportunity Grants for which a return of funds is required
- Other assistance under this Title for which a return of funds is required (e.g. LEAP)
**Student Health Insurance**
All full-time undergraduate students are required to carry health insurance. If a student is not otherwise insured, the University has arranged for basic coverage. A fee for this coverage will be assessed to all full time students. This fee will be waived upon presentation of proof of insurance to the University’s Insurance Carrier. In order for the fee to be waived students must complete an online waiver before the deadline established each year. Students who fail to meet the deadline are automatically covered and charged for insurance. There are no exceptions after the deadline has passed. Information about the Health Insurance Plan may be obtained from the Office of Campus Health or the Campbell Solution Center. Do not confuse this online waiver process with proof of insurance to live in the residence halls or play sports on campus.

**Student Eligibility**
Students must be officially registered at the University in order to attend class. If the student is not on the class list, the professor must ask the student to leave that class. Students at the Gwynedd Valley campus must report to the Campbell Solution Center to resolve administration issues. The student will not be able to report back to class until they are officially registered.

**Resident Student**
In order to be eligible to move into the residence halls a student must be officially registered for 12+ credits each semester and be in good financial standing (No financial holds). Financial holds that prevent a student from officially registering and attending classes also prevents a student from moving into the residence halls. Financial matters can be discussed with the staff at the Campbell Solution Center or Bursar’s Office.

All students must complete their financial aid paperwork and have their funding in place prior to attending any class or moving into the residence halls at the beginning of each academic semester.

**Payment Policy**
Payment of tuition, fees, and other charges is due on the published due dates. For the Gwynedd Valley campus, tuition is due in August for the fall semester and January for the spring semester. At all other campuses, tuition is due at the beginning of each class. Payment by employer reimbursement or payment plans must be arranged with the Bursar’s office prior to the published due dates in order to avoid changes for late payment. Students will not be issued degrees or transcripts and will not be permitted to register for future classes until all financial obligations have been cleared.

**Delinquent Accounts:**
A student who is financially delinquent shall forfeit the privilege of attending classes, and the University shall have the right to withhold grades, transcripts and diploma or certificate until such indebtedness is paid. A student who is financially delinquent at the close of a semester will not be permitted to register for another semester until all accounts are settled. Student accounts that are not resolved by the end of the semester will be placed with a collection agency. The student will be responsible for the full amount due plus all associated collection costs, late fees and legal fees. Third party fees can add up to 40% additional to your past due balances.

**Payment by check:**
Make all checks payable to GWYNEDD MERCY UNIVERSITY. All checks are to be drawn on US banks and in U.S. dollars. You may mail your check to the Gwynedd Valley campus or pay with an online check through your self-service account. All checks online or mailed are subject to a 10 day waiting period before Billing Holds will be removed.
Payment by credit card:
The University accepts VISA, Master Card, American Express and Discover with a $20 minimum per transaction in person. You may use your credit card online through the student’s self-service account. You will be assessed a 2.85% convenience fee for using a credit card online or in person.

By payment plan:
The Gwynedd Mercy University Installment Plan administered by Cashnet is a convenient way for parents and students to finance education expenses. The installment plan applies to Gwynedd Valley students only. The Graduate and Professional Studies students are not eligible due to the dynamic nature of their programs. The installment plan allows you to spread university expenses over 4 months for each semester. Fall semester- August, September, October, and November. Spring semester- January, February, March, and April. Additional information can be found on the Bursar’s web page. Students can sign up through their self-service account.

By employer reimbursement:
Students who are reimbursed by an employer may be eligible to receive an extension for payment of a portion of the amount due. Prior to registration a copy of the employer’s policy and a statement from the employer stating the student’s eligibility is required. Documentation is required at the beginning of each academic year. Ten percent (10%) of the tuition is then required at registration and the balance is due prior to the end of classes.

Payment Receipt:
You may obtain a copy of your statement on your self-service account under the Finances tab. If your employer requires a more detailed receipt: Gwynedd Valley students can email studentbilling@gmercyu.edu and GPS students can email GPSBursar@gmercyu.edu. Your email should include what is required on the statement.

In view of rising costs, Gwynedd Mercy University reserves the right to increase charges at any time and to make such changes applicable to students presently enrolled as well as to new students.

Religious Holidays

It is the policy of the University to respect the observance of major religious holidays. Where scheduling conflicts prove unavoidable, no student will be penalized because of religious reasons, and alternative means will be sought for satisfying the academic requirements involved.

Public Safety

The Department of Public Safety is concerned primarily with maintaining the highest level of security possible on the university campus and within University facilities. University Public Safety officers are not police officers and do not carry firearms; any criminal investigations are conducted by the Lower Gwynedd Police Department.

Because the safety and security of the University is the shared responsibility of all who live, work and study on the campus, members of the university community are encouraged and expected to use common sense where personal safety is concerned and to report any suspicious or criminal activities to the Department of Public Safety at 215-641-5522. Emergency phones are located outside the residence halls and in parking areas. Dialing is not required on these phones; when the receiver is lifted or the button is pushed, the phone automatically calls Public Safety. The office of Public Safety is located in St. Brigid Hall.
STUDENT FINANCIAL AID

Undergraduate Students
Gwynedd Mercy University's financial aid program is designed to provide financial assistance to qualified students whose resources are inadequate to meet the costs of attendance at the University. The University endeavors to assist as many students as possible using Gwynedd Mercy University funds as well as federal, state and other funds available. Students applying for financial aid are considered for all programs for which they are eligible. Financial aid is usually offered through a financial aid package, which consists of some combination of scholarship/grant, loan and employment. Most financial aid is awarded on the basis of demonstrated financial need. Funds available, academic records, and number of applicants may also affect the amounts and types of aid awarded to a student. Approximately 99% of the full-time, traditional student body receives financial aid administered by Gwynedd Mercy University.

Determination of Financial Need
Financial need is determined on the basis of information supplied on the Free Application for Federal Student Aid (FAFSA). All applications are analyzed according to a formula known as the Federal Methodology. In determining the extent of a student’s need, consideration is given both to the amount of support that may be expected from all family resources, as well as to those factors which affect a family’s financial strength, such as taxes, number of dependents, debts, other educational responsibilities and retirement needs. Financial aid is awarded for one academic year at a time; students must re-apply annually for renewal of aid. Renewal depends upon continued eligibility, satisfactory academic progress, and availability of funds.

Aid Application Procedures
A. New Entering Students
Students who wish to receive consideration for financial aid, in addition to fulfilling the requirements for general admission, must:
  • Submit the Free Application for Federal Student Aid (FAFSA) to Federal Student Aid Programs. Gwynedd Mercy University's federal code is #003270.
  • Complete the Federal Verification process, if selected for verification.

Above requirements should be fulfilled by priority filing date - February 15

B. Returning Students
Students who wish to request renewal of financial aid for the following year, as well as those already enrolled who wish to apply for the first time, must:
  1. Submit the Gwynedd Mercy University Financial Aid Application to the financial aid office.
  2. Submit the Free Application for Federal Student Aid (FAFSA) to Federal Student Aid Programs. Gwynedd Mercy University's federal code is #003270.

Above requirements should be fulfilled prior to April 1

It is the responsibility of the aid applicant to file all required forms by the stated deadlines. An incomplete application cannot be processed and will, therefore, not receive consideration. Once completed, it will be processed as time and funding permit.

In distributing financial aid, priority will be given to full-time students. Students enrolled on a half-time basis who are carrying a minimum of six credit hours per semester, may apply for financial aid and will receive all possible consideration for every type of assistance for which they qualify and which Gwynedd Mercy University has available.
A letter explaining the action taken on the aid application and giving information about aid offered will be sent to each student whose application is complete.

ACADEMIC PROGRESS POLICY
Student Financial Aid Satisfactory Academic Progress Policy

Federal regulations require that all students who receive any financial aid meet federal academic progress standards while taking courses toward a degree or certificate program. This policy applies to all terms of enrollment, even if not receiving federal aid, and all enrollment types (full-time/part-time). Academic progress is measured by cumulative grade point average, percentage of credits successfully completed, and the time it takes to complete the degree program. The financial aid office checks student academic progress after both the fall and spring semesters.

Progress Standards

A. **Completion Rate (67% Rule):** Students must receive a satisfactory grade in courses attempted by completing at least 67% of the credits for which they are enrolled. This percentage is calculated by dividing the number of credits earned by the number of credits attempted. All withdrawals, failures and incompletes are counted as attempted, but not earned credits.
   
   1. **Exception to the 67% Rule:** It is important to note that the 67% completion rule applies to most types of financial aid. However, specific programs may mandate a higher completion rate. For example, the PHEAA State Grant requires that a full-time student earn 24 credits (repeated coursework does not count in this total) in an academic year and requires a minimum of 12 credits for part-time students.

B. **Cumulative GPA Minimum Requirements (GPA Rule):** The maintenance of a cumulative grade point average of 2.0 for upper classmen and 1.8 for freshman students. Graduate, second bachelor's degree and doctoral students must maintain a 2.0 cumulative grade point average. Additionally, specific grants and scholarships may require a higher minimum cumulative grade point average.

C. **Maximum Hours (150% Rule):** Students may only receive financial aid up to the point at which they can no longer complete their program of study within 150% of the program length (including all semesters, even if no federal aid was received). For example, if a program requires 120 credits, a student may only attempt up to 180 credits in that program. All credits attempted and all transfer credits that are applicable to your program are counted.

D. **Developmental Courses:** Developmental courses are evaluated in progress calculation, including completion rate, maximum hours and cumulative grade point average. Federal financial aid may be awarded for a maximum of 30 semester hours of developmental coursework.

E. **Withdrawals, Incompletes, Audits and Repeat Courses:** Withdrawals, Incompletes and Audits do not count as a passing grade. These grades are counted in attempted credits. Once an Incomplete grade has been changed to a passing grade, progress can be recalculated upon written request. Repeated coursework is also counted as attempted credits, with all grades related to this repeated coursework included in financial aid GPA.
calculation.

F. **Change of Major and Double Majors:** Once all the requirements for a program are completed, a student may no longer receive financial aid unless they enter a new degree program. Students may apply for financial aid for the completion of a double major. All applicable courses in the completed program will count as part of the 150% attempted credits in both majors.

**Ineligibility for Financial Aid**

A. Any student, who fails to meet the progress standard and cumulative grade point average requirements, will be ineligible for future financial aid. A student who has become ineligible for financial aid will be notified in writing by the financial aid office at the end of the fall or spring semester.

B. Students on academic probation may be eligible to receive financial aid IF they meet satisfactory academic progress requirements. Students may still enroll without financial aid if they do not qualify for financial aid because of satisfactory academic progress issues.

C. Non-Matriculated students (students not accepted in a degree seeking program at the University) are ineligible for federal, state, and institutional financial aid. They may borrow private student loans in order to finance their course costs.

**Academic Progress Appeals**

Students who faced mitigating circumstances that may have affected their academic progress may appeal an academic progress decision. Mitigating circumstances include: experiencing a serious illness or accident; the death, accident or serious illness of your immediate family member; or other mitigating circumstances beyond your control. Poor time management, feeling “unprepared for school” or other circumstances that are in a student’s control will not be accepted as mitigating circumstances. To appeal, a student must complete the Financial Aid Academic Progress Appeal Form, provide acceptable supporting documentation and complete all required steps outlined on the form.

If a student’s appeal is approved, they may be required to develop (with designated university staff) and follow an academic plan and successfully complete courses with a grade of C or better in order to continue receiving student aid. Failure to follow the academic plan and successfully complete all registered courses during the semester of appeal, will result in the student having to successfully complete future courses without any financial aid support until all academic standards are met as described in this policy. Successful completion means receiving a grade of A, B or C. Withdrawals, incompletes and audits do not count as a successful completion grade.

If a student’s academic progress appeal is approved and an academic plan is developed, then they may receive financial aid on a probationary status (for either one semester or one year as determined by the appeals committee) until satisfactory academic progress criteria is met.
Regaining Financial Aid Eligibility

If a student does not meet satisfactory academic progress requirements and chooses to enroll at the University without financial aid assistance, academic progress will be checked again at the end of that term of enrollment. At that time, if the progress requirements are met, the student’s financial aid eligibility will be reinstated for subsequent semesters. Institutionally administered grants and scholarships will be reinstated for the student IF funds are still available at the time of awarding.

Normally, students should complete the associate degree in four semesters of full-time enrollment; the bachelor’s degree in eight semesters of full-time enrollment. Mitigating circumstances may necessitate an additional semester(s). Students should understand that state and institutional financial aid is limited to a maximum of four semesters for the associate degree and eight semesters for the bachelor’s degree.

Eligibility for federal aid is limited to twelve semesters for the bachelor’s degree and six semesters for the associate degree.

Institutional Refund Policy

To be eligible for a tuition refund from Gwynedd Mercy University a student must officially withdraw by completing a withdrawal form available in the Office of Academic Affairs. (See University Withdrawal under Academic Policies). The amount of the refund is based on the date that the withdrawal form is recorded in the Registrar’s Office. Not attending class does not automate an official withdrawal. To be eligible for a refund of room and board a student must officially notify the Office of Residence Life. The amount of the refund is based on the date of the withdrawal and is verified by the Office of Academic Affairs.

Refunds are established by Residence Life and are included in the student’s housing contract. No refunds will be issued until at least ten days after the drop/add period. The refund date is established by the Bursar’s Office. This includes refunds for overpayment and excess financial aid.

Return of Title IV Funds

The Office of Student Financial aid recalculates federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a payment period or semester. The federal Title IV financial aid programs must be recalculated in these situations.

If a student leaves the institution prior to completing 60% of a payment period or semester, the financial aid office recalculates eligibility for Title IV funds. Recalculation is based on the percentage of earned aid using the following federal Return of Title IV Funds formula:

\[
\text{Percentage of payment period or term completed} = \frac{\text{number of days completed up to the withdrawal date}}{\text{total days in the payment period or semester}} \times 100.
\]

(Any break of five days or more is not counted as part of the days in the semester.) This percentage is also the percentage of earned aid.

Funds are returned to the appropriate federal program based on the percentage of unearned aid using the following formula: Aid to be returned = (100% of the aid that could be disbursed minus the percentage of earned aid) multiplied by the total amount of aid that could have been disbursed during the payment period or semester.
If a student earned less aid than was disbursed, the institution would be required to return a portion of the funds and the student would be required to return a portion of the funds.

If a student earned more aid than was disbursed to him/her, the institution would owe the student a post withdrawal disbursement, which must be paid within 120 days of the student’s withdrawal.

The institution must return the amount of Title IV funds for which it is responsible no later than 45 days after the date of the determination for post withdrawal disbursement must be offered to the student within 30 days of the date of determination.

Refunds are allocated in the following order:
Unsubsidized Federal Direct Loans
Subsidized Federal Direct Loans
Federal Parent Direct (PLUS) Loans
Federal PELL Grant for which a return of funds is required
Federal Supplemental Opportunity Grants for which a return of funds is required

Never Began Attendance

Students who never began attendance in any classes at an institution are not eligible for Title IV funds. If a disbursement was made prior to determining that the student never began attendance, funds must be returned to the Department of Education. A Return of Title IV Funds calculation, however, is not necessary.

Unofficial Withdrawals (all F Grades)

If a student who began attendance and has not officially withdrawn fails to earn a passing grade in at least one course offered over an entire period, Gwynedd Mercy University must assume, for Title IV purposes, that the student has unofficially withdrawn, unless it can be documented that the student completed the period.

Accelerated BSN Program LOA Policy

The Federal government has determined that 45 days or more (excluding University scheduled calendar breaks) is a “break in attendance” and will affect the student’s success in completing the program. All students with a “break in attendance” must submit a Leave of Absence (LOA) form to their advisor and Financial Aid, for approval, or the student will be withdrawn from the program. The LOA form will indicate to the University how long the student will be out of attendance and the reason. The only reason ABSN students will take an LOA is due to receiving an unsuccessful grade in a class.

LOA

a) LOA request forms must be submitted within 10 days of the student’s Last Date of Attendance (LDA).
b) All parts to the LOA request form must be completed in order for the LOA to be considered for approval by the Financial Aid office.
c) Students can take a maximum of 120 days in one LOA with a total maximum of 180 days in a 12 month period. LOA requests will be denied if the break is under 45 days or if the student has exceeded 180 days. The twelve-month period begins with the start of the first leave.
d) Student returning from a first leave of absence must complete at least one course, with a grade other than “W” or “I” prior to requesting a second leave.

If the LOA is not completed or approved, the student will be withdrawn from the program and may be required to re-apply for admission.
a. If program withdrawal paperwork is not completed by student, then student will be withdrawn from program by their advisor.

Federal Exit Counseling

Students who have borrowed from Perkins, Nursing, or Direct (Subsidized/Unsubsidized) Loan must be sent exit counseling letter(s) if they:
- graduate from the University
- drop all of their courses during a semester or drop to less than 6 credits
- formally withdrawal from the University
- enroll in a semester at a rate of less-than-half-time (less than 6 credits)
- unofficially withdrawal from the University (stop attending all classes during a semester without formally notifying the University or fail to enroll in a subsequent semester)

Eligibility
To be eligible for any of the federally-funded programs, the student must be (1) a U.S. citizen or an eligible non-citizen, as defined by the U.S. Department of Education, (2) a regular student enrolled for the purpose of obtaining a degree, (3) making satisfactory academic progress toward completion of a chosen program of study, and (4) in need of financial aid as determined by the federal methodology needs analysis system. Students who have already earned a bachelor degree are not eligible for Federal, State, or University Grants/Scholarships.

Scholarships and Grants
Scholarships and grants are regarded as “gift” assistance, which need not be repaid; however, some of these may carry certain provisions to which one must adhere. Recipients of university scholarships must be enrolled on a full-time basis, and must have full-time tuition charges assessed on their billing statement (recipient of waivers may not be considered for University scholarships in addition to waivers). Several types of scholarships and grants, consisting of remission in part of the yearly tuition, are available. These scholarships and grants can be awarded for a maximum of eight semesters.

Financial aid received from public and/or private, external sources must be reported to the Financial Aid Office. This will require an adjustment in either the total amount and/or kind of aid provided in the financial aid package.

Merit Awards
Gwynedd Mercy University offers a number of MERIT AWARDS based on strong academic record and/or involvement in extra-curricular/community service activities. Required SAT scores for these awards reflect a combination of Critical Reading and Math scores only. These Awards are available only for new, first-degree students who will be enrolled on a full-time basis.

As a member of the National Collegiate Athletic Association (NCAA), Division III, the University does not consider athletic ability in the awarding of scholarships and grants. All scholarships and grants are limited by funds available and number of applicants. DEADLINES are, therefore, very important! Students who qualify for Merit Awards will be notified at the time of admission into the University. Merit awards may be renewed for an additional two (transfer students) or three (first-year students) years provided that recipients continue to meet eligibility requirements. The Merit Award will be the first component of any need-based financial aid award.
Institutional Scholarships and Grants
Selection of University Scholarships/Grant recipients will be made by the Student Financial Aid Committee after review of completed applications. Eligibility for Institutional Financial Aid is contingent on matriculation in a degree program, full-time enrollment and satisfactory academic progress.

Federal Pell Grant
The Pell Grant is a federal aid program, which provides grants ranging in amount from $400 to $6,195, depending on the student’s eligibility as determined by federal methodology. To receive consideration, the student must be enrolled for a minimum of three credits per semester in a degree or certificate program. Since the Federal Pell Grant is the foundation of all financial aid, all aid applicants are required to apply for this Grant. The Student Financial Aid Committee will develop the financial aid package with the appropriate Pell Grant expectation.

Federal Supplemental Educational Opportunity Grant (FSEOG)
The Supplemental Educational Opportunity Grant is a federal aid program, which provides grants ranging from $100 to $4,000 annually to students who demonstrate exceptional financial need. Priority for the FSEOG must be given to Pell Grant recipients.

Pennsylvania State Grants (PHEAA)
The Pennsylvania Higher Education Assistance Agency provides state grants ranging from $100 to $3,232 annually. PHEAA requires that the program of study be at least two academic years in duration and that the student carry a minimum of six (6) credits per semester. The state grant may be awarded for a total of four full-time academic years’ contingent upon annual application and continued eligibility. Veterans who satisfy all other PHEAA eligibility requirements may be entitled to a full state grant. Filing deadline: May 1. The state grant is the floor of financial aid and all aid applicants are required to apply for this type of assistance. The financial aid package will be developed with the appropriate state grant expectation. For further information, contact: Pennsylvania Higher Education Assistance Agency (PHEAA) 1-800-692-7392.

State Grants/Scholarships
Many states administer grant/scholarship programs for students attending colleges and universities both in and out-of-state. All students applying to Gwynedd Mercy University for financial aid are required to apply for state funds wherever available. Delaware, Connecticut, Massachusetts, Ohio, Rhode Island, Vermont and West Virginia offer state grants for their residents who are studying in another state. Applicants should consult guidance counselors and/or state agencies for information.

LOANS
Loans are regarded as “self-help” and are made directly to students enabling them to finance a portion of their education with future earnings. Several types of loans are available to qualified students in all four years of study.

Gwynedd Mercy University participates in the Federal Nursing Student Loan program. Through this program, the University provides long-term, low-interest loans to students who demonstrate financial need. The loans are interest free during the student’s enrollment at Gwynedd Mercy University and can be repaid over a 10-year period that begins nine months after graduation or termination of studies. Under certain federally mandated and approved conditions, borrowers may arrange to defer loan repayment and/or qualify to have loans cancelled in whole or part. Borrowers should note both deferment and cancellation provisions when negotiating the loans.

Loan amounts offered to students are contingent on adequate federal funding of the programs.
A loan is a serious responsibility and obligation. Students should exercise discretion when borrowing money for school. The full amount borrowed plus all accrued interest must be repaid whether or not the student borrower completes his/her program of study. Transcripts will not be released for any student whose file reflects default on repayment of a student loan.

Nursing Student Loan (NSL)
The Nursing Student Loan is a federal aid program, which provides loans to eligible nursing students on the basis of financial need and academic proficiency. A maximum of $3,300 may be borrowed for each of the freshman and sophomore years and $5,200 for each of the junior and senior years to an aggregate of $17,000 during undergraduate enrollment. Repayment begins nine months after graduation or termination of studies and borrowers are allowed 10 years to repay the loan. During the repayment period, 5% interest is charged on the unpaid balance of the loan principle.

Federal Direct Loan
The Federal Direct Loan Program provides annual loans up to $5,500 for freshmen, $6,500 for sophomores, $7,500 for juniors and seniors, and $8,500 for graduate students to an aggregate of $31,000 for undergraduate study and $138,500 for graduate study (including any undergraduate Federal Direct Loans). All applicants must demonstrate need for the subsidized Direct Loan. For eligible students, the Federal Stafford and Direct Loan will be subsidized, that is, the Federal Government will pay applicable interest during the student’s enrollment and the six-month grace period. Repayment begins six months after graduation or termination of studies and borrowers are allowed 10 years to repay the loan. The Federal Direct Loan Master Promissory Note can be completed online at [www.studentloan.gov](http://www.studentloan.gov).

Students who do not qualify for the federal interest subsidy because they do not meet the federal financial need analysis standards are eligible to borrow through the unsubsidized Federal Direct Loan program. The unsubsidized loan can be issued for the full amount of eligibility or in combination with a subsidized Federal Direct Loan. However, on any portion of the unsubsidized loan, interest must be paid by the student. Otherwise, all terms and conditions of the loans under the subsidized Federal Direct Loan Program apply to unsubsidized Federal Direct Loans.

Students who meet the federal requirements for independent student* status may be eligible to receive additional funding through the unsubsidized Federal Loan Program. Total Direct Loan borrowing (including subsidized and unsubsidized loans) may not exceed the following annual maximums:

<table>
<thead>
<tr>
<th>Year</th>
<th>Maximum</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>$ 9,500</td>
</tr>
<tr>
<td>Sophomore</td>
<td>$10,500</td>
</tr>
<tr>
<td>Junior &amp; Senior</td>
<td>$12,500</td>
</tr>
<tr>
<td>Graduate Level</td>
<td>$20,500</td>
</tr>
</tbody>
</table>

*Independent undergraduate aggregate is $57,500

Federal Direct PLUS Loan
Direct PLUS Loans are low-interest loans available for the parents of dependent students and for graduate/professional degree students. Satisfactory Credit History is Required. Amount of the Direct PLUS Loan may not exceed COST of ATTENDANCE minus any estimated financial aid the student has or may receive during the period of enrollment. Interest on the Direct PLUS Loan is a fixed rate which is set in July of every year. Interest is charged during all periods beginning on the date of the first disbursement. The Direct PLUS Loan Master Promissory Note (MPN) can be obtained online at [www.studentloan.gov](http://www.studentloan.gov).
Alternative Loans
In addition to the Federal Loan Programs, a student and/or credit-worthy co-signer may borrow funds not to exceed cost of attendance. Since Private/Alternative loans have different fee and rate structures, applicants are encouraged to request information directly from the lender or on the web at [www.elmselect.com](http://www.elmselect.com).

EMPLOYMENT
Employment is regarded as “self-help” and is made available to eligible students enabling them to finance their educational costs through job earnings.

Federal Work-Study (FW-S)
Work Study is a federal aid program, which provides employment both on Gwynedd Mercy University’s campus and off-campus with approved public or private non-profit agencies. Federal Work-Study is best described as the opportunity to work and earn a predetermined amount of money. Eligible students may be employed for a maximum of 10 hours weekly during the school year and 40 hours weekly during the summer and vacation periods. FW-S students are paid on an hourly basis for work performed; generally, they are paid twice monthly through the university business office. The University cannot guarantee a job or total earnings as awarded because the program is limited by the amount of funds received from the federal government.

BENEFITS
Veterans Benefits
The University serves only as a certifying and transmittal agency in regard to Veterans Educational or War Orphans Benefits. The University’s Veteran Affairs Department is part of the Financial Aid Office. The VA Coordinator is available to assist students with respect to their veterans’ benefits. In addition, veterans may contact: Veterans Administration Regional Office, P.O. Box 4616, Buffalo, NY 14240-4616.

Vocational Rehabilitation Grants
The Office of Vocational Rehabilitation provides financial assistance for qualified students. Eligibility requirements must be discussed with a representative from an OVR office.

Federal Consumer Regulations Act
To comply with the Federal Consumer Information Regulations Act, Gwynedd Mercy University makes available upon request a report on job placement statistics and graduation rates. A copy of the latest report may be requested in writing from the Vice President for Academic Affairs, Gwynedd Mercy University, P.O. Box 901, Gwynedd Valley, PA 19427-0901.

Federal Regulations require that Gwynedd Mercy University make available consumer information for students. This information can be found using the link [https://www.gmercyu.edu/about-gmercyu/fast-facts/consumer-information](https://www.gmercyu.edu/about-gmercyu/fast-facts/consumer-information)

Student Services and Campus Life - refer to the Student Handbook
ACADEMIC INFORMATION

Registration
Students are expected to register within the dates published on the Registrar’s Office website (see Academic Year). The University reserves the right to cancel all courses for which there is insufficient registration. A student who has not satisfied all financial obligations in any department of the University will not be able to register.

Responsibility rests with the student for the selection of courses that will satisfy the requirements of the University for graduation. Each student is assigned an advisor to assist with course scheduling. The student must consult with his or her advisor each semester/session. An advisor’s signature or an online approval is required for registration.

PLACEMENT PROGRAM FOR WRITING AND MATHEMATICS
THE COLLEGE ENGLISH AND MATHEMATICS ASSESSMENT (Does not apply to students enrolled in the School of Graduate and Professional Studies.)
To ensure that every student admitted to Gwynedd Mercy University is prepared to succeed in college-level courses, many of which require advanced writing and mathematics skills, the University requires that new first-year transfer and non-matriculated students take the Gwynedd Mercy University placement assessments for English and mathematics before registering for their first semester.

To ensure that you are prepared to succeed in college-level courses, we require that you take the English and mathematics placement assessments before registering for your first semester at GMercyU.

You are exempt from taking the respective placement exam if you meet one of the following exemptions:

- A score of at least three (3) on the Princeton Advanced Placement Test in English (Language and Composition) and/or mathematics (Calculus or Statistics)
- Transfer credits for college-level English composition or college-level mathematics courses (earned grade of C or better) through the official acceptance of transfer credits by the Registrar’s Office at Gwynedd Mercy University
- If you took the SAT after March 2016: A score of at least 35 in the reading test and a 680 in the mathematics test. To find your reading score, from the dashboard, select "view details," then select "skills insight."
  "If you took the SAT prior to March 2016: A score of at least 650 in the critical reading and/or mathematics sections of the SAT test exempts you from the respective test.
- A score of 29 or higher on the English or mathematics ACT test

The English and math placement assessments are untimed, and retests are not permitted. Students with documented disabilities who need accommodations, other than extended-time, should make their needs known to the Academic Resource Center staff at least a week in advance of the placement test. Ear plugs are available upon request.

SCHEDULING OF ASSESSMENTS
All incoming first-year and transfer students as well as transfer students who have not completed college-level English composition or mathematics courses should schedule an appointment with the Academic Resource Center (ARC) to take the placement assessments before registering for courses. It is the student’s responsibility to register for the assessments.
NOTIFICATION OF PLACEMENT ASSESSMENT RESULTS

Students will receive their test results by mail. Students whose test results indicate that they can proceed with college-level writing courses may register for ENG 101 College English. Students whose test results indicate that they need to develop their writing skills must register for and successfully complete ENG 002 Developmental Writing before enrolling in ENG 101 College English.

Students whose mathematics scores indicate they are prepared for college-level mathematics may register for most courses that require mathematics skills; courses that require higher-level mathematical skills are identified by a course prerequisite. Students who do not meet the math level for their major or the pre-requisite level for a course, must take either MTH 002, Developmental Mathematics, or math modules (as determined by their advisor) before enrolling in college-level mathematics and other courses that have mathematics components.

Students earn three credits for successful completion of ENG 002 Developmental Writing, and three credits for successful completion of MTH 002 Developmental Mathematics. Those credits count toward financial aid requirements; however, the course grade of “P” is not computed into a student’s grade point average. These credits do not count toward graduation.

TUITION FOR ENG 002 DEVELOPMENTAL WRITING, AND MTH 002 DEVELOPMENTAL MATHEMATICS

Full-time students who must take ENG 002, Developmental Writing, and/or MTH 002, Developmental Mathematics, may enroll with no additional fees or tuition charges provided that their course load does not exceed 16 credits.

INQUIRIES

All questions concerning the English and mathematics placement assessments should be directed to the Academic Resource Center.

Program Attendance and Course Attendance Policies – School of Graduate and Professional Studies

The pace of an accelerated degree program requires students to maximize opportunities to learn. The classes and out-of-class learning activities provide the primary context for instruction as well as learning. The School of Graduate and Professional Studies believes that in order to learn from faculty instruction and from one another, students must participate in all learning opportunities and be present at all classes and submit all out-of-class weekly assessable learning activities. Missing a class or failure to submit a weekly assessable learning activity cannot be “made up.” The policy is intended to encourage students to make choices that support their educational goals.

Definition of attendance for an on-ground course: On-ground students are considered present for the week if they have engaged in instructional activities by attending a scheduled face to face class and/or submitting any required Alternative Instructional Equivalency deliverables within the instructional week. Failure to do at least one of these will result in an official absence.
Definition of attendance for an online course: Online students are considered present for the week if they post to a discussion forum or submit any assignment or other deliverable during the instructional week (Monday-Sunday). Failure to actively engage in the course by posting to discussion forums or submitting assignments will result in an official absence.

- If a student is absent and has not submitted coursework for any 2 consecutive class sessions (putting student out of program attendance for 14 days), then the student will be administratively withdrawn from the student’s current course and earn the grade of “WA”. Additionally, the student will be dropped from all future courses and administratively withdrawn from the program unless attending a concurrent course.
- If a new student is absent and not submitted for the first 2 class sessions of their very first program course, then the student will be dropped from the course and all future courses. Since this student does not have a University transcript, they are considered “never enrolled”
- If student is taking more than one course at a time and he/she is not out of overall program attendance, then only an administrative course withdrawal may be necessary.
- If a student is absent for non-consecutive class sessions, then the student will earn a final grade from instructor based on either the departmental policy or the instructor's individual policy.
- Final grades can include “I” and “F” grades. All “I” grades need to be changed to a final grade within 30 days; otherwise, the Registrar' Office will change the “I” to an “F”.
- If student needs additional courses to complete degree, courses must be scheduled prior to last date of attendance (LDA) in order to avoid the possibility of being administratively withdrawn from program.
- If courses are not scheduled prior to LDA, student has within 7 days of LDA to communicate with Academic Advisor and schedule remaining requirements.
- If student does not communicate with Academic Advisor within 7 days of last date of attendance, student will be administratively withdrawn from program.
- If student communicates with Academic Advisor within 7 days and is able to schedule program re-entry within 45 days of LDA, no further action is required and student will be able to continue towards degree completion.
- If student communicates with Academic Advisor within 7 days but is not able to schedule program re-entry within 45 days of LDA, student must withdraw from program and then readmit. (A Leave of Absence will not be approved since this situation will not be considered an unforeseen circumstance.)
  - When readmitting, student must contact FA directly to reinstate FA funding. This process does not occur automatically.

School of Graduate and Professional Studies LOA Policy

The School of Graduate & Professional Studies requires students to attend all classes and to fully participate in online classes. The Federal government has determined that 45 days or more is a break in attendance and will affect the student’s success in completing program as outlined in course schedule. All breaks in attendance must have an approved Leave of Absence (LOA) or student will be administratively withdrawn from program. The Leave request will inform the University how long the student will be out of attendance and the reason.

1. Students out of attendance for 14 days but fewer than 45 days must submit their scheduled reentry date in writing.
2. Planned LOA
   a. LOA requests must be completed and submitted prior to student’s Last Date of Attendance (LDA).
b. For students out of attendance 45 days or more, a course withdrawal request becomes a Leave of Absence (LOA) request and it must be approved or denied based on LOA criteria.

c. All parts to the LOA request must be completed in order for Academic Advisor to review LOA. These include the student’s LDA, Scheduled Reentry Date, Reason, and Signature.
   i. Students who do not provide a reentry date within the prescribed time frame will be withdrawn from the program.

d. If submitted after LDA, it will be reviewed using unforeseen circumstance criteria, which is indicated on the Leave of Absence Request form. Proof of unforeseen circumstance is required.

e. LOA will be denied if over 180 days.

3. Unplanned LOA
   a. Students must complete LOA request and submit documentation.
   b. LOA requests approved for unforeseen circumstances will be evaluated to determine if course is dropped or withdrawn. If dropped, the course will be removed from the transcript and all charges to be removed from student’s account. If withdrawn, the course will remain on the transcript with a “W” grade and charges will be assessed based on the refund policy.

e. LOA will be denied if over 180 days.

4. If the LOA is not completed or approved, the student must complete a program withdraw request and then be readmitted.
   a. If program withdrawal paperwork is not completed by student, then student will be administratively withdrawn from program.

Choice of Major
Incoming students may make a request of major or choose University Studies. Retention in a program is contingent upon satisfactory progress. Refer to Program policy within each School. The University strongly suggests that University Studies students declare a major no later than the completion of 60 credits. Students who have more than 60 credits may be enrolled in the University Studies program for no more than two consecutive semesters before declaring a major. If, after two semesters in University Studies, a student is not accepted into a major, the student may continue as a non-matriculated, part-time student.

Change of Major
Students who would like to change their major must complete a “Change of Major/Minor” form and submit it to the Registrar’s Office by the deadline published on the form. Forms can be obtained through the student’s advisor and are also found on the Registrar’s Office website. Changes of majors are normally processed immediately and for the term in which the Registrar’s Office receives the form, except for students going into or leaving the Francis M. Maguire School of Nursing and Health Professions. For these students, the Change of Major forms received by the end of the drop/add period will be processed for the current semester. Any forms received after this date will be processed for the following semester.

FERPA RIGHTS AND POLICY NOTICE
The Family Educational Rights and Privacy Act (FERPA) is a Federal law which was enacted in order to protect students' education records at all schools that receive funds under a program of the U. S. Department of Education. This document provides a summary of this law.

Rights of the Student or Parent
FERPA gives a student's parents certain rights over the student's education records until the student reaches the age of 18 or attends a school beyond the high school level. At that time, the rights are transferred from the parents to the eligible student. These rights enable the eligible student or parents to:
Inspect and review the student’s education records maintained by the school. If the student and parents are unable to review the records at the school, they can request copies from the school (and may be charged a fee for them). Requests to review educational records must be directed to the Registrar and must identify, as specific as possible, the record(s) that the student wishes to inspect. The Registrar will contact the appropriate record custodian in the University who will make those records available to the student as soon as possible but no later than 45 days from the date of the request. The University has the right to refuse student access to records under certain circumstances.

Request that a school correct the student's records if they believe they are incorrect or misleading. If the school chooses not to update the student's records, the student or parent has a right to a formal hearing. If, after the hearing, the school still decides not to modify the student's records, the parent or student can include a statement in the records which contests the information.

When a School Does Not Need Written Consent
Generally, a school must have written permission from the parent or student before releasing any information from the student's records. Schools can, however, disclose the student's records without the student's or parent's consent to any of the following parties or under any of the following conditions:

- School officials with legitimate educational interest
- Other schools to which the student is transferring
- Specified officials for audit or evaluation
- Appropriate parties in connection with the student's financial aid
- Organizations which are conducting studies for, or on behalf of, the school
- Accrediting organizations
- In order to comply with a judicial order or a lawfully issued subpoena
- Appropriate officials in cases of health and safety emergencies
- State and local authorities, within a juvenile justice system, pursuant to specific state law

A school official is a person employed by Gwynedd Mercy University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person serving on the board of trustees; or a student serving on an official committee or as a federal work study student, such as a disciplinary or grievance committee. A school official also may include a volunteer or contractor outside of the University who performs an institutional service of function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of personally identifiable information from education records, such as an attorney, auditor, or collection agent or a student volunteering to assist another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the University.

Disclosure of Directory Information
Schools do not need consent to disclose “directory” information. Directory information is defined by Gwynedd-Mercy College as:

- Student Name
- Address (including telephone number and GMercyU email address)
- Dates of attendance
- Course load (full/part time status)
- Class level
- Field(s) of study
- Degree(s) conferred and dates awarded
• Honors and awards
• Date and place of birth
• photograph

Schools must, however, tell parents and students about the directory information and give them a reasonable amount of time to request that the directory information not be disclosed (see Registrar’s Office web page for the “FERPA no disclosure form” if you would like the University to withhold directory information).

Annual Notification of Rights
Each year, schools are required to notify the student and parents of their rights under FERPA. At Gwynedd Mercy University, the student is notified through the distribution of the Undergraduate and Graduate Catalogs.

Non-compliance
A parent or eligible student may file a written complaint with the Office regarding an alleged violation under the Act and this part. The Office’s address is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202.

For More Information
If you need additional information about FERPA, call 202-260-3887. Individuals who use TDD may call the Federal Information Relay Service at 1-800-877-8339.

Absence Due to Athletic Contests
Every student at Gwynedd Mercy University has a responsibility to attend classes regularly. However, as representatives of Gwynedd Mercy University, our student-athletes are excused from class attendance in order to participate in contractually-obligated intercollegiate athletic competition. As such, they provide recognition and value to the University community. However, in order for student-athletes to be excused from class, the following stipulations must be met:
1. The Director of Athletics will post a link to the Athletics homepage on the Gwynedd Mercy University website at the beginning of each semester, so faculty may access the roster and current game schedule of each sports team associated with the University.
2. Student-athletes are responsible for providing each of their course instructors with a schedule of competition dates and times at the beginning of the semester. Should contest dates be added or changed once the schedule is printed, it is the responsibility of the student-athletes to provide an amended schedule to their course instructors as soon as the additional dates and times are available.
3. In the case of schedules that may be altered due to inclement weather, it is the responsibility of the student-athlete to notify the professor of the change, as soon as the revised dates and times are available from the Athletic Department.
4. Student-athletes are advised to meet with the instructor in advance and determine a plan to satisfy the course requirements for the time the student-athlete is likely to miss. At that meeting, the instructor and student will complete an Intercollegiate Athletic Participation Class Absence Form (attached). The instructor will decide the appropriate assignment to compensate for the missed classroom time. This assignment shall not be in excess of the subject matter covered during the student-athlete’s absence, according to the syllabus. Clinical experiences, student-teaching days, internships and practicum days, and science labs are not covered by this policy and cannot be missed unless an agreement is reached between the student-athlete and the faculty member.

Student-athletes are responsible for submitting completed Intercollegiate Athletic Participation Class Absence Forms to the Department of Athletics.
5. Should a contest conflict with an exam or other graded in-class activity, the student-athlete must meet with the course instructor to establish an alternative method and/or date for testing/assessment.

As per NCAA regulation, student-athletes are not excused from class for practice or to play in a nontraditional-season contest. Students who do not comply with the policy have no recourse for exceptions to attendance policies listed in the course syllabus.

The Director of Athletics is available to answer questions and assist in the coordination and implementation of this policy.

Academic Complaints
The purpose of the University’s Academic Complaint procedure is to ensure that students have the opportunity to raise concerns which have remained unresolved after previous attempts to do so, and that these concerns will be dealt with in a just and fair manner. Student life-related complaints are handled through the University’s Student Complaints procedure, located in Volume VI, Section 6.7 of the Gwynedd Mercy University Policy Manual.

An academic related action or decision is eligible to be addressed through the Complaint procedure only if it involves a violation of federal, state or local law, or a misapplication or misinterpretation of University policy. The validity of University policies themselves may not be challenged through this process. Examples of academic complaints include the misapplication of the University attendance policy, inconsistent application of class syllabi policies, etc.

In addition, this procedure may not be used to resolve complaints regarding:
1. Claims based on purchases or contracts; or
2. Claims against a University employee on matters that are unrelated to the employee’s job or role at the University; or
3. Grade grievances.

The procedures set forth below may be used by individuals bringing complaints (“complainants”) who are enrolled as students at Gwynedd Mercy University. The complainant must be the alleged victim of unfair treatment; a complaint cannot be filed on behalf of another person. The existence of this procedure does not prohibit complainants from also filing claims in other forums to the extent permitted by national, state or local law or applicable accrediting agencies. The formal resolution process described below must be initiated within ten (10) business days of the decision, action, or events giving rise to the complaint. The Dean of the appropriate School may extend this time limit at his or her discretion if good cause is shown.

Informal Resolution
Before proceeding to the formal resolution process, complainants are expected to have discussed the concern with the person they allege to have caused the complaint (the “respondent”). This requirement may be waived if the complainant has a reasonable basis for believing that such a discussion could result in physical injury, severe emotional distress, or discrimination. If the respondent does not respond to the complainant’s attempts at discussion, or if an equitable solution cannot be found, the case will proceed through the formal resolution process outlined below.

Formal Resolution
If informal resolution is not successful, the complainant should file a written request for review with
the Dean of the appropriate School. The request must:

1. Provide the names of all respondents;
2. List the law or University policy that has allegedly been misapplied or misinterpreted, if 
   know;
3. State how the decision or action was unfair and/or harmful to the complainant;
4. State how the respondents are responsible for the action or decision; and
5. State the requested remedy.

The Dean will review the request. If it is clear that the complaint has not been filed within the time 
limit, or pertains to a matter not applicable under this procedure, or comes from a person without 
the right to issue a complaint, the Dean will dismiss the case and notify the complainant in writing.

If the complaint is not dismissed, the Dean will review the information provided, gather any 
additional information required, and formulate a decision within fifteen (15) business days of receipt 
of the request. If the respondent is the Dean, the Vice President for Academic Affairs will appoint 
another University administrator to issue a decision. Once a decision has been made, it will be 
recorded for the University record, and the complainant and respondent(s) will be notified of the 
decision in writing.

**Final Appeal**

If the resolution provided by the Dean is not satisfactory to the complainant or respondent, that 
person may file a request for reconsideration via a final appeal. Such a request must be submitted 
in writing to the Vice President for Academic Affairs within five (5) business days of receipt of the 
original decision.

The Vice President for Academic Affairs will review the information provided concerning the 
complaint, the request for reconsideration, and details regarding the complainant’s desired remedy. 
The Vice President for Academic Affairs will issue a final decision within fifteen (15) business days 
of receiving the request for reconsideration. The Vice President for Academic Affairs’ decision may 
include one of the following options:

1. A determination that the complaint was valid;
2. A determination that the complaint was not valid; or
3. A modification of the remedy proposed by the Dean.

The Vice President for Academic Affairs will forward his or her decision to the complainant, 
respondent and the Dean. The Vice President for Academic Affairs’ decision is final and cannot be 
appealed.

**Distance Education Student Academic Complaints**

In compliance with Federal Regulations for Title 34 Education § 668.43 (b) Institutional Information, 
Gwynedd Mercy University is required to provide current and prospective students with information 
for filing complaints.

The University strives to resolve complaints in a fair and timely manner. Students residing outside 
of the State of Pennsylvania while attending Gwynedd Mercy University who desire to resolve a 
complaint should refer to the University’s grievance procedures. If after following the University 
procedures the issue is not satisfactorily resolved internally and the student seeks additional 
resolution, the resources below may be used to file complaints in the student’s state or the 
institution’s accrediting body.
The Student Complaint Information by State and Agency list provides contact information for state education agencies. The State Contact Information in the linked list has been collected by the State Higher Education Executive Officers (SHEEO), and it will be updated as additional information becomes available. [http://www.sheeo.org/projects/state-authorization-postsecondary-education](http://www.sheeo.org/projects/state-authorization-postsecondary-education)

Gwynedd Mercy University is accredited by the Middle States Commission on Higher Education (MSCHE). Contact the Commission at 3624 Market Street, Philadelphia, PA 19104-2680 or call [267-284-5000](tel:267-284-5000) for questions about the accreditation of Gwynedd Mercy University. Information regarding MSCHE’s complaint process can be found on their website ([www.msche.org](http://www.msche.org)) under Complaint Procedures: [http://www.msche.org/documents/ComplaintsInvolvingMemberCandidate.pdf](http://www.msche.org/documents/ComplaintsInvolvingMemberCandidate.pdf).

**Grade Appeal**

If a student believes that his/her final grade is the product of the instructor’s bias or caprice, rather than a judgment on the merits or demerits of his/her own academic performance, the student must follow the procedure described in this subsection.

**Complaint Procedure:**

1. In most instances, a grade concern is handled by speaking with a faculty member. The student should initiate the complaint procedure by speaking first with the professor.
2. If the student has tried to resolve the matter, but has not been able to meet with the instructor or professor, the student should present, in writing, an appeal within twenty (20) calendar days of the grade report being mailed/posted on the web to the instructor of the course offered. This written appeal should include the specific reasons why the grade should be reviewed, and may be electronically sent.
3. The instructor must contact the student within fourteen (14) calendar days to discuss the complaint.
4. If the student is not granted a meeting with the instructor within the allotted time period, or is dissatisfied with the explanation that has been provided by the instructor, the student may appeal, in writing, to the Dean within 14 calendar days.
5. The Dean/chair will request the student and faculty member to submit relevant materials within 14 calendar days after the written complaint has been received. The administrator’s decision will be provided in writing, to the student within 14 calendar days after receiving the requested materials.
6. In the event that the student does not feel there has been any resolution to the student’s perception that a grade was biased or capricious, the student may appeal to the Vice President for Academic Affairs.
7. The appeal must be a formal, written request to the Vice President for Academic Affairs. The appeal letter should include dates and summaries of all other meetings or attempted meetings. The summary should also include names of all parties including faculty, and the reason for the initial appeal of a grade. All supporting documentation must be included with the appeal letter, the summary of the meetings, and the chronology of dates.
8. Within 14 calendar days of the written appeal, the Vice President for Academic Affairs may exercise the option to select a panel of three independent faculty members who will work with the Vice President for Academic Affairs to hear the student’s case and assist the Vice President for Academic Affairs in development of resolution.
9. The faculty member who is accused of bias or caprice will have an opportunity to present to the Vice President for Academic Affairs a verbal analysis of the facts of the case accompanied by relevant documentation.
10. The burden of proof in the process shall be upon the student complainant.
11. Decision reached by the appeals procedure:
12. If it is found that the final grade given was neither biased nor capricious, the case shall be dismissed, and the Vice President for Academic Affairs shall inform the student in writing within 14 calendar days of the decision.
13. If it is found that the final grade was the result of bias or caprice, the faculty member and the Vice President for Academic Affairs will meet and reach consensus to resolve the dispute and award an appropriate final grade.
14. The Vice President of Academic Affairs will notify the student within 14 calendar days.
15. The decision rendered in the letter from the Vice President for Academic Affairs is final and may not be appealed.
ACADEMIC INTEGRITY

Statement
Academic honesty is fundamental to the quest for truth, which is deeply rooted in our core values at Gwynedd Mercy University. The University highly values academic integrity and expects that each student will conduct his or her academic life in accordance with this expectation. Violations of this core value are considered serious offenses. Violations may include, but are not limited to, the following: cheating on an assignment, quiz, test or examination; falsifying data; grade alteration; deception to avoid meeting course requirements; plagiarism in any form; or assisting another student in cheating or plagiarizing, or receiving such aid.

Violations of the Academic Integrity Policy

Cheating: is any action that uses or provides unauthorized assistance or material during an academic exercise. This may include, but is not limited to:

1. Copying or offering unauthorized assistance on tests, quizzes, examinations, reports, papers or research.
2. Submission of the same paper or report for more than one course and/or at more than one institution without prior approval of both instructors.
3. Deception to avoid meeting course requirements.

Fabrication: is the falsification or invention of any information or citation in an academic exercise. This may include, but is not limited to: grade alteration, research papers, assignments, lab reports, clinical assignments, and any other data gathering efforts.

Plagiarism: is to present the words or ideas of another person as one’s own. Any assignment (e.g. written, oral, poster) or computer program (e.g. presentations, power points, web pages) acquired in part or in whole from any source and submitted as one’s own original work shall be considered plagiarism. Plagiarism also includes, but is not limited to:

1. The quotation or other use of another person’s words, ideas, logic, opinions, thoughts, or theories without use of quotation marks and acknowledgment of the source;
2. The paraphrasing of another person’s words, ideas, logic, opinions, thoughts, or theories without acknowledgment of the source;
3. The quotation or other use of facts, statistics, or other data or materials that are not clearly common knowledge without acknowledgment of the source;
4. Copying or purchasing all or any portion of another’s academic, research, or creative work—even with the creator’s knowledge and permission—and submitting it, in part or in its entirety, as one’s own. This includes material available through the Internet or other electronic sources and any material which has been copyrighted. Students are hereby advised that when such material has been copyrighted, its unauthorized use constitutes not only a breach of academic integrity, but also a violation of law that could lead to civil or criminal penalties.

Denying Others Access to Information: is any behavior that denies access to scholarly resources or to deliberately impede the process of other students’ success. This may include, but is not limited to: stealing, hiding or defacing books, journals or media; misrepresentation of identity; falsification of official University records or communications; alteration or destruction of course material, including web-based.
Collusion: involves the cooperation of students with faculty or staff personnel in securing confidential information/material (tests, examinations, etc.); cooperative efforts by students and student assistants to gain access to examinations or answers to examinations for distribution; assisting in or contributing to the academic dishonesty of another individual; and seeking, obtaining, possessing, or giving to another person an examination or portions of an examination (not yet given), without permission of the instructor.

Sanctions
In congruence with the mission and core values of Gwynedd Mercy University, faculty should teach ethical behavior, confront and report academic dishonesty, and provide sanctions based on the severity and frequency of violations of the Academic Integrity Policy. The determination of academic dishonesty and the determination of the severity of the sanction is the responsibility and purview of each faculty member.

The Office of the Vice President for Academic Affairs is identified as the repository for reports of violations of academic integrity. Because multiple violations can lead to different consequences, it is important that one office be charged with receiving the reports and determining the number of times a student has been cited with a violation. Each faculty member has a right to use his or her discretion in determining if an action is in fact a violation of the policy. However, if any sanction is taken, the violation and the sanction imposed must be reported via Maxient to the Provost and Vice President for Academic Affairs.

Sanction Scale:
1. Written warning;
2. Sanction other than those listed (additional assignments, additional tests, etc.);
3. Zero credit for the test or assignment;
4. Failure of Course (receives an F);
5. Written warning from the Provost and VPAA
6. Suspension from the University (minimum 1 semester, maximum 2 semesters);
7. Dismissal from the University.

Sanctions 1-4 can be enacted at the discretion of the faculty member. A report of the warning or a notice that sanctions 1-4 have been imposed is sent to the Provost and Vice President for Academic Affairs' Office via submission through Maxient. The report should also include a description of the violations and the date the faculty member became aware of the violation. The report must detail the conversation the faculty member had with the student. If a student cannot be reached, the faculty member should note the date of attempted outreach. The faculty member should file the completed report within 10 calendar days of discovering the violation.

Sanctions 5, 6, or 7 are imposed by the Provost and Vice President for Academic Affairs in consultation with the Dean when there are severe instances or repeated instances of violations of the Academic Integrity Policy. Even a first violation, if severe, could move to sanctions 5, 6, or 7. Students are to be notified that sanctions 5, 6, or 7 have been imposed within 14 calendar days of the violation being reported in Maxient and will meet with the Provost and Vice President for Academic Affairs.

Faculty will refer to the Academic Integrity Policy in their syllabi and will outline the sanctions they will impose for violations. This will remind students of their obligations and will protect faculty in case they need to enforce the policy.
**Appeal Process**

A student may appeal a faculty member’s report of a violation of the Academic Integrity Policy. A student may not appeal sanctions decisions or sanctions imposed by the Vice President for Academic Affairs.

To appeal a report of a violation of the Academic Integrity Policy:

1. Within 7 calendar days of being made aware of the report of violation by the faculty member, the student will send a written appeal, outlining why he or she believes the report is incorrect, to the Dean of the School in which the course is offered.

2. Note: if the faculty member reporting the violation is also the Dean of the School offering the course, the student should send the appeal to the Provost and Vice President for Academic Affairs who will then assign the appeal to another Dean.

3. The Dean hearing the appeal is responsible for the following actions:
   a) Review the report of violation and the student appeal
   b) At his or her discretion, meet individually with the parties involved
   c) If the Dean finds the report of violation correct, the records and sanctions stand
   d) If the Dean finds that the report of violation is incorrect, the report will be removed from the Provost and Vice President for Academic Affairs’ files and the sanction removed.
   e) Written notice of the outcome of the appeal is to be sent to the Provost and Vice President for Academic Affairs’ office, the student and the faculty member originating the report of violation of the Academic Integrity Policy within ten (10) calendar days of the Dean receiving the student appeal.

4. If the student wishes to appeal further, a written appeal, outlining why the finding is incorrect is to be sent to the Provost and Vice President for Academic Affairs within seven (7) calendar days of the notice from the Dean regarding the initial appeal.

5. The Provost and Vice President will then uphold or overturn the report of violation. If the finding is upheld, the records will be retained. If the report is overturned, all records regarding the incident will be removed from the student’s records. Written notice of the outcome of the appeal is to be sent to the Dean of the school offering the course, the student and the faculty member originating the report of violation of the Academic Integrity Policy within ten (10) days of receiving the appeal.

The decision of the Provost and Vice President for Academic Affairs is final and may not be appealed.
Course Changes
A student who desires to change a course or section may do so within the drop/add period of each semester/session (See “Academic Year” section for deadlines). Students must complete the “Add/Drop” form and submit it to the Campbell Solution Center. Forms can be found on the Registrar’s Office website. No student may enter a course after the end of the drop/add period except by permission of the instructor, advisor and Dean of the School in which the course is offered, and the submission of a drop/add form to the Campbell Solution Center. Students may drop courses via Self-Service or complete a drop/add form in order to be dropped from a course. Students cannot simply stop attending a class and expect to be dropped.

Course Load
A full-time student carries a minimum of 12 semester credit hours. Students with a minimum 3.0 cumulative average may carry a maximum of 18 credit hours.

A student who wishes to attempt more than 18 credit hours must obtain the written permission of the Dean or Chairperson of his or her school. (See expenses)

Classification of Students Class Level
The number of credit hours earned by the student plus transfer credits determines class level. To be classified as a sophomore, a student must have completed at least 30 semester hours of credit; to be classified as a junior, a student must have completed at least 60 semester hours of credit; and to be classified as a senior, students must have completed at least 90 hours of credit.

Repeated Courses
Students must refer to their respective School’s guidelines regarding repeated courses and maintaining eligibility in their major. Students may repeat a course only once. Credit is earned only once. Both grades are recorded on the transcript. The lower grade is flagged with parentheses {()}, and the higher grade noted with an asterisk{*}. Only the higher grade’s quality points are used to calculate the grade point average. All final grades, including those repeated remain a permanent part of the student's record.

Academic Progress
Gwynedd Mercy University is dedicated to the academic progress of every student. To be considered in “good academic standing” the following criteria must be met:

Students whose total credits (transferred and earned) are 30 or fewer must maintain a minimum cumulative grade point average of 1.80.

Students whose total credits (transferred and earned) are greater than 30 must maintain a minimum cumulative grade point average of 2.00.

Students should refer to individual School academic progress policies for any additional academic requirements.

The computation of the cumulative grade point average does not include challenge examinations, CLEP, Prior Learning Experience (PLA), developmental courses, or transfer credits. Only credits earned at Gwynedd Mercy University are included in the computation of the cumulative grade point average.

Probation and Dismissal
A full-time or part-time traditional student whose cumulative grade point average falls below the required minimum (see description under “Academic Progress”) during either the fall or spring semester will be placed on academic probation for the next full-time semester (either Fall or Spring).
Students will be notified in writing if they are on academic probation by the Office of Academic Affairs after a review by the Dean’s Council. Students on academic probation will be permitted to register for a maximum of 14 credits. A student on probation is not in good academic standing and is, therefore, not eligible to participate in major extracurricular activities, including intercollegiate athletics.

Any student who has been on academic probation may not be placed on academic probation for a second consecutive semester. By the conclusion of the probationary semester, students are expected to have achieved the minimum acceptable cumulative grade point average. Otherwise, they will be academically dismissed from the University by the Vice President for Academic Affairs. An exception for one additional semester of academic probation may be granted to students who demonstrate significant academic progress, as determined.

If, at any time, a full-time or part-time student’s cumulative GPA falls below 1.0, they are subject to immediate dismissal. Students who receive notification of dismissal from Gwynedd Mercy University may be given the option to appeal on the basis of extenuating circumstances. The appeal must be in writing, should outline the reasons for the student’s poor academic performance and the strategies the student will use to improve their academic standing, and must be submitted by the date stipulated in the dismissal letter. The appeal is directed to the Vice President for Academic Affairs who will present it to the Appeals Committee consisting of the Dean’s Council, the Dean of Students, and appropriate faculty and staff. The Appeals Committee will review the appeal and determine, based on the likelihood a student can achieve good academic standing the next semester, whether or not the student may return to Gwynedd. If a student is readmitted they will return on probationary status, and the Appeals Committee reserves the right to set conditions on which the student may return. These conditions may include, but are not limited to, a reduced course load, a revised course schedule, mandatory meetings with an academic coach, and mandatory class attendance. Students are generally allowed only one opportunity for appeal during their tenure at Gwynedd Mercy University.

Students who receive notification of dismissal without the right to appeal, or whose appeal is denied are immediately dismissed from the University. Dismissal is typically binding for one calendar year. After one year, students interested in returning to Gwynedd, may apply for readmission to the University. The School Dean will evaluate the readmission application for approval. Readmission is not guaranteed.

**Accelerated and Non-term Programs (GPS, ABSN)**

Students who fall below a 1.8 or 2.0 respective of their total credits (transferred and earned) will be placed on Academic Probation for the following term (terms are defined as Fall, Spring and Summer). Students who do not bring their GPA above the minimum threshold by the completion of the following term may be academically dismissed. Students on academic probation may not concurrently enroll in more than a single course. Undergraduate students enrolled in the School of Graduate and Professional Studies who earn a grade of F in any course or a grade less than C in a required course within the major, regardless of cumulative GPA, will be subject to Academic Warning. If the course in which the student earned an unsatisfactory grade is a curriculum requirement it must be repeated at the next available opportunity. Failure to pass a repeated course or earning a grade below a C in a repeated course within the major is grounds for dismissal.
Academic Program Dismissal
Each degree program stipulates satisfactory minimum grades with regard to its own major and certain general education courses. See more specific details of program degree requirements in the course listing section of each academic area. Should a full- or part-time student fail to meet these program-specific grade requirements, the Dean of the School or Coordinator of the Program in which the student is matriculated may dismiss the student from the program. Students who are dismissed from their program of study under these conditions, but who have a satisfactory cumulative grade point average based on the University’s policy of Academic Progress, may continue their studies (full or part time) if they are accepted into University Studies or another degree program by the Dean or Chairperson of that program.

Students who have more than 60 credits may be enrolled in the University Studies program for no more than two consecutive semesters before declaring a major. If, after two semesters in University Studies, a student is not accepted into a major, the student may continue as a non-matriculated, part-time student.

Off-Campus Credit Approval
Students, once matriculated, are expected to complete all course work at Gwynedd Mercy University. Approval to take courses at another regionally accredited college or university will be granted to students in good academic standing only if special or mitigating circumstances exist. No off-campus courses will be permitted during the student’s last semester prior to graduation unless a course is required for graduation and not offered at Gwynedd Mercy University. If a student is required to repeat a course, the repeated course must be taken at Gwynedd Mercy University.

Credits for approved courses taken at another regionally accredited institution will be transferred upon successful completion of the course with a grade of C (2.00) or better and upon receipt by the Registrar’s Office of an official transcript from the other institution. Students should confer with their advisor, as some Schools within the University may require a higher grade for credit transferability. Students who have earned and/or transferred 60 or more credits toward a bachelor degree may request off-campus courses only at regionally accredited baccalaureate-granting institutions.

Students must submit a completed “Course Off Campus” form (found on the Registrar’s Office website) to the Office of Academic Affairs prior to registering for the course(s) at the other institution. The University will not accept transcripts or apply credits for courses taken off campus that were not approved by all required parties in advance.

Application for Graduation
All students must submit an application for graduation during the semester prior to graduation to the Registrar’s Office (see “Academic Year” for deadline). Application forms are available in the Registrar’s Office, in the Office of Academic Affairs, and online at www.gmercyu.edu/registrar/. Deadlines for application are published in the academic calendar. Submission of an application does not guarantee graduation. Late submission may postpone graduation and/or receipt of a diploma.

Transcripts
See the Registrar’s Office website for details regarding transcript requests. There is a fee for each transcript. Transcript requests made during the periods of commencement, registration or examinations may be delayed. A student who has not satisfied all financial obligations in any department of the University will not be able to receive transcripts.

Concurrent Pursuit of Two Bachelor Degrees
A student who has been accepted into one bachelor degree program and wishes to earn a bachelor degree in a second area of study must have a minimum grade point average of 3.0. The student is
required to make a formal request through the Office of Academic Affairs. Students will be required to complete a minimum of thirty (30) credits beyond the minimum specified credits for the first degree in addition to all general education courses required by both degrees. General education courses completed in the primary bachelor degree do not need to be repeated. The student must meet all minimum grade requirements of both degree programs. Upon meeting the degree requirements for both bachelor degrees, two degrees will be awarded to the student.

**Second Degree Program**
A student who has earned a bachelor degree from a regionally accredited college or university and is accepted into an associate or bachelor degree program at Gwynedd Mercy University enters the degree through the "second degree" program. The Dean will complete an evaluation of previous college work, and a curriculum will be tailored toward the needs of the student. A minimum of thirty (30) credits at Gwynedd Mercy University will be required of all students who are accepted through this program. Student will be awarded 95 credits of advanced standing credits. Such students will be subject to academic dismissal.

The student would be required to complete all courses deemed necessary by the Dean of the School or Chairperson of the major, as well as any general education courses that are listed as requirements for eligibility of graduation.

**Double Major Program**
Students with a minimum cumulative grade point average of 3.0 at the end of their first semester of the sophomore year or thereafter may elect to pursue a second major in addition to their specific degree major. The permission of the Vice President for Academic Affairs and the agreement of the Dean(s) must be obtained in writing. The student is responsible for all major courses as will be specified by the Dean of the second major area of study.

**Minor Program**
Students interested in earning a minor should consult the specific section of the catalog that pertains to that subject. Students must check with the appropriate Deans and complete a “Change of Major/Minor” form which is submitted to the Registrar’s Office. Forms can be obtained on the Registrar’s Office website.

**Pre-Law Option**
Gwynedd Mercy University offers a Pre-Law Option. This option is given in conjunction with the following majors: history, psychology.

The student receives the bachelor degree in his or her major field, but the special pre-law component prepares the student for the rigors of law school. The pre-law component is described under each participating major.

**Online Consortium of Independent Colleges and Universities (OCICU)**
Gwynedd Mercy University is a participating Member of the Online Consortium of Independent Colleges and Universities (OCICU). The OCICU is a virtual academic consortium in which member institutions collaborate in sharing online, credit-bearing courses and programs. As a member, Gwynedd Mercy University makes available to its students, online courses offered by other members. Our students may register for an online course offered by the OCICU after consulting with their adviser and receiving the necessary approvals. Students who take an OCICU course are billed through the home institution at the prevailing per credit rate. Information about this program and application forms are available in the Registrar’s Office.

**Member of the South Eastern Pennsylvania Consortium for Higher Education (SEPCHE)**
SEPCHE is a consortium of eight independent higher education institutions in the
Greater Philadelphia region who engage in a collaborative approach to the challenges of higher education and work together to promote quality and efficiency of academic programming, student access, faculty development, institutional operations and community outreach, through sharing of a range of multi-functional activities, services and information. Other members of SEPCHE are: Arcadia University, Cabrini College, Chestnut Hill College, Holy Family University, Immaculata University, Neumann University and Rosemont College.

The SEPCHE Cross Registration Program is designed to provide increased educational access to all eight-member institutions for students at any member school. The SEPCHE schools include: Arcadia University, Cabrini College, Chestnut Hill College, Gwynedd Mercy University, Holy Family University, Immaculata University, Neumann University and Rosemont College. Through this program, students may take courses that might not be available at their home campus and experience the varied and diverse resources on member campuses across the Delaware Valley. The website is: www.sepche.org

Cross Registration Guidelines

Who Can Participate -- Full-time undergraduate matriculated students paying full-time tuition at any SEPCHE member institution may register for up to two undergraduate courses a year at any other SEPCHE member institution provided they have fulfilled any prerequisites stated, that there is space available in the course and that the course or its equivalent is not given at the home institution in the same semester. Students must have completed at least one year as a full-time student at their home campus before taking courses through cross registration. Registration applications are completed by the student and his/her advisor and then submitted to the Assistant Registrar.

The cross registration program functions only in Fall and Spring semesters. Cross registration is not available for accelerated or weekend courses, independent study, tutorials, internships, practicum field experience, student teaching experiences, private music lessons, or per credit hour or graduate students.

Scheduling - Students must adhere to the registration policies and deadlines of the host institution, including those for adding and dropping courses. Students are responsible for adjusting to differences in academic schedules and calendars.

Grading Practices - Grades received in courses taken through SEPCHE Cross Registration are calculated in the home campus grade point average. If there are differences in grading schemes, that of the home institution will prevail.

Credits - Credits earned count toward graduation requirements on the home campus. Substitution of courses taken through cross registration for required courses in a major (or minor) requires special approval by the major (or minor) department or division.

Tuition and Fees –
No tuition or fees will be charged by the host institution, except for special or extra fees that are part of courses taken, such as lab fees. The student is responsible for these fees, which will be collected by the home institution.

Other Information - Students are responsible for transportation to and from the host campus. There will be no additional charge for parking for SEPCHE students on the host campus. Students must follow normal procedures of the host campus to obtain campus identification and parking permit.
How to Cross Register:

1. Check the host institution’s web site course listing or contact the SEPCHE representative in the home Registrar’s Office to determine if space is available in the course(s).
2. Fill out a separate SEPCHE Cross Registration form (available in Registrar’s Office) for each course.
3. Get appropriate approval signatures from your advisor and/or division/department chair or dean.
4. Take the cross registration form(s) to the SEPCHE contact in the Registrar’s Office.

Evaluation of Transfer and Other Credits

Courses completed more than ten years (7 years for science courses) from a student’s date of acceptance are judged on a case-by-case basis by the Dean of the School the student is entering as to their applicability in fulfilling current program requirements of that School. This general University provision does not replace existing provisions of a School that are more restrictive in nature.

Every student is given individual attention at Gwynedd Mercy University. Transcripts from other colleges and universities are evaluated by the Registrar’s Office, in consultation with the Dean to determine Gwynedd Mercy University’s course equivalencies for appropriate transfer credits.

All transfer students are required to earn a minimum of thirty (30) credits at Gwynedd Mercy University for an associate degree and 45 to 50 credits, as defined by each school, at Gwynedd Mercy University for a bachelor degree. This credit requirement does not change regardless of the number of credits accepted in transfer. Additionally, at least half of the credits required for the major must be completed at Gwynedd Mercy University. The number of credits in the major varies within each degree program.

Official transfer evaluations will not be completed for students entering the university studies program. The Registrar’s Office may provide, upon request, unofficial notations indicating which courses might be transferred to Gwynedd Mercy University. These unofficial notes are in no way a contract with the student and will only be used as a guide for registration.

The following criteria will be used in the evaluation of transcripts submitted to Gwynedd Mercy University:

1. A minimum grade of "C" or better from a regionally accredited college or university.
2. Developmental courses which carry credit do not satisfy requirements within the major or general education component of a degree program. These courses do not count toward graduation.
3. No transfer credits may replace the Signature Seminars.
4. Grades of "P" (Pass) or "S" (Satisfactory) are generally not acceptable for transfer (except under the "second degree program"). Some Schools do allow for exceptions to this policy; each is evaluated on an individual basis.
5. Challenge examinations carrying a grade of "P" or "S" completed at another regionally accredited institution may be accepted in transfer within the general education or major component of a degree program; each is evaluated on an individual basis.
6. Training and experience within a branch of the military that has been evaluated for credit by the American Council on Education may be acceptable for transfer credits.
7. Gwynedd Mercy University participates in the Advanced Placement Examination Program (AP) and the College Level Examination Program (CLEP). These credits
are considered Gwynedd Mercy University credits and are processed through the Registrar’s Office.

8. Although course titles and credits earned appear on Gwynedd Mercy University’s Transcript, courses accepted in transfer are not included in the computation of Semester or cumulative grade point averages.

9. Students may petition to have courses accepted in transfer that were not accepted as a result of an initial evaluation. Usually, course descriptions and course outlines would need to be forwarded by the student for any course in question. In all cases, the submitted material is reviewed by the Registrar’s Office and by faculty within the subject area of the courses in questions.

10. Transcripts received from institutions outside of the United States must be evaluated (course-by-course) by the (WES) World Educational Services of New York. Gwynedd Mercy University will generally follow the recommendations of this service. Individual Schools within the University reserve the right to refuse any credit recommendations Made by World Educational Services.

11. The Registrar’s Office will evaluate only official transcripts accredited by regional Accreditation for all schools attended. This official evaluation is done after student is accepted.

12. The Registrar’s Office is responsible for the official transfer of credit. Official transcripts from ALL colleges attended must be on file at the time of admission. Official transcript evaluation is processed after admission to the University. “Issued to Student,” unofficial transcripts are not use for transfer evaluation

Credit by Evaluation
In order to recognize knowledge and experience attained through non-formal and non-traditional approaches to learning, the University utilizes several evaluation methods. Qualified students, with approval, may take examinations for academic credit as applicable to a given program of study. Students must arrange for non-traditional testing by obtaining an approval form signed by the Dean of the School for their major as well as from the Dean of the School for the course. Demonstrated evidence of “out-of-school” knowledge or experience is considered in the approval decision. Students must complete testing at least one full semester prior to graduation. Unless authorized, thirty (30) Gwynedd Mercy University credits must be earned before credits are posted. Open electives cannot be fulfilled through testing modes.

Students may not earn credit for any course which they have audited or for which they have received a grade. Credit by Evaluation cannot be used to replace a course previously completed course. A student who fails a challenge must enroll for the regular course in order to complete graduation requirements. Posting charges are listed in the catalog under Expenses.

If the applicant is successful, the appropriate dean will notify the Vice President for Academic Affairs who will arrange for proper credit to be entered on the student’s transcript.

CLEP
The College Level Examination Program, offered through the College Board, provides a standardized testing program for a variety of courses. Prior to taking a CLEP exam, the approval form must be secured. CLEP credit is not applied to open electives. Appropriate passing scores are determined by Gwynedd Mercy University. After review of the score, appropriate signatures secured through the Dean and the Vice President for Academic Affairs, and payment through Student Billing, the credit is posted on the permanent record. Payment and posting must be one semester prior to graduation.
Challenge Examination
Departmental challenge examinations may be given in the event that an approved examination is not available. The examination may include written, oral, laboratory tests or a combination of these; it will be significantly comprehensive to establish that the student possesses essentially the equivalent knowledge and skills as that of a student who successfully completed the course. After approval to take the challenge is granted, completing the exam successfully and payment is made, the credit is posted on the transcript. Payment and posting must be one semester prior to graduation.

Prior Learning Assessment
This is a formal process and procedure for the granting of credit for life experience. Students may apply for prior learning credits at any time prior to their last semester before graduation (for The School of Graduate and Professional Studies students, prior to taking the final 15 credits); however, students must have earned at least 30 credits at Gwynedd Mercy University before credits will be applied to the transcript. No credit for life experience can be applied to courses required as part of the Social Work Degree (BSW) program. There is a non-refundable per-credit application fee.

Application for prior learning includes the submission of a detailed portfolio that demonstrates the college-level learning. The learning experience demonstrated and verified through prior learning assessment (PLA) must have the academic equivalence of college-level learning. Developmental, remedial, or self-help courses are not comparable to college-level courses. Portfolios are evaluated by trained faculty assessor, who determine the number of credits awarded. Decisions concerning credit awarded will be communicated to the student by the dean of the program in which the credit request is housed.

Nursing Portfolio
The School of Nursing offers qualified registered nurses the opportunity to record professional knowledge and competence that reflects content included in a selected bachelor nursing course. A student must meet with the appropriate nursing faculty member to discuss eligibility, the procedure and complete the approval form for the portfolio process. Portfolios are submitted prior to the semester in which the selected course is regularly scheduled. A total of 12 credits towards BSN nursing credits may be earned through this method. Following completion of requirements, payment and thirty (30) credits earned at the University, portfolio credit will be recorded. Contact the School of Nursing for further details.

Independent Study
Opportunity to do creative independent work in a discipline offered at the University but not available for courses offered in the curriculum is provided for students who have a minimum cumulative average of 3.0.

A student who desires to engage in an independent study project must secure the sponsorship of a faculty advisor. The student must prepare a program prospectus, which states the objective of the study, the method to be used in performing the study, and the means by which the study will be evaluated. A copy of this prospectus, signed by the advisor and by the Dean must be in the Office of Academic Affairs for approval prior to registration.

The number of credits received for independent study must be counted in the maximum credit load allowed (18 semester hours). A grade will be assigned by the advisor upon completion of the project and the student will receive the academic credit agreed upon if the project is satisfactorily performed.
Course Withdrawal

Students who desire to withdraw from one or more courses may do so within the course withdrawal period. Students who do not officially withdraw from a course through their School will earn the appropriate grade based on the quality of their academic performance during the course and the grading policies within the course syllabus.

Any student who seeks to withdraw from courses within the course withdrawal period must submit a Course Withdrawal form to the Registrar’s Office. The Course Withdrawal form can be found in the Campbell Solution Center or on the Registrar’s Office website. The deadline for course withdrawal is published each semester/session in the Academic Calendar (see “Academic Year”) and may be obtained through the Registrar’s Office, on the Registrar’s website or in the Office of Academic Affairs.

Students who request a course withdrawal after the end of the withdrawal period must submit the Course Withdrawal form in addition to the appropriate documentation that supports their request to the School Dean for approval. Students are financially responsible for all courses from which they withdraw.

Students in the School of Graduate and Professional Studies must follow the policy listed under Course Add, Course Drop and Course Withdrawal – The School of Graduate and Professional Studies.

Concurrent Enrollment Policy for the School of Graduate and Professional Studies

Because of the intensive nature of the University’s accelerated courses, concurrent enrollment in courses at the University or another institution while enrolled in the School of Graduate and Professional studies is highly discouraged. However, under certain circumstances and on a case-by-case basis, students may request approval to concurrently enroll in a second course. Written permission from the Program Director and the Dean is required in order to enroll concurrently in more than two courses. Concurrent or overlapping enrollment in two courses in prohibited for new students or students on Academic Probation.

In order to request taking two concurrent courses (“doubling-up”) an undergraduate student must meet the following criteria:

- Must successfully complete, with a 3.0 or above, six credits in the School of Graduate and Professional Studies.
- Must earn a C or better in all major courses
- Students must earn a C or better in both enrolled courses or they will not be permitted to double up again any time during that academic year
- Undergraduate students are not allowed to enroll in a Gwynedd Mercy University signature course or capstone course and another course at the same time

Course Add, Course Drop and Course Withdrawal – The School of Graduate and Professional Studies

The pace of an accelerated degree program requires students to maximize opportunities to learn. Any breaks in attendance or schedule changes that will cause a break may change the expected graduation date of the student’s program and financial processing of student account. The policy is intended to encourage students to make choices that support their educational goals and to remain compliant with Title IV Federal Regulations.

Students must discuss all potential schedule changes with their Academic Advisors, the Financial Aid Office (if applicable), and the Bursar to ensure appropriate schedule and fund adjustments.
Adding a Course in the School of Graduate and Professional Studies (on ground & online):

- Student must submit a Course Drop & Add form or individual plan to their Academic Advisor.
- A registration deadline for adding a course will be enforced. To make sure the student is prepared for the course, the Course Drop & Add form or individual plan must be received one week before the course begins.
- All email requests must come from student’s GMERCYU email.
- Student will not be permitted to take more than 1 course per five-week term unless they meet certain criteria (see Concurrent Enrollment Policy for details).
- If student has a HOLD on his/her account, request will be denied, student will be informed via GMERCYU email, and student will not be permitted to attend class.

Dropping an On Ground Course in the School of Graduate and Professional Studies:

- In order to drop a course, the student must submit the Course Drop & Add form to their Academic Advisor prior to the first date of class. This form will explain to the student the consequences surrounding this type of schedule change.
- All email requests must come from student’s GMERCYU email.
- If a request is made to drop a course after the first class session, it will be treated as a WITHDRAWAL (see Withdrawing from an On Ground Course below).
  - 1 week drop period for new students: A new student must communicate to their Academic Advisor via GMERCYU email during the 1st week of their 1st course (prior to the 2nd class session) if they no longer wish to be enrolled in their program.

Withdrawing from an On Ground Course in the School of Graduate and Professional Studies:

- Students must submit a Course Withdrawal form to their Academic Advisor in order to initiate the withdrawal process.
- The student will receive a “W” grade and charges will be adjusted according to the Bursar’s Office Refund Policy.
- Students will not be permitted to withdraw from a course after the third night of the course.
- If request is submitted after the policy deadline, withdrawal request will be denied. The student will be informed via GMERCYU email and a final grade for the course will be submitted by instructor.

Dropping an Online Course in the School of Graduate and Professional Studies:

- In order to drop a course, students must submit a Course Drop & Add form to their Academic Advisor before the first night of class.
- Online courses open at 6pm on the Monday of the first week of a session. This is considered the course start date. The Monday of the first week of a session, prior to 6pm EST, is the deadline for dropping from an online course.
- All email requests must come from the student’s GMERCYU email.
- If a request is made to drop a course after the first class session, it will be treated as a WITHDRAWAL (see Withdrawing from an Online Course below).
  - 1 week drop period for new students: A new student must communicate to their Academic Advisor via GMERCYU email during the 1st week of their 1st course (prior to the 2nd Monday at 6pm) if they no longer wish to be enrolled in their program.

Withdrawing from an Online Course at GPS:

- Students must submit a Course Withdrawal form to their Academic Advisor in order to initiate the withdrawal process.
- The student will receive a “W” grade and charges will be placed according to the Bursar’s Office Refund Policy.
- The Monday of the third week of a session, prior to 6pm EST, is the deadline for withdrawing from an online course.
If request is submitted after the policy deadline, withdrawal request will be denied. The student will be informed via GMERCYU email and a final grade for the course will be submitted by instructor.

All email requests must come from the student’s GMERCYU email

The School of Graduate and Professional Studies Course Withdrawal Refund Policy
Drop prior to the first day of class - 100%
Withdrawal after one (1) class session - 90%
Withdrawal after two (2) or more class sessions - None

There is no refund for unauthorized withdrawal. The date of withdrawal is determined from the time the Office of Academic Advising receives the withdrawal form.

Withdrawal from University
All students who wish to withdraw from the University must complete a University Withdrawal form/Program Withdrawal form and submit to the Dean of their School for approval. Students must understand that a withdrawal is a permanent decision. Students who withdraw from the University will need to re-apply to the University should they wish to return after two semesters (Gwynedd Valley campus and ABSN program) or one calendar year (The School of Graduate and Professional Studies). Once the course’s term begins, students are financially responsible for all courses from which they withdraw. If applicable, the official date when a student withdraws from the university (designated by the date the student notifies the university of the decision to withdraw) is the basis to determine refunds or tuition adjustment.

Students who request a complete withdrawal from the University after the end of the withdrawal period must submit the University Withdrawal form/Program Withdrawal form with appropriate documentation that supports their request to their School Dean. The final decision will be made by the Provost and Vice President for Academic Affairs in consultation with the School Dean.

Grade Reports
Grade reports are available using the University's Self Service online features at the end of each semester/session. If a student believes that an incorrect grade has been reported for a particular course the student must contact the instructor within 30 calendar days from the last day of the final examination period of the semester/session during which the course was completed.

Grading System

</table>

The use of plus and minus indicates performance levels between those suggested by these characteristics.

A: Excellent (4 quality points per credit hour)
The grade A reflects exceptional interest and mastery of subject matter; the student has displayed initiative and creativity, as well as superior insight in analyzing problems and synthesizing subject matter; he or she manifests exceptional ability in integrating and applying this knowledge to other disciplines.
B: Very Good (3 quality points per credit hour)
The grade B evidences intelligent fulfillment of course requirements; the student has demonstrated a marked ability to communicate and apply more than merely the basic elements of a course; his or her initiative reveals unusual ability to generalize about course material and displays a marked degree of independence.

C: Satisfactory (2 quality points per credit hour)
The grade C indicates a satisfactory grasp of course content; the student can apply and express basic concepts intelligibly and has shown no measurable deficiency in meeting requirements of the course work. A grade of C-, or below is not acceptable in the major. (Refer to specific School requirements.)

D: Passing Grade (1 quality point per credit hour)
The grade D indicates only passable achievement in course work and indicates areas of deficiency in basic course content; the student has fulfilled the minimum requirements of the course (Refer to specific School requirements.)

D-: Minimum Passing Grade (.67 quality point per credit hour)
The grade D- indicates only a minimal passing achievement in course work and indicates areas of deficiency in basic course content, this student has fulfilled the absolute minimum requirements of the course, thus making a failing grade unwarranted (Refer to specific School requirements.)

F: Failure (0 quality points per credit hour)
The grade F indicates deficiency in so many areas of a course that the student’s understanding of the course content does not meet minimum requirements. The course must be repeated before credit can be obtained.

I: Incomplete
Students may petition their instructor for an extension beyond the normally scheduled semester/session final examination because of illness or another serious reason (the nature of certain courses prohibits a grade of incomplete). If permission is granted, the instructor will submit a grade of "I". Instructors must complete the “Incomplete Grade Contract” and submit it to the appropriate Dean. Forms must be signed by both the instructor and the student. The work must be completed within 30 calendar days from the last day of the final examination period. Otherwise a grade of “F” will be recorded. No extension will be granted beyond 30 days unless approved by the instructor and the Vice President for Academic Affairs prior to the end of the 30-day extension. If an extension is granted, the instructor must complete the “Incomplete Grade Extension” form, along with the student and submit it to the Vice President for Academic Affairs. This form can also be found on the Registrar’s Office website. Once a final grade is achieved, the instructor will submit a “Change of Grade” form to the Office of Academic Affairs.

W: Withdrawn
A grade of W is recorded for students who withdraw from a course by the published withdraw period with the permission of the Dean or advisor of their school. If a student ceases to attend class but does not officially withdraw, a grade of F will be recorded for that class. Please refer to the course withdrawal policies in this catalog for additional information.

P: Pass/Fail Courses
Junior and senior students are permitted the option of electing a pass/fail grading in courses designated in their curriculum as "open elective."

The conditions of the pass/fail policy are:
1. The pass/fail is limited to junior and senior level students.
2. The student may exercise his or her option in a course that would fill an open elective.
3. The student declares his or her intent of the pass/fail option at registration or no later than the end of the semester/session drop/add period.
4. The professor will be informed by the student that he or she has exercised the pass/fail option in the course.

5. The letter grade “P” is listed on the transcript but is not calculated in the quality point average. These credits are not included in the minimum 12 credits required for the Dean’s List.

AU: Audit
Courses may be audited with an advisor’s consent. Such courses must be indicated with an AU in the credit hour column on the registration card. The student who has been granted audit status will not be responsible for the assignments or examinations required for the course. Although no credit or grade is received, the same tuition and fees are charged for an audit as for a credit course. Alumni and senior citizens pay only the registration fee when auditing a class. Students are not permitted to change a status of a course from “audit” to “credit” or “credit” to “audit” after the end of the drop/add period.

Academic Alert
The University employs electronic academic alert systems, for traditional Gwynedd Valley students, to notify students who may be or become academically at-risk.

Grade Point Average
This average is determined by dividing the total number of quality points by the number of credit hours attempted. Credit hours for all grades earned at Gwynedd Mercy University are included in the calculation.

Examinations
Final examinations, for courses that require them, are held at the end of each semester/session unless exceptions are granted by the Vice President for Academic Affairs. No student is excused from these examinations. All examinations are held on the dates and in the places designated on the final examination schedule. A student who for illness or another serious reason is absent from a final examination may request permission from the Dean for rescheduling of his or her examination. If an examination has not been made up within four weeks, a grade of “F” is recorded for the course.
Academic Awards and Honors

Dean's List
Full-time students can be eligible for the Dean's List. Full-time students who have a semester grade point average of 3.5 and no grades below B qualify for the Dean's List for that semester. Credits that carry a pass/fail grade will not be considered part of the minimum full-time load. Students enrolled in the School of Graduate and Professional Studies may be full-time students but will only be eligible for Dean's List if enrolled in 12 or more credits that begin in the Fall or Spring terms. There is no Dean's list for summer enrollment.

Program Honors
Program honors are bestowed on graduating baccalaureate students who have achieved distinction in their major. In order to merit these honors, a student must attain an average of 3.5 in the major and must also receive the recommendation of the Dean.

Honors at Graduation
Baccalaureate students who have achieved academic excellence throughout their respective programs are eligible to receive a degree with honors at graduation. Candidates for the distinction *cum laude* must have attained a cumulative average of 3.5; for *magna cum laude*, 3.7; for *summa cum laude*, 3.9. Students enrolled in the associate degree programs may graduate *with distinction* if they attain a cumulative grade point average of 3.5
Honor Societies
Students of Gwynedd Mercy University are eligible for membership in the following honor societies:

1. **Sigma Phi Sigma**, The National Mercy Honor Society. This society is dedicated to the ideals of Catherine McAuley: fidelity, scholarship and service. Freshmen, sophomore and juniors with a minimum 3.2 grade point average, evidence of upholding the mission and values of the University and have a clear commitment of service to the University and/or their community may apply.

2. **Kappa Delta Pi** is an international honor society in education. It is the oldest and largest honor society in education. Invitations to join are based on academic achievement, a commitment to education as a career and a professional attitude that assures the member’s steady growth in the field of education.

3. **Lambda Iota Tau** is an international honor society for students of literature. Its purpose is to reward and encourage excellence in literary scholarship in colleges and universities. To be eligible, a student must major or minor in a department offering literature and all courses prerequisite thereto, and rank scholastically in the upper 35 percent of his or her class.

4. **Phi Alpha Theta** is the International History Honor Society. Gwynedd Mercy University’s chapter, Tau Omicron, was installed on October 29, 1972. To recognize and encourage excellence in the study of history, the society honors students who have earned B or better in all history courses and maintained at least a 3.0 (B) quality point average.

5. **Sigma Zeta** is a national science and mathematics honor society. Beta Delta is the Gwynedd Mercy University local chapter. The purpose of this society is two-fold: 1) to encourage and foster the attainment of knowledge of the sciences and mathematics; 2) to recognize the attainment of high scholarship among those qualified for membership in this society.

6. **Iota Kappa Chapter, Sigma Theta Tau**, International Honor Society of Nursing, Inc. The purposes of this international honor society are to recognize and foster in nurses superior achievement, the development of leadership qualities, high professional standards, creative work, and commitment to the ideals of the nursing profession.

7. **Alpha Sigma Lambda** is the national honor society for returning adult students. Its purpose is to recognize and reward the hard work, motivation, academic success, personal growth, and leadership qualities of its inductees and is housed in the Office of Academic Affairs.

8. **Lambda Beta** is the national honor society for the profession of Respiratory Care. This honor is conferred by the program faculty to students that exemplify superior academic achievement and exceptional professional growth and leadership.

9. **Alpha Eta** is the national honor society for the allied health professions. The purpose of the honor society is the promotion and recognition of significant scholarship, leadership and contributions to the Allied Health Professions. Students who have a GPA of 3.5 overall and 3.0 in their major are nominated by the faculty for induction into the society.

10. **Lambda Nu** is a national honor society for the radiologic and imaging sciences. Its objectives are to: foster academic scholarship at the highest academic levels, promote research and investigation in the radiologic and imaging sciences and recognize exemplary scholarship. Students who have a GPA of 3.5 overall and 3.0 in their major are nominated by the faculty for induction into the society.

11. **Psi Chi**, the international honor society in Psychology, founded in 1929 for the purpose of encouraging, stimulating and maintaining excellence in scholarship and advancing the science of psychology. Psychology majors or minors with a minimum 3.0 grade point average may be invited to join.
12. **Alpha Phi Sigma** is the international honor society for graduate and undergraduate student in the field of criminal justice. Founded in 1942, this society recognizes students for academic excellence and community service. Students with a 3.2 GPA overall and within the major may be invited to join Gwynedd Mercy University’s Kappa Delta Chapter.

13. **Sigma Beta Delta** is the international honor society for business, management, and administration. The purposes of Sigma Beta Delta are to encourage and recognize scholarship and achievement among students of business, management, and administration, and to encourage and promote personal and professional improvement and a life distinguished by honorable service to humankind.

14. **Tau Upsilon Alpha** is the program of the National Organization for Human Services (NOHS). The purposes of the Society are to honor academic excellence; to foster lifelong learning, leadership, and development; and to promote excellence in service to humanity. Human Services majors and minors with a GPA of 3.25 may be invited to join.
Keiss Library and Learning Commons

Keiss Library and Learning Commons provides students with the resources and assistance they need to be successful. Resources include large book and audiovisual collections, access to over 32,000 full-text electronic journals through subscription databases, as well as subscriptions to periodicals in print. Professional librarians are available during all library hours to help students use the available resources. Instruction is given to both individuals and to classes.

The library webpage (GMercyU.edu/library) provides access to the library’s catalog, full-text online resources, selected websites, and information about library hours and policies. All resources can be accessed from any available internet connection. Those users off-campus are required to log-in using their GMercyU network username and password in order to access the databases and newspapers.

The Gwynedd Mercy University librarians staff the reference desk whenever the library is open and are available to assist users in developing research strategies, using online resources and general reference. Assistance is also available during library hours via text, IM, email and telephone. When the library is closed, reference assistance is available 24/7 via a link to AskHerePA.

A current GMercyU student ID is required to borrow materials. Students may print from computers in the library. Each student is allotted 300 free prints per semester and after that number is reached, additional prints may be purchased at the Campbell Solution Center. Student IDs will be bar-coded the first time they are used. Books and audiobooks circulate for three weeks to students. Videos of feature films circulate for seven days and reserve materials, most media (videotapes, art prints, DVDs, etc.) must be used in the library. Arrangements can be made for use of non-circulating media for class presentations. Contact the library circulation desk at ext. 21474 for assistance.

The Library is fully wireless. Students bringing their own laptops can connect to the campus network. In addition, laptops are available for use in the library and may be borrowed using a current GMercyU ID. Lost or damaged laptops (or any laptop peripherals) will be billed at replacement cost.

SEPCHE member libraries provide borrowing privileges to the students, faculty, and staff of all eight SEPCHE institutions: Arcadia University, Cabrini College, Chestnut Hill College, Gwynedd Mercy University, Holy Family University, Immaculata University, Neumann University, and Rosemont College. A current GMercyU ID is all that is required to borrow from any SEPCHE library. The SEPCHE collaboration makes available nearly a million volumes, scores of electronic databases, and several special collections on various subjects. Library hours at SEPCHE schools vary, but professional librarians are generally available to assist users. The combined holdings of all SEPCHE libraries can be searched using WorldCAT from the library webpage.

Through its membership in several other consortia, Keiss Library and Learning Commons can either borrow needed materials from another library or can give a student a letter of introduction that will allow direct borrowing from more than 45 other academic libraries in the Philadelphia area.

Contact the library circulation desk at ext. 21474 for more information about these services.

The library has a book scanner and photocopier available for student use. There is no charge for using the book scanner, but photocopies are 15 cents per page.

For assistance or more information, call ext. 21474 (Circulation Desk) or ext. 21484 (Reference Desk) or check the library webpage at GMercyU.edu/library.
Academic Advising
Academic advising is a vital component of a student’s academic and personal success in college and beyond.

a. Traditional students who matriculate into a degree program are advised by full-time faculty in their major.

b. University Studies students work with professional academic advisors in the Academic Resource Center.

c. Students enrolled in accelerated undergraduate degree programs work with professional academic advisors in the School of Graduate and Professional studies.

Academic Advisors are identified on students’ course schedules in Self-Service.

The Academic Resource Center (ARC)
The Academic Resource Center (ARC), located in the Keiss Library Learning Commons, provides academic support for current Gwynedd Mercy University Gwynedd Valley students, faculty and staff. The ARC offers peer tutorials for individuals and groups, academic coaching, academic workshops, and mathematics modules. The ARC also provides testing accommodations for students registered with Accessibility Services, administers the University’s English and mathematics placement assessments, and provides professional academic advising for University Studies students, as well as those considering a change of major. ARC professional academic advisors guide students through selecting appropriate courses, creating an academic plan, and exploring academic interests and programs. In addition, they introduce students to the many helpful campus resources designed to support their learning. Advisors are available by appointment and walk-in. Call 267-448-1370 to schedule an appointment or for more information.

Smarthinking
Students enrolled in academic programs through the School of Graduate and Professional Studies or in the Accelerated BSN program (ABSN) have access to free academic support through Smarthinking. Smarthinking provides online tutoring in a variety of subjects, as well as a Writing Center. Tutoring is available in most academic subjects. Students can choose a live session or may choose to schedule an appointment with a tutor. Tutoring availability varies by subject but all subjects have some evening and weekend availability. The Writing Center offers review and feedback on papers. Students must allow a minimum of 24 hours for paper review. Students access Smarthinking through their course in Blackboard.

Academic Programs
Gwynedd Mercy University provides academic offerings ranging from associates and bachelor’s degrees to master’s degrees, post-graduate programs and certificates and doctoral degrees. The University offers courses in a traditional classroom setting as well as online and a hybrid mix of the two approaches. The University operates a main campus in Gwynedd Valley, as well as branch campuses in downtown historic Philadelphia and Bensalem, PA. Additionally, the University partners with a variety of other institutions to offer unique cross-registration and study abroad opportunities to its students.

The following sections outline the many academic programs available at Gwynedd Mercy University. For more detailed information about the University’s academic programs, including specific courses and curricular requirements, please consult the undergraduate and graduate academic catalogs.
Schools Operated by the University

School of Arts and Sciences
The School of Arts and Sciences is committed to fostering academic excellence by providing a core curriculum and degree programs in the fine arts, humanities, sciences, and social sciences that cultivate habits of mind in graduates who are actively engaged in scholarship, leadership, and service. The School offers degree programs in English, communication, history, philosophy, psychology, criminal justice, human services, gerontology, biology, mathematics, and computer information science, as well as minor programs in all disciplines and secondary education options in biology, English, history, and mathematics. The Honor Program is also a part of the School of Arts and Sciences.

School of Business and Education
The School of Business and Education prepare students to become professionals in a variety of functional areas. The Business programs build on a solid foundation in the liberal arts to enable students to enter careers in accounting, digital communication, marketing, finance, management, and sports management. The programs are committed to preparing students for careers through internships at leading regional and national companies.

The Education program prepares teachers to meet the educational challenges of the 21st Century. The undergraduate and graduate divisions of the school offer a variety of programs to meet the pre-service and in-service needs of education professionals. The teaching and learning processes and practices are changing rapidly due to research about how the brain responds to stimuli and how teachers can facilitate optimal learning experiences.

Frances M. Maguire School of Nursing and Health Professions
The Frances M. Maguire School of Nursing and Health Professions offers bachelor’s, master’s of science, and Doctor of Nursing Practice degrees. Freshmen in the nursing program experience the “profession” in the hospital environment very early in their educational career at Gwynedd Mercy University. With more than 200 regional health care affiliations, the clinical experience is always varied and first rate. Students in the bachelor’s and master’s programs can use work experience for credit through the School’s portfolio credit program. The School also offers a weekend nursing option (Saturdays and Sundays) or a full-time day option for those that already hold a BA or BS degree in another field. This program begins in the fall and is scheduled in a four-semester format. The nursing program at Gwynedd Mercy University is widely known for producing the best nurses in this region, and has been doing so for more than 50 years.

The School's Health Professions programs are cutting edge health care programs that offer real world experiences that extend beyond the traditional classroom setting. With its specialized laboratories and majors as well as the close partnerships with health care institutions and professionals, students learn to apply classroom education in clinical settings.

The Frances M. Maguire School of Nursing and Health Professions is committed to the Gwynedd Mercy University mission to combining education for professional competency with the Mercy tradition of service to society.
School of Graduate and Professional Studies
Gwynedd Mercy University understands the challenges that adult students face and can help them formulate a plan for success. The School of Graduate and Professional Studies degree programs provide a superior education solution for working adults who want the benefits of a supportive, ethics-based learning environment.

All degree programs are accelerated programs of the highest educational quality centered on earning a degree through the understanding and application of theory. In U.S. News & World Report’s 2011 edition of “Best Colleges,” Gwynedd Mercy University ranked in the first tier of its category, which is largely attributed to its high graduation and retention rates.

Face-to-face classes meet one evening per week for four hours as stipulated in state, federal and regional accrediting regulations. Online courses have no set class meeting times but do meet weekly between Mondays and Sundays, allowing students even more flexibility than the Center’s face-to-face courses. Moreover, they do follow the same regulations as face-to-face courses in regard to total instructional time.

Technology at Gwynedd Mercy University:

Computer Use Policy
The computer technology sources (lab or smart classroom facilities, hardware, software and media equipment) at Gwynedd Mercy University are provided to assist students, faculty, administration and staff in the pursuit, collection, and presentation of academic information. Because these computer technology resources are the property of Gwynedd Mercy University, their operation by individuals associated with the University should be consistent with the mission and values of the institution. (Please refer to the student handbook for the complete computer use policy of the University.)

The following technology resources are available for students:
• IT Service Desk (Help Desk) – communication and support of technical needs and requests
• Computer Labs – Six computer labs
• Smart Classrooms and Technology Enhanced Rooms – for teaching, learning and presentations
• Wireless Access – connections in common areas of each major building on campus
• Campus Network – highly available, redundant internet service providers and secure
• Emergency Notification Center – Omnilert campus text message notification for important announcements
• Blackboard – a learning management system for courses and collaboration

Computer Labs and their Descriptions
Gwynedd Mercy University offers multiple labs serving the faculty, staff, and students. These labs are managed by Institutional Technology Services with the various software and hardware. All labs have access to the Internet so that students are able to save work to their Microsoft OneDrive for access throughout the campuses.
Lab Hours
The Student Technology Center located on the main campus is open Monday through Friday from 8:00 am until 6:00 pm. Departmental labs are controlled by their individual departments and can be reserved by instructors; these labs will be unavailable during those reserved times. Labs on satellite campuses are open Monday thru Friday from 9:00 am until 9:00 pm.

Gwynedd Valley Campus

Star Schools Learning Center (*Saint Bernard Hall, Room 16*)
The Star Schools Learning Center features twenty workstations running the Windows 10 operating system, Visual Studio.NET, and Microsoft Office. This lab also features projector and a LaserJet network printer.

Natural Science & Mathematics Computer Lab (*Francis M. Maguire Hall, Room 203*) The Natural Science & Mathematics lab features twenty workstations running the Windows 10 operating system. These workstations support Microsoft Office, Maple 13, Environmental Science (Computer Lab Simulation), Virtual Chemistry Lab, Geometer's SKETCHPAD, C & S Solutions software, Adult Clinical Simulation, Pediatric Clinical Simulation, Neonatal Clinical Simulation, SE Clinical Simulation, Math-XL, and GAP4. This lab is also equipped with a LaserJet network printer.

Student Lab (*University Hall, Room W108*)
The Student Lab features thirty workstations running the Windows 10 operating system and Microsoft Office. This lab also features a LaserJet network printer.

Finance Trading Lab (*University Hall, Room E204*)
The Finance Trading Lab consists of 16 with dual monitor display units running a Windows 10 operating system with Microsoft Office and MorningStar. This computer lab also features a 42-foot stock ticker, two digital signage displays for new information about financial markets, a projection system.

Center City Campus Main Lab (*Fourth Floor*)
The Main Lab features twenty-four workstations running the Windows 7 Professional operating system along with Microsoft Office.

Bensalem Campus Main Lab (*Room 114*)
The Main Lab features sixteen workstations running the Windows 10 Professional operating system along with Microsoft Office.
Curriculum

The General Education Curriculum at Gwynedd Mercy University: Growth Through Mercy Connections

In order to prepare the distinctive Mercy graduate as a self-sufficient life-long learner who is an informed, responsible, caring citizen of a diverse global community, the University has established a common educational experience in its required curriculum of general education. This general education curriculum is a beacon guiding students toward the development of habits of thought and behavior that will serve them in the search for truth in all its complexity. This curriculum promotes the development of humane values that incorporate the ideals of integrity, compassion and mercy. The Signature Seminar component of the General Education curriculum offers students the opportunity to discover what is distinctive about Gwynedd Mercy University as a Catholic, Mercy institution committed to the critical concerns of the Sisters of Mercy: care of the earth, non-violence, anti-racism, immigration, and women.

Outcomes of the General Education Curriculum
Building on the University’s seven learning outcomes, the curriculum has been designed to ensure that students will be able to:

1. Express an appreciation and understanding of a variety of aesthetic, literary, cultural and ideological traditions
2. Engage meaningfully in a community of scholarship through inquiry, research and the communication of ideas
3. Evaluate historical, political, economic and scientific data while recognizing the interrelatedness of events and processes
4. Demonstrate an understanding of the impact of technology on society
5. Reflect upon the relationship of the Divine to the human experience
6. Examine and understand the dynamics of individual and group behavior
7. Demonstrate an understanding of quantitative reasoning
8. Engage in constructive activities of service to the community in light of the Gospel tradition as experienced through the Mercy charism that shapes the University.

*These are the minimum requirements for General Education. Additional courses may be required by specific degree programs and approved by the General Education Committee.

**FYE courses are not required for GPS students.

*** COM101 may be replaced with ENG, MUS, ART or Language if it can be documented that the instruction, delivery, and assessment of oral communication skills is incorporated in another required part of the curriculum. This substitution must be approved by the General Education Committee.
Honors Program
Students from undergraduate majors may be invited to participate in the Honors program based on admission criteria. The Honors Program is dedicated to providing an academically rigorous and challenging curriculum, steeped in the liberal arts and sciences, to its brightest and most industrious students. The Program is committed to preserving an academic culture that inspires a genuine eros for learning. Honors courses are designed to delve deeply into their subject matters in a way that allows students and professors to enter into a conversation of discovery.

To ensure that honors course credits are applied appropriately and efficiently within the student's academic plan, the student should meet regularly with his/her program adviser and the director of the Honors Program, preferably each semester at the time of pre-registration, for a review of the distribution and placement of honors credits.

6 honors core courses + an Honors Seminar course = Honor's Program Certificate
3.0 GPA in honors courses
+ overall GPA of 3.33 in Bachelor Degree Program = Degree with honors
PROGRAMS OF STUDY

Gwynedd Mercy University provides academic offerings ranging from associates and bachelor’s degrees to master’s degrees, post-graduate programs and certificates and doctoral degrees. The University offers courses in a traditional classroom setting as well as online and a hybrid mix of the two approaches.

Candidates for the Associate Degree are required:
a. to earn a total of at least 62 semester hours of credit in prescribed major and required general education courses.
b. to achieve a minimum cumulative quality point average of 2.0.
c. to earn a grade of “C” or better in the subjects designated as major courses.

Major
Credits earned in the major may not be used to satisfy general education requirements.
    Minimum total semester hour credits in the major: 27
    Minimum total semester hour credits required for degree: 62
Transfer information for Associate Degree:

1. Prior to matriculation at Gwynedd Mercy University, a student who accrued 24 or more credits from other universities, may have the FYE credits fulfilled with appropriate transfer credits.
2. Associate degree students must complete two GMERCYU Signature Seminars as part of their degree requirements.
3. Transfer students must complete one-half of the major requirements through Gwynedd Mercy University credits. For the total degree, at least 30 credits must be GMERCYU credits.
4. Gwynedd Mercy University associate students moving on to bachelor programs following completion of a GMERCYU associate program need a total of three GMERCYU Signature courses for the bachelor degree.

All official transcripts must be submitted and evaluated prior to matriculation at Gwynedd Mercy University. Official transfer evaluations are prepared through the GMERCYU Registrar’s Office. Refer to additional information in the University’s Transfer Guide.

Programs Leading to the Bachelor Degree

**Bachelor of Arts:**
- Behavioral/Social Gerontology
- English w/ Secondary Education
- History
- History w/Secondary Education
- Philosophy
- Psychology

**Bachelor of Health Science:**
- Occupational Science
- Respiratory Care

**Bachelor of Science:**
- Accounting
- Applied Psychology (GPS)
- Biology
- Biology w/Secondary Education
- Business Administration
- Business Administration with Organizational Management or Healthcare Administration concentration (GPS)
- Computer Information Science
- Criminal Justice
- Digital Communications
- Early Education
- Early Education/Special Education (PreK- 4/SPE PreK-8)
- Education Studies
- Finance
- Human Resource Management
- Human Services
- Management
- Marketing
- Mathematics
- Mathematics w/ Secondary Education
- Medical Laboratory Science
- Nursing
- Organizational Management (GPS)
- Psychology
- Radiation Therapy
- Radiologic Technology
Bachelor degrees require a minimum of 120 credits including the Senior Capstone course.

Major

Credits earned in the major may not be used to satisfy general education requirements.

Minimum total semester hour credits in the major: 30
Minimum total semester hour credits required for the bachelor degree: 120

Candidates for the Bachelor Degree are required:

a. to earn a total of at least 120 semester hours of credits in prescribed major and required general education course.

b. to achieve a minimum cumulative quality point average of 2.0.

c. to earn a grade of “C” or better in the subjects designated as major courses.

Transfer information for Bachelor degree:

1. Prior to matriculation at Gwynedd Mercy University, a student who accrued 24 or more credits from other universities, may have the FYE credits fulfilled with appropriate transfer credits.

2. If 25-59 accrued credits from previous collegiate work, two Signature Seminars and Senior Capstone course are required.

3. At 60 and above credits accrued from previous collegiate work, the two Signature Seminars plus Senior Capstone are required.

4. Transfer student must complete one-half of the major through Gwynedd Mercy University credits and fulfill specific school minimum GMERCYU credits requirements.

5. NO transfer credits may replace the Signature Seminars.

All official transcripts must be submitted and evaluated prior to matriculation at Gwynedd Mercy University. Official transfer evaluations are prepared through the GMERCYU Registrar’s Office. Refer to additional information in the University’s Transfer Guide.
SCHOOL OF ARTS AND SCIENCES

The School of Arts and Sciences houses the traditional liberal arts disciplines including English, history, philosophy, religious studies, foreign languages, music, art and science; psychology, sociology, criminal justice, human services and gerontology and programs in biology, mathematics, and computer information science are offered, as well. The Honors Program, which involves taking rigorous, challenging courses in the liberal arts and sciences and is open to academically qualified students, is also a part of the School of Arts and Sciences.

School Mission Statement
The School of Arts and Sciences at Gwynedd Mercy University is committed to fostering academic excellence by providing a core curriculum and degree programs in the fine arts, humanities, and sciences that cultivate habits of mind in graduates who are actively engaged in scholarship, leadership, and service.

Dean: Lisa McGarry, PhD

Behavioral & Social Sciences Division
Chair: Mary R. Reilly, MS
Faculty: Stephanie Fratantaro, MS; Rebecca L. Gullan, PhD; Wade J. Luquet, PhD; Patrick N. McGrain, PhD; Janice Nuss, MSW; Brigid K. O'Brien, MEd; Lorraine Phillips, PhD; Mary R. Reilly, MS

Liberal Arts Division
Chair: Lisbeth Chapin, PhD
Faculty: Lisbeth Chapin, PhD; Robert R. Clewis, PhD; Michael Clinton, PhD; Carol Evans, MMus; Wayne A. Huss, PhD; Lisa McGarry, PhD; Patrick Messina, PhD; Kathryn Reinhard, PhD.

Natural and Computational Sciences Division
Chair: Michelle Kulp McEliece, PhD
Faculty: Cindy Casey, MS; Felicia Corsaro-Barbieri, PhD; Julian Wade Farrior, PhD; Sandra Gallagher, MA; Christian Hellings, PhD; Michelle Kulp McEliece, PhD; Stacey Lettini, PhD; Justin McClain, PhD; Maria Winters, PhD.

Credit Requirements
Students accepted into a program of study are expected to complete all courses at Gwynedd Mercy University. Students transferring to Gwynedd Mercy University will have all previous course work completed at regionally accredited institutions evaluated for transfer and will be expected to complete all remaining program requirements at Gwynedd Mercy University. The School of Arts and Sciences requires a minimum of fifty (50) credits as a residency requirement for all students transferring into a bachelor’s degree program. A residency requirement of thirty (30) credits is required for students transferring into an associate degree program.
The Honors Program

Director: Patrick Messina, PhD
Associate Director: Robert Clewis, PhD

Honors Program Mission
Students from undergraduate majors may be invited to participate in the Honors program based on admission criteria. The Honors Program is dedicated to providing an academically rigorous and challenging curriculum, steeped in the liberal arts and sciences, to its brightest and most industrious students. The Program is committed to preserving an academic culture that inspires a genuine eros for learning. Honors courses are designed to delve deeply into their subject matters in a way that allows students and professors to enter-into a conversation of discovery.

Admission Requirements

First Year/Transfer Students
- 1100 combined SAT scores or ACT equivalent
- 3.33 GPA
- Interview with Honors Program Director

Current Students
- 3.33 cumulative GPA
- One letter of recommendation from faculty
- Interview with Honors Program Director

Completion Requirements
- Seven Honors courses
- 3.0 Honors Program GPA, plus 3.33 cumulative GPA in an undergraduate program

Curriculum
Students in the Honors Program take a seminar and six courses in these artes liberales:

**Trivium**
- Dialectic: philosophy, religious studies, history
- Rhetoric: English, political science, communication, history, philosophy
- Grammar: English, communication, history, religious studies, philosophy, language

**Quadrivium**
- Music: music, drama, art history, English, communication, philosophy, history, religious studies
- Mathematics
- Science: interpreted as physical and social sciences

To ensure that honors course credits are applied appropriately and efficiently within the student’s academic plan, the student should meet regularly with his/her program adviser and the director of the Honors Program, preferably each semester at the time of pre-registration, for a review of the distribution and placement of honors credits.

Benefits
- Recognition of Honors Program on transcript and diploma
- Small seminar classes that emphasize interactive learning and critical thinking
- Immersion in a challenging, classical liberal arts education
- Special advising
• Cultural and social events and occasions for informal gatherings with Honors faculty
• The option of on-campus Honors living-learning community
• Enhanced eligibility for graduate study and employment
• Participation by traditional, transfer, and nontraditional students from a cross-section of academic majors
Behavioral and Social Sciences
Behavioral & Social Gerontology, Criminal Justice, Human Services, Psychology and Social Work

Degrees offered

Bachelor of Arts
Behavioral & Social Gerontology
Human Services
Psychology

Bachelor of Science
Behavioral & Social Gerontology
Criminal Justice
Human Services
Psychology

Bachelor of Social Work

Minors:
Behavioral & Social Gerontology
Criminal Justice
Human Services
Psychology

Chair: Mary R. Reilly, MS
Faculty: Stephanie Fratantaro, MS; Rebecca L. Gullan, PhD; Wade J. Luquet, PhD;
Patrick N. McGrain, PhD; Janice Nuss, MSW; Brigid K. O’Brien, MEd; Lorraine Philips, PhD;
Mary R. Reilly, MS.

Program Coordinators:
Behavioral & Social Gerontology Mary Reilly, MS
Criminal Justice Patrick McGrain, PhD
Human Services Stephanie Fratantaro, MS
Psychology Mary Reilly, MS
Social Work Wade Luquet, PhD

Bachelor of Arts

Behavioral and Social Gerontology
Prerequisite: PSY 100 and SOC 100 for all courses.
Requirements: 54-56 semester hours including PSY 111, 200, 209, 212, 285, 312, 314, 320, 4000, one PSY elective; SOC 246, 260, 341, 442, 443, SWK 201, 335, one SOC elective; BIO 115.

Human Services
Prerequisite: PSY 100 and SOC 100 for all courses.
Requirements: 56 semester hours including PSY 111, 150, 212, 314, 321; SWK 201,202,241,304,400; HSV 430, 435,436, 4000, and four additional CRJ/PSK/SWK elective courses.

Psychology
Prerequisite: PSY 100 and SOC 100 for all courses.
Requirements: 48-49 semester hours including PSY 111, 150, 200, 210, 211, 312, 314, 320, 322, 370, 435, 4000 and four psychology electives.
Bachelor of Science
Behavioral and Social Gerontology
Prerequisites: PSY 100 and SOC 100 for all courses
Requirements: 54-56 semester hour including PSY 111, 200, 209, 212, 285, 312, 314, 320, 4000, one PSY elective, SOC 246, 260, 341, 442, 443, SWK 201, 335, one SOC elective, BIO 115, two electives from Natural and Computational Science.

Criminal Justice
Prerequisites: PSY 100 and SOC 100.
Requirements: 60 semester hours including: CRJ 102, 215, 216, 220, 225, 250, 251, 320, 326, 327, 370, 405, 410, 435, 4000 and four CRJ electives.

Human Services
Pre-requisites: PSY 100 and SOC 100.
Requirements: 56 semester hours including: PSY 111, 150, 212, 314, 321; SWK 201, 202, 203, 241, 304, 400; HSV 430, 435, 4000; three electives from Natural & Computational Sciences and four CRJ/PSY/SWK electives.

Psychology
Prerequisites: PSY 100 and SOC 100.
Requirements: 54-55 semester hours including PSY 111, 150, 200, 210, 211, 312, 314, 320, 322, 370, PSY 435 and 4000, plus four psychology electives; two electives from Natural & Computational Sciences.

Bachelor of Social Work
Gwynedd Mercy University has achieved Candidacy for Accreditation by the Council on Social Work Education’s (CSWE) Commission on Accreditation.

Candidacy for a baccalaureate or master’s social work program by the Council on Social Work Education’s Commission on Accreditation indicates that it has made progress toward meeting criteria for the assessment of program quality evaluated through a peer review process. A program that has attained Candidacy has demonstrated a commitment to meeting the compliance standards set by the Educational Policy and Accreditation Standards, but has not yet demonstrated full compliance.

Students who enter programs that attain Candidacy in or before the academic year in which they begin their program of study will be retroactively recognized as having graduated from a CSWE-accredited program once the program attains Initial Accreditation. Candidacy is typically a three-year process and attaining Candidacy does not guarantee that a program will eventually attain Initial Accreditation. Candidacy applies to all program sites and program delivery methods of an accredited program. Accreditation provides reasonable assurance about the quality of the program and the competence of students graduating from the program.

Prerequisites: PSY 100 and PSY 111.
Pre-Candidacy Requirements: SWK 201, 202, 241.
Requirements: SWK 100, 203, 205, 212, 301, 304, 305, 400, 435, 436, 445, 446, 4000 and two PSY, SOC, CRJ, or SWK electives.

Admissions Policy
Any student accepted into the University can declare social work as a major. Students will undergo a performance review in the social work major after taking SWK 201, SWK 202, and SWK 241 in the first semester of their sophomore year. They must submit a Candidacy Application to the Program Director by December 1st of their sophomore year.
The Candidacy Application must include:
1. A candidacy application form with all required personal information
2. A copy of the student’s unofficial transcript indicating an overall GPA of 2.5 or better and a 2.67 or better in required social work courses.
3. All criminal background checks necessary to practice with children and adults.
4. A completed and signed volunteer service form verifying that the student has performed 30 hours of volunteer service in the past three years. It is important that this volunteer service has been performed at a non-profit agency. Day camp counselor, baby sitter, or running errands are not appropriate volunteer service activities.
5. A letter of recommendation from a human service professional who supervised the student’s volunteer experience stating they believe the student has qualities for success as a social worker, including what they think will make the student successful.
6. A letter of recommendation from a non-social work professor stating they think they have the academic ability and discipline to succeed in the BSW program.
7. A three- to five-page self-assessment paper describing student qualities that would make them a good social worker. The paper should address any biases the student may be aware of and how the social work degree fits in to their career goals. The paper should make the case for the student to be admitted into the BSW program including how they can contribute to leadership in the degree program (participation in the Social Work Club, service, Phi Alpha Honor Society, etc.).

Upon receipt of the completed application packet, the material submitted will be reviewed by the Performance Review Committee consisting of the Program Director, the Director of Field Placement and other social work faculty. Students will be assessed based on their scholarship, self-awareness, motivation for a career in social work, quality of the self-assessment paper, writing quality, and appropriateness of the social work degree for student career goals. A Performance Review Rubric will be utilized to assess student’s continuance in the BSW program. Students will be notified of their candidacy status by the Program Director by the beginning of the spring semester. Students who are not accepted into the BSW program will have the opportunity to apply to the Human Services degree program or will be directed to the university’s professional advisors to choose another major.

Internal Transfers (Change of Major)
Students interesting in changing their major to the Bachelor of Social Work program may do so at any time but must have earned a GPA of 2.5 or higher at the time of the Candidacy application. Internal transfers will meet with the Program Director to discuss their interest, the requirements of the program, and the transfer of credits from their previous major. During this meeting, students are provided with a copy of the program handbook, program goals, and program policies. Students will have to take the prerequisite courses and then submit a Candidacy Application to enter the advanced level of the major in the same manner specified above. Students who are re-admitted to the University after a long period away must meet with the Program Director to discuss their interest, program expectations, and requirements. They must then submit an application to the social work degree program.

Transfer Students
Any student who has been enrolled in a regionally accredited post-secondary school of higher education and accepted into Gwynedd Mercy University as a transfer student may apply for admission into the Bachelor of Social Work program. Candidacy Applications to enter the advanced level of the major will be reviewed in the same manner specified above. The Registrar’s office will conduct a transfer equivalency analysis of the applicants completed credits. Course credits from another CSWE-accredited BSW program will be accepted if they correspond to the courses offered at Gwynedd Mercy University, if the course grades are C or higher; C- is not an acceptable grade for transfer. The Program Director will review all transcripts and course descriptions from the sending university to determine course equivalency.
Students who are graduates of associate degree programs in human services or social work that have articulation agreements with the BSW program will be admitted as per the agreement. Prior to admission, students must submit transcripts, a self-assessment paper, a strong letter of support from an academic advisor, and a writing sample from one of their courses. As with all transfer students, a minimum of fifty credits and a minimum of half of the major requirements must be completed at Gwynedd Mercy University.

**Minors:**

**Behavioral & Social Gerontology**
Students with a university major other than gerontology may earn a minor in gerontology by completing six courses (18 credits) from the gerontology program: BIO 115; PSY 260; PSY 285 or SWK 201, 246, 304 and 341. A maximum of six credits may be transferred from another college. Students must earn a “C” or better in all courses in the minor.

**Criminal Justice**
Students with a university major other than criminal justice may earn a minor in criminal justice by completing six courses (18 credits) in behavioral/social sciences: CRJ 102, 215, 216, and three CRJ electives. A maximum of six credits may be transferred from another college. Students must earn a “C” or better in all courses in the minor.

**Human Services**
Students with a university major other than human services may earn a minor in human services by completing six courses (18 credits) from the human services program: SWK 201, PSY/SWK 212, PSY 321, and four electives from approved CRJ/PSY/SWK courses. Approved courses for CRJ include: 102, 205, 207, 216, 217, 218, 225, 251, 285, 302, 303, 462, and 299/437 as determined by the Human Services Program Coordinator. Excluded PSY courses include: 111, 312, 320, 435, 439, 450, and 4000. Excluded SWK courses include: 400, 435, 436, 446, and 4000.

**Psychology**
Students with a university major other than psychology may earn a minor in psychology by completing six courses (18 credits) in psychology: PSY 100, 111, four electives. A maximum of six credits may be transferred from another college. Students must earn a “C” or better in all courses in the minor.

**Experiential Learning**
Students enrolled in any major in the Behavioral and Social Sciences Division are required to engage in some form of experiential learning. Experiential learning (e.g.: field placement, practicum and internship) allows students to put theory into practice, observe professionals engaging their field of study, practice their skills under the supervision of seasoned professionals, network within their chosen field and gain valuable experience to include on their resume. Requirements for experiential learning vary depending on the major. Information regarding experiential learning requirements are detailed in each program handbook. **Students should consult with their program coordinator/advisor the year before they expect to complete their fieldwork.**

**Major Grade Requirements**
A grade of C or higher is required in each of the major courses in the behavioral and social sciences division, including those taken as **general education requirements PSY 100 and SOC 100**. A student may achieve less than a “C” grade in only two major courses and he/she may repeat these courses only once. If a student, regardless of his/her cumulative grade point average, achieves less than a “C” grade on a third major course, or fails to bring all grades up to a “C” with one repeat, he/she may be dismissed from the program.
LIBERAL ARTS DIVISION
Art, English, Geography, History, Music, Languages, Philosophy, Political Science, Religious Studies

Degrees offered

Bachelor of Arts
- History
- History with Secondary Education Certification
- Philosophy

Associate in Arts
- Liberal Studies

Minors:
- English
- History
- Music
- Philosophy
- Religious Studies

Chair: Lisbeth Chapin, PhD
Faculty: Lisbeth Chapin, PhD; Robert R. Clewis, PhD; Michael Clinton, PhD; Carol Evans, MMus; Wayne A. Huss, PhD; Lisa McGarry, PhD; Patrick Messina, PhD; Kathryn Reinhard, PhD; Jennifer Wade, PhD

Program Coordinators:
- History: Wayne Huss, PhD
- Religious Studies: Jennifer Wade, PhD
- Philosophy: Patrick Messina, PhD

History
Requirements: 33 semester hours of history courses including HIS 107, 109, 131, 132, 449, 4000, and five history electives, as well as courses offered in the General Education and Core Curriculum, and 38 credits in open electives.

History with Secondary Education Certification
Requirements: 30 semester hours of history courses, including HIS 107, 109, 131, 132, 449, 4000, and four history electives, as well as courses offered in the General Education and Core Curriculum, and 42-48 credits in EDU and SPE, depending on certification option. Students seeking secondary certification must apply separately to the School of Education.

History with a minor: A student pursuing a Bachelor of Arts in history may earn a minor in select subjects by taking 18 specified credits in the subject area. Students should consult their history advisor for details.

History with a pre-law option
Requirements: 42 semester hours – 27 credits from the following: BUS 230; CIS 101; COM 101; ECN 102 or 103; ENG 315 or 448; HIS 131, 132; POL 101, 211; PSY 200, 210; SOC 255. 15 credits from the following recommended courses: HIT 103; PSY 150, 221, 222, 230, 320; SOC 325; ACC 105, 106, 315, 316; BUS 304, 373; CIS 102; ENG 107; HIS 101, 102; POL 212; PHL 234, 308; RS 101, 120, 231.
Philosophy
Requirements: 30 semester hours of philosophy courses including PHL 201, 202, 240, 305, 313 or 314, four electives (200 level or higher) and 4000.

Philosophy with a minor: A student pursuing a bachelor of arts in philosophy may earn a minor in select subjects by taking approximately 18 specified credits in the subject area. Students should consult their philosophy advisor for details.

Liberal Studies
This 62-credit program of study provides a foundation of courses in the liberal arts leading to the associate in arts degree. Requirements include courses in behavioral and social sciences, humanities, language, literature, fine arts and natural sciences. All credits earned in this program may be applied to general education requirements for a Bachelor of Arts or Bachelor of Science degree.

Minor Programs

Minor in English: Any six English courses above the 200 level in literature or writing.

Minor in Music: Students with any university major may earn a minor in music by completing 18 credits to be selected from the following: MUS 100, MUS 104, MUS 107, MUS200/EDU 203, MUS 203, MUS 204 or MUS 210. A maximum of three credits may be transferred from another college.

Academic Progress, Major Grade Requirements and Program Dismissal
The minimum passing grade for all required courses in the major is “C.” Any grade lower than a “C” in more than one major course may result in dismissal from the program. Students who earn less than a “C” in a required course may repeat it only once; if the repeat results in a grade less than a “C,” the student will be dismissed from the program.

Internship Program
Internship opportunities are available for students who have earned at least 90 credits (senior status), a “B” average in all required major courses, and permission of the Internship Faculty Supervisor and the Dean of the School of Arts and Sciences. An internship preparation course will be a pre- or co-requisite. Application should be made no later than the second semester of the junior year. Completion of 120 internship hours are required for 3 credits.
NATURAL AND COMPUTATIONAL SCIENCES
Biology, Chemistry, Computer Information Science, Physics, Mathematics, Science

Degrees offered:
Associate of Science
  Natural Science

Bachelor of Science
  Biology
  Computer Information Science
  Mathematics

Interdivisional Programs of Study
  Bachelor of Science
    Biology with Secondary Education Certification
    Mathematics with Secondary Education Certification

Chair: Michelle Kulp McEliece, PhD
Faculty: Cindy Casey, MS; Felicia Corsaro-Barbieri, PhD; Julian Wade Farrior, PhD; Sandra Gallagher, MA; Christian Hellings, PhD; Michelle Kulp McEliece, PhD; Stacey Lettini, PhD; Justin McClain, PhD; Maria Winters, PhD.

Program Coordinators:
  Biology: Michelle Kulp McEliece, PhD
  CIS: Cindy Casey, MS
  Mathematics: Christian Hellings, PhD.

BIOLOGY

Associate of Science

Natural Science
  Major Requirements: BIO 203/203L, 204/204L; CHM 151/151L, 152/152L, 203/203L, 204/204L; MTH 234 and 245 plus 7 credits in science electives (BIO, CHM or PHY) at level 200 or higher.

Bachelor of Science

Biology
  Major Requirements: BIO 203/203L, 204/204L, 230/230L, 251/251L, 402/402L, 415/415L, 421 (or BIO 440), 4000, 4001, 4002; plus 6 credits in biology electives at level 300 or higher; CHM 151/151L, 152/152L, 203/203L, 204/204L, 301/301L, 302; MTH 234, 245; PHY 241/241L, 242/242L.

All graduates will earn a minor in Chemistry. All seniors majoring in biology are required to take the ETS Major Field Test in Biology to be eligible for graduation.

Biology with Secondary Education Certification

All graduates will earn a minor in Chemistry. All seniors majoring in biology are required to take the ETS Major Field Test in Biology to be eligible for graduation.
Minors
A student who is pursuing a Bachelor of Arts or Bachelor of Science degree in some other area may gain a minor by completing at least six courses (with corequisite labs) with at least 18 semester hours in specified courses. Available minors are:

Biological Science, for students in majors other than biology
Students accepted into a baccalaureate program other than biology may earn a minor in biological sciences by completing 20-24 credits in biology. BIO 203/203L, 204/204L and an additional 12-15 credits (four courses) from BIO 251, 252, 230 or BIO electives at the 300-400 level. A maximum of six credits may be transferred from another college. All prerequisites for the chosen courses must be satisfied. A minimum grade of C must be earned for each course; C- grades are not acceptable.

Chemistry
Students accepted into a baccalaureate program may earn a minor in chemistry by completing 23-24 credits in chemistry. All of the following courses are required: CHM 151/151L, 152/152L, 203/203L, 204/204L, 301/301L, and CHM 302. A maximum of six credits may be transferred from another college. All prerequisites for the chosen courses must be satisfied. A minimum grade of C must be earned for each course; C- grades are not acceptable.

General Science, for students in majors other than biology
Students accepted into a baccalaureate program other than biology may earn a minor in general science by completing 18 credits in biology, chemistry and physics. The following courses are required: 3 credits in biology, 3 credits in chemistry, 3 credits in physics; also 9 credits in biology, chemistry, physics or science. A maximum of six credits may be transferred from another college. All prerequisites for the chosen courses must be satisfied. A minimum grade of C must be earned for each course; C- grades are not acceptable.

Human Biology, for students in majors other than biology
Students accepted into a baccalaureate program other than biology may earn a minor in human biology by completing 20 credits in biology. All of the following courses are required: BIO 107/107L, 108/108L, 317, 318; 6 credits of electives from the following: BIO 114, 115, 313 or PHA 101. A maximum of six credits may be transferred from another college. All prerequisites for the chosen courses must be satisfied. A minimum grade of C must be earned for each course; C- grades are not acceptable.

*BIO 313 has BIO 203/203L as a prerequisite

Microbiology
Students accepted into a baccalaureate program may earn a minor in microbiology by completing nineteen credits in biology. The following courses are required: BIO 305/305L\(^1\), BIO 307, 311, 313, BIO 414, and 421\(^2\), or 440\(^2\).
\(^1\)BIO 305/305L must be taken together.
\(^2\)The research or internship must be in a field of microbiology.

A maximum of six credits may be transferred from another college. All prerequisites for the above courses must be satisfied. A minimum grade of C must be earned for each course; C- grades are not acceptable.

Major Grade Requirements
Grades of “C” or higher are required in each major course in the Natural and Computational Sciences. A student may achieve less than a “C” grade in only two major courses and their prerequisites, and they may repeat these courses only once. If a student, regardless of cumulative grade point average, achieves less than a “C” grade on the third major course, or fails to bring all grades up to a “C” with one repeat, the student may be dismissed from the program.
Experiential Learning
A practical research is experience is required of every student enrolled in the biology program. This requirement may be satisfied by an on-campus research experience or an off-campus internship. Students interested in an off-campus internship must receive approval for the internship from the Biology program coordinator. Internships must be research-based and include at least 120 hours of working hours. Application should be made to the program coordinator as early as possible in the semester prior to the internship. Both on-campus research (BIO 421) and the biology internship (BIO 440) receive 3 credits. Students may complete more than one research experience or internship, but may only use one of these to satisfy the requirements of the biology degree.

Premedical/Predental/Preveterinary Education
Students preparing for application to a school of medicine, dentistry, veterinary medicine, optometry, or podiatry must include in their curriculum the following courses: Principles of Chemistry (CHM 151/151L, 152/152L), General Biology (BIO 203/203L, 204/204L), Organic Chemistry (CHM 203/203L, 204/204L) and General Physics (PHY 241/241L, 242/242L). These courses are part of the requirements for the bachelor’s degree in biology; students in other majors may use these courses to fulfill open electives.

Advising for students interested in a career in medicine, dentistry, veterinary medicine, optometry, or podiatry is provided by the Pre professional Advisory Office and letters of evaluation are written by the Pre professional Evaluation Committee; the Pre professional Advisory Office and the Pre professional Evaluation Committee are functions of the Natural and Computational Sciences Division and are intended to serve the students of this division. As a courtesy, the services of the Office and the Committee are available to all Gwynedd Mercy University students, including non-matriculated post-baccalaureate students, who meet the eligibility requirements.

COMPUTER INFORMATION SCIENCE

Bachelor of Science
The Computer Information Science program combines the fundamental problem-solving capabilities of computer science with hands-on experience in several areas of CIS, including programming, networking, cybersecurity, computer forensics, database development, web design, multimedia and mobile applications.

Major Requirements: a grade of “C” or better in CIS 104, 110, 114, 203, 204, 215, 230, 301, 304, 321, 330, 410, *CIS 420 CIS 4000 (*required for web design and multimedia option). Additionally, this degree requires MTH 231, 234, and 261. In addition to the core requirements, CIS majors select one of the two professional options: Cybersecurity/Computer Forensics or Web Design & Multimedia.

Computer Forensics Option – 16 credits
CIS 240 Cybercrime
CIS 2XX Cybersecurity
CIS 340 Computer Forensics
CIS 3XX IT Security
ENG 215 Technical Writing

Web Design & Multimedia Option – 15 credits
CIS 350 Multimedia I
CIS 424 Web Design II
CIS 450 Multimedia II
COM 202 Visual Communication
COM 205 Media Technology
Credit requirements: a minimum of 126 credits is required for the BS degree.

Minor in Computer Information Science
Students accepted into a baccalaureate program other than computer information science (CIS) may earn a minor in computer information science by completing eighteen (18) credits in CIS courses. For non-CIS majors, a minor in CIS requires: CIS 104, 114, 215, 321 and two additional CIS courses at the 200-level or above. A maximum of six credits may be transferred from another college. All prerequisites for the chosen courses must be satisfied. A minimum grade of C must be earned for each course; C- grades are not acceptable.

Major Grade Requirements
Grades of “C” or highs are required in each major course in the Natural and Computational Sciences Division. A student may achieve less than a “C” grade in only two major courses and may repeat these courses only once. If a student, regardless of cumulative grade point average, achieves less than a “C” grade on the third major course, or fails to bring all grades up to a “C” with one repeat, the student may be dismissed from the program.

Internship Program
Opportunities for on-the-job computer information science experience are available to interested students in the form of individually designed internship programs which must total at least 120-hours. Application should be made with the Internship Coordinator early in the second semester of junior year.

MATHEMATICS
Bachelor of Science

Mathematics
Major Requirements: MTH 231, 234, 235, 245, 246, 261, 301, 304, 305, 401, 407, 450 and two
300- 400 level math electives, PHY 241/241L, 242/242L.

Mathematics with Secondary Education
Major Requirements: MTH 231, 234, 235, 245, 246, 261, 301, 303, 304, 305, 401, 407, 450 and
one 300-400 level math elective, 450; PHY 241/ 241L, 242/242L; PSY 222, 301; EDU 100, 300, 319,
325, 351, 490, SPE 215, 231, 331.

Minor
Students accepted into a baccalaureate program other than mathematics may earn a minor in mathematics by completing 20 credits in mathematics. The following courses are required: MTH 245, 246; 12 credits of electives selected from: MTH 231, 234, 235, 261, 301, 302, 303, 304, 305, 401, 407, 437. A maximum of six credits may be transferred from another college. All prerequisites for the chosen courses must be satisfied. A minimum grade of C must be earned for each course; C- grades are not acceptable.

Major Grade Requirements
Grades of “C” or higher are required in each major course in the Natural and Computational Sciences Division. A student may achieve less than a “C” grade in only two major courses, and may repeat these courses only once. If a student, regardless of cumulative grade point average, achieves less than a “C” grade on the third major course, or fails to bring all grades up to a “C” with one repeat, the student may be dismissed from the program.

Physics/Mathematics Computer Lab (Maguire Hall)
The physics/mathematics lab holds 20 Pentium III workstations with wireless access to the internet on a Windows WP network. These systems support Microsoft Office 2003, Derive 5, Maple 10, Pasco Science Workshop-Data Studio, and Interactive Journey through Physics, GAP-4 and
Geometer’s SKETCHPAD. The room is equipped with a projection system, Smart Board, scanner, and a shared laser jet printer.
SCHOOL OF BUSINESS AND EDUCATION

BUSINESS

The School of Business and Education prepares students to become business professionals in a variety of functional areas. The Business programs build on a solid foundation in the liberal arts to enable students to enter careers in accounting, marketing, finance, management, and sports management. The programs are committed to preparing students for careers through internships at leading regional and national companies.

Degrees offered:

**Master of Business Administration**
4+1 MBA (See Graduate Catalog)

**Bachelor of Science**
Accounting
Accounting – CPA Track
Digital Communications
Finance
Management
Marketing
Human Resource Management
Sports Management

**Minors**
Business Administration
Health Care Administration

**Dean:** Heather L. Pfleger, EdD
**Faculty:** Ronald Bruce, MBA; Alan Harper, PhD; Ralph W. Hoffman, EdD; Stephen Mumford, MBA; Carlo Silvesti, MBA, CPA, CGMA, Margaret Rakus, ABD.

**Credit Requirements**
Students accepted into a program of study are expected to complete all courses at Gwynedd Mercy University. Students transferring to Gwynedd Mercy University will have all previous course work completed at regionally accredited institutions evaluated for transfer and will be expected to complete all remaining program requirements at Gwynedd Mercy University. The School of Business requires a minimum of forty-five (45) credits as a residency requirement for all students transferring into a bachelor’s degree program.

**Business**

**Bachelor of Science in Accounting**
**Major Requirements:** a grade of “C” or better in ACC 105, 106, 205, 206, 301, 305, 315, 316, 405, 406 and 407; BUS 101, 207, 230, 301, 304, 306, 310, 340, 4000; ECN 102, 103.
Accounting – CPA Track
The CPA Track is an academically challenging program which will offer the accounting major the opportunity to earn 150 credit hours in 4 years. To do this the student will be required to attend school part-time in the summer of their sophomore and junior years. The students in this program in addition to the traditional Bachelor of Science in Accounting will take additional courses in Intermediate and Advanced Accounting and several additional business courses and an additional internship. This is the result of new education requirements to become a CPA. The accounting major in the School of Business offers the following options:

1. Students having a 3.5 GPA and with the endorsement of the accounting faculty will be able to complete the 150-credit hour requirement in 4-years (six credits will be taken in the summer of the sophomore and junior years).
2. Students that do not have the 3.5 GPA will be required to complete the 150-credit hours through an additional year of study. Effectively, this will require 5-years to complete the bachelor’s degree in accounting with the CPA track.
3. Students interested in a career in accounting for government and industry can complete the degree in 4-years using the existing curriculum. If students find after they graduate that they wish to become a CPA, they will be able to meet the 150-credit hour requirements with the addition of 25 credit hours obtained through either additional undergraduate or graduate study. The accounting degree they obtained at Gwynedd Mercy University will satisfy the required accounting and business courses to obtain the CPA license.

Digital Communications
Major Requirements:

Finance
Major Requirements: a grade of “C” or better in ACC 105, 106, 301; BUS 101, 207, 230, 301, 304, 306, 310, 318, 321, 340, 4000; ECN 102, 103; and five of the following: ACC 315, 315; BUS 311, 312, 313, 314, 421, 422. A grade of “C” or better is required for all courses.

Human Resource Management
Major Requirements: A grade of C or better in ACC 105, 106, 301; BUS 101, 207, 230, 301, 304, 306, 310, 318, 321, 340, 4000; ECN 102, 103; and five of the following: BUS 371, 373, 374, 375, 376, 377, 379, 381.

Management
Major Requirements: A grade of C or better in ACC 105, 106, 301; BUS 101, 207, 230, 301, 304, 306, 310, 318, 321, 340, 4000; ECN 102, 103; and five of the following: BUS 320, 350, 371, 375, 381, 410, 421, 422. A grade of “C” or better is required for all courses.

Marketing
Major Requirements: A grade of “C” or better in ACC 105,106, BUS 101, 205, 207, 212, 214,209, 230, 310, 318, 333, 340, 405, 407, 410, two (2) marketing electives, ECN 102, 103 and BUS 4000. A grade of “C” or better is required for all.

Sports Management
Major Requirements: A grade of C or better in ACC 105, 106, 301; BUS 101, 207, 230, 301, 304, 306, 310, 318, 321, 340, 350, 4000; ECN 102, 103; and five of the following: BUS 351, 352, 353, 354, 355, 455. A grade of “C” or better is required for all courses.
**Internship Program**
The Internship Program is a directed work experience designed to provide the student with practical applications of business principles. This option is offered to accounting and business administration majors, usually in their senior year. To be eligible, students must have a “B” average in required business courses as well as permission of their adviser and the Dean. The internship may not be done at the student’s current place of employment.

**Second Bachelor Degree Program**
The Second Bachelor Degree Program is designed for those students who have already earned a baccalaureate degree in another field and who wish to pursue a second bachelor degree.

A program review will evaluate each application, determining which course requirements need to be fulfilled for the granting of a second degree. Because the student holds a bachelor degree from an accredited institution, course for course substitution is not necessary. Courses are selected in consultation with an adviser. Lower level courses may be replaced with higher level courses if the student has related professional work experience.

The second-degree program may be completed in the day or evening, on a full or part-time basis. A second-degree program requires a minimum of 30 credits at Gwynedd Mercy University.

**Minor in Business Administration**
A student pursuing a BA/BS in any major may pursue a minor in business administration by taking eighteen (18) credits in business related courses. For non-business majors, a minor in business administration requires: ACC 105, 106; BUS 101,207, 301; ECN 102. A grade of “C” or better is required for all courses taken in the minor.

**Minor in Healthcare Administration**
A student pursuing a BA/BS in any major, may pursue a minor in Heath care Administration by taking eighteen (18) credits in business related and health-care related courses. A minor in health care administration requires: BUS 101; ECN103; HA301, 302,401 and 402. A grade of “C” or better is required for all courses taken in the minor.

**Program Dismissal Policy**
A grade of “C” or better is required in each course within the major or minor. If a student achieves less than a “C,” the student is permitted to repeat the course once. If the student fails to receive a “C” or better after repeating the course once, the student, regardless of his/her cumulative grade point average, may be dismissed from the program.

**4+1 MBA**
Accepted business and accounting students are eligible to participate in our 4+1 MBA program. Students will be required to maintain a cumulative grade point average of 3.0 to continue eligibility.
EDUCATION

Gwynedd Mercy University prepares teachers to meet the educational challenges of the 21st Century. The undergraduate and graduate divisions of the school offer a variety of programs to meet the pre-service and in-service needs of education professionals. The teaching and learning processes and practices are changing rapidly due to research about how the brain responds to stimuli and how teachers can facilitate optimal learning experiences.

Degrees offered

Bachelor of Science
Bachelor of Science in Education Studies
Bachelor of Science in Early Education
Bachelor of Science in Early Education/Special Education
Bachelor of Science in Middle Level Education (Suspended 2017)
Bachelor of Science in Middle Level Education/Special Education (Suspended 2017)

Minors
Special Education

Endorsements
Autism Endorsement

School Personnel Certification Area

PreK- Grade 4/Special Education PreK-8
PreK-Grade 4
Grades 4-8/Special Education PreK-8
Mathematics and/or Science Concentration (Suspended 2017)
Secondary Education 7-12 in:
- Biology
- English
- Mathematics
- Social Studies

Dean: Heather L. Pfleger, EdD
Faculty: Mary Jo Pierantozzi, MS; Deborah Schadler, PhD; Monica Walsh, EdD.

Programs Leading to Certificates/Certification

Professional Educator Certification
Programs of study leading to teacher certification are available in PreK-4/PreK-8 Special Education, and secondary education areas of biology, English, mathematics and social studies.

Upon completion of the program requirements, the student is eligible to receive an Instructional I Provisional certificate, which permits the holder to teach in the Commonwealth of Pennsylvania, and in those states, which carry reciprocity. Those seeking their Instructional I certificate must demonstrate that they have successfully completed a teacher preparation program and pass Pennsylvania Qualifying Exams (PAPA, Praxis, PECT’s).
Bachelor of Science in Education Studies
The Education Studies major provides students the option of completing the requirements for the Bachelor of Science degree in education without completing the requirements for Pennsylvania Teacher Certification. Students in Education Studies must maintain a GPA of 2.0 or better. Any grade below a C in a course within the major must be repeated.

All education students entering the University will follow the curriculum for the Bachelor of Education Studies. For those students desiring Pennsylvania Teacher Certification, a t h e 48 credit mark students who have successfully passed a required Basic Skills Assessment Test* option will make formal application to the School of Education to begin the Teacher Professional Core curriculum that leads to Pennsylvania Instructional I certification.

*As per Act 168 of 2014, “Candidates for certification must take and successfully pass a basic skills assessment option prior to entry into a baccalaureate teacher preparation program effective August 1, 2015.” Formal admission into a baccalaureate program after the initial minimum 48-60 credits as required by Chapter 354 and prior to enrollment in courses that satisfy the Professional Core competencies required in the program Framework Guidelines is required. The four (4) basic skills assessment options are described below:

REQUIREMENTS FOR THOSE ACCEPTED TO THE EDUCATION PROGRAM

TESTING REQUIREMENTS:
The Basic Academic Skills test is required by Pennsylvania for all candidates to be officially enrolled in education programs. The Basic Skills requirement should be met as soon as possible upon entry to the university and must be passed prior to the 48 credit mark. The basic academic skills requirement may be met by any of the following assessment methods:

- The Pre-service Academic Performance Assessment (PAPA) modules in Reading, Writing and Mathematics.
  - Visit www.pa.nesinc.com to register for test code PA701.
  - Scores must be electronically submitted directly to the Pennsylvania Department of Education Bureau of School Leadership and Teacher Quality from the test vendor.
  - A minimum score of 220 is required in reading and writing. A minimum score of 193 is required in Mathematics. A composite scoring option is available.

- The Core Academic Skills for Educators (CORE) modules in Reading, Writing and Mathematics.
  - Visit www.ets.org/praxis/pa to register for test codes 5712, 5722 and 5732.
  - Scores must be electronically submitted directly to the Pennsylvania Department of Education Bureau of School Leadership and Teacher Quality from the test vendor.
  - A minimum score of 156 (Reading), 162 (Writing) and 142 (Mathematics) is required. A composite scoring option is available.

- The Scholastic Achievement Test (SAT) combined score of 500 or higher in each individual section -- Critical Reading, Writing, Mathematics.
  - As of 2/29/16 the following are acceptable scores: Reading 27, Writing and Language 28 and Mathematics 26.
  - Submit official test scores and a TIMS application cover sheet to the Pennsylvania Department of Education Bureau of School Leadership and Teacher Quality in an envelope sealed by the test vendor. Scores may also be verified by the Pennsylvania Approved Preparation Programs through TIMS.

- The best section scores from different test sessions may be selected.
- Submit official test scores and a TIMS application cover sheet to the Pennsylvania Department of Education Bureau of School Leadership and Teacher Quality in an envelope sealed by the test vendor. Scores may also be verified by the Pennsylvania Approved Preparation Programs through TIMS.

Older basic skills tests taken at the time they were active, such as the PPST Reading, Writing, and Mathematics tests taken between September 1, 2000 and December 31, 2012, are accepted.

Additional testing in the content area is required to acquire initial certification/the license to teach in public schools. There are one or more tests for each content area. For PreK-4, and Special Education PreK-8 there are newly developed tests the PECTs, Pennsylvania Educator Certification Tests (www.pa.nesinc.com):

- PECT PreK-4 is 3 modules (1, 2 & 3)
- PECT Special Education PreK-8 is 2 modules (1 & 2)

Secondary programs complete (http://www.ets.org/praxis/pa):
- ETS/Praxis for their 7-12 Content Area.

CLEARANCES:

1. **Child Abuse History Clearance:** All students enrolled in the School of Education are required to have a Child Abuse History Clearance. This is accomplished by completing a Child Abuse History Clearance Form. Fee $10.00.
   
   Department of Public Welfare
   
   P.O. Box 8170
   
   Harrisburg, PA. 17105-8170

   Application is available online at www.compass.state.pa.us/cwis. A copy of the form must be submitted to the School of Education by the beginning of each academic year.

2. **Criminal Record Check:** All students enrolled in the School of Education are required to have a Criminal Record Check. This is accomplished by completing a Request for Criminal Record Check form.

   Forms are available online at: www.epatch.state.pa.us. A copy of the form must be submitted to the School of Education before the first day of class.

3. **FBI Fingerprinting Check:** All students in the School of Education completion program are required to submit on FBI Record. The registration information is available online at: www.pa.cogentid.com.

4. **Tb (Tuberculosis Test Validation) Proof:** of a TB test must be delivered to the School of Education at the beginning of each academic year. See reporting form that follows.

Each of these four documents are valid for only one year from date of issue.

Also, by the 48-60 credit mark:

The student must have a minimum GPA of 3.0
The student must have completed at least six semester credits in college level mathematics and at least three semester credits in college level composition and three credits in English.
Secondary education students must apply to the School of their discipline, as well as the School of Education at the 48 credit mark.

Recommendation for state certification is predicated upon fulfillment of the academic requirements and upon the following considerations:

- Physical fitness for teaching
- Propensity for the teaching profession
- Professional attitude and performance

These criteria are continuously monitored. Standings are reviewed by the faculty with respect to these criteria. Students whose standings are not satisfactory will not be admitted to more advanced professional courses.

If the student reaches the 48-60 credit mark and has not achieved all of the above requirements he/she cannot continue in the Professional Core coursework toward PA Certification. Students could be dismissed from the School of Education or they could continue in the Educational Studies degree program.

**Pre-Student and Student Teaching**

Approval to pre-student or student teach is not automatically granted upon completion of academic requirements. If weakness or deficiencies are noted in subject matter, knowledge, pedagogy, communications, or interpersonal skills, the Dean may require the student to take corrective action, such as, additional coursework, additional practicum, personal counseling, or pursue another major.

**The Privilege of Pre-Student Teaching**

The student will be granted the privilege of entering into pre-student teaching only if the following requirements are met:

- Formal acceptance into the School of Education and the relevant certification program(s).
- Have on record official notification of PASSING all Basic Skills exams (while the School of Education respects the student who repeatedly takes the exam, this effort does not replace passing the exam).
- Maintenance of a 3.0 overall GPA.
- Submission of the formal application for pre-student teaching and all necessary documentations to accompany the application prior to the February duedate.
- Receive the recommendation of the Teacher Education Committee of the School of Education.
- Receive the recommendation of the Dean of the School of Education.

**The Privilege of Student Teaching**

- Formal acceptance into the School of Education and the relevant certification program(s).
- Have on record official notification of PASSING all PAPA exams (while the School of Education respects the student who repeatedly takes the exam, this effort does not replace passing the exams).
- Maintenance of a 3.0 overall GPA.
- Submission of the formal application for student teaching and all necessary documentations to accompany the application prior to the February duedate.
- Completion of ALL course work prior to the student teaching semester.
- Reception of the recommendation of the Teacher Education Committee of the School of Education.
• Reception of the recommendation of the Dean of the School of Education.
• Successful completion of the pre-student teaching experience with an earned grade of a minimum of a C+.

Removal from a Pre-Student or Student Teaching Placement
Students are assigned one (16 weeks) or two (eight weeks each) field experience(s) for Student Teaching. If a student is withdrawn from a field experience at the request of the assigned school administrator, the student will receive a grade of F for that specific experience. The school administrator will have reached the decision to request removal of the student teacher in collaboration with the cooperating teacher and the GMercyU field supervisor. The student may be permitted to repeat the student teaching experience the following semester if recommended by the GMercyU field supervisor, the GMercyU student advisor and the Director of Field Placement. The recommendation must be approved by the Dean of the School of Business and Education.

Credit Requirements
Students accepted into a program of study are expected to complete all courses at Gwynedd Mercy University. Students transferring to Gwynedd Mercy University will have all previous course work completed at regionally accredited institutions evaluated for transfer and will be expected to complete all remaining program requirements at Gwynedd Mercy University. The Education Program requires a minimum of fifty (50) credits as a residency requirement for all students transferring into a bachelor’s degree program.

Transfer credit in the concentration area will be accepted at the discretion of the Dean and credit evaluators. At least 50 percent of the concentration courses must be taken at Gwynedd Mercy University.

Admission into the Teacher Certification Programs:
Students seeking admission into the teacher certification programs at Gwynedd Mercy University must submit an application to the School of Education when the following conditions have been achieved. (Secondary education certification candidates submit an application to the School of their discipline and the School of Education):
1. The candidate for the teacher certification program must have attained passing scores on one of the following Basic Skills assessment methods:
   • The Pearson Pre-service Academic Performancer Assessment (PAPA) modules in Reading, Writing and Mathematics.
   • The Core Academic Skills for Educators (CORE) modules in Reading, Writing, and Mathematics.
   • The Scholastic Achievement Test (SAT
   • The American College Test (ACT)
2. The candidate for the teacher certification program must have completed a minimum of 60 semester credit hours of college level course work.
3. The candidate for teacher certification must have a minimum GPA of 3.0
4. The candidate for teacher certification must have completed at least six semester credits in college level mathematics and at least six semester credits in college level English composition and another English class.

School Personnel Certification Areas
Students who complete these programs satisfactorily are eligible for provisional certification for teaching in the public schools of Pennsylvania. The recommendation for these certificates is contingent upon passing the initial PA required Certification tests in PreK-4, Grades 4-8, Special Education, and secondary content areas are available.
Recommendation for state certification is predicated upon fulfillment of the academic requirements and upon the following considerations:
1. Physical fitness for teaching
2. Propensity for the teaching profession
3. Professional attitude and performance

Periodically, with special attention at the end of the sophomore and junior years, standings are reviewed with respect to these criteria. Students whose standings are not satisfactory will not be admitted to more advanced professional courses.

Transfer credits in the concentration area will be accepted at the discretion of the credit evaluators. At least 50 percent of the concentration courses must be taken at Gwynedd Mercy University.

Prior to February 1st of the pre-student teaching/student teaching semester, a student is required to file an application for pre-student and student teaching in the senior year. Final acceptance into the student teaching program is decided by the Teacher Education Committee and the Dean.

**Secondary Education**
Students can obtain provisional certification for teaching in the public schools of Pennsylvania in the following areas: biology; English; social studies or mathematics. To complete the requirements for certification, the student must major in one of the above named areas and complete at least the following education courses: 3 credits of EDU/PSY 301, PSY 222; EDU 100, 300, 325, 319, 351, 400; SPE 215, 231, 331 under approved supervision.

The recommendation for this certificate is contingent upon passing Basic Skills Tests and Praxis II tests for the specific discipline. The admission and retention procedure is the same as that described for elementary education.

**PHYSICAL EDUCATION**
**Participation in Physical Education Courses with Academic Credit:**
Any student seeking a degree at Gwynedd Mercy University may enroll in any two PE courses. These courses are one credit open electives which meet for eight weeks of the semester. No more than a total of two (2) PE credits may be counted towards the total credits required for any degree. Students are welcome, of course, to enroll in additional PE courses on a non-credit basis.
SCHOOL OF GRADUATE & PROFESSIONAL STUDIES

The School of Graduate & Professional Studies offers the following degree programs designed specifically for working adults:

Degrees Offered
Associate of Science in Business Administration
Bachelor of Science in Applied Psychology
Bachelor of Science in Business Administration: Healthcare Administration
Bachelor of Science in Business Administration: Organizational Management
Bachelor of Science in Nursing – Completion Program for Registered Nurses (Suspended 2018)

Dean, Mary L. Sortino, PsyD
Assistant Dean, Jill Winnington, DBA
Faculty: Jennifer Aucoin, Ph.D; PhD; Ellen Henderson, Ed.D; George Colton, EdD and Jill Winnington, DBA

Director for the Adult Studies Business Program: Jill Winnington, DBA

All degrees are accelerated, cohort-based programs of the highest educational quality. These are value-centered, highly interactive programs rooted in a progressive application of theory.

Classes meet online.

Bachelor of Science in Business Administration
The core curriculum is a 45 credit hour, 80 week program designed to expand a student’s critical thinking skills while providing the student with a solid foundation in business administration principles and their contemporary applications in the workplace. (A minimum of 46 hours of transferable credits is required for admission to the BSBA program.)

Concentration in Organizational Management Requirements:
A grade of “C” or better in: ACC 301; BUS 212, 213, 214, 310, 312, 323, 342, 405, 4001.

Concentration in Health Administration:
A grade of “C” or better in: ACC 302; BUS 213, 310, 323, 342, 371, 378, 405, 4001; HA 312, 401, 402.

Associate of Science in Business Administration
The core curriculum is a 67 credit hour, 114-week program designed to improve a student’s critical thinking skills while providing the student with a solid introduction to business administration principles.

A grade of “C” or better in: ACC 105, 106; BAS 100; BUS 101, 205, 210, 230, 292; ECN 102, 103.

Program Dismissal Policy
A grade of “C” or better is required in each course within the major or minor. If a student achieves less than a “C,” the student is permitted to repeat the course once. If the student fails
to receive a “C” or better after repeating the course once, the student, regardless of his/her cumulative grade point average may be dismissed from the program.

RN to BSN – Completion Program (Suspended 2018)
The Bachelor of Science in Nursing completion program (RN to BSN) is offered on-line by the School of Graduate and Professional Studies.

Bachelor of Science in Applied Psychology - Degree Completion Program
The Bachelor of Science in Applied Psychology, a **totally (100%) online accelerated** degree completion program, is designed for those students who have already earned a total of 30 transferable undergraduate credits and completed two years of professional work experience. The program is cohort based and focuses on theoretical foundations and the application of psychological principles in real world settings. Students can complete their degree in as little as 24 months. Students who complete the program will have the educational background to apply for bachelor level positions in various fields including but not limited to; community social services, research, criminal justice, business, and mental health.

Admission requirements include;
1. A completed, signed application with application fee,
2. 30 credit hours of transferable college credit from a regionally accredited institution
3. A personal statement
4. A minimum cumulative GPA of a 2.0 (on a 4 point scale) for all college credits previously attained
5. Equivalent of two or more years of professional work experience.

**Director for the Applied Psychology Program:** George Colton, Ed.D.

**Applied Psychology**
**Prerequisite:** 30 credits of transferable college/university credits from a regionally accredited institution, PSY 100

**Major Requirements:** 51 semester hours - PSY 111, PSY 200, PSY 210, PSY 212, PSY 303, PSY 305, PSY 306, PSY 307, PSY 313, PSY 312, PSY 314, PSY 321, PSY 4000, SOC 303, SOC 335, SOC 2000, BUS 381.

**Program Academic Policy**
The minimum grade point average within the major is a 2.0 and the minimum cumulative grade point average for the degree is also a 2.0. Grades of a C or better are required in all courses within the major. Grades below a “C:” in the major are grounds for dismissal from the program. Students who earn less than a “C” grade are permitted to repeat the course once. If the student fails to receive a “C” grade or better after repeating the course once, the student, regardless of his/her cumulative grade point average may be dismissed from the program.
Nursing Degrees offered:
Bachelor of Science in Nursing

Health Profession Programs:
Bachelor of Science
  Medical Technology Laboratory Science
  Radiation Therapy
  Radiologic Technology

Bachelor of Health Science
  Occupational Science
  Radiation Therapy
  Respiratory Care

Associate of Science
Respiratory Care

Dean: Ann Phalen, Ph.D.
Associate Dean: Mary Hermann, EdD

Medical Laboratory Science: Joy M. Fox, BS, RT(R) (M)(QM)(CT), Campus Coordinator

Nursing: Laraine Amoia-Watters, EdD; Mary Brinkman, PhD; Jennifer Brown, MSN; Patricia Brown O’Hara, PhD; Nicole Butler, MSN; Shannon Carabba, MSN; Nancy Chiarantona, MSN; Susan Cicione, MSN; Tiffany Ciocci, MSN; Brenda Clapp, DNP; Kelly Flanigan, EdD; Diane Gilson, MSN; Mary Hermann, EdD; Beth Hutter, MSN; Theresa Lewis, DNP; Karen Loving, DNP; Pamela B. Lynn, EdD; Velia McCabe, MSN; Claire McConnell, MSN; Terese McElwee, MSN; Kathryn McEvilly, MSN; Mary Ann McLaughlin, EdD; Johnette Meidt, MSN; Jean Michiels, MSN; Dona M. Molyneaux, PhD; Joy Nop, MSN; Corrie Pallante, MSN; Lorraine Quarles, MS; Amanda Quate, MSN; Catherine Razzi, MSN; Roseann Regan, PhD; Genevieve Rota, MSN; Michele Shuman, DNP; Denise A. Vanacore, PhD; Margaret Van Buren, MSN; Maria Warnick, MSN

Occupational Science: Thomas Mernar, PhD, OTR/L, Program Director; John Bindo, OTD; Mindy MacRone-Wojton, DSc, OTR/L; Sharon Montgomery, OTD; Michele Peterson, MS;

Radiation Therapy: Rose Marie Troutman, MS, RT (T), ARRT, Program Director; Susan Gallagher, MS, RT (R)(T), ARRT, Clinical Coordinator; Lorraine Quarles, MS, R.T. (T) (ARRT), Clinical Coordinator; Wayne Pinover, DO, Medical Director.

Radiologic Technology: Joy M. Fox, BS, RT(R) (M)(QM)(CT), Campus Coordinator
Respiratory Care: William F. Galvin, MSEd, RRT, CPFT, AE-C, FAARC, Program Director; Barbara B. Schuster, MEd, RRT, Director of Clinical Education; Thomas Lamphere, BS, RRT-ACCS, RPFT, FAARC; William Randall Solly, MS, RPFT, Laboratory Director; Donald D. Peterson, MD, Medical Director.
Bachelor of Science in Nursing (Traditional BSN)

The Bachelor of Science in Nursing program (BSN) is a four-year program that is structured to provide a strong foundation in the liberal arts, Mercy values, and sciences and professional nursing practice. Graduates from the BSN program are prepared as generalists to give direct and indirect nursing care in a variety of health care settings to individuals, families, communities and populations. Students acquire requisite knowledge, attitudes and skills to contribute to the health care team in a variety of nursing roles such as caregiver, teacher, advocate and leader. In addition, students obtain an education based upon which graduate study for specialization in nursing may be built.

Emphasis for the first two years of the BSN program involves acquiring a foundational knowledge in the liberal arts and sciences and some beginning nursing courses. In junior and senior years, the curriculum is heavily concentrated with a variety of nursing theory and clinical courses and selected liberal arts and science courses.

ADMISSION PROCEDURE FOR STUDENTS APPLYING FOR THE TRADITIONAL BSN PROGRAM:

1. Complete an application form and pay registration fee. (See Admission section)
2. Submit an official high school transcript of credits showing 16 units in prescribed and elective subjects. This should include: chemistry, biology and three units in mathematics (algebra I, algebra II and geometry).
3. Be in the top third of high school class.
4. Complete the Scholastic Aptitude Tests of the College Entrance Board (SATs) or American College Testing (ACTs). Students who have been graduated three (3) years or more may have this requirement waived.
5. Submit a written letter of recommendation concerning character and promise as a student in nursing from the principal, a teacher, or a guidance counselor from your high school/college.
6. Evidence that foreign applicants have received a minimum score of 550 on the TOEFL examination or a 6.0 on the IELTS test.
7. Refer to College Placement Program for College English and mathematics. Students must achieve an assessment level 3 in Math or must take MTH 002 during the summer prior to the Fall semester.

Any transfer applicant to the nursing program who has had science courses that are seven (7) years or older prior to beginning the nursing courses is required to take Excelsior examinations (anatomy and physiology and/or microbiology) or repeat the science courses to verify that the knowledge is current. Passing score of 50 is required by the science division for each exam. Excelsior science examinations are 3 credits each. Additional science credits may be needed to meet the curriculum requirements. If a student fails any of these Excelsior exams, the course(s) must be taken. All required science courses must have a “hands on” clinical lab experience.

A student who withdrew from the nursing program in good standing and wishes to resume, must REPEAT ALL NURSING COURSES if the lapse of time has been more than two (2) years.

Accelerated BSN (ABSN) Program:
Another program option for students holding a previous Bachelor’s degree in a field other than nursing is available. This is the Accelerated BSN (ABSN) Program for second degree students and is a full-time program that can be completed in 16 months. There are three opportunities throughout the year to begin this program: January, May, and August. The program is a 4-semester continuous (full-time) 16-month program.
BSN Weekend Program:

A second additional option for students holding a previous bachelor’s degree in a field other than nursing is available. The BSN Weekend Program can be completed every weekend year round including some Fridays over three years on the Gwynedd Valley campus.

RECRUITMENT FOR THE ABSN AND BSN WEEKEND PROGRAM IS FACILITATED BY SYNERGIS.

The following criteria and prerequisite courses are required to be considered for ABSN admission.

- GPA of 3.0 or greater
- All science courses require a “B” or better
- All pre-requisite courses must be completed within the past 7 years to be considered transferable
- Anatomy & Physiology I + Lab
- Anatomy & Physiology II + Lab
- Microbiology + Lab
- Chemistry for the Health Professions I + Lab
- Organic Chemistry I and II + Labs or Organic Chemistry I + Lab and Biochemistry
- Principles of Nutrition (taught by a Registered Dietician)
- Statistics
- Developmental Psychology (must cover across the lifespan)

The Professional Nursing Law permits the State Board of Nursing to consider the “moral character of any license candidate.” The applicant who is applying to the nursing program should be aware that the State Board of Nursing will not issue a license or certificate to an applicant who has been convicted of any felonious act. Matriculation into the nursing courses is conditional pending receipt and evaluation of a PA Criminal Record Check to determine if there is any conviction which may bar the student from the nursing program.

NON ACADEMIC CRITERIA FOR ADMISSION, PROGRESSION AND RETENTION

Graduates from the Frances M. Maguire School of Nursing and Health Professions must possess the essential knowledge, attitudes and skills to function in a wide variety of clinical situations, and render a wide spectrum of patient care in a safe and effective manner.

The goal of the Frances M. Maguire School of Nursing and Health Professions is to prepare every Distinctive Mercy Nursing student to think ethically, critically, and practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to facilitate knowledge, enhance nursing practice and patient safety, foster professional integrity, and ultimately improve the health outcomes of patients, families, and communities across the continuum of care. In addition, certain functional abilities are essential for the delivery of safe, effective, quality nursing care during clinical education activities. Therefore, the faculty has determined that certain technical standards are requisite for admission, progression, and graduation from the nursing programs.

In addition to classroom learning, clinical learning occurs throughout the program and involves considerations (such as patient safety and clinical facilities) that are not present for classroom accommodations. For this reason, any applicant or individual who seeks accommodations prior to or immediately after enrolling in the nursing programs must also request an assessment of the types of reasonable accommodations needed for the clinical education component of the program. The individual must be able to independently, with or without reasonable accommodation, meet the following technical standards of general abilities and those specifically of (1) observation; (2) communication; (3) motor; (4) cognitive, conceptual, and quantitative abilities; (5) essential behavioral and social attributes; and (6) ability to manage stressful situations. Individuals unable to meet these
technical standards, with or without reasonable accommodation, will not be able to complete the
program and are counseled to pursue alternate careers.

**General abilities:** The individual is expected to possess functional use of the senses of vision, touch, hearing, and smell so that data received by the senses may be integrated, analyzed, and synthesized in a consistent and accurate manner. The individual must also possess the ability to perceive pain, pressure, temperature, position, vibration, and movement that are important to the student’s ability to gather significant information needed to effectively evaluate patients. The individual must be able to respond promptly to urgent situations that may occur during clinical education activities and must not hinder the ability of other members of the health care team to provide prompt treatment and care to patients.

**Observation Ability:** The individual must have sufficient capacity to make accurate visual observations and interpret them in the context of laboratory studies, medication administration, and patient care activities. In addition, an individual must be able to document these observations and maintain accurate records.

**Communication Ability:** The individual must communicate effectively both verbally and non-verbally to elicit information and to translate that information to others. Each individual must have the ability to read, write, comprehend, and communicate effectively in the English language to facilitate communication with patients, their family members, and other professionals in the health care settings. In addition, the individual must be able to maintain accurate patient records, present information in a professional, logical manner and provide patient counseling and instruction to effectively care for patients and their families. The individual must possess verbal and written communication skills that permit effective communication with instructors and students in both the classroom and clinical settings.

**Motor Ability:** The individual must be able to perform gross and fine motor movements with sufficient coordination needed to perform complete physical examinations utilizing the techniques of inspection, palpation, percussion, auscultation, and other diagnostic maneuvers. The individual must develop the psychomotor skills reasonably needed to perform or assist with procedures, treatments, administration of medication, management and operation of diagnostic and therapeutic medical equipment, and such maneuvers to assist with patient care activities such as lifting, wheel chair guidance, and mobility. The individual must have sufficient levels of neuromuscular control and eye-to-hand coordination as well as possess the physical and mental stamina to meet the demands associated with extended periods of sitting, standing, moving, and physical exertion required for satisfactory and safe performance in the clinical and classroom settings including performing CPR, if necessary. The individual must possess the ability of manual dexterity that would be required for certain activities, such as drawing up solutions in syringe. The individual must be able to independently perform the detailed motor and fine activities without the use of assistive devices.

**Cognitive, Conceptual, and Quantitative Abilities:** The individual must be able to develop and refine problem-solving skills that are crucial to practice as a nurse. Problem-solving involves the abilities to measure, calculate, reason, analyze, and synthesize objective and subjective data, and to make decisions, often in a time urgent environment, that reflect consistent and thoughtful deliberation and sound clinical judgment. Each individual must demonstrate mastery of these skills and possess the ability to incorporate new information from peers, teachers, and the nursing and medical literature to formulate sound clinical judgment in patient assessment, intervention, evaluation, teaching, and setting short and long term goals.

**Behavioral and Social Attributes:** Compassion, integrity, motivation, effective interpersonal skills, and concern for others are personal attributes required of those in the nursing programs. Personal comfort and acceptance of the role of a nurse functioning under supervision of a clinical instructor or preceptor is essential for a nursing student. The individual must possess the skills required for full
utilization of the student’s intellectual abilities; the exercise of good judgment; the prompt completion of all responsibilities in the classroom and clinical settings; and the development of mature, sensitive, and effective relationships with patients and other members of the health care team. Each individual must be able to exercise stable, sound judgment and to complete assessment and interventional activities. The ability to establish rapport and maintain sensitive, interpersonal relationships with individuals, families, and groups from a variety of social, emotional, cultural and intellectual backgrounds is critical for practice as a nurse. The individual must be able to adapt to changing environments; display flexibility; accept and integrate constructive criticism given in the classroom and clinical settings; effectively interact in the clinical setting with other members of the healthcare team; and learn to function cooperatively and efficiently in the face of uncertainties inherent in clinical practice.

**Ability to Manage Stressful Situations:** The individual must be able to adapt to and function effectively to stressful situations in both the classroom and clinical settings, including emergency situations. The individual will encounter multiple stressors while in the nursing programs. These stressors may be (but are not limited to) personal, patient care/family, faculty/peer, and or program related.

Students should review the Technical Standards for the Nursing program carefully and identify if additional supports are needed for any portion (didactic and clinical) of the Nursing program. Students are encouraged to contact the Student Accessibility Services Office (215-646-7300 extension 21427) to arrange an individualized consultation to discuss any support services or accommodations they may require.

(Adapted from Drexel University School of Nursing and New York University School of Nursing).

**REQUIREMENTS FOR THOSE ACCEPTED INTO THE BSN PROGRAM:**

**Health and Background Requirements**

All **ABSN students** are required to submit health and background requirements prior to the start of the program.

- Failure to achieve 100% compliance with all requirements will result in the student’s inability to remain enrolled in nursing courses. Students will be required to withdraw from nursing courses.

Gwynedd Valley BSN **students enrolled in Level 200 nursing courses (effective Fall 2019 semester):**

- Must submit all health and background requirements as indicated no later than the due dates identified in the written information provided and mirrored on the Gwynedd Mercy University Complio/American Data Bank website. Refer also to the FMMSNHP BSN Student Guidebook.

  - Failure to achieve 100% compliance with health and background requirements may result in withdrawal from nursing courses in the Fall 2019 semester. Noncompliance by the end of the Fall 2019 semester results in the inability to register for nursing courses for the Spring 2020 semester.

Gwynedd Valley BSN **students enrolled in Level 300 and 400 nursing courses (effective Fall 2019 semester):**

- Must submit all health and background requirements as indicated no later than the due dates identified in the written information provided and mirrored on the Gwynedd Mercy University Complio/American Data Bank website. Refer also to the FMMSNHP BSN Student Guidebook.
Failure to achieve 100% compliance with all requirements by the due dates indicated will result in the inability to remain enrolled in any nursing course; noncompliant students will be required to withdraw from nursing courses.

Complete instructions and information related to these requirements are located on the Gwynedd Mercy University's Compliance website. Refer to additional details at gmercyucompliance.com

**Failure to complete these mandatory requirements will result in the inability to enroll in/begin subsequent nursing courses.**

**Requirements are subject to change at any time.**

Meningitis Students living on – campus only | X |

**Background Clearances**

| Child Abuse Clearance * | X |
| FBI Fingerprinting ** | X |
| All students must complete the Department of Human Services (DHS) Fingerprinting + DOA Fingerprinting | |
| PA State Criminal Background Clearance * | X |

* Background Clearances

*A response to any of the clearances other than *"No Record"* may prevent a student from participating in clinical patient-care experiences. As a result, the student will be unable to meet course and program learning outcomes, which may lead to dismissal from the BSN program.

A PA Child Abuse History Clearance is required to determine if there is any conviction/charge which may bar the student from the nursing program. This evaluation is necessary in order to participate in experiences which include contact with children. This requirement is mandated by the Commonwealth of Pennsylvania per 24 P.S. 1-111 of the Pennsylvania Public School Code and 23 Pennsylvania C.S.A. 6355 of the Pennsylvania Child Protection Services.

**The Older Adults Protective Services Act (OAPSA) of Pennsylvania requires students who are not, or have not been a resident of the Commonwealth of Pennsylvania for the last two years, to complete fingerprinting thorough the DOA in addition to fingerprinting through the Department of Human Services.

**Additional Requirements**

**Transportation to Clinical Patient Care Experiences**

Students are required to provide their own transportation to and from the health care agencies for clinical experiences.
Liability Insurance

Students are required to maintain student nurse liability insurance while enrolled in the BSN program. This insurance is arranged by the university and a fee for this insurance will be charged to the student’s account.

Math Competency Examination

Successful completion of a math competency examination with a minimum score of 85% is required in the NUR 209, Fundamentals of Nursing. Three opportunities will be afforded to the student to successfully complete this examination. Failure to achieve a score of 85% or better on the math examination may result in a course failure.

Math competency will be assessed throughout the BSN program. Attainment of benchmark requirements is required and are detailed in individual course syllabi.

Academic Progression for the BSN Program

Grades of “C” or higher (“C minus” (C-) not acceptable) are required in all nursing and science courses. For advancement to the sophomore year, a 2.0 cumulative average is required. A student may achieve less than a “C” (“C” minus is not acceptable) in only one nursing course. He/she may repeat the course once and cannot progress in the sequential nursing clinical courses until its successful completion with a “C” or higher grade. Students may be part-time while repeating the course but are required to return to full-time status during subsequent semesters. If a student achieves less than a “C” grade (“C”- is not acceptable) in any two nursing courses, he/she will be dismissed from the program. Refer to BSN Student Guide Book for further detail for academic progression in nursing courses.

ACCEPTABLE ACADEMIC ACHIEVEMENT IN SUPPORT COURSES IN NURSING

Grades of “C” or higher (“C minus” (C-) is not acceptable) are required in Math (MTH103), Anatomy and Physiology I and II, Lecture and Laboratory, and Nutrition 200, Microbiology for Health Services, Chemistry for Health Professions I and II.

1. A student who earns less than a “C” in Anatomy and Physiology I lecture may advance and take Anatomy and Physiology II. However, Anatomy and Physiology I must be repeated and a grade of “C” or higher must be earned.

2. A student who earns less than a “C” in Chemistry 115 must repeat this course before taking Chemistry (CHM) 116.

3. Grades of “C” or higher in both lecture and laboratory science, math and nutrition courses must be earned before the student can advance to their junior level nursing courses.

NOTE: NURSING COURSES ARE SEQUENTIAL FOR ALL PROGRAMS

**Total credits for the Traditional BSN Program = 131 Credits:**
- Periodic assessment and testing is required throughout the BSN program of studies. See BSN Student Guide Book and course syllabi for specifics on assessment and testing.
- All students in the BSN program are required to take a designated NCLEX-RN diagnostic test prior to graduation. If a score predictive of success on NCLEX-RN is not achieved, the student will be required to complete the assigned remediation plan. The application for an RN license will not be sent by the University until the required score is achieved.

Total credits for the Weekend BSN Program = 67 credits

Smarthinking

Students enrolled in the Accelerated BSN (ABSN) program through the Frances M. Maguire School of Nursing and Health Professions have access to academic support through Smarthinking. Smarthinking provides free online tutoring in a variety of subjects, as well as a Writing Center. Tutoring is available in most academic subjects. Students can choose a live drop in session, or may choose to schedule time with a tutor. Tutoring availability varies by subject but all subjects have some evening and weekend availability. The Writing Center offers review and feedback on papers. Students must allow a minimum of 24 hours for paper review. Students access Smarthinking through their course in Blackboard.

Academic Policies for All BSN Programs: Traditional, ABSN and Weekend

BACCALAUREATE NURSING LABORATORY, ON CAMPUS DAYS AND CLINICAL ATTENDANCE POLICY

LABORATORY ATTENDANCE POLICY

Students are required to attend all laboratory components of their course work. It is the responsibility of the student to notify the course faculty about a lab absence. The student must send the faculty an email stating the date and reason for their absence, no less than one (1) hour prior to the beginning of the lab. Students who miss more than two (2) labs per course are at risk for course failure.

Procedure
Students will be required to pay a $50.00 lab make-up fee for each unexcused absence. If a student fails to properly notify the faculty course lead about the lab absence (as described in the “policy” section), the student will be required to pay the lab make-up fee. The fee will be waived for students who provide documentation of extraordinary circumstances that necessitate absence from the lab such a serious illness or death in the family. All absences will be reviewed by the course full-time faculty. All unexcused absences are subject to the lab fee. If the student is ten (10) minutes or later for the lab session without sufficient documented cause, the student will be required to make up the lab session and pay the $50.00 lab make-up fee.

The lab make-up fee is payable to “Frances M. Maguire School of Nursing & Health Professions” in a $50.00 money order. No personal checks or cash will be accepted. The money order make-up fee must be submitted to the BSN administrative assistant of the student’s program a minimum of five (5) days prior to the scheduled lab make up day. The lab make-up day will be determined by the course faculty. Failure to submit the lab make-up fee and/or attend the lab make-up day may result in course failure.

CLINICAL ATTENDANCE POLICY

Students are required to arrive on time for their clinical experiences and attend all clinical components of their course work. If a student is late for their clinical experience, he or she will receive a clinical warning. Chronic lateness will result in clinical probation and the student is at risk for clinical/course failure. Being absent without notification may result in a failing grade for the clinical course. This determination will be made by the appropriate designated faculty. Any and all missed clinical components must be made up. Clinical make-up is scheduled at the discretion of the course faculty.
A. In case of a clinical absence, it is the responsibility of the student to notify the clinical course faculty at the minimum of 2 hours before the clinical day begins. Failure to notify faculty and agency of clinical absence may result in a course failure.

B. Students will bear the expense incurred for the make-up experience. Students are required to pay a **$125.00 per day make-up fee**. The fee must be paid prior to the scheduled make-up day/simulation or he or she fails the course.

C. Students who request a waiver of the clinical make-up fee should be directed to the Associate Dean.

D. Extreme circumstances will be addressed by the Associate Dean or designee, on an individual basis.

**ELECTRONIC-BASED EXAMINATION POLICY**

**Procedure**

**A. Student Responsibilities**

1. Nursing students must install and maintain the current version of examination software application on their laptop computer that will be used during proctored examination/s.
2. Students must be familiar with their computer, the current version of examination software and instructions prior to downloading an examination/s.
3. Students must adhere to any email instructions from the IT department regarding updates and system maintenance of the current version of examination software.
4. Examinations will be available by 6 PM the evening before the examination
5. **Students must download the examination prior to the start of the exam**
   - Any student who fails to download an examination will receive an automatic point deduction from the examination score received. For example; a student who scores 100% on an examination will receive a score of 95%.
   - Students beginning the examination late will not be granted additional time to complete the examination. Students are subject to Examination policies and procedures as outlined in the BSN Student Handbook. Students must have a fully charged laptop computer and an A/C power cord available. There is no guarantee that outlets will be available for charging
   - Upload the examination on completion or as the scheduled examination period ends and before leaving the room.

**B. On examination day students must:**

1. Arrive at least 10 minutes before the scheduled start time of an examination.
2. If a student is late for an exam a second time, they will have 5 points deducted from their exam.
3. Students should enter the room and report to their assigned seat
4. Students must bring Gwynedd photo ID to be seated for the test. If they forget their ID they will not be allowed to sit for the exam.
5. Students must be seated prior to the start of the scheduled exam/class time with necessary materials (i.e. laptop, pencil) with all other materials, such as books, notes backpacks and other personal belongings must be placed in the designated space as per faculty direction.
6. Wearing outer apparel such as hoods, hats, ponchos, bulky sweaters, or any clothing items with large pockets is not permitted. Proctors can request that students remove any clothing
item that violates the policy.

C. Testing Guidelines/rules

1. Use of any device capable of web, email, text-messaging and/or data storage capability is prohibited during examinations. All personal equipment (e.g., cell phones, pagers, iPod, watches, smart watches, headphones, ear buds, etc.) must be turned off and left with personal items in the front of the room. Failure to do so will result in automatic expulsion from the room and a score of zero for the test/exam. If a calculator is required for testing, it must be the approved calculator with the testing program. Foam or rubber ear plugs are permitted to cancel out environmental noise.

2. Speaking to another student after the examination has started is not permitted and will result in automatic expulsion from the room and a score of zero for this examination.

3. Passing notes, calculators or any other items or materials or speaking to another student after the exam has started will result in automatic expulsion from the room and a score of zero for the examination.

4. Any questions or requests should be made directly to the instructor or proctor. Proctors are under no obligation to answer questions during an exam.

5. Any attempt to tamper with or disable the electronic testing software security features will be considered a violation of the Academic Integrity policy and will result in disciplinary action. Prohibited activities include, but are not limited to: sharing examination password(s), recording examination questions, and reverse engineering examination encryption or attempting to do so.

6. Students experiencing technology problems must make arrangements with Institutional Technology (IT) to inspect their computer and borrow a University computer as needed.

7. Students who are unsuccessful in downloading the examination file or encounter technical problems, before the start of the exam that would prevent the use of their computer during an examination should immediately notify the proctor. If deemed necessary, the student will be referred to IT for inspection and diagnosis of their computer problem. Every effort will be made to resolve the issue in a reasonable timeframe. If the faculty proctor/s determines that the issue cannot be resolved in a reasonable timeframe, at the extreme discretion of the faculty the student may be issued a paper examination. The student will follow-up with the course faculty and IT staff as instructed.

8. A functioning computer must be available for the next testing session.

9. One sheet of scratch paper will be provided to each nursing student during the administration of an examination/s. The scratch paper will include the academic integrity statement regarding examinations. Students must clearly print, sign and date the scratch paper. The scratch paper must be submitted to the faculty proctor/s at the conclusion of the examination. Students who fail to return this sheet will receive a zero (0%) on the examination/s.

10. At the completion of the examination, students are required to upload their examination/s immediately and show the examination submission confirmation screen (green screen) to the faculty proctor/s before leaving the testing room to ensure examination results are received properly. Students who experience difficulty submitting their examination will be referred for technical assistance. Students who do not upload examination results and do not seek technical assistance the day of the examination are at risk of receiving a zero on the examination.

D. Missed exams

1. The student must notify the faculty via email PRIOR to the start of the exam.

2. Failure to report the absence prior to the start of the exam will be considered a no call no show and will result in a maximum achievable grade of zero
3. All missed exams must be made up within 48 hours or at the discretion of the faculty and will result in a maximum achievable grade of 95%

E. Emergencies (Example: Fire Alarm)

1. All students must shut down their devices (hard shut-down, using the off switch). This stops the clock on the exam. There will be a record of all of students’ keystroke activities during the emergency.
2. Once students return to the classroom and turn on their devices and are ready to continue their exams, the universal resume code will be provided.
3. At examination completion, students will return their scratch paper to the faculty proctor, show their green screen to the proctor and their name will be checked off the class roster.
4. At examination completion, there will be a check of the electronic testing log for any improper activity during or after the emergency.

Grade Rounding Policy for Undergraduate Nursing Courses

POLICY
Faculty will record student course grades of all nursing undergraduate nursing courses in Self service and Blackboard.

PROCEDURE
Blackboard

1. A minimum of 76.0 is required for passing in all undergraduate courses.
2. There is no rounding of grades for individual examinations, quizzes and assignments.
3. Faculty will record the final course grade mathematically rounded to a whole number.

Students’ scores will be recorded as two decimal places when applicable (> 0.50 will be rounded to the next highest number, i.e., 70.50 = 71; <0.50 will be rounded to the next lowest number, i.e., 72.49 will be recorded as 72.0).

4. Faculty will record the ATI/HSEI score using a decimal format.

Self Service

1. Final course grades will be recorded in Self Service as a letter grade corresponding to the whole number grade for the assigned course based on the Nursing Program grading criteria.

(Approved: December 2018)

Nursing Course Withdrawal Policy

1. Students will be permitted to request a withdrawal from one individual nursing course only once throughout the program. A second withdrawal request from the same individual nursing course will be denied by the Associate Dean or Dean.
2. A student requesting a second course withdrawal from the same individual nursing course for extenuating circumstances must make an appointment with the Associate Dean or Dean. It will be at the discretion of the Dean to grant a second withdrawal.
3. Students must submit a Course Withdrawal form to their Academic Advisor or Associate Dean in order to initiate the withdrawal process.
4. Students must submit a request for a withdrawal by the final day as published on the official Academic Calendar. Late withdrawals will be decided on an individual basis and at the discretion of the Dean of the School and the Vice President of Academic Affairs.
5. The student will receive a “W” grade, and charges will be adjusted according to the Bursar’s Office Refund Policy.
6. Students are required to take all nursing courses at Gwynedd Mercy University.
7. Withdrawing from a course may impede a student’s graduation time.

(Effective: August 2019)

Admission of Licensed Practical Nurses to the BSN Program
Licensed practical nurses (LPN) may receive credit through the life experience process (see academic information) for NUR 209 Fundamentals of Nursing Practice provided they have fulfilled the following criteria:

1. Have been licensed by examination in the state of Pennsylvania (LPN)
2. Have been accepted into the BSN program in compliance with admission policies for all students who apply for the BSN degree nursing program
3. Have met the requirements for those accepted into the nursing program
4. Have met the non-academic criteria for admission and retention
5. Have received a grade of “C” or higher in the following transfer courses:
   - Anatomy & Physiology I and II 8 credits
   - Microbiology 3 credits
   - Nutrition 3 credits
   - Chemistry 115 & 116 8 credits

Credit for NUR 209 Fundamentals of Nursing Practice is contingent on satisfactory performance on a lab practicum to demonstrate proficiency in required nursing skills. In addition, the LPN will be required:

   - To fulfill the mathematics requirement by satisfactorily passing the math competency examination with a score of 85 or higher.
   - To attend specific classes as designated by the faculty on topics not included in the curriculum for licensed practical nurses.
   - To complete NUR 208 Introduction to Professional Nursing.

**Major Requirements:** NUT 200; BIO 107, 107L, 108, 108L, 121, CHM 115/115L, CHM 116/116L, MTH 103

**Other General Education Requirements: total of 67 credits**
Admission of Licensed Practical Nurses to the BSN Program
Licensed practical nurses (LPN) may receive credit through the life experience process (see academic information) for NUR 209 Fundamentals of Nursing Practice provided they have fulfilled the following criteria:

6. Have been licensed by examination in the state of Pennsylvania (LPN)
7. Have been accepted into the BSN program in compliance with admission policies for all students who apply for the BSN degree nursing program
8. Have met the requirements for those accepted into the nursing program
9. Have met the non-academic criteria for admission and retention
10. Have received a grade of “C” or higher in the following transfer courses:
   - Anatomy & Physiology I and II 8 credits
   - Microbiology 3 credits
   - Nutrition 3 credits
   - Chemistry 115 & 116 8 credits

Credit for NUR 209 Fundamentals of Nursing Practice is contingent on satisfactory performance on a lab practicum to demonstrate proficiency in required nursing skills. In addition, the LPN will be required

- To fulfill the mathematics requirement by satisfactorily passing the math competency examination with a score of 85 or higher.
- To attend specific classes as designated by the faculty on topics not included in the curriculum for licensed practical nurses.
- To complete NUR 208 Introduction to Professional Nursing.

**Major Requirements:** NUT 200; BIO 107, 107L, 108, 108L, 121, CHM 115/115L, CHM 116/116L, MTH 103

Health Profession Programs

Gwynedd Mercy University offers the following health professions programs:

- Medical Laboratory Science
- Occupational Science/Occupational Therapy
- Radiation Therapy
- Radiologic Technology
- Respiratory Care

Academic Standards
Without exception, students must have a cumulative grade point average of 2.00 on a 4.00 scale for all course work completed at Gwynedd Mercy University. Some programs have established a minimum grade point average higher than 2.00 on a 4.00 scale. Some programs also use a component of the overall grade point average, such as math/science grade point average. See specific grade point average information for each program in the handbook for that program and/or in this catalog.

All students in health programs must maintain a grade of C or better in all concentration courses and natural science requirements. (C- is not acceptable). The program specific policy on repeating a course in which a student has earned below a “C” grade is outlined in the student handbook for that program and/or in this catalog.

Technical Standards for Admission and Retention
A degree in one of the health sciences attests to the mastery of knowledge and skills. It follows from this that graduates of the health programs must possess the essential knowledge and skills to function in a broad variety of clinical situations, and render a wide spectrum of patient care in a safe and effective manner.

The Health Professions faculty has specified nonacademic criteria, Technical Standards, which all applicants/students are expected to meet in order to participate in the health programs. These criteria include the following five areas: 1. observation; 2. communications; 3. motor function; 4. intellectual-conceptual, integrative, and quantitative abilities; and 5. behavioral and social attributes.

Professional Conduct
Students are responsible for exhibiting conduct that is appropriate to their professional training and education. Each program will distribute a handbook that indicates standards and policies of appropriate professional conduct.

Academic Policies in the Health Professions

Credit Requirements
Students accepted into a program of study are expected to complete all courses at Gwynedd Mercy University. Students transferring to Gwynedd Mercy University will have all previous course work completed at regionally accredited institutions evaluated for transfer and will be expected to complete all remaining program requirements at Gwynedd Mercy University. The School of Nursing and Health Professions requires a minimum of forty-five (45) credits as a residency requirement for all students transferring into a bachelor’s degree program. A residency requirement of thirty (30) credits is required for students transferring into an associate degree program.
Probation in a Health Profession Program
Upon the recommendation of the faculty in the student’s program, a student is placed on probation. Probational recommendations are made when the student does not meet the standards of academic performance or professional standards. Students placed on probation for program-specific requirements will be notified in writing by the Program Director.

Dismissal from a Health Profession Program
Upon the recommendation of the faculty in the student’s program, a student may be dismissed from a health program. Dismissal is based on the failure to meet academic or professional standards. The student will be informed of dismissal by the Dean and/or the Program Director. Dismissal from a health program does not necessarily mean dismissal from the University.

Clinical Affiliations
Clinical education at hospitals and other institutions, which provide fieldwork experiences, are required by all health programs. The program faculty in Radiation Therapy and Respiratory Care are responsible for the selection, approval and assignment of all clinical experiences. Although individual student needs will be recognized, the final placement decisions are made by the program faculty. Students are responsible for transportation, fees, self-support, and for following the rules and regulations of the clinical affiliate to which they are assigned. The student’s conduct must be consistent with the standards of the University, clinical affiliate and the profession.

Each student must carry malpractice insurance, which covers injuries arising out of the rendering of or failure to render professional services. All students must provide a health examination form upon admission. Specific information will be given to all accepted students on health forms and immunizations.

Student emergency health care while at a clinical affiliate is handled in accordance with the clinical affiliate’s policy and is the direct responsibility of the student.

All laboratory or clinical courses are competency-based, thus, students are required to successfully complete all designated clinical competencies as defined by the specific program. The indicated number of contact hours frequently exceeds the number in a didactic course to fulfill this directive and to orient students to new and varied instrumentation.

(This section is addressed by each affiliate program for Medical Laboratory Science and Radiologic Technology).

Child Abuse History Clearance (Matriculation may be conditional pending receipt of clearance)
Students enrolled in the Health Professions are required to have a Child Abuse History Clearance. This is accomplished by completing a Child Abuse History Clearance Form obtained from the Program Director or program’s Director of Clinical Education.

(This section is addressed by each affiliate program for Medical Laboratory Science and Radiologic Technology).

Criminal Record Check: (Matriculation may be conditional pending receipt of criminal record check)
Students enrolled in Health Professions are required to have a Criminal Record Check. This is accomplished by completing a Request for Criminal Record Check form obtained from the Program Director or program’s Director of Clinical Education.
Drug Screening:
Certain clinical agencies may require students to undergo drug screening to participate in clinical education at that agency.

BACHELOR OF SCIENCE and BACHELOR OF HEALTH SCIENCE DEGREE PROGRAMS

Medical Laboratory Science

A student who wishes to earn a Bachelor of Science degree in Medical Laboratory Science follows a four-year program or a five-year program. The first three years (90+) credits are taken on the university campus. The final year of the Medical Laboratory Science program takes place in a 12-month program at a hospital-based NAACLS approved affiliate School of Medical Laboratory Science. Students are required to take the MLS (ASCP) examination offered by the American Society of Clinical Pathologists.

Students taking the Medical Laboratory Science major must complete all required courses before beginning the senior year of study at a hospital-based National Accrediting Agency for Medical Laboratory Science (NAACLS) approved affiliate School of Medical Laboratory Science. Most science courses must be less than seven (7) years old by the time the student begins clinical training at the hospital. No science course can be greater than ten (10) years old by the time of clinical training at the hospital.

The hospital-based (NAACLS) accredited Schools of Medical Laboratory Science are independent from the University. Students will be advised when application must be submitted to affiliate programs. A list of NAACLS approved Schools of Medical Laboratory Science can be found at www.naacls.org. Admission is competitive and the University cannot guarantee admission.

Technical Standards:
An applicant to the Medical Laboratory Science Program must, with or without reasonable accommodation, have sufficient:

- Visual acuity to be able to identify microscopic structures, cells, and organisms; to operate analytical instruments appropriately and safely without substantially endangering students, co-workers and patients.
- Fine motor skills and manual dexterity to obtain and manipulate specimens, reagents, instruments, and analytical equipment according to established guidelines with speed, accuracy, precision, and in a manner that does not endanger others.
- Communication skills to effectively convey and/or explain results to other health care personnel, both within and outside the laboratory.
- Interactive skills to maintain cooperative and productive working relationships with patients and other health care professionals.
- Emotional stability to exercise appropriate judgment in responding to emergency situations that may be present in the health care environment.
- Ability to effectively handle stressful situations.
- Ability, with or without reasonable accommodation, to safely perform all core tasks required of a medical laboratory scientist.

All standards were formulated to be in compliance with the Rehabilitation Act of 1973 and the
Americans With Disability Act.

**Three-Plus-One Option**

Students who completes all academic requirements in three years will seek admission to a NAACLS accredited affiliate hospital-based School of Medical Laboratory Science in order to complete the senior year.

Representatives from the hospital will review the applicant’s grades and performance in the laboratory. A personal interview will follow. **Admission is competitive and the University cannot guarantee that a student will be accepted to an affiliate program**

The senior student who is full time pays a fee to the University for this year (found in this catalog under expenses). The student is responsible for the tuition to the affiliate hospital and any additional costs.

The student is responsible for transportation to and from the School of Medical Laboratory Science.

Following successful completion of the prescribed curriculum, the student is eligible to receive the Bachelor of Science degree in Medical Laboratory Science, and after passing a nationally administered examination, to become a certified medical laboratory scientist.

**Jefferson Option – Bioscience Technologies**

Students also have the option to apply for transfer into the Bioscience Technologies program at Thomas Jefferson University College of Health Professions. Gwynedd Mercy University maintains a formal articulation agreement with Jefferson. Application must be made separately from the Gwynedd Mercy University application. Students interested in transferring to the Bioscience Technologies program at Jefferson will follow the curriculum of the Medical Laboratory Science program. They will work with the Jefferson admissions transfer coordinator as well as their academic advisor, to complete all prerequisite courses and paperwork to apply for transfer. **Admission is competitive and no guarantee is granted any student that they will be accepted for transfer.**

**Bioscience Technologists** work with RNA, DNA and proteins in academic research laboratories, pharmaceutical industries, forensic DNA testing laboratories or molecular analysis.

**Cytotechnologists** use microscopy to evaluate specimens, locate and interpret the presence or absence of cancer cells, precancerous changes, infections or inflammatory patterns. Specimens can be obtained from any organ of the body. Cytotechnologists are the health professionals who read the gynecologic specimens called “pap” smears. Medical Laboratory Scientists perform a wide range of diagnostic testing in various types of laboratories.

The Bachelor degree in Biotechnology/Applied Molecular Technologies, Cytotechnology/Cell Sciences or Medical Laboratory Science will be awarded by Thomas Jefferson University. Additional information on these programs can be found on the Jefferson website for health professions. It is important for the interested student to make interest and intent known to the Campus Coordinator as soon as possible in order to coordinate the completion of prerequisite courses and application in a timely manner.
Medical Laboratory Science/Biology — Four-Plus-One Option
The student who prefers to obtain a bachelor degree in biology prior to studying the medical laboratory science component may do so. Following the attainment of this degree, the student can seek admission to an NAACLS accredited School of Medical Laboratory Science. Acceptance into the MLS will be facilitated by completing the listed prerequisites as a part of the initial degree program. In this case, a student will not receive 35 credits for the clinical training and will not receive a second degree in medical laboratory science. The student would receive a certificate from the hospital and be eligible to take the MLS (ASCP) examination.

If a student wishes to complete a bachelor degree in biology and then receive a second degree in medical laboratory science, the student would apply to the NAACLS accredited School of Medical Laboratory Science as a matriculated Gwynedd Mercy University student. The student would receive 35 credits for the clinical training and would be awarded a second degree, a bachelor of science in Medical Laboratory Science. Students would be eligible to take the MLS (ASCP) examination at the completion of the program.

Academic Progression for Medical Laboratory Science
Students must maintain a minimum grade point average of 2.8 overall and a 2.5 average in science. If either the overall GPA or science GPA falls below these standards, the student will be placed on program probation. Should the GPA remain below these standards for a second semester, then the student will be dismissed from the MLS program. All grades in science and the major must be “C” or above. For any grade below a “C” in a science course or a major course, the student will have one opportunity, for one course only, to repeat the course. Any subsequent failure in a science or a major course will result in the student being dismissed from the MLS program. Students must go through the admission process required to be admitted to the hospital-based NAACLS accredited affiliate School of Medical Laboratory Science. The hospital-based NAACLS accredited affiliate School of Medical Laboratory Science is independent from the University. Admission is competitive and the University cannot guarantee admission.

Career Ladder
Medical Laboratory Technology to Laboratory Science
Gwynedd Mercy University has developed a career ladder to provide upward mobility for medical laboratory technicians who wish to obtain a Bachelor of Science degree in medical laboratory science.

This program has been designed to:
• Build on credits from the associate degree
• Complete all academic courses in either the day or evening school before beginning the senior year of study at a NAACLS approved School of Medical Laboratory Science.
• Utilize all previous clinical training and experience toward completion of clinical rotation.

Eligibility for Admission
Admission to the MLT-to-MLS program is open to graduates of a medical laboratory technician program who have obtained their MLT (ASCP) certification (or equivalent). Additional criteria for eligibility for admission with advanced standing to Gwynedd Mercy University are described in this catalog in the admission section. Application may be made for this program as a full-time or part-time student.

Upon acceptance to Gwynedd Mercy University, the student will begin course work to fulfill the baccalaureate degree requirements. The degree requirements include the academic requirements of the University, as well as the upper level science and health science courses. Students are required to attend a NAACLS approved affiliate School of Medical Laboratory Science and are not exempt due to the previous study in medical laboratory technology.
Students must maintain a minimum grade point average of 2.8 overall and 2.5 in science. Students must go through the admission process required to be admitted to the hospital-based NAACLS accredited affiliate School of Medical Laboratory Science. The hospital-based NAACLS accredited affiliate School of Medical Laboratory Science is independent from the University. Admission is competitive and the University cannot guarantee admission. Course requirements are the same as listed under Medical Laboratory Science.

**Occupational Science**

The Bachelor of Health Science (BHS) in Occupational Science Program is a dual degree program with the Master of Science (MS) in Occupational Therapy Program. The entry-level Occupational Therapy Master’s degree Program has applied for accreditation and been granted Candidacy Status by the Accreditation Council for Occupational Therapy Education (ACOTE®) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE®’s telephone number c/o AOTA is (301) 652-AOTA and its Web address is www.acoteonline.org. The program must be granted Candidacy Status, have a pre-accreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT®). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR®). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT® Certification Examination. A felony conviction may affect a graduate’s ability to sit for the NBCOT® certification examination or attain state licensure.

During the first three years of the Occupational Science Program, students will take three years of pre-professional courses in liberal arts, health science, and occupational science. Students who qualify for entry into the professional phase of the Occupational Therapy Master’s Program (see Academic Progression into Occupational Therapy Master’s Program below) will take 3 terms of occupational therapy courses to complete 123 undergraduate credits and earn a Bachelor of Health Science (BHS) in Occupational Science (see BHS in Occupational Science Graduation Requirements below). Students will continue to take 40 graduate credits in occupational therapy courses and earn a Master of Science degree in Occupational Therapy if graduation requirements are met (see MS in Occupational Therapy Graduation Requirements in Graduate Catalog). In summary, the entire dual degree program in Occupational Science and Occupational Therapy can be completed in 12 academic terms with 123 undergraduate credits and 40 graduate credits. Occupational Science majors will have an undergraduate advisor. For updates on the Occupational Science Program, visit [http://www.gmercyu.edu/OS](http://www.gmercyu.edu/OS). For information on the curriculum and stage of accreditation for the Occupational Therapy Master’s Program, visit [http://www.gmercyu.edu/OT](http://www.gmercyu.edu/OT).

**Minor in Psychology**

Occupational Science students completing all required Psychology courses may be eligible to apply for a minor in Psychology.

**Academic Progression into Occupational Therapy Master's Program**

Occupational Science majors are guaranteed entry into the MSOT program the summer after their junior year if the following criteria are met: cumulative undergraduate GPA of 3.1 or greater, combined GPA of 3.1 or greater in prerequisite courses, (General Psychology, Abnormal Psychology, Developmental Psychology, Sociology, Anatomy and Physiology I and II with lab, and Statistics), earn a “C” or better in all non-prerequisite courses prerequisite courses completed at Gwynedd Mercy University, have 50 hours or more of documented occupational therapy observation or work beginning in the fall of their freshman year to the spring of their junior year, and attest to meeting the Essential Functions of Occupational Therapy Practice(below).
Occupational Science majors are eligible to re-take up to 2 courses in the Occupational Science curriculum that are not an OSC 400 level course. If a student earns less than a “C” in one or two 400 level courses, they cannot progress into the Occupational Therapy Master’s Program after their senior year. These students would be placed on academic probation and will need to retake the one or two courses over the following year and earn a “B” or better if they desire to continue on into the Occupational Therapy Master’s Program. If a student earns less than a “C” in three or more courses, they may be disqualified from entry into the Occupational Therapy Master’s Program.

**Essential Functions for Occupational Therapy Practice**

Students entering into the Occupational Therapy Master’s Program must possess essential skills (sensorimotor, process, social interaction) to perform all educational (classroom, laboratory and clinical), fieldwork, and experiential preceptorship tasks in an accurate, safe, and efficient manner, to the satisfaction of the faculty, with or without reasonable accommodation. These essential skills include, but are not limited to, the ability to possess the:

**Sensory and Motor Skills**

1. Assume a variety of body postures that can include continuous sitting, standing, walking, bending, reaching, pulling, lifting, stooping, kneeling, and crawling.
2. Demonstrate manipulation skills to effectively carry and use therapeutic equipment (i.e. assistive devices, weights).
3. Demonstrate movement and mobility skills that are required for safe handling of persons of various sizes in order to perform safe transfers and guarding during ambulation with and without an assistive device.
4. Push and pulling in order to provide resistance for the purposes of maneuvering and transitioning persons such during bed mobility, using a wheelchair, and for sitting and standing balance activities.
5. Demonstrate eye-hand coordination, postural control, strength, endurance, and integrated function of the senses (vision, hearing, smell, and touch) during the therapeutic process.

**Process Skills**

1. Demonstrate the mental capacity to understand, problem solve, and make judgements in order to promote safety.
2. Demonstrate the mental capacity to understand, problem solve, and make judgements in order to promote ethical reasoning.
3. Demonstrate verbal and written insight into one’s own academic and clinical performance.

**Social Interaction Skills**

1. Interact with others in a professional, courteous, and collaborative manner while using good judgment for confidentiality.
2. Demonstrate respect for the dignity of each person.
3. Read, speak, and write in English effectively using proper grammar, spelling, and punctuation.
4. Demonstrate mature and professional behaviors with other students, faculty, colleagues and clients.
5. Be receptive and open to mentor feedback about academic or fieldwork performance and adherence to academic and fieldwork policies and procedures.

**Occupational Science Curriculum**

The pre-professional phase of the Occupational Science curriculum for the first 3 years is 89 credits. Occupational Science majors meeting eligibility for entry into the MSOT program will continue on to the Professional Phase of the Occupational Therapy Master’s curriculum and complete 34 additional credits for a total of 123 undergraduate credits over the course of 9 academic terms. For course sequence and descriptions of the remaining 40 graduate credits over
3 academic terms, refer to the Occupational Therapy Master’s Program in the Graduate Catalog.

### BHS in Occupational Science Graduation Requirements

Occupational Science students losing eligibility to enter the Occupational Therapy Program after their junior year can change their major to meet the requirements of graduation in a different major.

### Radiation Therapy

**Prerequisites:** High school/college physics, or chemistry, proficiency in mathematics (C+ or higher).

**Corequisites:** BIO 107, 107L, 108, 108L, PHY 111, CIS 101, COM 101; ENG 101; MTH 141 or 142; PSY 100, 111 and all Seminar courses, etc. as described in curriculum sheet.

A student who wishes to earn a Bachelor of Science Degree in Radiation Therapy follows a 40 calendar month course of study and clinical education. Liberal arts and prerequisite science courses primarily are taught during the first and second year of the program. Clinical education begins in the Spring semester of the sophomore year, two days a week and five days a week during Summer Session I & II. During the third year of the program the student spends two days per week in didactic studies and three days per week in clinical education. For Summer I & II between third and fourth year the student spends four days per week at clinical and one day on campus for didactic studies. In the fourth year the student spends two days per week in didactic studies and three days per week in clinical education for the Fall semester. Finally for the last semester of the fourth year the student spends four days per week in the clinical setting and one day in didactic studies. Students will be assigned to a minimum of four affiliated cancer treatment centers for clinical education. These centers may include a medical school/research hospital, regional/community hospital, and freestanding facility. Students will be responsible for all transportation expenses including but not limited to parking fees or tolls. Students may be required to travel up to approximately 100 miles to the clinical facility.

Applicants are required to “shadow” in a Radiation Therapy department and submit a written report on their observation and experience of the visit. Incoming freshman must achieve an SAT score of 1080 or higher in Math and Verbal or a minimum ACT score of 22. Transfer students must have an overall GPA of 3.0 or higher and have completed the following prerequisites Anatomy & Physiology I & II, with a lab, an upper level Math both with a grade of C+ or higher, English 101, Public Speaking/Communication and Intro into Desktop Computing. Additionally, an interview with Program faculty is also required prior to acceptance into the program. Applicants will be accepted on a space available basis only.

The Bachelor of Science Degree Program is full time and requires ten semesters or 40 consecutive calendar months of study. Following successful completion of the prescribed curriculum, the student receives a Bachelor of Science Degree in Radiation Therapy, which is conferred at the May Commencement Ceremony.

Students enrolled in the bachelor degree program must maintain a minimum grade of “C” in all RTS didactic and co-requisite courses and a grade of “B” or higher in all RTS clinical courses. A grade of “C-” requires the course be repeated and successfully passed before entering the next phase of education. This will require the student to withdraw from all radiation therapy courses until he/she can repeat the course the next time the course is offered, provided there is space available. A student who fails two didactic courses in the major and/or co-requisite courses (C- and below) or one clinical course (B- and below) will be dismissed from the program. A grade of “F” requires the student to withdraw from the program. Students must maintain an overall GPA of 3.0 or higher.

Candidates accepted for the Bachelor of Science or Bachelor of Health Science in Radiation Therapy must have documented proof of the following additional requirements prior to clinical courses:

1. Certificate of health from a nurse practitioner or a family physician is necessary. Health forms will be emailed from the Program Director’s office by mid-July. Completed health forms are submitted to the Campus Health Office before classes begin in the Fall. Students without completed health forms will not be permitted in any clinical site.

2. Cardiopulmonary Resuscitation (CPR) Certification or re-certification is required before beginning clinical education experiences in any health care facility. Copies must be submitted to the Program Director’s office in Maguire Hall to be placed in the student’s file.
3. **Health Insurance Coverage:** Students must carry health insurance while in the Radiation Therapy Program. This health insurance can be obtained through the University if the student does not have personal coverage. Confirmation of health insurance coverage must be submitted to the Program Director by the beginning of each academic year.

4. All students enrolled in the Program are required to carry liability insurance through the University. A fee for this insurance will be charged to the student’s account.

5. **Child Abuse History Clearance:** All students enrolled in the Program are required to have a Child Abuse History Clearance. This is accomplished by completing a Child Abuse History Clearance Form. Instructions to obtain the form will be emailed to the student via the Program Director.

6. **Criminal Background Check:** All students enrolled in Radiation Therapy Program are required to have a criminal background check performed. To order your criminal background check go to [www.castlebranch.com](http://www.castlebranch.com)

7. **Drug Screening:** All students must present results from drug screening to participate in clinical education. Information on drug screening requirements are listed on the Health Form. Students are responsible for the cost of the screening.

8. **Tuberculosis Screening:** All students must present yearly results from a tuberculosis screening in order to participate in clinical education. Information on PPD screening is listed on the Health Form. Students are responsible for the cost of the screening.

9. **Flu Shot:** All students must receive a flu shot by November 1st of each year.

Students of the program of study receive school pins, which are presented at a special program ceremony in May.

Graduates of the bachelor of science degree are eligible and required to apply to the American Registry of Radiologic Technologists (ARRT) to sit for the Registry Examination in Radiation Therapy.

---

**Radiation Therapy Bachelor of Health Science Degree**

**Major Requirements:** RTS 200, 202, 203, 204, 208, 209, 303, 304, 305, 306, 307, 308, 320, 400, 402, 403, 404, 406, 407, 408, 409, 410; HS 208, 305, 403; PSY 111 and all Semnan courses, etc. as described in curriculum sheet.

**Corequisites:** BIO 107, 107L, 108, 108L; CIS 101; COM 101; ENG 101; MTH 141 or 142.

The Bachelor of Health Science Degree in Radiation Therapy is designed for graduates of a JRCERT accredited Radiology program. Students must be ARRT registered in radiology by the end of the Fall semester.

**Eligibility for Admissions**

1. Applicants must be graduates of a program approved by the JRCERT accredited Radiology program.
2. Applicants must possess an associate degree or equivalent from a regionally accredited institution.
3. The applicant must have achieved a grade point average (GPA) of 3.0 or higher on a 4.0 quality scale, in all prior course work. An official transcript from each college attended must be submitted.
4. The applicant must possess or be eligible for ARRT certification. Students must become registered prior to the end of the Fall Semester.
5. Applicants must have completed the following prerequisite college courses: College English, communication arts, computer science, anatomy and physiology I & II, physics,
mathematics (algebra), philosophy, and psychology with a grade of C+ or higher.

6. Additionally, applicants are required to shadow in a Radiation Therapy department and submit a written report on their observation and experience of the visit.

7. An interview with program faculty is also required prior to acceptance into the program.

8. Applications will be accepted on a space available basis only.

The Program is full time and requires five (5) semesters or 20 consecutive calendar months of study and begins with the fall semester. The curriculum is the same as the third and fourth years of the Radiation Therapy program. During the third year of the Program the student attends two days per week in didactic studies and three days per week in clinical education. For Summer I & II between the third and fourth year the student attends four days per week at clinical and one day on campus for didactic studies. In the fourth year the student attends two days per week in didactic studies and three days per week in clinical education for the Fall semester. Finally, for the last semester of the fourth year the student spends four days per week in the clinical setting and one day in didactic studies. Students will be assigned to a minimum of three affiliated cancer treatment centers for clinical education. These centers may include a medical school/research hospital, regional/community hospital, and freestanding facility. Students will be responsible for all transportation expenses including but not limited to parking fees or tolls. Students may be required to travel up to approximately 100 miles to the clinical facility.

Students enrolled in the Radiation Therapy program must maintain a minimum grade of “C” in all RTS didactic and co-requisite courses and a grade of “B” or higher in all RTS clinical courses. A grade of “C-” requires that the course be repeated and successfully passed before entering the next phase of education. This will require the student to withdraw from all Radiation Therapy courses until he/she can successfully repeat the course the next time the course is offered, provided there is space available. A student who fails two didactic courses in the major and/or co-requisite courses (C- and below) or one clinical course (B- and below) will be dismissed from the program. A grade of “F” requires the student to withdraw from the program. Students must maintain an overall GPA of 3.0 or higher.

Following successful completion of the prescribed curriculum, the student receives a Bachelor of Health Science Degree in Radiation Therapy, which is conferred at the May Commencement Ceremony. Additionally, there is a special program ceremony in May for students where the school pins are presented. Graduates of the program are eligible and required to apply to the American Registry of Radiologic Technologists (ARRT) to sit for the Registry Examination in Radiation Therapy.

The Bachelor of Science in Radiation Therapy (Degree Completion)

The Bachelor of Science in Radiation Therapy (Degree Completion) is designed for graduates of a JRCERT accredited Radiation Therapy Program as a degree completion program. Students must be ARRT registered in Radiation Therapy. General Education courses can be completed on a full-time, part-time, evening or day basis. The requirements to complete the Bachelor of Science in Radiation Therapy (Degree Completion) for Radiation Therapists all previous course work and life experience credits will be evaluated on an individual basis. All transcripts must be submitted with the application.

Please refer to the curriculum sheet for General Education requirements.

**Bachelor of Health Science in Radiation Therapy**
RADIOLOGIC TECHNOLOGY
The Radiologic Technologist or radiographer is an individual who uses imaging equipment to perform diagnostic imaging (x-ray) procedures as ordered by physicians. They are health care specialists who can also perform advanced modality procedures such as CT, MRI, mammography, and interventional radiology as well as education, research and other related fields with additional education or training.

As a radiologic technologist, one can work in a variety of health care settings including: hospitals, doctors’ offices, clinics and outpatient centers as well as continuing their education after graduation.

Prerequisites: Successful completion of High school or college biology. Chemistry, Physics and/or Anatomy and Physiology, are highly preferred. Proficiency in mathematics (C+ or higher) is also necessary.

Corequisites: ENG 101; BIO 107 & 107L; MTH 141 or 142, PSY 100; BIO 108 & 108L; PSY 111; PHY 111, 111L; CIS 101; COM 101; HS 109 and all Seminar courses, etc. as described in curriculum sheet.

Major Requirements: All RDS courses are listed on the curriculum sheet.

A student wishing to earn a Bachelor of Science in Radiologic Technology follows a 2 + 2 program of study. The first two years of the program are spent at Gwynedd Mercy University completing the necessary general education and science courses to prepare the student for working in a health care environment. The second two years are spent off-campus at an affiliate certificate program in radiologic technology. The program must be accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT) 20 N. Wacker Drive, Suite 900, Chicago, Illinois 60606-2901 (312) 704-5300. Further information can be found on www.jrcert.org.

During the 2nd two years of the program in radiologic technology, the student will have didactic, laboratory and clinical education on a full-time, 40 hours a week basis. All radiologic technology courses will be taught by qualified educators in the field of radiologic technology. Students will participate in didactic and clinical education courses at affiliate sites. All graduating students are eligible to sit for the national registry examination in Radiography (ARRT) to become a registered radiologic technologist, a title recognized in all 50 states.

As a radiologic technologist, a professional in the health care team, graduates are responsible for proper patient care, appropriate radiation exposure and accurate radiographic positioning and procedures to ensure quality diagnostic radiographs. Graduates from this Bachelor of Science degree program can expect additional career options such as, management, applications, sales and more. The Bachelor of Science degree affords the graduate opportunities for advancement along with the skill of a registered radiologic technologist.

Students transferring acceptable credits must take a minimum of 36 credits of coursework at Gwynedd Mercy University including the two seminar courses in order to be eligible for the Bachelor of Science Degree in Radiologic Technology.

Application to JRCERT accredited Schools of Radiologic Technology must be made separately from the Gwynedd Mercy University application. Students will be advised at which point in their studies that these applications must be submitted. Admission is competitive and no guarantee is granted any student that they will be accepted.
Jefferson Option – Radiologic Sciences
Students also have the option to apply for transfer into the Diagnostic Imaging Multi-Competency Program at Thomas Jefferson University College of Health Professions. Gwynedd Mercy University maintains a formal transfer agreement with Thomas Jefferson University. **Application must be made separately from the Gwynedd Mercy University application. Additional pre-requisite courses are required.** Students will be advised at which point in their studies that this application must be submitted. Admission is competitive and no guarantee is granted any student that they will be accepted. Students choosing this option will have their bachelor of science degree awarded by Thomas Jefferson University. Students considering this option should meet with the Radiology Campus Coordinator as early in the educational process as possible to plan this pathway.

B.S. Completion Option (Reverse Bachelor’s Degree)
This program is designed to provide the Registered Radiologic Technologist, RT(R), with a pathway to earn the B.S. in Radiologic Technology degree recognizing their accomplishment in successfully completing a School of Radiologic Technology and subsequently passing the ARRT’s Examination in Radiography. The student is required to follow and complete the courses listed in the Radiologic Technology Curriculum. This is the same curriculum that the traditional 2 + 2 student follows.

Students may be eligible for up to 62 credits in the Radiology major section of the curriculum. Students may also transfer general education courses from other colleges and universities as per Gwynedd Mercy University’s policies and procedures. The student must also meet the credit residency requirement in order to earn the degree.

Please contact the Radiology Campus Coordinator for more details.

Academic Progression
The student must maintain a minimum overall GPA of 2.8 and a 2.5 GPA in the major and Exploring the Natural World section of the curriculum throughout the program. If in a semester either the overall or the major and Exploring the Natural World section of the curriculum GPAs fall below these standards, the student will be placed on program probation. Should either of those GPAs remain below these standards for a second semester, the student will be dismissed from the program. Should a student receive a grade below a “C” in any of these courses, the student will have one opportunity, for one course only, to repeat the course. Should a student receive below a “C” in any subsequent course, the student will be dismissed from the program.

Technical Standards:

<table>

</tr>
<tr>
<td>Pushing</td>
<td>Using upper extremities to press against something with steady force in order to thrust forward, downward or outward.</td>
</tr>
<tr>
<td>Pulling</td>
<td>Using upper extremities to exert force in moving objects in a sustained motion.</td>
</tr>
</tbody>
</table>
Lifting | Raising objects from a lower to a higher position or moving objects horizontally from position-to-position.
Grasping | Applying pressure to an object with the fingers or palm.
Talking | Expressing or exchanging ideas by means of spoken word to other workers accurately, loudly or quickly.
Hearing | Ability to receive detailed information through oral communication and to make fine discriminations in sound when applicable.
Visual Acuity | This is a minimum standard for use with those whose work deals largely with preparing and analyzing data and figures, accounting, transcription, computer terminal, monitors, extensive reading, visual inspection, using measurement devices, assembly or fabrication of parts at distances close to eyes.
Medium Work | Exerting up to 50 pounds of force occasionally, and/or up to 20 pounds of force frequently, and/or up to 10 pounds of force constantly to move objects.

RESPIRATORY CARE PROGRAM

Respiratory Care is a rapidly growing Health Profession concerned with the diagnosis and treatment of patients with abnormalities associated with the process of breathing. A respiratory care professional can practice as a Certified Respiratory Therapist (CRT) or as a Registered Respiratory Therapist (RRT). Additional coursework can be secured to prepare the therapist to practice in a leadership or service capacity. The respiratory care program at Gwynedd Mercy University provides a true career ladder and is a three-plus-one program allowing for practice at all three levels. The first three years represents the Associate Degree and the final year, the Bachelor of Health Science Degree.

The primary goal of the respiratory care program is to provide the student the knowledge, skills, and professional attitudes and behaviors to practice as a safe, competent, caring and compassionate health care professional.

ASSOCIATE of Science Degree in Respiratory Care

Prerequisites: High school or college chemistry or physics, satisfaction of English and mathematics placement test requirement, tour of respiratory care department (desired but not required).

Corequisites: BIO 107, 107L, 108, 108L, 111; COM 101; ENG 101; FYE 1000, 1001; MTH 136; PSY 100; 1 Seminar Course; PHY 111; CHM 111; RS elective and CIS 101.

The Associate of Science Degree in Respiratory Care is accredited by the Commission on Accreditation for Respiratory Care (CoARC) and is an Entry into Respiratory Care Professional Practice. It consist of three years and is broken down as follows:

The first year consist of general studies rich in the natural science, mathematics, and liberal arts disciplines. It is designed to prepare students for the respiratory care concentration courses taken in the second and third year.

The second year entails course work in the art and science of respiratory care coupled with a chemistry course in the Fall and microbiology in the Spring. Respiratory care courses are didactic (classroom), laboratory, and clinical in nature. The didactic classes are designed to address the principles and concepts of the particular subject in question. The laboratory is designed for
demonstration and practice and serves as an environment where the student can first experience the procedures and practices of respiratory care in a controlled and closely supervised manner. Many of the laboratory sessions are self-directed with assistance provided by the faculty as needed. The clinical courses are both observational and performance in nature. The student will first observe procedures and modalities with the intention of gaining confidence and familiarity. After exposure and observation, the student will perform procedures and modalities until competency is assessed. Competency is followed by repeated practice and skill refinement. The ultimate goal is mastery and a high degree of expertise.

The clinical component will entail: clinical rotations in between semesters (approximately two weeks) that will serve as orientation to the hospital and to the respiratory therapy department, two days a week of clinical rotation during the second semester, and eight weeks of clinical rotations during the summer. The clinical component is competency-based which means that the student must successfully complete all designated procedures to satisfy the course requirements. Upon completion of the second year of the program, the student will continue on to the third year, which is where credentialing-eligibility can be obtained.

The third year consists of advanced topics in respiratory care coupled with statistics in the fall and a basic communication course in the spring. The third year of the program is modeled after the second and consists of didactic (classroom), laboratory, and clinical courses. The didactic classes are designed to address the advanced principles and concepts in a classroom environment while the laboratory is designed for demonstration and practice. Laboratory sessions will frequently entail presentations and demonstrations by physicians and/or other health care professionals with knowledge and expertise in a variety of advanced topics. The clinical courses are both observational and performance in nature. The student will observe advanced procedures and modalities with the intention of gaining confidence and familiarity. After exposure and observation, the student will perform procedures and modalities until competency is assessed. Competency is followed by repeated practice and skill refinement. The ultimate goal is mastery and a high degree of expertise. Students in the third year of the program are expected to possess a relatively high degree of expertise and mastery with the skills and modalities addressed in the second year. The clinical component of the third year will entail clinical rotations two days a week in both the fall and spring semesters and two weeks of clinical rotations in between semesters. Rotations are of an advanced nature and entail specialties, which are provided in 5-day blocks. The specialty rotations will occur in a variety of clinical sites to include: large university-teaching hospitals, pediatric and neonatal centers, community hospitals, and alternate care sites; such as, home care and subacute care.

Upon completion of the third year of the program, the student will receive an associate degree in respiratory care and be eligible to sit for the NBRC the Therapist Multiple Choice Examination. Successful completion of the Therapist Multiple Choice Examination at a designated (low) cut score levels grants the student the Certified Respiratory Therapist (CRT) credential and allows the student to apply for a license to practice in the State of Pennsylvania.

Upon completion of the NBRC Therapist Multiple Choice Examination at a designated (high) cut score level, the student is eligible to sit for the NBRC Clinical Simulation Examination. Upon successful completion of this examination, the student is granted the title of Registered Respiratory Therapist (RRT) and the receipt of an exclusive registry number. The RRT is the terminal credential in the profession of respiratory care and the highest level of professional practice. All students should aspire to achieve this level of credentialing. Additional specialty examinations and credentials are available and can be addressed by the program faculty. Entry into the third year of the program requires acceptable academic standing and approval of the program faculty.

The fourth year is the baccalaureate level of the program. It is designed as a degree completion
program that enhances the liberal arts and adds health science electives geared towards professional leadership in the areas of patient/family/clinical education, wellness, and/or entry-level management/supervision. The bachelor’s degree strives to prepare a well-rounded graduate prepared to provide professional leadership and service.

**BACHELOR OF HEALTH SCIENCE IN RESPIRATORY CARE**

As noted above, this option is designed as the final year of the 3-plus-1 program. It is a degree completion program designed for students seeking professional leadership and/or service in Respiratory Care. Students choosing this option must complete all course work outlined in the Associate Degree curriculum at Gwynedd Mercy University. Students seeking to transfer into the program must obtained the NBRC Registered Respiratory Therapist (RRT) credential, receive transfer credit for all comparable respiratory care courses and be prepared to complete all prerequisite General Education and Core Curriculum courses outlined on the respiratory care curriculum sheet. The NBRC Registered Respiratory Therapist (RRT) credential will serve as “credit – for registry” and designated respiratory care courses previously completed at other institutions will be transferred and credited against the respiratory care curriculum. The student will be required to pay appropriate fees. The RRT credential must be within five years of the actual year of graduation from the BHS program or re-credentialing will be required. A minimum grade of “C” must be maintained for all concentration and science courses (a “C-“is not acceptable). Applicants must have achieved a grade point average (GPA) of at least 2.5 on a 4.0 quality scale for entry into the program and an official transcript from each college attended must be submitted. At least forty-five (45) credits must be earned at Gwynedd Mercy University. Students should seek advice and guidance from the program director.

**Program Requirements:**

The NBRC Registered Respiratory Therapist (RRT) credential can be substituted for the majority of the respiratory care courses. Credentials must be current (within the past five years) or re-credentialing will be required. Student is required to pay appropriate fees.

The specific courses, as well as the required sequence, are displayed on the respiratory care curriculum sheet. Specific questions regarding transfer and sequencing of courses are to be referred to the program director.

**Technical Standards**

In addition to the technical standards for the Health Professions, the following essential functions are required of all students in the Respiratory Care Program. Respiratory therapists are responsible for the care of patients, some of whom are critically ill. They are often required to manage highly complex pieces of equipment, as well as interact with patients in order to make diagnostic and therapeutic assessments. Respiratory therapists must also be able to communicate with other health care professionals and respect privacy and confidentiality of patient data, information and communication. Therefore, in order to be successful in the respiratory care program, all applicants should be able to perform, learn and/or adhere to the following essential functions:

- Spend much of the day traveling between patient rooms, various care areas and the respiratory care department
- Move and position bedridden patients
- Perform physically demanding tasks; such as: chest physiotherapy, chest compression, movement of life support equipment and technology
- Communicate effectively with patients and staff
- Use a stethoscope to assess breath sounds, hear normal levels of speech of patients and staff and respond to alarms
- Accurately measure medication, read patient records, evaluate information displayed on patient monitors and make observations of patients as required for respiratory care
- Manipulate small pieces of equipment and perform such tasks as arterial puncture and endotracheal intubations
- Apply sufficient intellectual and emotional skills in order to plan and exercise independent judgment and to respond quickly to medical emergencies.

Examination
All students should successfully complete NBRC Therapist Multiple Choice Examination and the NBRC Clinical Simulation Examination (RRT examinations) prior to completion of the fourth year of the program. Students eligible for the BHS degree after the third year (due to the acceptance of transfer credits) should complete the RRT credentialing process within one year of graduation to maintain good standing with the program. The student is responsible for transportation to and from the clinical site and all students are required to carry medical and liability insurance. Membership in the professional society is provided at a reduced (student) rate and is a requirement of the program. Students must maintain a “C” in each respiratory course and all mathematics and science courses in order to advance to the next level (a "C"-is not acceptable for advancement). In addition, students must adhere to course sequence as outlined in the curriculum. Advancement from one level to the next is based on availability as well as recommendation of program faculty. Students matriculating at Gwynedd Mercy University will be given preference for advancement to the next level of the program over students transferring from other institutions.

Academic Progression
As previously noted, students must achieve a “C” or better (C- or below is not acceptable) in all science, mathematics and respiratory care courses. Should they receive a grade below this level, they will be permitted to repeat the science or mathematics course once. Should the student receive a grade below this level in any respiratory care course, or multiple respiratory care courses within the same semester, the student will be given one opportunity to repeat the courses. Should a student receive a grade below this level in any subsequent respiratory care course, the student will be dismissed from the program. Additionally, student must follow the course sequence and cannot progress to any upper level course without satisfactory completion of prerequisite courses. Advanced standing through transfer of credit is possible and is handled on an individual basis.

** Bachelor of Health Science in Respiratory Care
Accounting

ACC 105 Principles of Accounting I (3)
An introduction to basic principles of financial accounting, the effects of business transactions, and the effect on the financial statements. Learn how to prepare basic financial statements and to engage in decision making essentials in our economic system through analysis of receivables and inventories.
Prerequisite: BAS 100 for School of Graduate & Professional Studies students.

ACC 106 Principles of Accounting II (3)
An expansion of basic principles learned involving a deeper coverage of the complexities in the areas of accounting for depreciation, liabilities, and payroll taxes. Analysis of a corporation's shareholder’s equity (bonds) and financial statements is stressed.
Prerequisite: A grade of C or better in ACC 105.

ACC 205 Intermediate Accounting I (3)
This course provides a study of generally accepted accounting principles and introducing international financial reporting standards, as they relate to financial reporting. The conceptual framework is established and accounting theory developed as the foundation for accounting principles, constraints and qualitative characteristics. Problems relating to income determination, classification and form and content of financial statements are stressed. Prerequisites: A grade of C or better in ACC 105, 106.

ACC 206 Intermediate Accounting II (3)
An expansion of the comprehensive study of generally accepted accounting principles and introducing the student of international financial reporting standards. Asset valuation, liability classification, analysis of stockholder's equity and more complex principles related to income determination in various business situations are discussed.
Prerequisites: A grade of C or better in ACC 105, 106, 205.

ACC 207 Intermediate Accounting III (3)
An in-depth study of GAAP (Generally Accepted Accounting Principles) and IFRS (International Fin Reporting Standards) reporting issues dealing with earnings per share calculations, investments, derivatives, post-retirement accounting for benefits and pensions, lease accounting, revenue recognition, in-depth analysis of cash flow statements, and full disclosure.
Prerequisite: ACC 205, 206.

ACC 301 Managerial Accounting (3)
The study of accounting as an aid for management decision-making. Cost behavior, budget planning and control, and performance measurement are among the topics, which will be discussed.
Prerequisites: A grade of C or better in ACC 105, 106, MTH 136 or its equivalent. ACC 302 for School of Graduate & Professional Studies students.

ACC 302 Financial Accounting (3)
This course is an in-depth study of the role that financial accounting data plays in the decision-making process of managers of both for-profit and nonprofit organizations. Topics include examination of financial statements and financial statement analysis. (School of Graduate & Professional Studies only)
Prerequisites: A grade of C or better in ACC 105, 106 or its equivalent.
ACC 305 Cost Accounting (3)
An examination of the role and attitude of the cost manager and the skills necessary to gather information for the analysis of business situations. The goal of decision-making is stressed. The course contains analysis of costs including job, process and standard costing as well as the study of processes and efficiencies.
Prerequisites: ACC 105, 106 and a grade of C or better in ACC 301.

ACC 315 Personal Taxes (3)
An intensified course involving taxation of individuals; tax policy, tax research, tax history, technical tax provisions, and tax planning including tax practice suggestions.
Prerequisites: A grade of C or better in ACC 105, 106.

ACC 316 Investment and Business Taxation (3)
A course designed to examine federal taxation of property transactions and the taxation of various forms of business organizations such as corporations, partnerships and S corporations.
Prerequisites: A grade of C or better in ACC 105, 106, 315.

ACC 317 Accounting Information Systems (3)
Principals involved in establishing an accounting information system included are source documents, internal control, and the interfaces needed for managerial control of the business. The integration of managerial accounting, information needs with the design and implementation of systems is studied.

ACC 405 Advanced Accounting (3)
This course includes a series of discrete topics not previously included in other courses plus topics considered in greater depth here than in previous courses. Included are GAAP accounting, business combinations, government accounting, foreign currency translation and derivatives.
Prerequisites: A grade of C or better in ACC 105, 106, 205, 206, 305.

ACC 406 Auditing/Fraud (3)
A study and critical appraisal of current auditing standards related to the examination of financial statements by an independent auditor for both public and privately owned businesses. The course also applies many of the same auditing techniques to discover fraud, through the use of case studies, exploring the moral and ethical problems and issues of the accountant in auditing and detecting fraud.
Prerequisites: A grade of C or better in ACC 105, 106, 205, 206, 305.

ACC 408 Advanced Accounting II (3)
This course will pursue further complex accounting issues not covered in previous courses. Topics will include: GAAP and IFRS handling of international currency transactions, fiduciary accounting, including both bankruptcy and estates and trusts, and accounting for non-profit organizations.
Prerequisites: ACC 405

ACC 437 Special Topics
This course provides opportunity to research a current accounting issue under GAAP or IFRS, comparing and contrasting the handling and application of the account theory and practice.

ACC 440 Accounting Internship (6)
A 240-hour work experience designed to provide the student with practical application of accounting principles. To be eligible for this internship, a minimum B average in all accounting courses is required as well as permission by the accounting adviser and the Dean of the School.
Prerequisite: Completion of ACC 205 & 206 are required and ACC 315 & 316 are recommended to be completed, with a grade of B or better.
ACC 441 Internship in Public Accounting (3)
A continuation of work experience designed to provide the student with practical application of accounting principles. To be eligible for this internship a minimum “B” average in all accounting courses is required, as well as permission by the accounting advisor and the Dean of the School.

Prerequisites: ACC 205, 206, 315, 316.

ART

ART 100 Basic Drawing (3)
This introductory course in drawing focuses on line, value, perspective, and composition. It includes experiential drawing from landscape, still life and the figure.

ART 105 Art Appreciation (3)
This course introduces the origins and historical development of art from prehistoric times to the present day. Emphasis is placed on the relationship of design principles to various art forms including but not limited to sculpture, painting, architecture, photography and printmaking. Upon completion, students should be able to identify and analyze a variety of artistic styles, periods and media.

ART 106 Painting I (3)
Art elements, advanced drawing and composition, and color and design theory with studio work in acrylic and oil media receive emphasis in this beginning course, which includes work on still life, landscape, figure, and non-figurative compositions. (2-hour laboratory).

ART 111 Watercolors (3)
Students learn about various watercolor techniques, color and composition, and design through the painting of still-life subjects and landscapes.

ART 115 Art History I (3)
This course introduces works of art from ancient cave paintings to the Renaissance.

ART 116 Art History II (3)
Works of art from the Renaissance to the present are the focus of study in this course.

ART 122 Introduction to Digital Photography (3)
This course is designed to narrow the gap between traditional (film) and digital photography. Through demonstrations and hands-on practice, students will learn the basic concepts and tools of Photoshop. They will also create digital images and develop a working method within a digital photographic context. Cameras are required for this course.

ART 137 Sculpture (3)
The study of the visual elements of art and how they relate to three-dimensional forms, the course explores many media as a way of exposing the students to the scope of sculpture. Lab Fee.

ART 205 Modern Art (3)
This course is a chronological survey of the history of modern architecture, sculpture, painting, and graphic arts in Europe and the US. The course begins with Impressionism and moved through the 20th century through Word War II. Emphasis is placed on the interaction between art and society, industry, design, urbanism, war and technology.

ART 206 Contemporary Art (3)
This course is a continuation of Modern Art. It is a chronological survey of the expansion of forms, media, issues, and participants in the art made in Europe and the US from the aftermath of...
World War II to the present. Selected works of painting, sculpture, photography, architecture, performance, and video are examined as stylistic and historical objects addressing art history and theory, popular culture, politics, gender, race and a global culture.

**ART 437 Special Topics (3)**
Course focuses on a medium and approach selected by the instructor.

**BIOLOGY**

**BIO 101 Science of Life (3)**
An introduction to biology for non-majors. Basic principles of biology with emphasis on cell structure, energy metabolism, reproduction, genetics, diversity, and evolution. 3 lecture hours per week.

**BIO 103 Human Anatomy (3)**
This course for non-science major students investigates the human body, from cells to body systems. 3 lecture hours per week.

**BIO 107 Anatomy and Physiology I (3)**
A study of the basic concepts of human anatomy and physiology, beginning with cell biology and histology and continuing with a survey of skeletal, muscular, nervous, sensory, and endocrine systems. 3 lecture hours per week. *Not accepted as credit towards the biology major.*
Corequisite: BIO 107L
Prerequisite: High school chemistry or equivalent.

**BIO 107L Anatomy and Physiology Laboratory I (1)**
Laboratory studies of the structure and function of the systems included in BIO 107. 2 laboratory hours per week. *Not accepted as credit towards the biology major.*
Corequisite: BIO 107

**BIO 108 Anatomy and Physiology II (3)**
A continued study of the basic structural and functional aspects of hematology, immunology, cardiovascular, respiratory, digestive, renal and reproductive systems. 3 lecture hours per week. *Not accepted as credit towards the biology major.*
Corequisite: BIO 108L
Prerequisites: “C” or better in BIO 107 or permission of Division chair.

**BIO 108L Anatomy and Physiology Laboratory II (1)**
Laboratory studies of the structure and functions of the systems included in BIO 108. 2 laboratory hours per week. *Not accepted as credit towards the biology major.*
Corequisite: BIO 108

**BIO 111 Microbiology (3)**
An introduction to the microbial world, including discussion of the morphology, metabolism, growth and control of microorganisms. Topics include human infection, resistance and immunity. 3 lecture hours per week. Offered in the summer. *Not accepted as credit towards the biology major.*
Corequisite: BIO 111L

**BIO 111L Microbiology Laboratory (1)**
Basic microbiological techniques, biochemical and physiological reactions and identification of selected microorganisms. 2 1/2 laboratory hours per week. Offered in the summer. *Not accepted as credit towards the biology major.*
Corequisite: BIO 111
BIO 114 Human Genetics (3)
This course for non-science-major students investigates normal patterns of inheritance and their biologic basis as well as how genetic abnormalities results in inborn genetic disorders. The course will additionally emphasize the important social, political, legal and ethical issues raised by genetic technology. 3 lecture hours per week. Offered in alternate fall semesters. **Not accepted as credit towards the biology major.**

BIO 115 Biology of Aging (3)
Topics include theories of aging, discussion of organ systems of the body from the standpoint of the normal functions and specific age-related changes and disorders, as well as needs of the older adult. 3 lecture hours per week. **Not accepted as credit towards the biology major.**

BIO 121 Microbiology for the Health Sciences (3)
An integrated lecture and laboratory course utilizing case studies to introduce students in the health sciences to the world of microorganisms and issues they may face involving microbes in the field of health care. Topics will include the structure and function of microorganisms, their growth and control, as well as their role in infection and human resistance and immunity. Basic handling and identification of microorganisms will be discussed in the laboratory component. For non-biology majors only. 3 lecture hours per week and 5 laboratory sessions/recitations per semester. **Not accepted as credit towards the biology major.**

BIO 203 General Biology I (3)
An introduction to life science designed as a molecular investigation into living things, beginning with the cell. Cellular chemistry, structures and functions will be addressed. Physiological processes such as respiration and photosynthesis are discussed, as are the molecular aspects of cell division, genetics and gene expression. The course continues with an introduction into how genetics influences development, evolution, phylogeny and speciation. 3 lecture hours per week. Offered in the fall semester.
**Prerequisite:** A C or better in high school chemistry or equivalent.
**Corequisite:** BIO 203L

BIO 203L General Biology Laboratory I (1)
Laboratory investigations designed to supplement and clarify basic biological concepts introduced in BIO 203, including studies into eukaryotic and prokaryotic cells and cellular processes, molecular biology and genetics. 3 laboratory hours per week. Offered in the fall semester.
**Corequisite:** BIO 203

BIO 204 General Biology II (3)
An introduction into organismal biology beginning with basic systematics and species classification with an investigation into the biodiversity of the animal and plant kingdoms. The structure, function and development of animal systems will be discussed, as will plant growth, response and reproduction. The course culminates with an examination of ecology and animal behavior. 3 lecture hours per week. Offered in the spring semester.
**Corequisite:** BIO 204L
**Prerequisites:** BIO 203/203L with a grade of C or better.

BIO 204L General Biology Laboratory II (1)
Laboratory investigations designed to supplement and clarify basic biological concepts and species classifications introduced in BIO 204, including the examination of living and preserved specimens from various phylogenetic kingdoms to gain a familiarity with animal and plant anatomy and physiology. 3 laboratory hours per week. Offered in the spring semester.
**Corequisite:** BIO 204
BIO 230 Principles of Ecology (2)
A study of the basic hierarchical structure of ecological patterns from the individual organism to the globe. Determination of basic ecology patterns and causes of those patterns will be discussed in terms of abiotic and biotic factors with the underlying evolutionary causes. This class is writing intensive with a least five writing assignments and essay exams. 2 lecture hours per week.
Corequisite: BIO 230L
Pre-requisites: BIO 203/203L, BIO 204/204L or permission of instructor.

BIO 230L Principles of Ecology Laboratory (1)
An inquiry-based field laboratory in which students develop a research question and experimental design, perform research, and collect and analyze data in appropriate scientific formats. Topics discussed include different approaches to field research, appropriate experimental design, data analysis, and presentation. 3 laboratory hours per week.
Prerequisites: BIO 203/203L and BIO 204/204L.
Corequisite: BIO 230.

BIO 251 Genetics (3)
An investigation into the fundamental principles of Mendelian and non-Mendelian inheritance and the molecular and cellular basis of heredity, including the molecular and biochemical processes behind inheritance, gene expression and development. Additional topics include pedigree analysis, mutation and cancer, the conflict between nature and nurture, modern DNA technology, population genetics, evolution, and the ethical impact of genetics on society. 3 lecture hours per week. Offered in the spring semester.
Prerequisites: BIO 203/203L; CHM 203/203L or permission of instructor.

BIO 251L Genetics Laboratory (1)
The genetics techniques laboratory is designed to introduce the student to the fundamentals of experimentation in basic Mendelian and non-Mendelian principles using model genetic systems as well as molecular genetics techniques. 3 laboratory hours per week. Offered in the spring semester.
Pre- or Corequisite: BIO 251

BIO 299 Selected Topics in Biology (3)
A study of a specialized subject area which may vary based on student/faculty interest. For non-major students only. The topic, course structure and instructor will be announced prior to pre-registration. There are no prerequisites.

BIO 302 Vertebrate Anatomy (3)
This is an integrative biological study of structural and functional anatomy of the vertebrate classes. It utilizes an organ system approach to the study of comparative anatomy, considers unique adaptations of individual vertebrate groups and incorporates evolutionary relationships in conjunction with aspects of vertebrate behavior, ecology and paleontology. Lecture and reading assignments incorporate research data from current literature. 3 lecture hours per week.
Corequisite: BIO 302L
Prerequisites: BIO 203/203L, 204/204L or equivalent.

BIO 302L Vertebrate Anatomy Laboratory (1)
This is an organ-based study of select specimens from the vertebrate classes, and includes a number of special topics, e.g. adaptations to flight. The laboratory promotes skill development, including a variety of investigative techniques. 3 laboratory hours per week.
Corequisite: BIO 302
BIO 305 Biology of Microorganisms (3)
A study of the biology and chemistry of microorganisms including their morphology, metabolism, genetics, growth and control, as well as their interactions with host cells. 3 lecture hours per week. Offered in alternate fall semesters.
Corequisite: BIO 305L
Prerequisites: BIO 203/203L; CHM 203/203L.

BIO 305L Biology of Microorganisms Laboratory (1)
Basic microbiological laboratory techniques including those used for the isolation, cultivation, enumeration, and identification of microorganisms. 3 laboratory hours per week. Offered in alternate fall semesters.
Corequisite: BIO 305

BIO 307 Eukaryotic Microbiology (3)
A continuation of BIO 305 focusing solely upon eukaryotic microorganisms. The course will be divided into three sections focusing upon the morphology, metabolism, evolution, and ecology of the three categories of eukaryotic microorganisms: Protists, fungi, and helminthes. 3 lecture hours per week. Offered in alternate spring semesters. Prerequisites: BIO 203/203L and BIO 305/305L.

BIO 310 Mycology (3)
A detailed study of important fungi with emphasis on their biology, physiology and significance. Current research on the control of fungi and treatment of fungal diseases is examined. 4 lecture/laboratory hours per week.
Prerequisite: BIO 203/203L or permission of division chairperson.

BIO 311 Virology (3)
A comprehensive modern approach to the field of virology that focuses on the biology, application, and control of viruses. Topics include, but are not limited to, virus morphology and replication, evolution and extinction, emerging pathogens, gene and bacteriophage therapy, antiviral drugs, and virus-immune system interactions. 3 lecture hours per week. Offered in alternate spring semesters.
Prerequisite: BIO 203/203L.

BIO 312 Parasitology (2)
Study of the morphology, distribution, symptoms, treatment, prevention, and control of important parasites. 2 lecture hours per week.
Corequisite: BIO 312L
Prerequisite: BIO 203/203L or permission of division chairperson.

BIO 312L Parasitology Laboratory (1)
Studies involving the comparisons and morphology of the parasites considered in BIO 312 using slides, demonstration materials and living organisms. 2 laboratory hours per week.
Corequisite: BIO 312

BIO 313 Immunology (3)
The mechanisms, cells, and molecules involved in immunological responses will be examined in this course. Emphasis is on comparison of antibody and cytokine responses. Resistance to infectious organisms, allergic responses, tissue transplantation, and autoimmune diseases will also be discussed. 3 lecture hours per week. Offered in alternate spring semesters.
Prerequisite: BIO 203/203L

BIO 315 Ecology (3)
A study of basic ecological concepts including biotic parameters, ecosystem principles, biogeochemical cycles and energy flow as well as biological factors such as interspecific and
intraspecific interactions among individuals, populations, communities and the ecosystem, with implications for evolution.

**Prerequisites:** BIO 203/203L, 204/204L or equivalent.

**BIO 317 Advanced Physiology I (3)**
Advanced Physiology explores the regulatory mechanisms involved in maintaining and controlling a homeostatic environment at the subcellular, cellular, and organismal levels. The course begins with a survey of the principles of regulatory and cell physiology and continues with an investigation of electrophysiology and the physiology of the human nervous, muscular, and endocrine systems. This course emphasizes an understanding of how the body functions under normal conditions (in the absence of disease). Deviations from normality associated with pathological conditions will be discussed to help demonstrate important concepts in human physiology. 3 lecture hours per week.

**Prerequisites:** BIO 107/108 or BIO 203/204.

**BIO 318 Advanced Physiology II (3)**
Advanced Physiology II is a continuation of the study of homeostatic regulatory mechanisms using selected organ systems, including the cardiovascular, respiratory, digestive, renal, reproductive, and immune systems. 3 lecture hours per week.

**Prerequisite:** BIO 317 with a grade of C or better.

**BIO 402 Molecular Biology of the Cell (3)**
An investigation into the components that comprise cells, how those components are formed as well as how cells function individually and as part of a multicellular whole. Topics will include organelle structure and function, molecular signaling, membrane transport, the cytoskeleton and the cell cycle, as well as control mechanisms in gene expression and loss of control in cancer. 3 lecture hours per week. Offered in the fall semester.

**Prerequisites:** BIO 203/203L, 204/204L; CHM 203/203L, 204/204L, 301 or permission of division chairperson.

**BIO 402L Molecular Biology of the Cell Laboratory (1)**
This is a project-driven laboratory course that introduces students to the world of mammalian cell culture. In addition to learning basic cell culture techniques, students will use cell viability assays, spectrophotometry, RNA isolation, reverse transcription PCR, and DNA gel electrophoresis to investigate important research questions in cell biology. Students will also gain experience in experimental design, data analysis, presentation of experimental results, and maintenance of a detailed laboratory notebook. 3 laboratory hours per week.

**Corequisite:** BIO 402L.

**BIO 414 Infectious Disease (3)**
A mixed lecture and case study approach to human infectious disease. The course explores the processes of transmission, pathogenesis, interaction with the immune response, and evolution of infectious microorganisms. Specifically, the course is focused upon host-pathogen relationships, transmission dynamics, and mechanism of disease emergence. 3 lecture hours per week. Offered in alternate spring semesters.

**Prerequisites:** BIO 203/203L and BIO 305/305L.

**BIO 415 Developmental Biology (3)**
A study into the biochemical, molecular and genetic factors that regulate organismal growth and development. The field of classical embryology will be combined with molecular biology to investigate the mechanisms by which DNA dictates organism form and function. The course will
cover topics including cell fate determination and differentiation, fertilization, embryogenesis, pattern formation, the regulation of gene expression during development, plant and animal cell lineages, tissue and organ formation, gene rearrangements in adult cells, aging, and developmental responses to the environment. Molecular mechanisms of development will be examined in species ranging from bacteria to higher plants and animals. Offered in the spring semester. 3 lecture hours per week.

Corequisite: BIO 415L
Prerequisites: BIO 251, 402; CHM 301 or equivalent.

BIO 415L Developmental Biology Laboratory (1)
The laboratory is designed to supplement the material presented in the developmental biology lecture by introducing students to the fundamental model systems utilized in the study of developmental processes. Patterns of development will be investigated in both plant and animal species using both prepared specimens and living models. 3 laboratory hours per week. Offered in the spring semester.

Corequisite: BIO 415

BIO 421 Biology Research (3)
This is an independent course of research under the direction of a member of the science faculty. Students will participate in a research project involving a literature review, laboratory research, and data analysis. Students will be expected to formalize their experience with a presentation in written, oral or poster format. Students may earn research credit more than once, but only 3 credits may be used to satisfy the biology major requirements. Permission of instructor required.

BIO 430 Research Process and Techniques (0)
This course will prepare students to conduct research or participate in an internship in the sciences. The course must be taken prior to or in conjunction with enrollment in BIO 421 or BIO 440. May be taken more than once.

BIO 437 Special Topics (1-3)
This is an in-depth study of a specialized subject area. The selected topic varies based on student/faculty interest and current research advances. Topic, course structure, credit and instructor will be announced prior to preregistration. Course may be repeated if topic is different.

Prerequisite: BIO 203/203L, 204/204L and permission of instructor.

BIO 439 Independent Study (1-3)
Investigation of selected topics.

Prerequisites: Junior/senior status; permission of Dean of the School of Arts and Sciences, the Division Chairperson and Vice President for Academic Affairs.

BIO 440 Internship (1-3)
A work experience with a minimum of 120-hours designed to afford the student a practical experience in the application of biological techniques and practices.

Prerequisites: Completion of relevant biology and chemistry courses, science GPA of 3.0, and approval of program director and/or Dean of the School.

BIO 4000 Seminar I - Capstone (1)
The first of a three-part biology capstone course series. The capstone course(s) help the student to reflect upon how expertise in their discipline has been integrated with the university mission, core values and learning outcomes during the course of their education. Students will be exposed to options for their future and prepare for their post-graduate plans as well as begin research for their senior thesis. The class will additionally initiate a service project to be completed by graduation and begin the compilation of a portfolio to be submitted in the third capstone course. 1 conference hour per week. Junior status required. Offered in the spring semester.
Corequisite: SCI 4000.

BIO 4001 Seminar II – Capstone (1)
The second of a three-part biology capstone course series. The capstone course(s) help the student to reflect upon how expertise in their discipline has been integrated with the university mission, core values and learning outcomes during the course of their education. Students will meet both as a class for literature and peer reviews as well as individually with an assigned thesis advisor during the formulation of their senior thesis. The class will continue the work of the service project initiated in BIO 4000 and continue the compilation of the portfolio to be submitted in the third capstone course. 1 conference hour per week. Senior status required. Offered in the fall semester.
Prerequisite: BIO 4000

BIO 4002 Seminar III – Capstone (1)
The third of a three-part biology capstone course series. The capstone course(s) help the student to reflect upon how expertise in their discipline has been integrated with the university mission, core values and learning outcomes during the course of their education. Students will formally present their written thesis to a broader audience. Students will actively demonstrate proficiency in the discipline via a comprehensive examination and be required to self-assess their growth with regard to the GMercyU core values and learning outcomes, as well as the general education and biology program goals through the submission of a portfolio of representative assignments and experiences spanning their university career. Finally, students will complete a service project initiated in BIO 4000. 1 conference hour per week. Senior status required. Offered in the spring semester.
Prerequisite: BIO 4001

BUSINESS ADULT STUDIES

BAS 100 Introduction to Business Adult Studies (1)
This course will emphasize such topics as self-management, research skills, learning styles and basic academic competencies as preparation for both the workplace and the completion of this academic program. Students will be introduced to the Gwynedd Mercy University learning outcomes and how these relate to their educational, personal and career goals. (School of Graduate & Professional Studies only)

BUSINESS
All research papers in the School of Business must be in APA format.

BUS 101 Business Theory (3)
An overview of the theoretical framework and structure of today's business environment is studied. Content areas include management, e-business, ethics and social responsibility, business organization, human resource management, international business and current business topics.
Prerequisite: BAS 100 for School of Graduate & Professional Studies.

BUS 205 Principles of Management (3)
This course requires an analysis of the managerial processes with emphases on the planning, organizing, directing and control functions used by managers to accomplish the goals of the organization. Related behavioral topics will be included in the discussions. Course requirements will include a research paper and Internet assignments.
Prerequisite: BUS 101.
BUS 207 Principles of Marketing (3)
An overview of marketing theory and application in the context of the corporate, global and digital environment is studied. Topics include strategic planning, consumer behavior and customer experience design, business consumer marketing, developing and managing product offerings, marketing research and intelligence, advertising, public relations, sales promotions, pricing strategies and developing a marketing plan.

BUS 209 Business Statistics I (3)
An introductory course in the use of statistics in business. Topics covered include measures of averages and dispersion, probability theory, probability distributions, sampling theory and estimation.
Prerequisite: MTH 136.

BUS 210 Marketing and Consumer Behavior (3)
An overview of marketing theory in the context of the corporate environment and consumer behavior. Topics include marketing strategy, opportunities, consumer behavior, segmentation, marketing mix, and the external and internal influences on the consumer including the effects of demographics, and social and psychological variables on buyer behavior. (School of Graduate & Professional Studies only)
Prerequisite: BAS 100 for School of Graduate & Professional Studies students.

BUS 212 International Business (3)
An overview of the global market and its challenges for the U.S. businessperson. The student will look at the operation of the multinational company, international business activities, agreements between nations and other topics related to participation in global activities.
Prerequisite: BUS 101. Or BUS 323 for School of Graduate & Professional Studies.

BUS 213 Principles of Human Resource Management (3)
The student will be introduced to the field of human resource management. This course will examine the many aspects of human resources and how these functions support the goals of the organization. Topics will include recruiting, selection, training and development, compensation and safety. Student requirements will include a research paper and case analysis.
Prerequisite: BUS 101; BAS 100 for students in the School of Graduate & Professional Studies

BUS 214 Business Ethics (3)
A discussion of the impact of ethics on today’s business world with content areas to include business social responsibilities, rights of stakeholders, government interaction and international ethical practices is studied. The student will be expected to analyze cases and to write opinion reports using APA format as a part of the course requirements.
Prerequisite: BUS 101

BUS 230 Business Law (3)
An introduction to the general framework of the law and how the law impacts business operations. The student will examine the basic elements of the law, its historical development, contracts, agency, sale of goods and various forms of business organizations. Student requirements will include case analysis and a review of research in the field.
Prerequisite: BAS 100 for School of Graduate & Professional Studies.

BUS 292 Business Case Studies (3)
This course applies the business case method of learning various business situations that illustrate business strategy development. The evaluation of cases illustrates the causes of business problems, available solutions, and the impact of managerial choices on both the
BUS 310 Principles of Finance (3)
This course is an introduction to the role of finance in the economy. Financial markets, debt and equity instruments, capital budgeting, inflation, and the role of the financial manager are examined.
Prerequisite: ACC 105, 106, 300, 301; MTH 136 or its equivalent. ACC 111 for the School of Graduate & Professional Studies students.

BUS 311 Money, Banking and Financial Institutions (3)
Money, credit and financial instruments; banks, other financial institutions and the operation of the Federal Reserve System are discussed in relation to economic activity, inflation and unemployment.
Prerequisite: ECN 103; BUS 310.

BUS 312 Managerial Finance (3)
An examination of financial decision making in the firm, including the sources of funds, capital structure and long-range financial growth are studied.
Prerequisite: BUS 310.

BUS 313 Investments (3)
An introduction to the securities markets, their operations and regulations and alternative investment opportunities are presented. Corporate and government issues, risk and portfolio development will be considered. Current market conditions will be discussed.
Prerequisite: BUS 310.

BUS 314 International Finance (3)
This course considers the nature and scope of international financial management. Direct foreign investment, international exchange, U.S. balance of payment, and the multinational enterprise will be discussed.
Prerequisite: ECN 103; BUS 310.

BUS 318 Operations Management (3)
The course will consider the operational aspects of running a manufacturing or service organization. Topics will include layout considerations, service requirements, inventory control and a preview of today’s operations challenges. Course requirements will include case studies, end of chapter review questions and small off-site assignments.
Prerequisite: BUS 101.

BUS 319 Purchasing and Contracting (3)
Introduction to the procurement function. Specification of products and services, selection of suppliers, price, delivery, and other requirements; contract negotiations will be discussed.
Prerequisite: BUS 101.

BUS 320 Small Business Management (3)
This course examines the start-up and operation of a small business. Emphasis will be placed on the business plan, financial options, managerial challenges and day-to-day operations. The student will be expected to conduct an analysis of a business opportunity as a part of the course requirements.
Prerequisite: BUS 101.

BUS 323 Business Management and Leadership (3)
This course provides the student with an overview of management and leadership processes within an organization. By applying principles of planning, organizing, staffing, directing, controlling, and team development and building – to a comprehensive team project – the student will develop an understanding of the role of manager in today’s organization. (School of Graduate & Professional
Studies Only

Prerequisite: BAS 100.

**BUS 333 Advertising and Digital Promotion Design (3)**
An overview of the various offline and online media available to advertisers, the factors influencing the choice of media and the role played by advertising agencies are studied. Topics include the role of advertising in society, effective consumer communication strategies, consumer analytics, segmentation, targeting and positioning consumers, creating digital and non-digital strategies, planning and buying media, executing an advertising plan, developing a message and return on investment strategies and management.

Prerequisites: BUS207

**BUS 334 Consumer Behavior (3)**
This course provides an analysis of the consumer decision process and customer experience design strategies in the market place. Special emphasis is placed on the external and internal influences on the consumer including the effects of demographic, social and psychological variables. Topics include developing strategies, variations in behavior, changing societal values, consumer perceptions, learning and memory theory, consumer motivation and attitudes, self-concept and lifestyle issues, information analysis, post purchase management, organizational buying and marketing regulations.

Prerequisite: BUS 207.

**BUS 340 Business Statistics II (3)**
This course is a continuation of BUS 306. Topics include hypothesis testing, regression and correlation techniques, time series analysis, index numbers, nonparametric techniques and analysis of variance.

Prerequisite: A grade of C or better in BUS 306.

**BUS 341 Business Statistics (4)**
The use of statistics in business will be explored. Topics covered include measures of averages and dispersions, probability theory and distributions, sampling, tests of hypothesis, regression, and correlation. (School of Graduate & Professional Studies only)

Prerequisite: BUS 323.

**BUS 342 Business Statistics (3)**
The use of statistics in business will be explored. Topics covered include measures of averages and dispersions, probability theory and distributions, sampling, tests of hypothesis, regression, and correlation. (School of Graduate & Professional Studies only)

Prerequisite: BUS 323.

**BUS 350 Principles of Sports Management (3)**
This introductory level course provides the student with an overview of the structure of the sports industry and highlights the scope and variety of career opportunities in the area. The value of professional management to sports organizations will also be emphasized. Attention will be given to the issues facing sport organizations and the use of management techniques to solve business-related problems

Prerequisite: BUS 301.

**BUS 351 Sport Marketing (3)**
This course provides the student with basic knowledge and understanding of sport marketing and promotions for the educational, recreational and professional sport. The components of the course include developing products, sponsorships, special events, fund raising, public relations, promotions, and utilizing radio and television networks.

Prerequisite: BUS 207
BUS 352 Sport Business and Finance (3)
This course is designed to prepare the prospective sport manager with an overview of the major financial issues facing the sport industry. An analysis of the following areas will be undertaken: sources of revenue for sports organizations, a comparison of public and private sector funding in sports, and investment of public resources into private sporting facilities.
Prerequisites: BUS 310, 350.

BUS 353 Sport Law (3)
This application of legal principles is considered in relation to professional and amateur sports. Emphasis is placed on tort liabilities and the regulation of sport in a variety of settings. The governance structure of professional and amateur sports organizations will also be discussed.
Prerequisite: BUS 230.

BUS 354 Athletics Administration (3)
This course is designed to introduce the student to the management issues faced by administrators within collegiate and high school athletics departments. Students will develop an understanding of issues such as governance, scheduling, NCAA and conference compliance, gender equity and Title IX, conference membership issues, departmental structure, and organizational goals in athletics, legal issues, and operating procedures.
Prerequisite: BUS 350.

BUS 355 Facility Management (3)
This course investigates the functions of sport managers in the design, operation, and financing of sport facilities. Students will examine the issues pertaining to management of public and private arenas, stadiums, and multipurpose facilities. Management of temporary facilities for special events will also be considered.
Prerequisite: BUS 301.

BUS 373 Labor and Industrial Relations (3)
This course includes topics such as collective bargaining, union and management negotiating strategies, the grievance process and a consideration of public sector bargaining. The student will be expected to complete a research paper and to review different types of grievances as a part of their coursework.

BUS 374 Employment Law (3)
A survey course introducing the laws that impact the employee-employer relationship. The student will analyze how the law affects areas such as hiring, compensation and safety as well as the laws governing discrimination. A Pennsylvania application will be included where appropriate. The student will be evaluated on the basis of examinations, case analysis, legal research and Internet use.
Prerequisite: BUS 301.

BUS 375 Risk Management (3)
The use of risk management techniques as tools to improve the efficiency and effectiveness of the organization are studied. The student will be introduced to the risk management process, various non-insurance activities to control risks in the workplace, safety in the workplace and current issues facing the businessperson. Coursework will include a research paper, case analysis and classroom discussions.
Prerequisite: BUS 101.

BUS 376 Employee Benefits (3)
This course will include consideration of the history of benefits, health insurance and its issues, other benefit options, administration and evaluation of employee benefit plans. The student will be expected to complete a research paper, perform case analysis and participate in classroom
discussions.

Prerequisite: BUS 301.

BUS 377 Training and Development (3)
The student will take an in-depth look at training and its importance to the organization. Topics in this course include preparing the organization for training, evaluation of various training methods and employee development. The student will be required to complete a research paper, analyze cases and design a training program.

Prerequisite: BUS 101.

BUS 378 Healthcare Risk Management (3)
Risk Management affects the entire organization and is commonly referred to as Enterprise Risk Management (ERM). The focus for healthcare organizations is to reduce risk in all areas with the goals of quality improvement and cost reduction. The student will be introduced to the risk management process, current federal and state legislation, cost and benefits of safety programs in the healthcare setting, strategies for medical error and liability reduction, the use of healthcare information technology to reduce risk, current topics in health insurance, and managing risk in integrated healthcare delivery systems. Coursework will include a research paper, case analysis and classroom discussions and presentations.

Prerequisite: BUS 101.

BUS 379 Seminar: Human Resources Development (3)
Policies and programs concerned with the allocation, utilization, development, and maintenance of human resources are presented. A case study approach with emphasis on student research and interaction.

Prerequisite: BUS 371. Does not replace BUS 4000.

BUS 381 Organization Theory and Behavior (3)
This course examines the systematic study of behavior and attitudes in organizations. The question of why people in organizations feel and behave as they do is examined through the study of motivation, communications, personality, leadership, and group dynamics.

Prerequisite: BUS 101, 301.

BUS 391 Current Business Issues (1)
This course is an independent research paper, which reviews current events in business. Permission of the Dean of the School is required.

BUS 405 Marketing Decision Making Using Analytics (3)
This course develops a comprehensive overview of marketing strategy. Management decision-making in all areas of marketing is addressed. Strategic planning and implementation in segmentation, product, distribution, promotion, and pricing will be included.

Prerequisites: BUS 207 and any 300 level marketing course or BUS 323 for School of Graduate & Professional Studies.

BUS 407 Marketing Research and Analytics(3)
Research techniques/methods on the collection and analysis of data used as a basis for market identification, product planning, consumer behavior, pricing policy, and sales strategy are studied. Students will learn and use Google Analytics to learn marketing metrics and how the data gained through online research can be used in the marketing management of an online business enterprise.

Prerequisites: BUS 101, 207
BUS 410 Digital Business Marketing Management (3)
This course presents theories and applications necessary to develop and manage online digital strategies. Topics include an introduction to e-marketing strategies, e-mail marketing, online advertising, affiliate Marketing, search engine marketing, search engine optimization, social media strategies, crowd sourcing, viral marketing, online reputation management, web public relations, web site design and development theories, web analytics and conversion optimization, mobile marketing strategies and customer experience management.

**Prerequisites:** BUS 207

BUS 421 Corporate Studies I (3)
This course provides students the opportunity to complete an in-depth study of a service corporation, or several service corporations, so to better understand the integration that is required in management practices within a corporate business structure. The course will focus on the challenges, opportunities and integration of corporate management, administration, marketing, human resource management, leadership and, as applicable, global operations and management.

**Prerequisites:** BUS 101, 207, 301.

BUS 437 Special Topics (3)
This course provides opportunity for investigation of a selected topic or topics designed to integrate and deepen the student’s comprehension and application of business theory and practice.

BUS 438 Social Media Marketing (3)
An in-depth study of the theories, processes, and application of social media marketing within an organization. The course will explore strategies to build social communities and better understand its opportunities and organizational impact. The concept of a social business will be studied through the analysis of the approaches to implement social technologies. The course will also explore the planning and implementation processes of social business initiatives.

**Prerequisite:** BUS 101, BUS 207

BUS 439 Independent Study (1-3)
This course allows the student to investigate selected topics. Registration with permission of the Dean of the School and the Vice President for Academic Affairs.

BUS 440 Internship (6)
This is a 240-hour work experience designed to afford the student a practical experience in the application of business techniques and practices.

**Prerequisites:** Required business courses must be completed or taken concurrently, minimum of B average and approval of adviser and the Dean of the School.

BUS 441 Internship (3)
This is a 120-hour work experience designed to afford the student a practical experience in the application of business techniques and practices.

**Prerequisites:** Required business courses must be completed or taken concurrently, minimum of B average and approval of advisor and Dean of the School.

BUS 445 Sport Management Internship (3-6)
The internship requirement is considered to be one of the most critical components of the Sport Management program. Student will undertake a 120-240 hour supervised internship. This opportunity is expected to enhance the student’s academic experiences, provide additional work experience, and networking opportunities. Internship experiences may take place in any of the varied sport industry settings.

**Prerequisite:** Approval of advisor and Dean of the School.
BUS 455 Sport Management Seminar (3)
The sport management seminar is designed to provide an overview of the moral and ethical issues faced by sport organizations. Emphasis will be given to the issues presented by sport managers as they attempt to operate businesses whilst understanding the basic tenants of sport policy and governance issues. Also included will be an examination of the structure and governance of sports organizations.
Prerequisite: Three Sports Management courses. Does not replace BUS 4000.

BUS 4000 Seminar: Business Policies and Strategies – Capstone Course (3)
Using a business simulation/case approach, this course is a study of management policy as an integrative force to all other functions of businesses; i.e., marketing, manufacturing, finance, personnel. The course represents an insight into the strategies behind corporate policies.
Prerequisites: BUS 301, 304, 306, 310.

BUS 4001 Seminar: Business Policies and Strategies – Capstone Course (4)
Using a business simulation/case approach, and by integrating learning team experiences with classroom theory this course is a study of management policy as an integrative force to all other functions of businesses; i.e., marketing, manufacturing, finance, personnel. The course represents an insight into the strategies behind corporate policies. (School of Graduate & Professional Studies Only)
Prerequisites: BUS 205, 214, 310, 323, 342.

CHEMISTRY

CHM 105 Living Chemistry (3)
An introduction to chemistry designed to promote scientific literacy for the non-science student. Emphasis is non-mathematical and focuses on the applications of chemical principles to situations encountered in modern life, including preservation of natural resources, medicine and genetics, and consumer products. 3 lecture hours per week.

CHM 111 Chemistry for the Allied Health Professions (3)
An introduction to general, organic and biological chemistry for students in the health professions. Topics include the structure, properties and reactions of inorganic, organic and biological compounds, solution chemistry, gas laws, energetic, acid-base chemistry, equilibrium, kinetics, electrochemistry and nuclear chemistry. Emphasis is on physiological and clinical applications. 3 lecture hours per week. Offered in the fall semester. Not accepted as credit towards the biology major.

CHM 115 Chemistry for the Health Professions I (3)
An introduction to the principles of general chemistry for students of the health professions. Topics include the structure, properties and reactions of inorganic compounds, nuclear chemistry, stoichiometry, gas laws, solution chemistry, thermochemistry, equilibrium, kinetics, and acid-base chemistry. Emphasis is on physiological and clinical correlations. 3 lecture hours per week.
Pre-requisite: demonstrated knowledge of high school algebra.
Corequisite: CHM 115L or permission of course director.

CHM 115L Chemistry for the Health Professions I Laboratory (1)
Introduction to the experimental techniques of chemistry applying the principles of stoichiometry, gas laws, thermochemistry and solution chemistry to the study of the composition and reactions of compounds. 3 laboratory hours per week.
Corequisite: CHM 115 or permission of course director.
CHM 116 Chemistry for the Health Professions II (3)
An introduction to organic and biological chemistry for students of the health professions. Topics include the structure, properties and reactions of organic compounds, carbohydrates, lipids, proteins, and nucleic acids, enzyme activity and metabolic pathways and the storage and transmission of genetic information. Emphasis is on physiological and clinical correlations. 3 lecture hours per week.
**Pre-requisite:** C or better in CHM 115 or equivalent or permission of course director.
**Corequisite:** CHM 116L or permission of course director.

CHM 116L Chemistry for the Health Profession II Laboratory (1)
Application of the experimental techniques of chemistry to the study of the structure, function and reactions of organic and biological compounds. 3 laboratory hours per week.
**Prerequisites:** CHM 115/115L or permission of course director.
**Corequisite:** CHM 116 or permission of course director.

CHM 151 Principles of Chemistry I (3)
Chemical compounds and reactions; terminology, stoichiometry, solution chemistry, gas laws, thermochemistry, electronic structure and chemical bonding. 3 lecture hours and 1 recitation hour per week. Offered in the fall semester.
**Prerequisites:** High school chemistry or equivalent; demonstrated knowledge of algebra.

CHM 151L Principles of Chemistry Laboratory I (1)
Application of the principles of stoichiometry, gas laws and solution chemistry to the synthesis, separation and identification of compounds. 3 laboratory hours per week. Offered in the fall semester.
**Corequisite:** CHM 151.

CHM 152 Principles of Chemistry II (3)
Condensed states of matter, properties of solutions, chemical kinetics, electrochemistry and nuclear chemistry. 3 lecture hours and 1 recitation hour per week. Offered in the spring semester.
**Prerequisite:** Grade of “C” or better in CHM 151.

CHM 152L Principles of Chemistry Laboratory II (1)
Laboratory investigations of properties of solutions, chemical kinetics and chemical equilibrium emphasizing techniques of quantitative analysis, including both traditional gravimetric and volumetric methods and instrumental methods of spectrophotometry and chromatography. 3 laboratory hours per week. Offered in the spring semester.
**Corequisite:** CHM 152.
**Prerequisite:** Grade of “C” or better in CHM 151/151L.

CHM 203 Organic Chemistry I (3)
An introduction to the molecular structure and reactivity of carbon-based compounds. Emphasis is given to the relationships between molecular structure and chemical and physical properties. Topics include theories of chemical bonding, isomerism and stereochemistry, IR and NMR spectroscopy, and the mechanisms of fundamental reactions (i.e., substitution, elimination, addition). 3 lecture hours and 1 recitation hour per week. Offered in the fall semester.
**Prerequisites:** CHM 151/151L, 152/152L.
**Corequisite:** CHM 203L.
CHM 203L Organic Chemistry Laboratory (1)
A techniques-focused course to develop skill with common organic chemistry lab techniques including separations, purifications, and the use of spectroscopic and analytical equipment (e.g., IR, GC, HPLC) to characterize substances. Experiments demonstrate theoretical principles from CHM 203. 3 laboratory hours per week. Offered in the fall semester.
Corequisite: CHM 203.

CHM 204 Organic Chemistry II (3)
Continuation of CHM 203. Topics include aromaticity, organometallics, oxidation and reduction, and carbonyl chemistry. Connections to biology are emphasized, where appropriate. 3 lecture hours and 1 recitation hour per week. Offered in the spring semester. Prerequisites: Grade of “C” or better in CHM 203/203L.
Corequisite: CHM 204L.

CHM 204L Organic Chemistry Laboratory II (1)
Continuation of CHM 203L. Experiments illustrate multistep organic synthesis and demonstrate theoretical concepts from CHM 204. 3 laboratory hours per week. Offered in the spring semester. Corequisite: CHM 204.

CHM 299 Selected Topics in Chemistry (3)
A study of a specialized subject area which may vary based on student/faculty interest. For non-major students only. The topic, course structure and instructor will be announced prior to pre-registration. There are no prerequisites.

CHM 301 Biochemistry I (3)
Chemical structure, function and reaction of biologically important molecules, including nucleic acids, proteins, carbohydrates and lipids; biological membranes; enzyme kinetics, regulation and mechanisms. This course may be taken in lieu of CHM 401. 3 lecture hours per week. Offered in the fall semester.
Prerequisites: CHM 203/203L, 204/204L; BIO 203/203L
Corequisite: CHM 301L or permission of instructor

CHM 301L Biochemical Techniques Laboratory I (1)
A laboratory techniques course, which applies methods of modern biochemical separation and analysis, including spectrophotometry, chromatography, electrophoresis and immunochemistry, to the quantitative investigation of biochemical systems. This course may be taken in lieu of CHM 401L. 3 hours laboratory per week. Offered in the fall semester.
Prerequisites: CHM 203/203L, 204/204L; BIO 203/203L

CHM 302 Biochemistry II (3)
Intermediary metabolic pathways; photosynthesis; integration and regulation of mammalian metabolism. 3 lecture hours per week. Offered in the spring semester. Prerequisites: Grade of "C" or better in CHM 301.

CHM 437 Special Topics (3)
This is an in-depth study of a specialized subject area. The special topic varies based on student/faculty interest. Topic, course structure and instructor will be announced prior to preregistration. This course may be used to satisfy a biology elective in the biology major. 3 lecture hours per week.
Prerequisites: CHM 151/151L, 152/152L, 203/203L, 204/204L, 401/401L
DIGITAL COMMUNICATIONS

COM 101 Public Speaking (3)
This is a course in public speaking with emphasis on informative, argumentative and persuasive skills along with the sharpening of student’s ability to listen and analyze.
Prerequisite: ENG 101

COM 102 Introduction to TV Production (3)
This course offers basic skills that would be invaluable to the prospective news broadcaster – including camera work, presentations, and editing with a specific focus on journalistic techniques.

COM 201 Theories of Mass Communication (3)
This course is designed to introduce the fundamentals of mass communication, acquainting the students with theories of how the mass media shapes both ourselves as individuals and the world in which we live. It offers an introduction to research methods and the history of the discipline, examine the theories and perspectives that research has generated, and explore important social and ethical questions revolving around media effects.
Prerequisite: ENG 101

COM 202 Visual Communication (3)
Students receive a broad introduction to the distinct theories and perspectives involving visual communication, while addressing important issues of visual literacy. It spotlights the use of images in marketing and public relations and in news.
Prerequisite: ENG 101

COM 203 Introduction to Journalism (3)
Extends and reinforces the foundation of communication theory offered in Theories of Mass Communications, while more specifically illuminating journalistic working practices. In a hands-on approach, students learn about journalism while doing journalism.
Prerequisite: ENG 101

COM 204 Introduction to Public Relations (3)
This course gives students a valuable insight into the work of public relations, a profession that works closely with news-workers, and one into which many journalists eventually move. This course covers the development of the public relations industry from its historical beginnings to contemporary application, including the relationship between theory and practice. While reviewing many specific areas of the field including media relations and crisis communication, the course highlights the core of utilizing public opinion and persuasion, as well as the arena of strategic counsel.
Prerequisite: ENG 101

COM 205 Media Technology (3)
This course introduces students to practical applications in video, audio, and multimedia technology. Students will examine innovations in new forms of media, information and communication technology.

COM 206 Public Relations (3)
This course delivers the basis for a multitude of written public relations materials, respecting the fact that exceptional writing in the industry is the most widely noted and requested skill. The course reviews news-writing style and how it parallels public relations writing, grammar, lead writing, and additional fundamentals. Students develop personalized portfolios, which include such items as print and electronic news releases, media alerts and advisories, feature stories and public service announcements.
Prerequisite: ENG 101, COM 204, COM 204 can be taken simultaneously with special approval.
COMD 206 Public Relations (3)
This course delivers the basis for a multitude of written public relations materials, respecting the fact that exceptional writing in the industry is the most widely noted and requested skill. The course reviews news-writing style and how it parallels public relations writing, grammar, lead writing, and additional fundamentals. Students develop personalized portfolios, which include such items as print and electronic news releases, media alerts and advisories, feature stories and public service announcements.
Prerequisite: ENG 101

COMD 218 Social Media and Professional Communication (3)
This course focuses on the use of social media in business. The course teaches individuals how to create a social media campaign, and how to analyze and present data in order to address organizational issues and make appropriate business decisions.

COM 299 Selected Topics in Communication (3)
In this course students have the opportunity to explore issues and/or develop skills and expertise in areas selected by the instructor. Course may be repeated for credit if the topic changes

COM 301 Feature and Magazine Writing (3)
Feature writing demands a unique combination of talents – the accuracy and techniques of the busy reporter and the literary skills of the creative writer. This course is designed to help students achieve those abilities with theoretical and practical training in writing feature articles for newspapers, magazines and broadcast. Students should learn to develop ideas for articles, carry out research, conduct interviews and write the articles themselves, with the course also suggesting strategies for selling written work on a freelance basis.
Prerequisite: ENG 101

COM 302 Media Ethics (3)
In this course, students examine ethical standards and practices in mass media, as well as the key ethical issues confronting mass communicators today. Case studies, ethical decision-making models, and industry standards will be used to show the impact of decisions media professionals make.
Prerequisite: PHL 2000

COMD 305 Media and Globalization (3)
This course introduces globalization processes, social movements, and new technologies, as well as law and regulation within digital communications, while exploring implications for access to information internationally.

COM 400 Advanced Journalism (3)
This course will be built around the student website, Gwynedd Now, and its sister print publication, The Gwynmercian. Students will gain advanced skills in news selection, writing, headline creation, editing and layout, both in print and on the Web. Best reporting by students will be used to prompt exploration and discussion of issues surrounding the reporting and publication of news.
Prerequisite: ENG 101, COM 203

COM 401 Broadcast Journalism (3)
Explores the variety of skills required to communicate effectively through radio and television. The course emphasizes the performance techniques, creativity, writing and analytical skills needed to communicate effectively using various formats such as interviews, editorials, commercials and newscasts.
Prerequisite: ENG 101, COM 203
COM 405 Internship (3)
Allows student to experience communication-related fields in an applied context outside the classroom, usually in (but not restricted to) news organizations, media outlets, publication houses, and web design companies.
Prerequisite: ENG 101, COM 203

COM 406 Communication Internship II (3)
This course allows students to expand their experience and exploration of professional communication in an applied context outside of the classroom. To be used as an elective in addition to COM 405 at for-profit organizations not covered by COM 407.

COM 407 Internship for Non-Profit Entities (3)
This course allows student to experience communication in an applied context outside the classroom with a service-learning component. To be used as an elective and not as a substitute for COM 405.
Prerequisite: ENG 101, COM 203

COM 437 Special Topics (3)
This course offers the opportunity for in-depth study of a select area of communication offered by the instructor. Course may be repeated for credit if the topic changes

COM 4000 Capstone (3)
This course is designed for students to integrate and extend the work begun in other classes with a final interrogation of the field resulting in research and/or professional projects that will help prepare them for careers or graduate school.

COMD Digital Media Economics and Budgeting (3)
This course teaches an understanding of the role of economics concepts and budgeting with regard to the creation and development of digital media.

COMPUTER INFORMATION SCIENCE

CIS 100 Beyond the Laptop: Exploring Technology (3)
This course is designed as a general education course for students that are not currently computer information science majors, but find technology interesting enough that they would enjoy exploring it further in a very hands-on way. The course will explore the relationship between humans and technology and the interrelationship between science and technology as well as the basic principles of: electricity, electronics, computers, programming and robots. Students will work in teams to work with electricity, electronics and robotics kits as well as construct programs utilizing drag and drop type programming tools such as (ALICE).

CIS 101 Introduction to Desktop Computing (3)
This course provides students in all majors with the computer skills necessary to be successful in both school and the workplace. Students will learn common file management techniques such as configuring folder options and digital file organization using Windows 10 operating system. Aero snap and peek, shortcuts, backup options, basic cloud storage, OneDrive and Google Docs, Blackboard learning environment, and the University's email system will be covered. Students will learn the latest Microsoft Office Professional Suite including Word, Excel, PowerPoint, and Access. (Not required for CIS majors)

CIS 102 Emerging Internet Technologies (3)
This course serves two purposes: (1) to learn about emerging Internet technologies and (2) to master the skills necessary to more effectively use the Internet for research. Students will learn
How to discern the quality of information on the Internet, identify scholarly and non-scholarly sources, utilize specialized directories, optimize search engine queries, learn the different types of plagiarism, understand copyright laws, write in APA format, and successfully sort through the mass amounts of data on the Internet. Students will research emerging Internet topics while taking advantage of the many online tools available to them. After completing a research paper on an assigned topic, students will create a final project from their paper utilizing the latest techniques, resources, and software. This course includes many in-class projects, both individual and group, and is updated each semester. By learning how to use existing technologies, students enrolled in this class will be better prepared in their academic, personal, and professional endeavors.

CIS 104 Programming I (3)
This course is designed as a first programming course for CIS majors or anyone interested in programming. Taught in one of the industry leading programming language C++ or Java, this course will cover the structured and procedural programming aspects of the language, including top-down design, loops, conditional structures, use of variables, scope, arithmetic operations, processing records, Boolean algebra, and reinforcement of basic algorithmic design. This will give the student a good foundation for more advanced topics in programming.

CIS 110 Information Systems (3)
This course is designed to provide students, future information system managers, with the skills necessary to understand and manage the technologies which have become an integral part of today’s business landscape. Major topics include management in a digital world, development and acquiring information systems, improving business processes, business intelligence using data analytics, artificial intelligence and robotics, and enhancing the organization through social media. The impact of mobile computing, cloud computing, the Internet of Things (IoT), and outsourcing will be discussed. Students will learn how to apply a systems approach to problem solving and the systems development life cycle (SDLC).

CIS 114 Web Design I (3)
This class teaches students how to create a website from scratch using HTML and CSS. Topics include content planning and visual aesthetics including design and layout of images and text, the end-user experience (UX), and adaptive cross-device design. The basic elements of the latest versions of HTML and Cascading Style Sheets (CSS) will be covered including site design and page formatting, graphic manipulation for web content, Search Engine Optimization (SEO), as well as browser, mobile device, and server capabilities. Students will learn how the web works and what happens when a webpage is viewed in a web browser across multiple types of devices (Responsive Web Design). By the end of the course students will be able to publish their own websites with code they have written themselves.

CIS 203 Systems Analysis and Design (3)
This course covers the current topics in systems analysis and design while focusing on the core set of skills that all analysts and project managers must possess, along with an overview of current project management and CASE tools. Students will learn about each phase of the software development life cycle (SDLC) for a project including: requirements analysis and determination, project scheduling, process modeling, user-interface design, program design, implementation, maintenance and review. Students will work together in teams to address emerging challenges such as cloud services and service-oriented architecture, the growth of ecommerce, human-user interactions, and designing gesture-based interfaces for smartphones and tablets.
Prerequisite: CIS 104 or permission of instructor.

CIS 204 Programming II (3)
This course is designed as a second programming course which concentrates on the object-oriented aspects of programming. Topics including object properties and methods, inheritance, and polymorphism. This course will continue utilizing either the C++ or Java programming language.
Students will gain valuable industry skills with several hands-on programming assignments.

**Prerequisite:** CIS 104 or 301.

**CIS 215 Introduction to Relational Databases (3)**
This course is designed to provide individuals with a complete introduction to database concepts and the relational database model. Topics include QBE, SQL, normalization, design methodology, DBMS functions, basic database administration and other database management approaches, such as client/server databases, and data warehouses. In addition to the theoretical concepts, this course also gives the student a good foundation in hands-on training using the latest version of the Microsoft Access DBMS. At the completion of this course, students should be able to understand a user’s database requirements and translate those requirements into a valid database design.

**Prerequisite:** 100 level CIS course or greater.

**CIS 230 Introduction to Networking (3)**
This course provides a baseline level of knowledge for success in industry in the field of computer networking. Students study the layers of the ISO model, cable installation and management, networking media, network interface cards, network topologies, network communications and protocols with concentration on TCP/IP. Students are exposed to other new industry topics such as Networked Attached Storage (NAS) as well as the latest wireless technologies. With a focus on networking operating systems, this course provides coverage of both Microsoft Windows Operating Systems and Server technologies. The course follows the CompTIA+ guidelines for networking.

**Prerequisite:** Any 100-level CIS course or permission of instructor

**CIS 240 Cybercrime (3)**
This course gives the student the knowledge and skills to identify, track and prosecute the cyber-criminal. Exposes the student to the process of detecting attacks and collecting evidence in a forensically sound manner with the intent to report crime and prevent future attacks. Students are introduced to advanced techniques in computer investigation and analysis with interest in generating potential legal evidence, provided preparation to identify evidence in computer related crime and abuse cases, as well as track the intrusive hacker's path through a client system. Students are introduced to tools used in investigations, investigating network traffic, web attacks, DoS attacks and corporate espionage.

**Prerequisite:** Any 100-level CIS course or permission of instructor

**CIS 301 Algorithms and Data Structures (3)**
This course feature the concept of programming as a method of analyzing, stating and solving problems on a computer. This course includes both structured and non-structured logic in the solution to mathematical and data progressing problems. Topics include: arithmetic operations, working with data files, processing records, loops, Boolean algebra, linked lists, stacks, queues, recursion, binary trees, multi-way trees, graphs and sorting.

**Prerequisite:** CIS 104 or 204.

**CIS 304 Event-driven Programming (3)**
Students will be instructed in the fundamentals of event-driven programming where functions are determined by events such as user actions. Service oriented and time driven programs, event and exception handlers, trigger functions, user created events, anticipation of events, error trapping, and user interface design will be covered. ASP.net web pages, file I/O database connectivity, and web services will also be covered. Students will work hands-on using the latest tools and techniques to create their own program.

**Prerequisite:** Any programming course or permission of instructor.

**CIS 320 Computer Applications in Business (3)**
This course gives students a cursory overview of the major computer based business systems found in businesses today. Systems that will be looked at include E-commerce, Accounting Information Systems, Human Resource Information Systems and Enterprise Resource Planning Systems. In
addition, the course will explore how knowledgeable workers can solve typical business problems through the use of advanced Microsoft Office features found in Word, Excel and Access. (5 weeks) (School of Graduate & Professional Studies only)

CIS 321 Computer Organization (3)
This course provides students with an in-depth look at computer hardware, software, and the interaction between the two. By breaking computer organization down in a hierarchical manner, students will gain a thorough understanding of computer architecture. Students will learn the history of modern-day computers, the Von Neumann architecture model, circuitry, Boolean logic, logic gates, instruction sets, processor arithmetic and control functions, input/output, memory management and storage, machine code, and assembly and compile processes. In addition to using the Little Man Computer (LMC) prototype to understand the stored program concept, students will complete hands-on computer hardware builds.

Prerequisite: Any programming course or algorithms course or instructor permission.

CIS 325 Database Administration and Security (3)
This course focuses on the performance, integrity, and security of relational databases. Mapping to the Microsoft Administering a SQL Database Infrastructure Exam (70-764), topics include configuring data access and auditing, database server backups and restores, monitoring SQL Server instances, maintaining high availability, and disaster recovery. Through hands-on labs students will learn client/server architecture, connection encryption, how to configure data collection for analysis, statistic management, and implementing failover cluster instances. Emphasis will be placed on current security threats such as SQL injections, data leaks, privilege escalation, stolen backups, and security policies.

Prerequisite: CIS 215.

CIS 330 Networking Administration and Security (3)
A more advanced study of computer network administration and tools using the latest Microsoft Server operating system. Topics include administration of file, database, print and other servers; study of window active directory services, virtualization, imaging technologies, and other current network administration issues and emerging technologies. Various security issues facing networks in businesses today are addressed.

Prerequisite: CIS 230.

CIS 340 Computer Forensics (3)
This course introduces the student to the field of computer forensics and digital investigations. Students will learn the skills necessary to launch and complete a successful computer investigation through hands-on data acquisition, analysis, and reporting. Students will learn the components necessary to create an effective, efficient, and secure computer forensic lab. Popular tools and forensic methodologies currently used in the industry will be introduced. Network forensics and the examination of non-traditional devices will also be discussed. Students will work on hands-on labs using the software and techniques discussed in class.

Prerequisite: Any 100-Level CIS course or permission of instructor.

CIS 350 Multimedia I (3)
Students will gain valuable hands-on experience creating multimedia applications that can be used for a wide variety of purposes. Students will learn to create animations with the latest version of one of the most popular multimedia tools on the market today: Adobe Flash. Flash lets you combine graphics, sound, video and other media. It supports multiple timelines and features, like the latest in IK technologies (inverse kinematics), achieved by adding bones to animations to give them more ‘life-like’ movement. Students will also learn motion tweening and shape tweening animation techniques, creating interactive media for the World Wide Web, information kiosks and presentations.

Prerequisite: Any computer course.
CIS 410 Operating Systems (3)
A study of operating systems concepts including processes, memory management, file systems, storage systems, input and output, networking, and security, as well as other topics will be presented. Students will learn basic operating system abstractions, mechanisms, and their implementations. Study of the most recent operating systems will be covered in parallel with concepts taught. Students will gain a practical understanding of how processes, file and storage systems and security function as elements of any operating system.
Prerequisite: Any programming course.

CIS 420 Mobile Application Development (3)
This course is an advanced course in software development for mobile devices using the latest technologies in the industry for mobile phone development. Students will learn how to determine what operating systems are available for smart phones, what tools, hardware and software are needed to develop applications for different types of phones. This course will stay current with the industry at the time the course is offered and will continue to adapt to the smart phone market. Emphasis will be placed on the full-life-cycle of software development from requirements specifications through final deliverable application.
Prerequisite: Junior status or above, CIS 104 and (CIS 204 or 301).

CIS 421 Advanced Computer Platforms (3)
This course advances the student’s understanding of computer architecture which began in “Computer Organization” to include detailed treatment of all key organizational issues including I/O, RISC instruction set, cache memory, internal and external memory, parallel processors, and micro-programmed implementation. Additional topics include: input and output storage systems, systems software, alternative architectures, embedded systems, performance measurement and analysis, and network organization and architecture.
Prerequisite: CIS 321.

CIS 424 Web Design II (3)
This is an advanced level course continuing the development of web site design utilizing the Adobe Dreamweaver development environment, as well as other current tools used in the industry. This course is designed to incorporate skills learned in the introductory web design course and add in dynamic web functionality by connection to back-end databases, e-commerce support, and learning more advanced features of web applications. The students will culminate the semester by creating their own dynamic web site.
Prerequisite: CIS114 or permission of instructor.

CIS 437 Special Topics (3)
This course provides opportunity for investigation of a selected topic or topics designed to integrate and deepen the student’s comprehension and application of computer information science theory and practice.

CIS 439 Independent Study (3)
This option affords students the opportunity to pursue research in a particular field of interest. This is not a traditional classroom setting.

CIS 440 Internship (3-6)
A work experience with a minimum of 120-hours designed to afford the student a practical experience in the field of Computer Information Science and information technology.
Prerequisite: Student should have completed 30 credits; minimum GPA of 2.5 and approval of internship coordinator and/or dean of the school.

CIS 450 Multimedia II (3)
This course allows students to apply the animation and multimedia techniques learned in Multimedia
I, to gaming technology. Students will learn the basic elements of game design and development, while working hands-on in the gaming software projects for different types of games. Prerequisite CIS 350 or permission of instructor.

**Prerequisite:** CIS 350.

**CIS 4000 Capstone (3)**
This course is designed to be taken at the end of the CIS program, applying the culmination of knowledge gained in all program courses and incorporating many facets of the major. Students will work either in teams to design, develop and implement a solution to a real-world IT problem, or work independently on a comprehensive research project. Students will create a portfolio of work from their courses over their entire career in the CIS program; along with present their project work at the end of the semester. This course offers the student a comprehensive approach to their professional development.

**Prerequisite:** Completion of all required CIS core courses in the major and at least 2 courses in the student’s professional option.

**CRIMINAL JUSTICE**

**CRJ 102 Introduction to Criminal Justice (3)**
A survey of the American criminal justice system and its components: police, courts and correction. The course is designed to describe the functions of the system from arrest through trial, appeal, sentencing, correction and parole. The object of the course is to provide the student with a procedural framework of the criminal justice process. (Also SOC 102.)

**CRJ 205 Stalking & Domestic Violence (3)**
This course will introduce students to the topics of stalking and domestic violence from a criminological, sociological, and psychological perspective. In this course students will look at the social factors that contribute to the incidence and prevalence of both stalking and domestic violence. Students will examine victim outcomes and the criminal justice response to these crimes. Students must be at least a sophomore or receive permission of the Instructor.

**CRJ 207 Drugs, Society & Criminal Justice (3)**
The American justice system has struggled to confront the problems related to drugs in our society, which include increased criminal activity, drug use by children and adolescents, and prison overcrowding. Throughout the semester, students will learn and understand the nature of drug use, and the psychological and physiological effects of various legal and illicit drugs. Additionally, this course covers the relative influence that drug use has on both the criminal justice system and larger society. This includes analysis of the various components of domestic and international drug production and trafficking, as well as the efforts made by our government to curtail these criminal initiatives.

**CRJ 215 Criminology (3)**
An introduction to crime and criminality, the course examines types of crime, such as violent and property crime, white-collar, organized and victimless crimes, as well as theories of crime and the collection of statistical crime data.

**CRJ 216 Race, Class & Ethnicity (3)**
For much of our history, the administration of justice has always been about controlling the minority outside of the ruling class. In fact, race and ethnicity necessarily influence individual experiences in the criminal justice system, as well as within the broader society. The purpose of this class is to critically examine the characteristics of race and ethnicity and how they are used to bias decisions within our criminal justice system. Students will investigate the past and present behavior of the
courts, correctional institutions, and law enforcement officials, and the possibility of prejudiced policies and practices utilized to rule against minority classes. Additionally, interracial crime is addressed, with a focus on how the criminal justice system has inadequately addressed the correlates that lead to the perpetuation of such destructive actions.

**CRJ 217 Probation & Parole (3)**
This course focuses on the application of the fundamental concepts of probation and parole, theory and nature of probation concepts and principles to the civil and criminal justice systems, with a focus on forensic psychology.

**CRJ 218 Women in Criminal Justice (3)**
This course offers an examination of the role that women play in the criminal justice system. This includes the treatment that women have historically been subjected to, as offenders, victims of crime, and actors within criminal justice professions. Specific topics include the nature of female offending, the processing of females by the criminal justice system, the juxtaposition of women and substance abuse, domestic violence, and women in law enforcement, corrections, and other legal professions.

**CRJ 220 Ethics in Criminal Justice (3)**
This course will explore a range of value-based concepts and perspectives designed to familiarize students with their importance both within the complex world of crime and justice and outside of it. This course will explore more generally the relevance of duties, obligation, and principles; to encourage sound reflection on those particular explorations; and, ideally, to be better equipped to resolve any (criminal justice) situation in which conflict might arise.

**CRJ 225 Juvenile Delinquency (3)**
Consideration of delinquent and status offenders, the role of the family, peers, schools and gender in the creation of delinquency and the controversy surrounding the punishment of juvenile offenders.

**CRJ 250 Police and Law Enforcement in America (3)**
A survey of law enforcement in American focusing on the role of the police, their functions and responsibilities. This course also includes an examination of the historical foundations of police organizations and police work, occupational roles, patterns of relationships between the police and the public, community policing.

**CRJ 251 Victimology (3)**
The analysis of victims of crime and the factors connected to the victimization is a specific and often overlooked area of study. In fact, victims have historically been ignored, with the emphasis placed on the offender and the goal of reducing recidivism. The modern evolution of victim rights has led to the conclusion that victimology can have an impact on the genesis of the criminal justice system and larger sociological networks. This course is an examination of the legal, procedural, sociological, psychological, and economic effects experienced by crime victims.

**CRJ 285 Family Violence and the Criminal Justice Response (3)**
An overview of domestic violence in America, including spouse and child abuse in its physical, sexual and psychological forms and attempts at intervention by criminal justice agencies. Analysis of types of abuse and offenders, existing research and emerging problems, as well as intervention strategies involving arrest and prosecution, protection of victims, changes in legislation and social and cultural contexts which enable violence.

**CRJ 299 Selected Topics in Criminal Justice (3)**
This course provides students the opportunity to explore topics selected by the instructor. Course may be repeated if the topic changes.
CRJ 301 Introduction to Private Security (3)
This course is designed to acquaint the student with systems and organizations of security with primary emphasis on the private sector. The course includes an examination of historical and philosophical perspectives of security and a comparison of the private and public sectors. It covers the protection of personnel, facilities and other assets as well as the administrative, legal and technical problems of loss prevention and control.

CRJ 302 Violence & Criminal Justice (3)
Violence in our society is not easy to define, simply because it takes place in a variety of forums. The purpose of this course is to investigate violence in several contexts, including crimes such as rape, robbery and assault, as well as crimes of the collective, including gang violence, school violence, and hate crimes. Students will examine recent trends and patterns in violent crime and explore the theoretical perspectives behind the occurrence of violent activities, and reflect on intervention and prevention efforts available for controlling violent events.

CRJ 303 Sexual Deviance (3)
This course is a study of the characteristics and development of sexual deviance. In multidisciplinary fashion, the criminological, psychological and physiological components of addiction will be examined, along with the more common predatory offenders, including pedophiles, rapists, and lust murderers. In addition, specialized offenders such as juvenile offenders and cyber stalkers are examined, with the hope of shedding light not only on how these perpetrators operate but how to spot them for self-protection.

CRJ 310 Introduction to Criminal Justice Research (3)
An introduction to research appropriate to the exploration of problems in the criminal justice field. Students will develop basic research skills and come to an understanding of research design and methodologies used in the works of criminal justice researchers and criminologists. Serves to prepare students for reading the professional literature and for undertaking original research projects.

CRJ 311 Organized Crime (3)
This course is a study of the many facets of organized crime. The theoretical explanations behind the creation and operation of organized crime groups, and the perpetuation of this phenomenon, will be examined. Moreover, their activities and the ramifications of their business transactions will be discussed. Additionally, the operations of various organized crime groups will be reviewed, shedding light on the groups themselves and the numerous models that allow them to perpetuate their criminality. Finally, the political, legal, and enforcement initiatives created to stop this type of criminal activity will be assessed, both for application and effectiveness.

CRJ 320 Forensics Crime Scene Investigation (3)
This course will examine the role of the crime-scene investigator at the crime scene. Common items of physical evidence are identified. In-depth discussions of both digital and film crime-scene photography are presented, and recognized procedures for conducting the crime-scene search are emphasized. The philosophy underlying the appropriate undertaking of a crime-scene reconstruction is detailed as exemplified by blood pattern interpretation.

CRJ 326 Criminal Procedures (3)
This course is designed to give students an understanding of the major aspects of the law of criminal procedure, the purposes behind that law and how that law impacts the search for, the gathering of, and the use of evidence in criminal cases. The Constitutional provisions, which are the source of much of the law of criminal procedure, and the courts’ interpretations of those provisions, will be closely examined. 
Prerequisite: CRJ 102
CRJ 327 Criminal Law (3)
This course is designed to give students an understanding of the origins and purposes of criminal law, the constitutional limitations on criminal law, and the general principles of criminal liability and defenses to criminal liability.
Prerequisite: CRJ 102.

CRJ 355 Terrorism and Hate Groups (3)
An investigation of domestic and international groups espousing hatred and creating terror for political purposes. Included among topics discussed will be religion and terrorism, biochemical terrorism, fanaticism and the anti-terrorist response. The American militia movement, Middle Eastern terrorism and cults in the U.S. and Japan will be among groups studied.

CRJ 370 Corrections (3)
An overview of the history and evolution of correctional philosophies, practice and procedures. Includes management and organization of institutional and community-based corrections, diversionary programs and purposes of different types of offender treatment. The course will also consider correctional service to the state and society, costs, recidivism and controversial issues in contemporary corrections.
Prerequisite: CRJ 102, or permission of instructor.

CRJ 401 Theories of Crime and Deviance (3)
An in-depth examinations of sociological and interdisciplinary theories found in the study of crime, delinquency and deviance, including theories of the Chicago School, social learning, control theory, rational choice and routine activities theory. Relationships between the theories, types of crime and the study of crime derived from casebooks are explored.
Prerequisite: CRJ 102, 215.

CRJ 405 Criminal Investigations (3)
The fundamentals of criminal investigation, theory and history will be surveyed. Students study and follow the process of criminal investigations from collection of crime scene evidence to the courtroom, including problems encountered in interviewing, interrogating and investigation and specific techniques appropriate to different types of crimes.

CRJ 410 Courts in America (3)
An introduction and overview of criminal courts in America, their historical development, functions and consideration of controversies in the courts system including media impact on juries and trials, plea bargaining, sentencing issues, prosecutorial discretion, jury selection and juvenile justice. Provides students with an understanding of the courts and court processes as located in the broader socio-political environment.
Prerequisites: CRJ 102, 326, 327.

CRJ 415 Administration of Justice (3)
An examination of the organization, administration and interrelation of criminal justice agencies, and an exploration of policy problems and potential solutions to issues in all areas of the administration of justice. Analysis will focus on personnel policies, management procedures and policies, and evaluation of each agency within the system and include such issues as discretionary decision-making and the association between crime rates and punitive policies of correction.
Prerequisite: CRJ 102.

CRJ 425 White Collar Crime (3)
Ranging from Edwin Sutherland to Enron, this course will focus on crimes committed by corporations and the white-collar criminal, how such crimes are defined and the moral, ethical, legal and social contexts, which promote it. Discussion will also include societal perception and reaction to white-collar crime.
CRJ 435 Criminal Justice Internship (3-6)
Criminal justice majors who have attained class standing as a junior may choose to obtain directed experience in selected criminal justice or security facilities, programs or agencies under faculty supervision and upon the recommendation of the instructor. The internship is a field placement designed to enable the student to acquire the skills, experience and knowledge necessary for the further preparation and choice of a career, while also providing a serve to the larger community. May be repeated for credit up to a total of six semester hours maximum. Students must complete 40 documented hours of work for each credit earned.

CRJ 437 Special Topics (3)
Investigation of selected topics related to criminal justice identified by faculty as useful to the student’s developing knowledge and competence in the field.

CRJ 455 Issues in Private and Corporate Security (3)
This course will focus on contemporary issues in security including legal authority and general effects on society. Various segments of the course will explore the branches and functions of security in multiple industry and institutional settings including private industry, business, government and other institutions. A specific segment of the course will be devoted to the analysis of the growing function of security from a management perspective.

CRJ 461 Crisis Management/Handling Arrested Persons (3 credits)
As part of the ACT 120 curriculum this course prepares police officers for the management of aggressive, dangerous or violent individuals, while focusing on the police officers’ peacekeeping abilities. This course deals with intervention in dispute situations, and the management of disorderly, mentally ill, or psychologically distraught persons. In addition, students learn techniques for handling persons in custody.
Prerequisite: Permission of instructor.

CRJ 462 Human Relations/Families in Crisis (3 credits)
As part of the ACT 120 curriculum this course addresses issues such as human behavior, interpersonal communication, cultural diversity, stereotypes, and ethnic intimidation. Mandated reporting requirements for bias crimes, the underlying offenses of ethnic intimidation, and information on hate groups that are known to operate in Pennsylvania are included. In addition, some of the major theoretical frameworks for studying families in crisis and in major life style transitions are examined. The course also provides training on an effective law enforcement response to domestic violence calls.
Prerequisite: Permission of instructor.

CRJ 463 Motor Vehicle Collision Investigation/Report Writing (3 credits)
As part of the ACT 120 curriculum this course is designed to introduce the basic investigative practices related to traffic collisions as well as to explain the initial actions to be taken at an accident scene including traffic direction and control. This course addresses the basic elements of the first responding police officer’s role and the safe practices related to being the first responder to a hazardous materials incident. The importance of written communication skills in the information-gathering process, preliminary investigation, field note taking, documentation of the crime scene or arrests, and articulation regarding the use of force and official police report writing are emphasized.
Prerequisite: Permission of instructor.

CRJ 464 Motor Vehicle Law Enforcement (3 credits)
As part of the ACT 120 curriculum this course introduces the basic laws that constitute the Pennsylvania Vehicle Code and their relationship to the work of the police officer. Topics include the legal issues related to occupant safety, in general, and Pennsylvania statutes, in particular.
Prerequisite: Permission of instructor
CRJ 465 Patrol Procedures and Operations (3 credits)
As part of the ACT 120 curriculum, the course introduces the student to the tasks and duties that police officers must accomplish on a day-to-day basis. The emphasis of this course is on techniques and procedures of patrolling and policing in the community. This course also addresses terrorism and homeland security issues.
Prerequisite: Permission of instructor

CRJ 490 Honors Thesis in Criminal Justice (3-6)
A criminal justice major may choose to prepare an honors thesis in criminal justice under the supervision of a criminal justice faculty member upon the approval of the program coordinator. The thesis may examine any theoretical, empirical or policy issue of the student’s choice within criminal justice and would represent an integration and culmination of studies completed during the student’s studies. May be repeated for additional credit up to a total of six semester hours.

CRJ 4000 Capstone (3)
The purpose of this course is to complete a research project in the field of criminal justice. Utilizing classroom and online dialogue, each student will complete a literature review, create a methodologically-sound research instrument, and conduct an investigation on a specific aspect of the criminal justice system. The end product for each student will be a final research paper that entails a discussion of the relevant literature in the field, the methodology chosen to complete the research, and the analysis of the data that they collected throughout the semester. Further, each student will present their research in such a fashion to explain the relevance of their research and the contribution they have made to the existing literature. The goal of this class is for each student to complete their own research project, from the beginning stages of finding a researchable topic to the presentation of a final research report. In consultation with the instructor, students will engage in a service project relevant to their research.
Prerequisite: CRJ 310

DRAMA
See English

ECONOMICS

ECN 101 Economic Problems (3)
This course, which may be used to fulfill a humanities elective, presents a study of contemporary economic issues from humanistic and historical perspectives and includes a discussion of inflation, unemployment, corporate vs. union power, among other issues.

ECN 102 Microeconomics (3)
This course surveys four major topics: an introduction to economics; the economics of the firm and resource allocation; current microeconomic problems; and international economics and the world economy. This course may not be used to fulfill a humanities economics elective.

ECN 103 Macroeconomics (3)
An examination of national income accounting, inflation, unemployment, and interest rates and the use of monetary and fiscal policy are studied. This course may not be used to fulfill a humanities economics elective.
Prerequisite: A grade of C or better in ECN 102.

ECN 104 Introduction to Applied Economics (3)
An overview of economics, focusing on a limited but crucial set of economic principles. Topics include a study of contemporary economy problems, appropriate use of scarce resources, business cycles and policy-making, forces behind economic growth, inflation, employment and
monetary controls and economic systems. (School of Graduate & Professional Studies only)

**Prerequisite:** BAS 100.

**ECN 320 Managerial Economics (3)**
This course is a study of the fundamental principles of economics and how they affect the consumer, business and industry, the government and the entire economy. Domestic aswell as global issues are emphasized. Topics include supply and demand, monopoly, fiscal policy, unemployment and international trade. (School of Graduate & Professional Studies only)

**Prerequisite:** BAS 101.

**EDUCATION**

**EDU 100 Education in America (3)**
This is a foundation course in American education. A major thrust of the course involves the study of the multiple factors that impact learning and teaching in the United States. Throughout the course a wide array of areas will be addressed including: history of American education; philosophical, psychological, ethical, economic, and sociological underpinnings of American education; current issues; learners and the learning context; teacher professionalism; teaching in a multicultural society. (Also required for Secondary Education Majors.)

**EDU 104 Health and Motor Development PreK-4 (3)**
Health and safety issues are examined with regard to nutrition reducing health risks and health influences. Emphasis will be on the development of motor skills and safety as students plan and present lessons supporting the national and PA Academic Health Education Standards. The class will also include the value of play, games and sports in child development. This course is approached from a Pre K – 4th grade classroom teacher’s viewpoint as students demonstrate knowledge and understanding of the National Association for Sport and Physical Education for Pre-K to grade 4.

**Prerequisite:** EDU 100

**EDU 112 Philosophical Foundations of Middle Grades Education (3)**
This is a foundation course in American middle grades education. A major thrust of the course involves the study of the philosophical foundations for middle level education as described by the NMSA (National Middle School Association). The unique characteristics and development of adolescents will be examined.

**EDU 216 Foundations of Teaching and Learning PreK-4 (3)**
This is a foundation course in the teaching and learning process of children in pre-kindergarten to 4th grade. Students will be required to demonstrate knowledge of learning as a process that integrates all areas of a child’s development. Student will examine curriculum models and developmentally appropriate practices for individual and group needs, with special emphasis on developmental and learning theories. Course content is based on the competencies of the PA Early Learning and Academic Standards.

**Prerequisite:** EDU 100

**EDU/PSY 200 DEVELOPMENTAL PSYCHOLOGY (3)**
Theories, issues and research concerning changes in physical, intellectual, emotional and social development across the life-span are examined and applied to specific social issues.

**Prerequisite:** PSY 100.

**EDU 222 Adolescent Psychology (3)**
Learning and personality theory of adolescent period; emphasis on problems arising out of physical development, sensory changes, mental growth, and emotional development. (Required for Secondary Education Majors.) (Cross-referenced – See PSY 222)
EDU 223 Teaching Science PreK-4 (3)
This course is designed to familiarize students with objectives, methods, and resources for pre K to Grade 4 science and to further enhance the scope of their science knowledge through lecture, class discussion, projects, and student demonstration. The course will introduce students to academic standards developed by NSTA, and PDE. Students will develop lesson plans, based on Danielson’s four domains, and these will include best practices in instruction and various types of assessment techniques. The course will involve students in a hands-on, constructivist mode of teaching/learning.
Prerequisite: EDU 100.

EDU 224 Teaching Social Studies PreK-4 (3)
This course is designed to familiarize students with objectives, methods, and resources for PreK to Grade 4 social studies and to further enhance the scope of their social studies knowledge through lecture, class discussion, projects, and student demonstration. The course will introduce students to academic standards developed by NCSS, the National Geographic Society, and PDE. Students will develop lesson plans, based on Danielson’s four domains, and these will include best practices in instruction and various types of assessment techniques. The course will involve students in a hands-on, constructivist mode of teaching/learning.
Prerequisite: EDU 100.

EDU 226 Reading Sequence I – Foundations of Early Literacy Research (3)
This is a foundational course on literacy instruction for PreK-4 students. The course will provide students the opportunity to: review the evolution of American Reading Instruction, explore various instructional processes for teaching reading and writing, investigate techniques for teaching reading and writing, discover the role of assessment in literacy instruction and become familiar with the Pennsylvania Literacy Standards.
Prerequisite: EDU 100

EDU 227 Math Methods for PreK-4 (3)
This course emphasizes the basic mathematical competencies identified by the Pennsylvania Core Standards for Mathematics and the National Council of teachers of Mathematics as critical to math instruction for pre-kindergarten to fourth grade students. Students will examine methods and strategies essential in the instruction of number operations, geometry, measurement, data analysis, and algebraic concepts. Students will experience collaborative learning, direct instruction, and participate in required field experience assignments.
Prerequisite: EDU 100

EDU 228 Art and Humanities (3)
This course emphasizes the competencies identified by the Pennsylvania Early Learning Standards and the National Core Arts Standards for pre-kindergarten to fourth grade children in the content area of arts and humanities. Students will examine methods and strategies essential in the instruction of the production, performance and exhibition of music, dance, theater, and visual arts. Students will learn of cultural and historical contexts, and develop an understanding of aesthetic and critical response to a variety of art mediums.
Prerequisite: EDU 100

EDU 229 Reading Sequence II – Language Development and Early Literacy, Instruction and Assessment (3)
This course emphasizes reading and writing instructions for emerging readers and writers Birth- K. Instruction will focus on assisting students in: discovering developmentally appropriate practices for emerging readers and writers, examining oral language development and its impact on literacy development, exploring various instructional processes, investigating assessment practices and procedures for emerging readers and writers, and reviewing Pennsylvania Learning Standards for Early Childhood Literacy.
Prerequisite: EDU 226.
Corequisite: Early Childhood Field Work

**EDU 245 Methods and Materials for Middle Grades: Reading Across Curriculum (3)**
This course will emphasize reading and writing in the content area for grades 4-8. Instruction will focus on various instructional processes, techniques for teaching reading and writing, differentiated literacy programs, assessment practices and procedures and review of Pennsylvania literacy standards as well as the NCTE/IRA standards and vision for effective instruction of language arts.
**Prerequisite:** EDU 100 or 112.

**EDU 300 Pre-Student Teaching (Secondary Education Majors) (3)**
Observation and participation in classroom activities of local schools one day a week for 14 weeks prior to student teaching.
**Prerequisite:** EDU 100; EDU 325 for secondary education majors or corequisite.
**Corequisite:** EDU 325

**EDU 301 Educational Psychology (3)**
Study of the nature of learning, teaching relationships, individual differences, and the classroom as a social unit. *(Required for Secondary Education Majors.)* *(Cross-referenced – See PSY 301)*

**EDU 309 Technology Integration in Education PreK-8 (3)**
In this course, students will become familiar with the PDE Standards of Science and Technology as well as the National Educational Technology Standards (NETS) for both teachers and students. Students will design lesson plans and learning activities that integrate technology from Pre K to Grade 8. Students will be introduced to the various tools of technology including assistive technologies for students with special needs. The use of technology for assessment, management and other administrative procedures will also be addressed.
**Prerequisite:** EDU 100

**EDU 314 Reading Sequence III – Early Literacy Instruction and Assessment (3)**
This course emphasizes reading and writing instruction for transitional readers and writers in grades 2-4. Instruction will focus on assisting students in: discovering appropriate practices for instructing transitional readers and writers, exploring various instructional processes, investigating assessment practices and procedures for transitional readers and writers, considering differentiated learning for transitional readers and writers and reviewing Pennsylvania Literacy Standards.
**Prerequisite:** EDU 226.

**EDU 315 Curriculum, Instruction, Assessment for Typical and Atypical Student PreK-8 (3)**
This course is designed to prepare teacher candidates to understand and implement curriculum models and instructional strategies that are assessment driven. Students will design lessons and data driven assessment strategies for typical and atypical students. There will be an instruction to the Response to Intervention model.
**Prerequisite:** EDU 100

**EDU 316 Reading Sequence IV – Literacy Instruction, Assessment and Intervention (3)**
This course emphasizes reading and writing instruction for fluent readers in PreK-4. Instruction will focus on: exploring various instructional processes, examining techniques for integrating reading and writing instruction in the content areas, investigating assessment practices and procedures for fluent readers and writers, reviewing Pennsylvania Literacy Standards and analyzing various remedial programs.
**Prerequisite:** EDU 226, 229, 314
EDU 319 Selected Topics in Secondary Education (3)
This course addresses issues that are encountered by teachers in middle and high schools today. These include meeting the diverse needs of all middle/high school students, multicultural education, social challenges and other topics relevant to this population of students’ needs and concerns. Field work required.
Prerequisite: EDU 100.

EDU 325 Secondary School Methods and Materials (3)
Study of basic methods and materials of secondary education; the rationale behind the methods, as well as how to carry these methods out in the classroom. Students will explore Standards, Curriculums, Assessment and Lesson Planning.
Prerequisite: EDU 100.

EDU 351 Meeting the Needs of English Language Learners (3)
This course emphasizes various instructional processes, techniques and assessment for working with English language learners. Differentiation and review of Pennsylvania standards will be addressed.
Prerequisite: EDU 100 (Pre-K) or EDU 112 (4-8)

EDU 372 Math Methods for the Middle Level Grades 4-8 (3)
The course emphasizes the basic mathematical competencies identified by the Pennsylvania Academic Standards for Mathematics and the National Council of Teachers of Mathematics critical to mathematics instruction for middle school teaching. Students will learn the pedagogical methods and strategies combined with the essential mathematical theories of number operations, algebra, geometry, fractions, data analysis, probability and statistics through demonstrations, collaborative learning, modeling and field experience. This course is intended for the junior level.
Prerequisite: EDU 100 or 112.

EDU 373 Methods and Materials for Middle Grades: Science (3)
This course is designed to familiarize students with objectives, methods and resources for grade 4-8 science and to further enhance the scope of their science knowledge through lecture, class discussion, projects and student demonstration. The course will introduce student to Academic Standards developed by NSTA and PDE. Students will develop lesson plans, based on Danielson’s four domains and these will include best practices in instruction and various types of assessment techniques. The course will involve students in a hands-on, constructivist mode of teaching/learning.
Prerequisite: EDU 100 or EDU 112.

EDU 374 Methods and Materials for Middle Grades: Social Studies (3)
This course is designed to familiarize students with objectives, methods and resources for grades 4-8 social studies and to further enhance the scope of their social studies knowledge through lecture, class discussion, projects and student demonstration. The course will introduce students to academic standards developed by NCSS, the National Geographic Society and PDE. Students will develop lesson plans, based on Danielson’s four domains and these will include best practices in instruction and various types of assessment techniques. The course will involve students in a hands-on, constructivist mode of teaching/learning.
Prerequisite: EDU 100 or EDU 112.

EDU 395 Field Experience 1 (6)
During this stage of Field Experience, the Education Studies major will spend two (2) days per week or equivalent in a school setting to observe in the teaching and learning process. Major focus will be on observing and understanding the four domains of effective teaching. As the semester progresses, the student will begin to work with individual students and teach in a small group setting. A University Supervisor will evaluate the student in the classroom.
EDU 401 Student Internship and Professional Seminar (6-12)
The internship takes the place of student teaching for in-service teachers. Seminar and individual conferences are held by university supervisors.

EDU 414 Classroom Management for PreK-4 (3)
This course is designed to prepare teacher candidates to understand and use provisions and procedures needed to create and maintain an environment in which effective teaching and learning can occur. Various discipline models will be introduced.
Prerequisite: EDU 100

EDU 415 Pre-Student Teaching PreK-8 (3)
The student is required to participate in classroom activities of local schools one day each week during the semester. Two different placements are offered to the student in preparation for the student’s anticipated certification categories. The experience is to promote the development of professionalism in the school and community setting while affording the opportunity to apply teaching methodology and educational concepts mastered in coursework. A weekly seminar provides an opportunity to analyze the experience. Application to the Education Committee of Gwynedd Mercy’s School of Education is required early in the spring semester prior to the experience.

EDU 437 Special Topics (3)
Investigation of a selected topic or topics designed to integrate and enhance the student’s comprehension and application of educational theory and practice.

EDU 439 Independent Study (1-3)
Investigation of selected topics. Registration with permission of the advisor, Dean and the Vice President for Academic Affairs.

EDU 460 Student Teaching Pre-K-4/SPE Pre-K-8 (12)
This course is designed for the student who is simultaneously seeking certification in early education (PreK-4) and special education (PreK-8). This student teaching requirement is fulfilled after all other coursework requirements have been completed and has at least a cumulative GPA of 3.0. The student is required to make formal application to the Education Committee of the School of Education by February 1st of the spring semester prior to the academic year in which the student anticipates engaging in student teaching. The experience is designed to allow for the development of professionalism in the school and the community setting while affording the opportunity to apply teaching methodology and education concepts mastered in coursework on a daily basis. This student teaching experience is for 16 weeks in an inclusion classroom under the supervision of a certified elementary education teacher and a certified special education teacher and is accompanied by a weekly seminar class to provide an opportunity to analyze the experience.
Prerequisite: All course work complete; Appropriate PECT tests are needed for certification.

EDU 480 Student Teaching/Classroom Management/Educational/Technology - Grades 4-8 (12)
The student teaching requirement fulfilled during the second semester of senior year. The first three weeks will be spent in intensive research and student in Classroom Management and Technology. During the remaining 12 weeks, each candidate for certification will spend five days a week in a classroom of grades 4-8. Seminar and individual conferences are required by supervisors.
Prerequisites: All coursework must be completed prior to student teaching.

EDU 490 Student Teaching and Professional Seminar Secondary Education (12)
The student teaching requirement (13 weeks) is fulfilled during the last semester of senior year. Each candidate for certification spends five days a week for seven weeks in a primary grade and even weeks in an intermediate grade. Seminar and individual conferences are required by
supervisors.

**Prerequisite:** All course work must be completed prior to student teaching.

**EDU 495 Field Experience 2 (6)**

During the second Field Experience, the Education Studies major will spend two (2) days per week in a school setting exploring and assisting the classroom teacher. Here the student will tutor, help with assignments, teach small group lessons and continue to refine their knowledge of effective teaching using the four domains of effective teaching. A University Supervisor will evaluate the student in the classroom. A weekly seminar accompanies this Field Experience.

**EDU 4000 Capstone Seminar (3)**

This course provides for culminating activities of the curriculum in early, middle and special and education. Students demonstrate proficiency in activities aimed at securing a teaching position, as well as research-based best relative to the state competencies practices. To be taken the semester before student teaching. Individual active research projects required.

**Teacher Apprentice Program (TAP) (No Credit)**

The Gwynedd Mercy University teacher assistant program (TAP) schedules time for all freshmen, sophomores, juniors and transfer students to assist in participate in classroom activities and requires observation of teaching techniques in local schools weekly. See Teacher Apprentice Program (TAP) Handbook.

**Field Experience (No credit)**

Beginning the first semester of freshman year, students enrolled in teacher education courses are responsible for direct experience with pupils on a para-professional basis through organized programs of observation in urban, suburban and rural situations. This includes the aforementioned TAP.

**ENGLISH**

This section includes drama, writing and literature courses. Students matriculated as of Fall 2007 or later must take ENG 102, or 210 to satisfy one open LLFA elective under General Education. Students matriculated prior to Fall 2007 may satisfy the Literature/Communications/Drama elective under General Education by taking any course designated ENG with the exception of ENG 002, 101, 400, 405, 430 or 439.

**Please note:** ENG 101 prerequisite may be set aside only with the permission of the Division Chairperson.

**ENG 2001 Arts and Ideas (3)**

This is an introductory course designed to give the student an appreciation of the literary and fine arts. The course examines ideas rooted in justice, philosophy, spirituality, politics, science, education, art, and psychology through literature that spans the evolution of those ideas. The course requires both analytical and creative responses to these ideas so that students can express their understanding of the complex relationship among thought, writing, art and society.

**Prerequisite:** ENG 101

**ENG 002 Developmental Writing (3)**

A review of sentence, paragraph and essay structure, this course prepares the student for college writing. **Passing this course is a prerequisite for taking ENG 101. Credits may not be used to satisfy credit requirements for graduation.** The grading for this course is a pass (P) or fail (F).

**ENG 101 College English (3)**

This course focuses on the personal and expository components of rhetoric. Emphasis is given
ENG 102 Introduction to Literature (3)
Students explore literary genres from selected world masterpieces with emphasis on style and philosophic import and write themes of critical analysis.
Prerequisite: ENG 101

ENG 103 Play Production (3)
This course emphasizes the fundamentals of play production – script selection, casting, blocking, lighting, publicity and culminates in the production of a play.

ENG 105 Grammar Review (3)
This class reviews the basics of traditional grammar – classes of words and sentences, inflections and functions of English, syntactical relationships and usage – and examines alternative grammar systems.

ENG 107 Basic Journalism (3) – Cross-reference COM 203

ENG 109 Journalism Practicum (1) – Cross-reference COM 400
Prerequisite: ENG 101

ENG 112 Theater for Young People (3)
This course serves as an introductory practicum for those students who plan to stage plays in educational settings or use theater techniques to enrich education. Students create puppets, write simple plays and participate in an end-of-term performance. (Materials fee: $25.00)

ENG 200 Communication Arts (3)
Refer to COM 101 for course description.

ENG 201 British Literature I (3)
Students in this course read and discuss selected major figures in English literature from the Anglo-Saxon Period through the eighteenth century.
Prerequisite: ENG 101

ENG 202 British Literature II (3)
Students read and discuss major figures in English literature from the Romantic Period to the present.
Prerequisite: ENG 101

ENG 203 Introduction to Poetry (3)
Students read, discuss and write about traditional and modern poems. They learn the rudiments of poetry and refine critical thinking and writing skills by analyzing and interpreting poems. This course benefits future English teachers, creative writers and those who love literature.
Prerequisite: ENG 101

ENG 210 Introduction to the Theater (3)
This course surveys important historical periods of theater from Greeks to present; examination of representative dramas from each period.
Prerequisite: ENG 101
ENG 212 Women Authors (3)
This course surveys the problems of women as writers and writers as women.
Prerequisite: ENG 101

ENG 215 Technical Writing (3)
Designed as a process that is adaptable to all professions or crafts, the technical writing course reviews and reinforces the tools of writing.
Prerequisite: ENG 101

ENG 216 American Literature I (3)
This course concentrates on major figures in America’s literature from the Colonial Period through the Age of Transcendentalism.
Prerequisite: ENG 101

ENG 217 American Literature II (3)
Beginning with writers of the nineteenth century, American Literature II surveys major figures from realism and naturalism through modernism and post-modern writing.
Prerequisite: ENG 101

ENG 218 Multicultural Literature (3)
Treating the literature of ethnic groups such as European immigrants and people of color, this course may be a historical survey or a thematic exploration of issues and may focus on one or more groups.
Prerequisite: ENG 101

ENG 230 History of the English Language (3)
This course surveys origins of the development of the English language from the Proto-Indo-Europeans of Central Europe through the development of the Danish, Saxon and Germanic tribes to the present-day status of the English language.
Prerequisite: ENG 101

ENG 240 History of Rhetoric (3)
This course explores classical texts, as well as their influence on contemporary principles and philosophical perspectives and the production of written, oral, visual, and digital texts today. Students will discuss important developments in the history of rhetoric and use rhetorical theory to consider issues related to oral, written, and visual discourse.
Prerequisite: ENG 101

ENG 270-289 Themes in Literature (3)
This series of courses treats popular themes as they appear in literature and the media.
Prerequisite: ENG 101

ENG 290 The Short Story (3)
This course analyzes the short story genre and its development in world literature.
Prerequisite: ENG 101

ENG 299 Selected Topics in English (3)
In this course students have the opportunity to explore genres, concepts or authors selected by the instructor. Course may be repeated for credit if the topic changes.
Prerequisite: ENG 101 and other courses as deemed necessary by the instructor.

ENG 301 World Masterpieces I (3)
Beginning at the ancient epics of eastern and western cultures and ending in the late
Renaissance, this course focuses on major writers of world literature.
Prerequisite: ENG 101

ENG 302 World Masterpieces II (3)
Masterpieces of the modern ages, Romantic through contemporary, are examined.
Prerequisite: ENG 101

ENG 305 Persuasive Business Presentations (3)
Verbal skills essential to effective business presentations, including negotiation, debating, extemporaneous speaking, and interviewing provides the focus of this course. Oral reporting, management briefing, conference and committee leadership, and active listening are addressed as tools to minimize or eliminate barriers to understanding. (5 weeks) (School of Graduate & Professional Studies only)

ENG 310 Literary Criticism (3)
This course examines the aesthetics of literature from Plato to contemporary theory.
Prerequisite: ENG 101

ENG 315 Essay Writing (3)
An advanced study of expository writing processes, this course stresses techniques of research, logic, and organization of writing.
Prerequisite: ENG 101

ENG 320 Cinema and Cinematography (3)
This course focuses on the history of films and analysis of film scripts with emphasis on class discussion of major directors including Carol Reed, Alfred Hitchcock, Stanley Kubrick, and Orson Welles.
Prerequisite: ENG 101

ENG 330 Myth and Fantasy (3)
This course studies ancient and modern mythology through its embodiment in literature and in themes common to all cultures.
Prerequisite: ENG 101

ENG 400 Tutorial in Acting (3)
Students participate in the university production as actors or actresses and research the various styles and theories of acting: Classical, Elizabethan, Restoration, Stanislavskian, Brechtian. Research paper required.
Prerequisite: ENG 103.

ENG 401 Chaucer and His Contemporaries (3)
Reading and discussion of Chaucer's major works is supplemented with those of his contemporaries including Langland, the Pearl poet and others.
Prerequisite: ENG 101

ENG 405 Tutorial in Directing (3)
Introduced to the techniques of directing for the proscenium and arena stages, students learn to cast, block and direct a play.
Prerequisite: ENG 103.

ENG 413 Poets of Britain and America (3)
Poets of Britain and America are examined with emphasis on the moderns and post-moderns.
Prerequisite: ENG 101
ENG 416 Shakespearean Tragedy (3)
This course studies the major tragedies as performance art, including Hamlet, Macbeth, Richard III, King Lear, Romeo and Juliet, and Othello.  
Prerequisite: ENG 101

ENG 417 Shakespearean Comedy (3)
This course focuses on the major comedies as performance art, including As You Like It, Twelfth Night, A Midsummer Night's Dream, The Taming of the Shrew, and Much Ado About Nothing.  
Prerequisite: ENG 101

ENG 422 Romantic/Victorian Literature (3)
Students engage in in-depth study of the literature of the Romantic and Victorian Age.  
Prerequisite: ENG 101

ENG 423 Modern Fiction (3)
Novels and short stories of twentieth-century authors are discussed in terms of thought and technique in modern fiction.  
Prerequisite: ENG 101

ENG 425 Seventeenth and Eighteenth Century British Literature (3)
This course examines selected prose and poetry from the late English Renaissance, the Restoration, and the eighteenth century. Readings include works by the Metaphysical and Cavalier poets, Jonson, Bacon, Dryden, Swift, Pope, and others.  
Prerequisite: ENG 101

ENG 430 Internship (3-6)
An option for out-of-the-classroom work, this internship gives students practical experience in professional communications field.  
Prerequisites: B average in all required English courses, permission of the division chair. Required English courses must be completed or taken concurrently.

ENG 437 Special Topics (3)
This course offers the opportunity for in-depth study of a major author, period or concept selected by the instructor. Course may be repeated for credit, if topic changes.  
Prerequisite: ENG 101

ENG 439 Independent Study (3)
Qualified advanced students may arrange independent study in areas not covered by existing courses: study of special aspects of major works and authors. The student must have the permission of the Chair of Language, Literature and Fine Arts and the Vice President for Academic Affairs.  
Prerequisite: ENG 101

ENG 447 Seminar in Novel (3)
This course examines the novel, drawing examples from the 19th and 20th centuries.  
Prerequisite: ENG 101

ENG 448 Writing Seminar (3)
The process of writing creative research papers, essays and other non-fiction materials is reviewed. The course combines the tools of research with the appropriate organizational method and emphasizes peer-evaluation, revision, and market research toward publication.  
Prerequisite: ENG 101
ENG 450 Senior Seminar (3)
An integration of literary study, critical theory and techniques of literary research, this course combines class discussion and independent work, having as its goal the completion of a paper representative of the undergraduate major’s research interests.
Prerequisite: ENG 101

ENG 451 Creative Writing (3)
Students practice their creative writing skills with reference to reading and study of contemporary literature.
*Permission of the instructor is required.
Prerequisite: ENG 101

ENG 460 Theater of Greece and Rome (3)
A study of the production techniques of the classical period combines with reading of representative plays by Sophocles, Euripides, Aeschylus, Aristophanes, Plautus, Terence, and Seneca.
Prerequisite: ENG 101

ENG 461 Modern Drama (3)
Students read and analyze the works of selected modern playwrights, including Ibsen, Strindberg, Pirandello, Brecht, Shaw and Ionesco.
Prerequisite: ENG 101

FIRST YEAR EXPERIENCE (FYE)
FYE 1000 is required of all full-time and part-time first-year students during their first semester; FYE1001 is required of all full-time and part-time first-year students during their second semester. Students who matriculate at the beginning of the spring semester are required to take both FYE1000 and FYE1001 during their first semester. Students who are 21 years of age or older or who have accrued 24 or more credits of university experience are exempt from FYE. Students who are exempt from FYE should take a general education elective in place of the FYE courses. Students are not allowed to withdraw from either course except in cases of documented necessity. In all such cases, permission from the Dean of Student Success is required to withdraw from the course. Any student who does not successfully complete FYE 1000 is required to enroll in the course again in the next semester of their attendance. Any student who does not successfully complete FYE 1001 is required to enroll in the course again in the next semester of their attendance.

FYE 1000 First Year Experience (2)
This course is the first in the core curriculum and will transition students into the Gwynedd Mercy University community. It has three main goals including educating students in the Mercy tradition and the mission of the university, fostering the development of academic skills, and supporting the positive growth of interpersonal and social skills, all of which are necessary for success in the collegiate environment and beyond. In addition, this course introduces students to the concept of service to society reflective of the Mercy charism. Components of this course are sponsored by the Academic Affairs and Student Services divisions of the university. Therefore, co-curricular events are required. Attendance at the first class, which is held during new student orientation, is mandatory.

FYE 1001 First Year Experience Service (1)
As part of the FYE program, this course nurtures student development for service to society within the Mercy tradition through participation in a service activity and a guided written reflection. In addition, the course emphasizes leadership, research, collaboration, and oral communication skills, as well as fosters social and personal responsibility. FYE1000 is a pre- or co-requisite for this course.
FRENCH

FRE 101 Basic French I (3)
This course serves an introduction to the French language as well as an exploration of cultural themes in the French-speaking world. Emphasis will be place on effective oral and written communications. No prerequisite.

FRE 102 Basic French II (3)
Conversation and composition skills continue to be emphasized along with developing proficiency in understanding spoken French. Cultural enrichment will include such topics as current events, history and the arts.
Prerequisite: FRE 101 or previous study of the language.

FRE 201 French Conversation I (3)
Intensive French conversation on topics relating to the French aspects of present-day society is supplemented by use of films and slides.
Prerequisites: FRE 101, 102 or the equivalent.

FRE 299 Selected Topics in French (3)
This course provides students who have completed FRE 101 and 102 or the equivalent the opportunity to explore French language, culture, literature, history and other topics as selected by the instructor. Course may be repeated if the topic changes.
Prerequisite: FRE 101, 102 or the equivalent and additional courses as indicated by the instructor.

FRE 439 Independent Study (3)
Qualified advanced students may arrange independent study in areas not covered by existing courses; analysis of literary techniques, translation, study of special aspects of major works and authors in the field of French literature and culture.
Prerequisite: FRE 101 and 102.

GEOGRAPHY

GEO 100 Political Geography (3)
The political significance of contemporary world patterns of nations and states is considered through the interaction of their physical, economic and cultural aspects.

GEO 101 Cultural Geography (3)
The interrelationships of geography, cartography and culture are explored through a study of population, migration, language, religion, social customs and political and economic development.
We will examine what role these interrelationships have played in modern geography.

HEALTH ADMINISTRATION

HA 301 Health Care Delivery Systems (3)
Introductory course in medical care organization. The health care system will be examined in terms of primary and secondary providers, financing mechanisms and the health services consumer. Current legislation and future trends in the medical field will be analyzed.

HA 302 Health Care Administration (3)
This course will examine major issues of health care as it pertains to the management of health
service organizations and health systems. Particular emphasis is placed on team building and increased awareness of professionalism in health care. HA 301 or 302 are a prerequisite to all health administration courses.

**HA 311 Sociology of Medicine (3)**
(For description see SOC 311)

**HA 312 Health Planning (3)**
Intensive, in-depth examination of “real world” medical care organization topics and problems. Emphasis on the development of health planning and policy strategies and their implementation.

**HA 401 Health Care Financial Management (3)**
Intensive examination of development and management of resources for health care through the budget and staffing process.

**HA 402 Legal Issues in Health Administration (3)**
Examination of the interaction of the legal system with modern medical practice. Particular emphasis on regulatory factors and medical malpractice as they influence the organization and delivery of health care are the focus of this course.

**HA 422 Internship in Health Administration (6)**
A 240-hour directed work experience in a health care institution/program affording the student a beginning “hands on” administrative experience.

**Prerequisites:** Completion of all required HA courses except HA 492, minimum of B average and approval of advisor and the dean of the school.

**HA 492 Seminar: Health Policy Analysis (3)**
Discussions designed to integrate class work and the internship experience to facilitate the transition from student to health administration professional. Does not replace BUS 492.

**Prerequisite:** Completion of all required HA courses.

**HEALTH SCIENCE**

**HS 100 Introduction to Allied Health (2)**
The core component of this course will include an overview of the health care systems, the health professional, ethical and legal considerations and basic safety and infection control techniques. 2 hours lecture/lab per week.

**Prerequisite:** Acceptance into a Health Program.

**HS 109 Medical Terminology and the Acute Care Record (3)**
In this course students learn the language of medicine with emphasis on the application of medical terminology in the medical record. The types of terms that will be taught include; the components of medical words, terms specific to all body systems, common disease processes, and common drug names and their prescribed uses. The content of the acute care record and the documentation needs of the related health care practitioners will be an integral topic of this class.

**HS 208 Basic Pathophysiology (3)**
Students will learn the disease processes associated with common disorders in the population of the United States. Treatments and pharmacology related to these diseases will also be discussed. Library research is also required in this course.

**Prerequisites:** BIO 107 and 108.

**HS 305 Teaching in the Health Profession (3)**
Health related teaching skills; development of learning objectives; use of media and teaching
strategies such as lecture, group process and tutorial methods. Additionally, emphasis will be placed on development of lesson plans for use in a formal classroom, clinical setting, and/or patient education in-service and community education environment.

**HS 370 Promoting Health/Preventing Disease (3)**
This course will provide the health profession student with the opportunity to gain an appreciation and awareness of health promotion and disease prevention. It will provide a forum for the discussion of issues, concerns and intervention strategies in fostering optimal health. 
**Prerequisite:** Completion of or enrollment in a health care profession.

**HS 403 Current Topics in Health Care (3)**
This course introduces students to the historical development, structure, operation, current and future directions of the major components of the American health care delivery system. It examines the ways in which health care services are organized and delivered, the influences that impact private and public health care delivery and health policy decisions, and factors that determine the allocation of resources in the public and private systems. The course provides detailed overviews of factors that influence the establishment of priorities, and the relationship of health care costs to measurable benefits. A major course aim is to enable students to assess the role of organized efforts to influence health policy formulation, and the contributions of medical technology, research findings and societal values on the evolving health care delivery system. 
**Prerequisites:** CIS 101, or permission of the Radiation Therapy program director.

**HS 410 Medical Immunohematology (3)**
This course will expand upon the knowledge acquired at the MLT level. Problems in blood banking procedures, regulations governing blood banks, review of the theory of immunohematology, blood reactions and case studies will be emphasized. 
**Prerequisite:** MLT-AD or equivalent.

**HS 425 Advanced Hematology/Coagulation (3)**
This course will expand the knowledge acquired at the MLT level. Hematologic and coagulation disorders and information concerning advanced diagnostic procedures will be stressed along with quality control, laboratory management, instrumentation and case studies. 
**Prerequisite:** MLT-AD or equivalent.

**HS 437 Special Topics (3)**
This course provides opportunity for investigation of a selected topic or topics designed to integrate and deepen the student’s comprehension and application of health science theory and practice.

**HS 439 Independent Study (1-3)**
Qualified advanced students may arrange independent study in areas not covered by existing courses. Registration is with the consent of the involved faculty and permission of the dean of the school and the vice president for academic affairs.

**HS 445 Medical Chemistry (3)**
This course will expand upon the knowledge acquired at the MLT level. Advanced chemistry procedures, instrumentation, disease states, quality control and laboratory management will be reviewed. 
**Prerequisite:** MLT-AD or equivalent.

**HS 455 Medical Microbiology (3)**
Infectious disease, epidemiology and antibiotics and chemotherapeutic agents will be emphasized.
HEALTH SCIENCE EDUCATION

HSE 342 TIPS: Teaching Skills for Allied Health Professionals (3)
This course is composed of two, three and a half day workshops: Strengthening Clinical Teaching and Strengthening Classroom Teaching. These workshops enable participants to develop and present both lecture and demonstration lessons, develop communication skills and construct performance evaluation instruments.

HSE 343 TIPS: Strengthening Clinical Teaching (1.5)
This course consists of a three and half day workshop provided by the TIPS faculty. This workshop enables participants to develop and present demonstrations and lectures of a clinical or laboratory nature. Attendees will learn to develop a lesson plan, write objectives, and construct performance evaluation instruments.

HSE 344 TIPS: Strengthening Classroom Teaching (1.5)
This course consists of a three-and-a-half-day workshop provided by the TIPS faculty. This workshop enables participants to develop and present lectures of a didactic or classroom nature. Attendees will learn to develop a lesson plan, write objectives, and construct performance evaluation instruments.

HISTORY

HIS 2000 Conflict & Consensus in History (3)
This course seeks to expand students’ understanding of the historical, political, psychological and social dimensions of global communities, while learning to relate to and interact with those of different viewpoints and experiences. It introduces students to historical thinking and themes in order to develop critical thinking skills associated with historical inquiry and to acquire a broad understanding of factors related to American or World History.
Prerequisite: ENG 101

HIS 101 Western Civilization to 1648 (3)
This course offers a survey of the developments of western societies and ideologies from the origins of civilization in the ancient Near East to the mid-seventeenth century.

HIS 102 Western Civilization from 1648 (3)
This course provides a survey of modern Europe from the mid-seventeenth century to the present. Topics include the development of political systems and ideologies, intellectual, scientific, political, social, and industrial revolutions, nationalism, imperialism, communism and globalism.

HIS 107 World History I (3)
This course provides a survey of the developments of societies from the origins of the earliest civilizations in Africa, Asia, the Mediterranean and the Americas to 1500.

HIS 109 World History II (3)
This course provides a survey of the development and interactions of the cultures of Europe, the Americas, Africa, Asia and Oceania from 1500 to the present in order to give students a greater understanding of the relationships among diverse regions and cultures in today’s world.
HIS 131 American Civilization to 1877 (3)
This course provides a basic survey of political, social economics, intellectual and cultural developments from the early colonial era through Reconstruction.

HIS 132 American Civilization from 1877 (3)
This course provides a basic survey of political, social economic, intellectual and cultural developments from Reconstruction through modern times.

HIS 140 The Non-Western World (3)
This course provides an introduction to the civilization of Africa, Asia, Latin America and the Middle East, including their politics, cultures, and social structures.

HIS 203: Revolutionary and Federalist America
This course offers a detailed examination of the time period from about 1763 to 1800, which includes the gradual disintegration of the relationship between Great Britain and its American colonies, the ideological development of the American Revolution, the outbreak and progress of the War for Independence, and the controversies and turmoil entailed in the making of a new nation.

HIS 210 Twentieth Century Europe (3)
This course surveys European political, social, economic and cultural developments that have shaped contemporary Europe.

HIS 214 History of Pennsylvania (3)
This course explores the social, cultural, economic, cultural and political influences on and by the inhabitants of the Commonwealth of Pennsylvania from colonial times to the 20th century.

HIS 217 Early Modern Europe 1300-1750 (3)
This course examines political, social, intellectual and cultural developments from the Renaissance to the Enlightenment.

HIS 218 The French Revolution and Napoleon (3)
This course examines the causes, events, and consequences of revolution, as well as social change and war from the end of the Old Regime to the Bourbon Restoration of 1815.

HIS 219 Nineteenth-Century Europe (3)
This course examines European political, economic, and social events from the fall of Napoleon to the outbreak of World War I.

HIS 220 United States in the 1960s (3)
This course offers a detailed examination of the tumultuous and influential period from the close election of 1960 to the unprecedented resignation of an American president in 1974.

HIS 230 History of Philadelphia (3)
The course offers a detailed examination of the political, economic, social and cultural developments of William Penn’s “Greene Country Towne” over a period of 300 years.

HIS 233 Colonial America (3)
This course carefully examines the process of the colonization and maturation of American from earliest times to end of the French and Indian War.

HIS 234 Invention and Technology in America (3)
This course studies the effects of technological, mechanical and scientific change upon the fabric of American life from the Civil War to the present.
HIS 236 Civil War and Reconstruction (3)
This course offers a thorough examination of the tragic but fascinating story of the Union torn apart and put back together again.

HIS 237 Jefferson and Jackson (3)
The course explores the personalities, events, ideologies and controversies in the period from the election of Thomas Jefferson to the end of the Mexican-American War.

HIS 239 U.S. Since World War II (3)
This course offers a detailed examination of the political, social and economic forces that have shaped American life since 1945.

HIS 240 Pluralism in American History (3)
This course provides a socio-historical study of Native Americans, African-Americans and immigrants from colonial times to the 20th century. (HIS 131 or HIS 132 is recommended as a prerequisite.

HIS 246 Women in American History (3)
This course offers a survey of the role of women in America from colonial times to the present. Covered topics include moral reform, everyday life, political and social activism and the labor and peace movements.

HIS 250 Contemporary World (3)
This course offers a survey of fundamental developments in world history from 1945 to the present. Topics include the Cold War years, economic affluence in the West and Japan, and the struggle of non-Western nations for political independence and economic prosperity.

HIS 299 Selected Topics in History (3)
This course offers a detailed study of a specialized subject area that will vary based on student/faculty interest. The topic, course structure and instructor will be announced prior to pre-registration. There are no prerequisites.

HIS 317 Latin America (3)
This course examines selected nations of Latin America from independence to the present, paying special attention to recent political and economic developments.

HIS 322 Irish History (3)
This course explores Irish history and culture from prehistory to the present. Topics addressed include: pre-historic and Celtic Ireland; the impact of Christianity on Irish society; the Viking and Anglo-Norman influence; English conquest and dominance; political movements and resistance during the 18th and 19th centuries; the famine and diaspora; independence and partition; and the sources of conflict and prospects for conciliation in Northern Ireland.

HIS 326 USSR and Modern Russia (3)
This course examines the institution and development of the Communist society among the peoples of the former Russian Empire in the years since 1917 and the transition to the Commonwealth of Independent States.

HIS 335 History of Nazism (3)
This course examines the period of Nazi control in Europe and its impact on world history during the period 1933-45. Topics include: the post-war circumstances that gave rise to Nazism; the nature of National Socialism as an ideology and political movement; the personality and role of Adolf Hitler as leader of Nazism and Nazi Germany; German society under Nazism; the Second World War; and the Holocaust.
HIS 430 Internship (3-6)  
This work experience is designed to give the student practical experience in a professional historical/archival field.  
**Prerequisite:** “B” average in all required history courses, permission of the division chairperson. Required history courses must be completed or taken concurrently.

HIS 437 Special Topics (3)  
This course allows for the investigation of a topic in history that is not adequately covered in any of the courses listed above. It may be repeated if the topic is different.

HIS 439 Independent Study (1-3)  
Qualified advanced students may arrange independent study in areas not covered by existing courses. Registration is with consent of the involved faculty and the permission of the chairperson of the division and the Vice President for Academic Affairs.

HIS 449 Historiography (3)  
This course introduces students to fundamental questions about the nature of history and to the varieties of history that different answers to these questions have inspired. Students will investigate the kinds of questions historians ask about the past, the relationship between theory and evidence in historical writing and the varieties of evidence historians use to reconstruct the past.

HIS 4000 Capstone Seminar (3)  
This course features research under direction of a faculty mentor on a theme or themes chosen by faculty and/or students. Work is reported both orally and in writing.  
**Prerequisite:** HIS 449

HONORS PROGRAM  
Qualified students who are not members of the honors program may be permitted to enroll in an Honors course, provided they have at least a 3.0 cumulative GPA.

HON100/Lecture/DA - Mysticism and Transcendence (3)  
This course investigates the human being as having a capacity for transcendence and an ultimate desire to be with God. Students read the relevant works of the Western philosophical and theological traditions, surveying a broad range of possibilities and perspectives on mysticism, transcendence, the soul, philosophy of religion, and related themes. Pre-requisite: ENG101. Satisfies either a philosophy or religious studies elective in General Education, and "Dialectic" within the Honors Program.

HON 150 Philosophy of the Sublime: The Awesome (3)  
This course is a historical introduction to the concept of the sublime, or the ‘awesome’. The sublime, a feeling of great exhilaration, excitement, or awe, is a positive aesthetic experience in response to a vast or powerful object, or one that appears vast or powerful. Traditional examples of sublime objects, or things that evoke the feeling, are waterfalls, icebergs, raging storms, deep ravines, mountains (Rockies, Alps, Himalayas), and perhaps some works of art (land art, film, poetry, fiction). As “disinterested,” the experience of the sublime is not to be identified with fear; as an intense feeling or “affect” (emotion), the sublime is to be distinguished from wonder and curiosity. Can the sublime be evoked by art and nature alike, or only one of these? How is it distinguished from beauty? How is it connected to, and different from, the ‘moral feeling’? What causes it from a psychological or scientific point of view? We will examine the theory of the sublime from its roots in Longinus’s rhetorical theory, through the British and German traditions, concluding with the perspective of contemporary thinkers (Lyotard, Danto) and neuroscience. Students will read and respond to canonical ‘sublime’ texts (fiction, poetry), react to works of art (photos, film, etc.) associated with the sublime, and engage with texts from history of philosophy and rhetoric. The course will thus offer an opportunity to study basic ideas of logic (argumentation), rhetoric, and the relation between them. It may be taken for English or Philosophy credit. It may be used to fulfill a General Education requirement or an Honors Program requirement under "Rhetoric" or “Dialectic.”
HON151 Dangerous Books (3)
This course exposes students to a "dangerous" canon of works that have been regarded at various points in history as being prohibited, radically transformative, and/or subversive. Students will analyze these texts according to their philosophical content and historical context and assess their enduring impact on society. It may be taken for History or Philosophy credit. It may be used to fulfill a General Education requirement or an Honors Program requirement under “Rhetoric” or Dialectic.”

HON152/Lecture/EG - History, Memory, & Forgetting (3)
This course seeks to facilitate students’ critical thinking about history as constructions of the past. In the United States and throughout the world, debates and sometimes violent campaigns have focused on official narratives and commemorative depictions about the past that function to sustain existing norms of status and power. Who contributes to making these choices? Whose voice, and thus perspective, remains muted? How does this affect what stories about the past get told and how they get told? Why do these questions and the manner they get resolved matter? This course addresses a rich body of literature about collective memory, an emerging literature on cultural forgetting, and case studies relating to various current topics.
Prerequisite: ENG101. Satisfies the History elective in General Education, and "Rhetoric" within the Honors Program.

HON 200 Latin Foundations (3)
It may be used to fulfill a General Education requirement or an Honors Program requirement under "Grammar.”

HON 201 (3)
The Middle Ages describe the approximately thousand-year span in western culture between what is called Antiquity and Modernity. The fall of the old Roman Empire to Germanic invaders marks its beginning. The crisis in western culture due to the Renaissance and the religious turmoil of the sixteenth century marks its end. The intervening centuries gave rise to a rich culture that this course seeks to describe and have you experience in various ways. The experience will be mostly through the writings of some extraordinary medieval men and women. They are voices speaking to us from the past, inviting us into their world and sensitizing us to view, perhaps from new angles, features of our own world that seem to echo theirs. Besides literature, our course will utilize film and music to draw you into the spirit of the Middle Ages.(Please note that this course may be taken for English, Religious Studies, or Philosophy credit. It may be used to fulfill a General Education requirement or an Honors Program requirement under “Grammar.”) It may be taken for English, Religious Studies, or Philosophy credit. It may be used to fulfill a General Education requirement or an Honors Program requirement under “Grammar” or “Rhetoric” or “Dialectic.”

HON 202 Politics & Literature in the Modern Era (3)
It may be taken for English or History credit. It may be used to fulfill a General Education requirement or an Honors Program requirement under ”Rhetoric” or “Grammar.”

HON250 Infinity, Paradox, and Reason (3)
An introduction to the concept of the infinite, paradoxes that surround it, and the attempt to make sense of it through logic and reason. The course will include historical, philosophical, and scientific perspectives on the concept of infinity, with a primary focus on how mathematics deals with it in theory, and how it is used in models of the real world. Questions that will be considered include: Is infinity a number? How can some infinities be bigger than others? Does the infinite appear in our physical universe? How can we add together infinitely many things and yet get a finite result? No mathematics beyond the high school level will be assumed. Pre-requisite: ENG101. May be taken for Math credit. Satisfies either a Math or philosophy elective in General Education, and "Mathematics"
within the Honors Program.

HON 300 From Observation to Impact (3)
It may be used to fulfill a General Education requirement or an Honors Program requirement under "Astronomy" (sometimes called “Science”).

HON 350 Seminar in Tragedy (3)
This Honors seminar will investigate the human condition by observing humanity at its most critical time: when the judgments characters must make radically alter their lives and the lives of those whom they love, or those for whom they are responsible. In many instances these judgments result in death. Additional historical, philosophical, scientific or sociological background material will be presented to contextualize and clarify various aspects of the plays. It may be taken for English credit. It may be used to fulfill a General Education requirement or an Honors Program requirement under "Music" (sometimes called “Arts”).

HON 351 World Music
It may be used to fulfill a General Education requirement or an Honors Program requirement under "Music" (sometimes called “Arts”).

HON 4000 Honors Colloquium
This discussion seminar functions as the capstone in the Honors Program.

HUMAN SERVICES
The following courses may only be taken by Human Service majors

HSV 430 Human Services Practicum Preparation (0)
In this course, students will be introduced to the purpose and value of the practicum experience, the practice of reflective thinking and journaling. This course is a pre- or co-requisite with HSV 435 and HSV 436.

HSV 435 Human Services Practicum I (4)
With the permission of the Human Services Program Coordinator, senior level students will be provided direct experience in selected supervised settings including social, educational, personnel and organizational facilities, agencies and programs. The practicum aims to provide a service to the community and enable the student to acquire the skills, experience, and knowledge necessary for the choice of a career. Students must complete 40 documented hours of field work for each credit earned.

HSV 436 Human Services Practicum II (4)
With the permission of the Human Services Program Coordinator, senior level students will be provided direct experience in selected supervised settings including social, educational, personnel and organizational facilities, agencies and programs. The practicum aims to provide a service to the community and enable the student to acquire the skills, experience and knowledge necessary for the choice of a career. Students must complete 40 documented hours of field work for each credit earned.
Prerequisite: HSV 435

HSV 4000 Human Services Capstone (3)
With the permission of the Human Services Program Coordinator, senior level students will be provided the opportunity to demonstrate skills learned throughout the Human Services degree program. Through writing assignments, role play, lecture, site visits, portfolio development, and a service project that contributes to the field, students will demonstrate their mastery of the program goals for the Human Services degree.
ITALIAN

ITA 101 Basic Italian I (3)
This beginning course introduces the Italian language. The four basic skills of listening, speaking, reading and writing are taught. No prerequisite.

ITA 102 Basic Italian II (3)
This course builds upon the basic foundations established in ITA 101. It emphasizes an in-depth study of the grammatical structures and how they function.
**Prerequisite:** ITA 101 or prior study of the language.

ITA 299 Selected Topics in Italian (3)
This course provides students who have completed ITA 101 and 102 or the equivalent the opportunity to explore Italian language, culture, literature, history and other topics as selected by the instructor. Course may be repeated for credit if the topic changes.
**Prerequisite:** ITA 101, 102 or the equivalent and additional courses as indicated by the instructor.

LITERATURE
See English

MATHEMATICS

MTH 002 Developmental Mathematics (3)
Credits may not be used to satisfy credit requirements for graduation.
A course designed to prepare students for courses requiring quantitative skills.
The grading for this course is pass (P) or fail (F).

MTH 103 Fundamentals of Mathematics I (3)
A survey of introductory college mathematics. Topics include the structure of number systems, applications of decimals and percent's, proportions and unit conversion, problem solving, sets and logic, analyzing arguments, and number theory.
**Prerequisite:** Gwynedd Mercy University Mathematics Assessment Test, Level 3

MTH 104 Fundamentals of Mathematics II (3)
A continuation of MTH 103. This course covers concepts of algebra including linear equations, inequalities, quadratics with applications, relations and functions, graphing, geometry, counting techniques, probability, and statistics.
**Prerequisite:** Gwynedd Mercy University Mathematics Assessment Test, Level 3

MTH 120 Contemporary Math for Business (3)
This course covers standard business mathematics with work-related applications to prepare students for the quantitative courses (statistics, economics and finance) required in their programs. Topics include basic mathematics, algebra, coordinate geometry, counting techniques and probability. The use of a scientific calculator is required. (5 weeks) (School of Graduate & Professional Studies only)

MTH 136 Topics of Mathematics (3)
An introductory college mathematics course to promote mathematical literacy. Topics include contemporary applications of mathematics (such as scheduling, optimization and identification numbers), counting techniques, probability and statistics. A graphing calculator is required for class,
Prerequisite: Gwynedd Mercy University Mathematics Assessment Test, Level 3.

MTH 141 Elementary Mathematical Models (3)
An introductory college mathematics course designed to introduce the concept of mathematical functions and how real-world situations can be represented by them. Topics and skills include linear and exponential modeling techniques, solving and simplifying equations using algebra, graphing, data analysis and rates of change. Some assignments may require computer use. A graphing calculator is required for class, assignments and testing.
Prerequisites: A working knowledge of high school mathematics including two years of algebra and Gwynedd Mercy University Mathematics Assessment Test, Level 4.

MTH 142 Elementary Functions (3)
This course is a fast-paced one semester precalculus course which includes a study of polynomial, rational, algebraic, exponential, logarithmic, and trigonometric functions and their applications. A TI 89 symbolic algebra system and graphing calculator is required for class, assignments, and testing.
Prerequisites: A working knowledge of high school mathematics including two years of algebra and Gwynedd Mercy University Mathematics Assessment Test, Level 4.

MTH 231 Discrete Mathematics (3)
A course in discrete structures with applications. Topics include formal logic, sets, functions, sequences, growth of functions, complexity of algorithms, applications of number theory, mathematical induction, recursion, counting techniques, relations, graph theory, and trees. A TI 89 symbolic algebra system and graphing calculator is required for class assignments and testing. Some assignments will require computer use.
Prerequisites: Three years of high school mathematics including two years of algebra and Gwynedd Mercy University Mathematics Assessment Test, Level 4.

MTH 234 Probability and Statistics (3)
A course in analysis of data with focus on statistical inference. Topics include descriptive statistics, random variables and probability distributions, correlation and regression analysis, non-parametric statistics, and use of statistical software. A TI 89 graphing calculator is required for class, assignments, and testing. Some assignments may require computer use.
Prerequisites: Three years of high school mathematics including two years of algebra and Gwynedd Mercy University Mathematics Assessment Test, Level 4.

MTH 235 Linear Algebra (3)
A course in linear algebra with applications which includes systems of linear equations, matrices, determinants, n-dimensional vector spaces, eigenvalue theory, general vector spaces, and linear transformations. A TI 89 symbolic algebra system and graphing calculator is required for class assignments and testing. Some assignments will require computer use.
Prerequisites: Three years of high school mathematics including trigonometry and two years of algebra and Gwynedd Mercy University Mathematics Assessment Test, Level 5.

MTH 245 Calculus I (4)
A course in the mathematics of continuous change. Topics include both differentiation and integration, with an emphasis on applications. A TI 89 symbolic graphing calculator is required for in-class work, assignments and tests. Some assignments will require computer use. 4 lecture hours and 1 computer lab/recitation hour per week.
Prerequisites: Four years of high school mathematics including trigonometry and Gwynedd Mercy University Mathematics Assessment Test, Level 5.

MTH 246 Calculus II (4)
A continuation of MTH 245. Topics include advanced integration techniques, limits, I'Hopital’s Rule,
improper integration, infinite sequences and series, parametric equations, and some complex number theory. A TI 89 symbolic graphing calculator is required for in-class work, assignments and tests. Some assignments will require computer use. 4 lecture hours and 1 computer lab/recitation hour per week.

**Prerequisite:** MTH 245.

**MTH 261 Programming for Mathematics (3)**
An introduction to computer programming and algorithm development, with specific focus on mathematical applications. Students will create programs to solve computationally difficult problems and to analyze mathematical models of real-world phenomena through simulation. All projects and assignments will require the use of a computer.

**Prerequisite:** MTH 245 or permission of instructor.

**MTH 299 Selected Topics in Mathematics (3)**
A study of a specialized subject area, which may vary, based on student/faculty interest. For non-major students only. The topic, course structure and instructor will be announced prior to pre-registration. There are no prerequisites.

**MTH 301 Multivariable Calculus (3)**
A continuation of MTH 246, topics include vectors in three-dimensional space, vector-valued functions, partial derivatives, multiple integrals, and vector analysis. A TI 89 symbolic algebra system and graphing calculator is required for class assignments and testing. Some assignments will require computer use.

**Prerequisite:** MTH 246.

**MTH 302 Differential Equations (3)**
Introduction to methods of solution and applications of ordinary differential equations and systems of ordinary differential equations. A TI 89 symbolic algebra system and graphing calculator is required for class assignments and testing. Some assignments will require computer use.

**Prerequisite:** MTH 235, 246

**MTH 303 College Geometry and Related Topics (3)**
Historical development of geometry from Mesopotamian civilization to the present that includes axiom systems, Euclidean and non-Euclidean geometries, topology, and other related topics. Some assignments will require computer use.

**Prerequisite:** MTH 235, 245, or permission of instructor

**MTH 304 Number Theory (3)**
This course includes prime numbers, divisibility and factorization, modular arithmetic, the Euclidean algorithm, linear Diophantine equations, congruencies, the Chinese remainder theorem, multiplicative orders, the Euler phi-function and primitive roots. A TI 89 graphing calculator is required for class assignments and testing. Many assignments will require computer use to generate data needed for making conjectures.

**Prerequisite:** MTH 231, 245, 246.

**MTH 305 Sets, Relations, and Functions (3)**
An introduction to the basic techniques of writing proofs. Application of proof writing techniques and an in-depth study of fundamental concepts and principles that are used throughout mathematics: logic, sets, relations, functions, and infinity through topics such as Cartesian product, partitions, equivalence relations, mathematical induction, set indexing, special functions and transfinite numbers.

**Prerequisites:** MTH 231 and MTH 246.
MTH 307 Real Analysis I
An in-depth analysis of properties of the real number line, higher-dimensional Euclidean spaces and general metric spaces. Limits, sequences and series are studied. The basic theory of functions of a real variable is considered, including continuity, derivatives and integrals.
**Prerequisite:** MTH 305

MTH 401 Abstract Algebra (3)
A course in abstract mathematics including the integers, groups, normal subgroups, quotient groups, finite abelian groups, rings, integral domains, ideals, quotient rings, fields, homeomorphisms, isomorphism, real and complex numbers, and polynomials. A TI 89 graphing calculator is required for class assignments and testing. Some assignments may require computer use.
**Prerequisite:** MTH 231 and 305.

MTH 407 Probability Theory (3)
Probability as a basis for statistical theory and inference. Distributions of random variables, conditional probability, statistical independence, mathematical expectation, probability distributions, probability density and distribution functions of random variables. A TI 89 symbolic algebra system and graphing calculator is required for class, assignments, and testing. Many assignments will require computer use.
**Prerequisites:** MTH 234, 245, 246.

MTH 408 Mathematical Statistics (3)
A continuation of MTH 407. Topics include sampling distributions, estimation theory and applications, hypothesis testing theory and applications, regression and correlations, analysis of variance, nonparametric tests and use of statistical software. A TI 89 graphing calculator is required for class, assignments and testing. Many assignments will require computer use.
**Prerequisite:** MTH 407

MTH 437 Special Topics (1-3)
This is an in-depth study of a specialized subject area. The selected topic varies based on student/faculty interest and current research advances. Topic, course structure, credit, and instructor will be announced prior to preregistration. Course may be repeated if topic is different.
**Prerequisites:** MTH 231, 234, 235, 245, 246 and permission of instructor.

MTH 439 Independent Study (1-3)
Investigation of selected topics.
**Prerequisite:** Permission of the Dean of Arts and Sciences, the Chairperson and the Vice President for Academic Affairs.

MTH 440 Internship (1-3)
A work experience designed to afford the student a practical experience in the application of mathematical techniques and practices.
**Prerequisites:** Completion of relevant mathematics courses, Math GPA of 3.0 and approval of internship coordinator.

MTH 4000 Mathematics Seminar - Capstone (3)
Research on topics related to the student’s study of mathematics or its related fields. Several projects/papers must be developed and presented.
**Prerequisite:** Permission of the instructor.
MEDICAL LABORATORY SCIENCE

Medical Technology courses are open to senior Medical Laboratory Science students who have been accepted to a hospital-based School of Medical Laboratory Science. MLS courses are given at the hospital.

A grade of incomplete (I) will be recorded until the affiliate sends a grade report for courses, which are not completed at the report time. The final transcript will have grades according to the following courses and credits.

MLS 410 Medical Immunohematology (2)
Study of the theory of immunohematology. Emphasis is on antigen systems of red cells and antibodies produced against these as related to blood transfusions. Included will be methodologies used, the importance and hazards of transfusion of human blood and blood components, quality assurance, and the regulations governing blood banks.

MLS 415 Clinical Immunohematology (2)
Performance of methodologies and problem-solving techniques in immunohematology, to include cross-matching, antibody identification, preparation and transfusion of blood and blood components, and transfusion reactions.

MLS 420 Basic Hematology and Coagulation (2)
Theoretical aspects of routine hematology and coagulation procedures are covered in detail. Normal cellular elements of the blood and bone marrow and coagulation factors are covered and correlated to appropriate hematology techniques.

MLS 425 Advanced Hematology and Coagulation (2)
Theoretical aspects of specialized hematology and coagulation techniques are reviewed in appropriate detail. Hematologic and coagulation disease states are thoroughly studied and correlated to the relevant basic and advanced techniques.

MLS 430 Clinical Hematology and Coagulation (2)
Performance of various hematological and coagulation techniques are emphasized. Theory and comparison of techniques are discussed where pertinent. Appropriate pathologic states are thoroughly reviewed and compared.

MLS 435 Immunology (2)
Study of the body’s immune process, host reactions and diseases of the immune system. The course will include laboratory immunology procedures.

MLS 440 Urinalysis and Other Body Fluids (2)
Study of urine and other body fluids with emphasis on composition, theory of laboratory tests and related pathology; includes clinical experience.

MLS 445 Medical Chemistry (4)
Chemistry of the human body; included will be enzymology, endocrinology, biochemistry of lipids, carbohydrates and proteins; metabolism of nitrogenous end products, physiology and metabolism of fluids and electrolytes; colorimetry and spectrophotometry; electrophoresis; chromatography; theory and principle of instrumentation; radioimmunoassay; toxicology and quality control.

MLS 450 Clinical Chemistry (4)
Performance of various clinical chemistry procedures. Emphasis will be on techniques, principles of procedures and relationship of results to normal and disease states. Also a detailed study of instrumentation as used in clinical procedures.
MLS 455 Medical Microbiology (5)
Detailed study of pathogenic microorganisms encountered in infectious diseases. Symptomatology, identification, treatment and epidemiology of microorganisms are studied. A study of other pathogenic organisms, such as yeast, fungi, viruses, and higher forms of parasites will also be included.

MLS 460 Clinical Microbiology (4)
Identification and sensitivity testing of pathological microorganisms from normal and infectious materials by appropriate laboratory techniques. Also included is parasitology, mycology, mycobacteriology, serology, and some virology.

MLS 4000 Clinical Seminar/Capstone (4)
A culminating course for students in the clinical laboratory sciences designed to review the educational process from the general education and sciences up to the professional laboratory studies, including continuing education and lifelong learning. Students will review issues in laboratory management, educational methodologies, and community service as it relates to health care, research, clinical correlation case studies and laboratory information systems (LIS). Students will review materials for the national registry examination.

MUSIC

MUS 100 Glee Club (1)
This course is designed to train and develop vocal talents by study, practice and actual choral performance. Student in this course are required to attend all course dates, rehearsals (one evening per week and some weekends) and Voices of Gwynedd performances. Uniform and materials fees apply.

MUS 104 Music Appreciation I (3)
This course is designed to discover listening skills that will sharpen the student’s perception of music, involving some study of its element: melody, harmony, rhythm and meter, tempo and dynamics, timbre and form - and a knowledge of how these are combined in the works heard; information about the great composers, their lives and careers from music of earlier times to the Baroque period is provided.

MUS 107 Music Therapy (3)
An introduction to music as a healing art form, this course includes visits to institutions and schools which use music as therapy.

MUS 200 Fundamentals of Music (3)
This course introduces the fundamentals of music including melody, rhythm and harmony, materials and methods used in teaching music in the elementary classroom. It includes the use of the recorder and simple songs appropriate for various age levels.

MUS 203 Introduction to Broadway Musicals (3)
The course traces the origins of the musical drama back to the cantatas of J.S. Bach, the operas of Mozart and standard musicals by Rodgers & Hammerstein.
MUS 204 Music Appreciation II (3)
This course continues Music Appreciation I from the Baroque to Modern Times.

MUS 210 Advanced Music Theory (3)
A continuation of Fundamentals of Music, this course emphasizes music composition and analysis of major works.
**Prerequisite:** MUS 200.

MUS 299 Selected Topics in Music (3)
This course offers students the opportunity to pursue study of musical topics, composers and forms chosen by the instructor. Course may be repeated if the topic changes.
**Prerequisite:** Determined by instructor.

MUS 437 Special Topics (3)
This course permits in-depth study of a composer, period, genre or topic in music selected by the instructor.

MUS 439 Independent Study (3)
Qualified advanced students may arrange independent study in areas not covered by existing courses: study of special aspects of major works and composers. The student must have the permission of the Chair of Language, Literature and Fine Arts and the Vice President for Academic Affairs.

NURSING

NUR 208 Introduction to Professional Nursing (1)
This course is designed to introduce the students to the art and science of nursing. Personal and beginning nursing professional identity formation is facilitated. The value of a baccalaureate nursing education grounded in a liberal arts education is explained. The historical evolution, values and legal parameters of the nursing profession are discussed. The heritage of the Sisters of Mercy within a liberal arts education is described. Selected concepts of caring, communication, cultural competence and the nursing process are introduced. An overview of the roles of the nurse as a member of the interprofessional health team is included. Future trends in nursing and health care are highlighted.
**Pre or Co- requisites:** CHM 115, 115L, 116, 116L; MTH 103 BIO 107, 107L, 121, ENG 101

NUR 209 Fundamentals of Nursing Practice (4)
This course provides an introduction to the fundamentals of nursing practice. Students will utilize the nursing process as a framework to apply nursing knowledge, diagnoses, interventions, and outcomes to individuals. Course concepts are grounded in evidence-based practice to promote, maintain, and restore health. Topics related to safety, oxygenation, ventilation, circulation, perfusion, ingestion, digestion, absorption, elimination, urinary, movement, sensory input and the nurse patient relationship and the roles of the professional nurse are explored. Emphasis is placed on applying knowledge and practicing skills in the nursing skills lab, simulation lab, and clinical setting.
**Prerequisite:** NUR 208
**Pre or Co-requisites:** CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L; NUT 200; NUR 208, BIO 108, 108, 121, NUR 212, 213, PSY 202, ENG 101

NUR 212 Health Assessment in Nursing (3)
This course is designed to develop health assessment skills across the lifespan. Emphasis is placed on the development of skills essential for using health and physical examination as tools for nursing assessment. Normal and abnormal history and physical assessment findings are differentiated. Biological, psychosocial, spiritual and cultural dimensions of the individual are explored. Health
promotion strategies including risk factor reduction as they relate to the adoption of healthy lifestyles are identified. Opportunities are provided to practice health assessment.

Prerequisite: NUR 208

NUR 213 Evidence-Based Practice in Nursing (2)
This course provides information about the origins of evidence-based practice and its application in nursing clinical practice. Students are provided with critical thinking, informational literacy and the technology skills to enable them to research a basic clinical practice question. Key outcomes of this course include acquisition of a beginning understanding of clinical reasoning and evidence-based practice and how these concepts contribute to safe, quality nursing person-centered care.
Prerequisite: NUR 208
Pre or Co-requisites CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L; NUT 200; BIO 108, 108L, 121, NUR 209, NUR 212, PSY 202, ENG 101

NUR 307 Nursing Care of Adults (6)
This course focuses on the physical, psychological, social, spiritual and cultural forces that influence the health of the adult population. Students will utilize the nursing process as a framework to apply nursing knowledge. Course concepts are grounded in evidence-based practice to promote, maintain and restore health. Topics related to safety, oxygenation, ventilation, circulation, perfusion, ingestion, digestion, absorption, elimination, regulatory, urinary, sensory input, movement and the nurse patient relationship. Emphasis is placed on application in the adult health clinical setting and simulation laboratory.
Prerequisites: CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200; NUR 208, 209, 212, 213, PSY 202, ENG 101
Co-requisites: NUR 324, 316, 317.

NUR 313 Contemporary Issues in Professional Nursing (2)
This course examines selected topics critical to the practice of professional nursing. Current issues and trends that impact nursing within the health care delivery system are addressed. Professional and career development will be explored. Topics are addressed from historical, political, socioeconomic and technological perspectives.
Co-prerequisites: NUR 317, 319.

NUR 314 Pharmacology (2)
This course is an introduction to the principles of pharmacological therapy in nursing practice. It examines the nurse’s role in applying these principles to caring for the patient and nursing implications relative to the utilization of drug therapy. Content encompasses general principles of pharmacodynamics of selected perfusion, ingestion, digestion, absorption, elimination, adaptation, regulation, reproductive, urinary systems, movement and sensory input. Students will utilize cultural sensitivity, clinical reasoning, therapeutic nursing interventions and therapeutic communication skills for application in the clinical setting.
Prerequisites: CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200; NUR 208, 209, 212, 213, PSY 202, ENG 101
Co-Prerequisites: NUR 307, 315, 316.

NUR 315 Pathophysiology of Disease Processes (3)
This pathophysiology course is designed to promote the understanding and application of fundamental disease processes. General pathophysiology concepts presented in this course are cell injury, necrosis, inflammation, wound healing and neoplasia. These concepts are applied to disorders in oxygenation, ventilation, circulation and perfusion, ingestion, digestion and absorption
and elimination; adaptation, regulatory, reproductive and urinary function and movement, coordination and sensory input. The goal of the course is to teach students the pathogenesis of various symptoms and diseases affecting the human body. Altered, physiological functions of human organs are explained and then described on molecular, cellular, organ and systemic levels. By the end of the course, students will be able to understand the relationship between clinical symptoms and diagnostic findings of selected disease processes.

**Prerequisites:** CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200; NUR 208, 209, 212, 213, PSY 202, ENG 101

**Co-prerequisites:** NUR 307, 314, 316, 317

**NUR 316 Nursing Care of Clients with Alteration in Behavioral Health (4)**
This course addresses behavioral health problems and the nurse’s role in assisting patients to achieve and maintain optimum behavioral health. Content encompasses neurobiological, psychosocial, ethical, cultural, and spiritual perspectives. Effective therapeutic communication skills, the nurse-patient relationship, and the nursing process are applied in caring for patients and families across the lifespan. Emphasis is placed on the role of the nurse in promoting and maintaining a culture of safety on the behavioral health unit.

**Prerequisites:** CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200; NUR 208, 209, 212, 213; PSY 202, ENG 101

**Co-prerequisites:** NUR 307, 313, 314, 315, 319.

**NUR 317 Nursing Care of Women, Children & Families (5)**
This course examines the childbearing and childrearing families in contemporary society. The nursing process is applied to provide holistic nursing person–centered care within the context of the family. Topics are related to safety and normal and altered physiologic processes as it affects the childbearing and childrearing families. Experiences in the classroom and clinical setting enable the student to integrate cultural sensitivity, clinical reasoning, communication skills, and therapeutic nursing interventions for women, children and families.

**Prerequisites:** CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200; NUR 208, 209, 212, 213 307, 314, 315, 316; PSY 202, ENG 101

**Co-prerequisites:** NUR 307, 314, 315, 313, 319.

**NUR 319 Nursing Care of Adults with Complex Healthcare Problems (5)**
This advanced adult health course expands on knowledge and skills addressed in prior nursing courses. The course focuses on the application of the nursing process to the adult patient with multisystem pathophysiologic conditions and complex needs. Included are critical care concepts with related nursing interventions to promote, maintain and restore health. Topics related to safety, oxygenation, ventilation, circulation, perfusion, ingestion, digestion, absorption, elimination, regulatory, urinary, sensory input, movement and the nurse patient relationship. Professional nursing practice is emphasized as students enhance critical thinking skills and practice clinical decision making. This course promotes integration of values into professional behaviors and accountability for personal and professional growth.

**Prerequisites:** CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200; PSY 202, NUR 208, 209, 212, 213 307, 314, 315, 316; PSY 202, ENG 101

**Co-prerequisites:** NUR 313, 316, 317

**N324 Pathophysiology and Pharmacological Integrated Concepts (3)**
This integrated pathophysiology/pharmacology course provides a foundation for understanding disease process in conjunction with pharmacological therapy to treat and manage disease. Students will discuss cultural sensitivity, clinical reasoning, therapeutic nursing interventions and communication skills as they apply to clinical practice. Both general pathophysiologic/pharmacological principles will be explained as they apply to the macro concepts identified by the Gwynedd Mercy University Frances M. Maguire School of Nursing and Health Professions.
NUR 413 The Older Adult (2)
This course explores aging and the impact of aging on individuals, families and caregivers. Current
theories of aging, the aging process, and the effects of political, social and economic issues on the
lifestyles of the aging population will be examined. The influence of heredity, environment, lifestyle
and access to adequate healthcare in relation to the care of older adults will be discussed.
Prerequisites: CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200;
NUR 208, 209, 212, 213; PSY 202; ENG101
Corequisite: NUR 307, 316, 317

NUR414 Complementary and Alternative Healing (3)
This course will provide a comprehensive and clinical relevant coverage of complementary and
alternative medicine. It will cover the history, philosophy, and mechanisms of alternative therapies
and includes a thorough review of the clinically controlled trials, indications, and contraindications
of each therapy.

NUR 415 Selected Health Problems of Women and Children (3)
Selected health problems and related issues pertaining to women and children will be critically
analyzed in relation to the impact on the individual, his/her family and the community. Cultural,
spiritual, ethical and moral aspects will be discussed as they influence nursing care. The role of the
nurse and community resources available to this population is explored. (can be taken as the nursing
elective).

NUR 417 Genomics in Nursing (3)
This course introduces the concepts and principles of genetics, genomics, and epidenomic and their
relevance to health and nursing care. Genetic influences from conception and throughout the lifespan
are considered from a nursing perspective. Ethical, legal, and socioeconomic issues associated with
genetics are examined.
Prerequisites: CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200;
NUR 208, 209, 212, 213; PSY 202, ENG 101
Co-Prerequisites: NUR 307, 313, 314, 315, 316, 317.

NUR 419 Synthesis of Learning for Nursing Practice (6)
This course focuses on preparing the graduating nursing student for transition to professional nursing
practice. Preparation is achieved through synthesis of acquired knowledge with emphasis on
reflective practice and application of learning. An understanding of professional nursing standards,
ethical problem solving, evidence-based practice and a commitment to lifelong learning will be
provided. This course provides an integrative theoretical and clinical experience.
Prerequisites: CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200;
NUR 208, 209, 212, 213; PSY 202, ENG 101
Co-prerequisites: NUR 423, 4001.

NUR 422 Health & Illness in the Community (6)
This course emphasizes the healthcare of culturally diverse individuals, families and aggregates in
a variety of community settings. The concepts of community health nursing and the roles of the
professional nurse in the community are critically analyzed. The impact of the health care delivery
system on the nurse in the community is presented. Principles of public health nursing and
epidemiology are integrated. The focus on health promotion, health protection, health maintenance
and restoration are emphasized. Critical thinking is utilized in assessing the community. Clinical
settings include: home care, hospice, extended care facilities and population focused settings.
Prerequisites: CHM 115, 115L, 116, 116L; MTH 103; BIO 107, 107L, 108, 108L, 121; NUT 200;
NUR 208, 209, 212, 213, 307, 313, 314, 315, 316, 317, 319, 413, 417, 422, 431; PSY 111, ENG 101
Co-Prerequisites: NUR 413, 417, 431.

**NUR 423 Global Health and Health Policy (2)**
This course examines globalization and its impact on the health of all populations. Emerging diseases, environmental safety and health risks are addressed. Health care policy and the socioeconomic, geopolitical, ethical and cultural variables that influence health are explored. Critical analysis of selected global and national problems is examined within the framework of professional nursing practice. The importance of cultural sensitivity and ethical judgment are emphasized.

**Co-Prerequisites:** NUR 419, 4001.

**NUR 431 Nursing Research (3)**
The focus of this course is the critical analysis of the process of research. Types of research, steps of the research process, variables, frameworks and measurements are discussed. Problems related to clinical practice are identified and emphasis is placed on the nurse's role in improving patient care outcomes by being able to read, use and participate in the research process.

**Co-Prerequisites:** NUR 413, 417, 422.

**NUR 4001 Leadership and Management in Professional Nursing (3)**
Concepts, theories and roles of leadership and management in professional nursing are examined. Development of the leadership abilities of the individual nurse in influencing the nursing profession and society are discussed. Communication, ethical reasoning, critical thinking, financial issues and cultural competence are included as they relate to leadership and management.

**Co-Prerequisites:** NUR 419, 423.

**COURSES FOR the BSN with MSN OPTION:**
A graduate course elective can be taken with faculty approval and if the student has completed all 300 level courses.

**NUR 530 – Theoretical Foundations of Nursing – (3)**
Examines knowledge development in nursing. Analysis and evaluation of selected nursing conceptual models and theories. Discussion of the relationship between nursing knowledge and research, education and practice. Students develop a personal philosophy and theoretical foundation for practice. Must be taken prior to the area specialization and the research courses. (substitutes for the nursing elective).

**NUR 610 Research Methodology – (3)**
Systematic study of the research process and methodologies appropriate to advanced practice nursing. Students are introduced to concepts and terminology relevant to the theoretical context of research, research design and methodology, data collection, data analysis, and reporting of results. Development of a research problem appropriate for advanced practice nursing investigation. Emphasis on the advanced practice nurse role of research. (substitutes for NUR 431).

**Prerequisite or concurrent:** NUR 530
NUTRITION

NUT 200 Principles of Nutrition (3) (3 cr. content)
A comprehensive course that covers the essentials of optimum nutrition in health and disease. It includes macro-nutrients and energy metabolism; vitamins and minerals; nutrition and diet for the client. The course includes an examination of clinical nutrition as it pertains to care of clients in a health care setting.

OCCUPATIONAL SCIENCE

OSC 101: Introduction to Occupational Science and Occupational Therapy (3)
This course presents students with an introduction to the academic discipline of Occupational Science and the profession of Occupational Therapy. Students will learn about the concept of occupation, how health is influenced by occupational performance and participation, and how the therapeutic use of occupation can influence the development and/or recovery of persons with disabling conditions. The evolution of Occupational Science and the current and emerging practice areas in Occupational Therapy will be reviewed.  
Prerequisite: Open to all majors

OSC 201: Study of the Form, Function, and Meaning of Occupation (2)
This course reviews some of the complex and diverse nature of daily occupation, including the observable aspects (form), purpose (function), and meaning of occupation. Students will be encouraged to reflect on their own patterns of daily occupation and its influence on identity.  
Prerequisite: Open to all majors

OSC 301: Lived Experience of Disability and Occupation (2)
This course will review the literature and multiple narratives into how disability is defined and conceived. Students will gain insight into the personal and environmental barriers that can limit occupational performance and occupational participation.  
Prerequisite: Open to all majors

OSC 402: Neuroscience of Occupational Behavior (2)
Covers body functions and structures of the nervous system, including the impact of nervous system impairment on occupational behavior.  
Prerequisite: Open to Occupational Science majors

OSC 403: Functional Anatomy for Occupational Therapy (3)
In-depth study of the body functions and structures of the human body with major emphasis on functional anatomy within the domain of concern for occupational therapy. Includes a practice lab.  
Prerequisite: Open to Occupational Science majors

OSC 405: Foundations of Occupational Therapy (3)
Introduction to the foundations of the occupational therapy profession including its history, philosophical base, professional terminology, theory development, frames of reference, and the varied scope and roles of the occupational therapy practitioner.  
Prerequisite: Open to Occupational Science majors

OSC 406: Creativity and Activity Analysis (2)
Exploration of the historical and contemporary use of creativity in the promotion of health through client-centered activities to promote health and recovery. Emphasis on the analysis, grading, and managing of complexity of therapeutic activities. Includes a practice lab.  
Prerequisite: Open to Occupational Science majors
OSC 407: Kinesiology for Occupational Therapy (3)
Focus on the understanding and analyzing typical, atypical, and compensatory human movement across the life span. Includes a practice lab.
**Prerequisite:** Open to Occupational Science majors

OSC 408: Professional Skills I: Therapeutic Use of Self (2)
Exploration of human behavioral theories and practice of therapeutic use of self within individual and group therapeutic contexts. Focus on understanding the occupational needs of individuals and groups, teaching-learning process, appraisal of effective communication, empathy, mindfulness, and building of rapport to foster effective therapeutic relationships.
**Prerequisite:** Open to Occupational Science majors

OSC 410: Professional Development I: Ethics, Values, and Responsibilities (2)
Examines the ethics and values of the profession of occupational therapy including the ethical standards of occupational therapy practice and review of scenarios to solve ethical dilemmas. Includes professional development regarding the acquisition of professional membership, knowledge, and skills expected of students in a professional program while beginning to develop a plan for lifelong learning.
**Prerequisite:** Open to Occupational Science majors

OSC 411: Health & Medical Conditions: Children & Youth (2)
Examines development and the prevailing health and welfare needs of children and adolescents with or at risk for mental and/or physical disabilities and chronic health conditions. Focus on varying medical conditions that can impact occupational performance and participation of children and youth.
**Prerequisite:** Open to Occupational Science majors

OSC 412: Occupational Therapy Process: Children &Youth (5)
Integrates theories and the occupational therapy process of evaluation (including assessment), intervention, and targeted outcomes with children and adolescents. Includes a practice lab.
**Prerequisite:** Open to Occupational Science majors

OSC 413: Occupational Therapy Fieldwork: Children & Youth (1)
Immersion experience into a therapeutic service delivery context with children or youth.
**Prerequisite:** Open to Occupational Science majors

OSC 414: Research Methods I: Evidence-based Practice (3)
Review of quantitative and qualitative research methodologies, appraisal of professional literature and levels of evidence, and the influence of clinical expertise and client values in supporting best therapeutic practices.
**Prerequisite:** Open to Occupational Science majors

OSC 415: Professional Skills II: Safety, Mobility, ADL, IADL, and Work (2)
Review and practice of a wide array of healthcare and practice skills that include infection control, safety, body mechanics, wheelchair and mobility device use, ADL training, IADL training, and ergonomics to improve work performance. Includes a practice lab.
**Prerequisite:** Open to Occupational Science majors

OSC 416: Professional Development II: Healthcare, Policy, and Advocacy (2)
Focuses on understanding healthcare, policy, and reimbursement that influence access to occupational therapy practice across multiple practice areas. Review of intra-professional and inter-professional roles, and the laws and regulations that influence occupational therapy practice. Promotion of occupational therapy to other professionals, service providers, consumers, third-party
payers, regulatory bodies, and to the public.

**Prerequisite:** Open to Occupational Science majors

**OSC 4000: Wellness and Health Promotion through Occupation Capstone (2)**
Exploration of occupation, health literacy, and diversity factors that influence health and wellness. Review of community-based and institutional-based practice areas in the promotion of health and wellness in individual, group, and population-based contexts.

**Prerequisite:** Open to Occupational Science majors

To view the remainder of the courses in the Occupational Therapy major, refer to the OSC 600 and 700 level courses in the Graduate Catalog.

**PHILOSOPHY**

*Requirements for bachelor degree: PHL 2000 and one upper level philosophy course or one elective religious studies course*

**PHL 2000 Encountering Ethics (3)**
This course analyzes moral problems and evaluates their possible solutions in light of ethical theories.

**Prerequisite:** ENG 101

**PHL 100 The Human Condition (3)**
This course offers a systematic introduction to some central concerns of men and women both as individual persons and as social beings. It considers our complex nature, the many activities in which we engage and the problem of our destiny, especially in relation to God and nature.

**PHL 201 Ancient Philosophy (3)**
This course examines the emergence of Greco-Roman philosophy. It can cover the Pre- Socratic thinkers, the founders of Greek philosophy such as Socrates, Plato, and Aristotle, and the Roman philosophers and ancient Neo-Platonists.

**PHL 202 Medieval Thought (3)**
This course examines the philosophical contributions made by Jewish, Christian, and Muslim scholastics and their ancient predecessors. The discussion focuses on the preoccupations traditionally associated with the medieval thinkers, e.g., God, Divine revelation, the relationship between faith and reason, the problem of evil, and the respective provinces of philosophy and theology.

**PHL 207 19th Century Continental Philosophy (3)**
This course covers the key thinkers associated with German Idealism and Romanticism and their reception. Philosophers covered may include Schiller, Fichte, Schelling, Schopenhauer, Hegel, Kierkegaard or Nietzsche.

**PHL 211 Philosophy of Love (3)**
This course focuses on the internal relation between love and meaning in human existence. It explores this major philosophical theme in Platonism, existentialism, or other traditions.

**PHL 225 Film Theory and Philosophy (3)**
This course addresses issues relating to the philosophy of film and film theory. Topics include theories of film evaluation, definitions of film, and emotional responses to motion pictures, using film to illustrate philosophy, films as thought experiments, and using movies to make substantive philosophical claims.

**Prerequisite:** PHL 2000
PHL 231 Philosophy of Law (3)
A philosophical inquiry into the nature of law and legal systems. An examination of the philosophical elements of law and the connections between these elements and criminal justice policy and practice. By reading works from classical and modern authors, students analyze notions such as legal obedience, human rights, responsibility, personal liberty, punishment, a just (or unjust) constitution, just laws, and the relation between law and morality.

PHL 234 Philosophy of Globalization (3)
This course surveys some global problems: hunger, depletion or inequitable distribution of resources, violence. It identifies the ethical values involved and provides a philosophical consideration of some possible solutions.

PHL 240 Logic (3)
This course introduces the study and practice of inductive and deductive reasoning with consideration given to such topics as truth, validity, and propositional logic.

PHL 250 Philosophy of Science (3)
This course examines the nature of science and its relationship to technology and human responsibility as revealed in the works of scientists and philosophers.

PHL 299 Selected Topics in Philosophy (3)
This course offers a detailed study of a specialized subject area that will vary based on student/faculty interest. The topic, course structure and instructor will be announced prior to pre-registration. There are no prerequisites.

PHL 302 St. Augustine’s Confessions (3)
This course will focus on Augustine’s Confessions in it’s entirely. It will provide an extensive analysis covering a variety of philosophical branches and topics that converge on the problem the human condition and the relationship of the self to others and God. Topics include the nature of conversion, free will, the internal conflict of the soul, the nature of conscience, the problem of evil, the relationship between temporality and eternity, and love.

PHL 305 Contemporary Philosophy (3)
This course studies the thought of contemporary philosophers such as Sartre, Heidegger, Wittgenstein, Rorty and Quine. It can take either a philosopher-based approach or a thematic approach concerning issues in epistemology, metaphysics, and related areas.

PHL 308 Political Philosophy (3)
This course looks critically at political democracy. Readings from philosophy and the social sciences explore political institutions, individualism and attempts to renew community life. (May be taken for sociology credit).

PHL 310 Philosophy of Education (3)
This course offers a philosophical investigation of the basic principles, aims and human values involved in the process of education. It examines major educational philosophies as well as contemporary issues in this area.

PHL 313 Modern Philosophy (3)
This course analyses the works of authors such as Descartes, Spinoza, Leibniz, Locke, Hume, Kant and Hegel. It examines notions such as certainty, freedom, substance, concepts, and sensations in the modern period. The latter is discussed as a response to medieval and Renaissance philosophy.

PHL 314 Kant’s Philosophy of History and Humankind (3)
This course analyzes Kant’s lesser-known but important writings about biology, nature, history, and
humankind. We read his moral, aesthetic, anthropological, political and historical essays, lectures, and notes. Knowledge of Kant’s three Critique’s will be helpful, since we will refer to them while explaining his views of nature and humanity.

**PHL 325 Philosophy of Religion (3)**
The course studies the shared philosophical themes that emerge in different religious traditions. Readings include works by philosophers and from Eastern, Western, and Native American religions.

**PHL 330 The Healing Journey (3)**
Healing involves social forces, personal attitudes and patterns of meaning which allow us to re-establish an authentic wholeness in the context of illness and suffering. Readings in the social sciences and philosophy are used to investigate these issues. (May be taken for sociology credit.)

**PHL 420 Philosophy in Italy (3)**
This course focuses on philosophy that developed in the Italian territory. It covers ancient, medieval, and modern philosophy in Italy, including ancient Rome. It discusses philosophers such as Epictetus, Seneca, Boethius, Aquinas, and Machiavelli.

**PHL 430 Asian Philosophy (3)**
The goal of this course is to understand the major principles and practices of Taoism and Zen and to see the value and viability of these principles and practices. Topics include: approaches to creativity, aesthetics and spiritual mastery.

**PHL 437 Special Topics (3)**
Investigation of a selected topic designed to integrate and deepen the student’s comprehension and application of philosophy.

**PHL 439 Independent Study (3)**
Qualified advanced students may arrange independent study in areas not covered by existing courses. Registration is with consent of involved faculty and the permission of the Dean of Arts and Sciences, the Chairperson and the Vice President for Academic Affairs.

**PHL 4000 Capstone Seminar (3)**
The capstone allows students to demonstrate their mastery of philosophy by defending a thesis that examines key philosophical texts and draws upon secondary literature on the topic. The seminar’s purpose is to give philosophy majors experience in presenting research in a symposium setting. **Prerequisite:** Philosophy majors with senior standing or permission of the chairperson of the Humanities Division.

**PHYSICAL EDUCATION**

**PE 100 High Intensity Interval Training (1)**
High Intensity Interval Training (HIIT) involves high-intensity exercise intervals intermingled with periods of lower intensity intervals of active recovery. HIIT training calls for challenging work for short time frames lasting from thirty seconds to two minutes. The class runs for one hour twice per week. **Prerequisites:** None

**PE 101 Conditioning/Weight Training (1)**
This class teaches basic principles of weight training. Types of weight training exercises and nutrition and fitness concepts are introduced which instruct students to design their own personal program.
PE 102 Aerobics (1)
This is a group aerobic exercise class that will also provide information on cardiovascular fitness, weight control, stress management and benefits of exercise.

PE 103 Beginning Tennis (1)
This course is designed for the beginner participant. Students will have the opportunity to gain the necessary skills and knowledge which will enable them to take part in the game of tennis as leisure-time activity.

PE 104 Beginning Racquetball (1)
This course will include strokes, strategy and basic concepts of this indoor racquet sport. Through a combination of play and instruction, the student will be prepared for life-long participation in an aerobic and social sport.

PE 111 Karate/Self Defense (1)
An introductory course in the history, terminology and skills of this martial art. Classes are taught by professional black belt martial artists.

PE 113 Lifetime Recreational Activities I (1)
A culmination of lifetime activities that are played throughout the year. Examples include: volleyball, wallball, pickle-ball, power walking, racquetball, bocce ball, and horseshoes. Students will be instructed on rules and techniques, then tested on the material at the end of the 8-week session.

PE 114 Lifetime Recreational Activities II (1)
This course is a continuation of Recreation Activities I. Five or six various lifetime activities are presented. Activities will vary due to the weather conditions. Part I is not a pre-requisite.

PE 120 Introduction to Yoga (1)
Students learn to breathe, strengthen and relax through a basic posture series scientifically designed and time-tested in bringing about the union of the body, mind and spirit - the essence of yoga. Various other styles of yoga are also explored.

PE 299 Interval Training (1)
This course is a combination of strength, pilates, and cardio. The course is intended to provide a complete workout experience using all muscle groups.
Prerequisites: none.

PHYSICS

PHY 111 Physics for Allied Health Sciences (3)
Students will learn basic physical principles with applications to the measurement, analysis and treatment of human beings. The structure and function of biomedical instrument systems specific to the field of radiation therapy, radiologic technology and respiratory care will be explored. 3 lecture hours per week in the spring semester. Not accepted as credit towards the biology major.

PHY 111L Physics for Allied Health Sciences Lab (1)
This course is designed to provide the student with an understanding of basic physics principles, methods and terminology, with application to the measurement, analysis and treatment of human beings. Physics principles and terminology will focus on the fields of radiation therapy and radiologic technology. 3 laboratory hours. Offered in the spring semester. Not accepted as credit towards the biology major.
Corequisite: PHY 111.
**PHY 241 General Physics I (3)**
Principles of classical mechanics for science and mathematics majors. Topics include one and two dimensional kinematics, vector analysis, dynamics, work and energy, energy and momentum conservation, rotational motion of rigid bodies, mechanical properties of matter.
Mathematical level requires a working knowledge of differential and integral calculus. 3 lecture hours and 1 recitation hour. Offered in the fall semester.
**Corequisite:** PHY 241L.
**Prerequisites:** MTH 245.

**PHY 241L General Physics Laboratory I (1)**
A course in which the student is exposed first hand to the observational nature of science and the basic measurement techniques of experimental physics. Collection of raw data and its reduction via graphical analysis are stressed. Subject matter is drawn from the concurrent lecture course. 3 laboratory hours. Offered in the fall semester.
**Corequisite:** PHY 241.

**PHY 242 General Physics II (3)**
Continuation of PHY 241. Topics include heat, first and second laws of thermodynamics, vibrations, analysis of wave motion, sound, electrostatics, electrical circuits, electromagnetism, geometrical optics, atomic and nuclear structure, radioactivity and topics in modern physics. 3 lecture hours and 1 recitation hour. Offered in the spring semester.
**Corequisite:** PHY 242L.
**Prerequisite:** PHY 241 with a grade of “C” or better.

**PHY 242L General Physics Laboratory II (1)**
Continuation of PHY 241L. Experimentation focused upon topics covered in the concurrent lecture course, including heat, thermodynamics, wave motion, sound, electrical circuits, electromagnetism, atomic structure, and radioactivity. 3 laboratory hours. Offered in the spring semester.
**Corequisite:** PHY 242.

**PHY 299 Selected Topics in Physics (3)**
A study of a specialized subject area which may vary based on student/faculty interest. For non-major students only. The topic, course structure and instructor will be announced prior to pre-registration. There are no prerequisites.

**POLITICAL SCIENCE**

**POL 101 American Government (3)**
This course analyzes the American form of government, its functions and current problems along with reflections upon comparative governments around the world.

**POL 211 Constitution of the United States (3)**
This course provides a basic understanding of the philosophical, historical, and political roots of the United States Constitution, its structure, provisions and interpretations and includes a study of notable Supreme Court controversies.

**POL 212 State and Local Government (3)**
This course offers an understanding of the structure and functioning of the Pennsylvania state legislature, courts, municipal governments and school boards within the context of federalism and discusses their impact upon the state’s history and the daily lives of its citizens.
POL 255 Law and Social Justice (3)
(For description see SOC 255.)

POL 299 Selected Topics in Political Science (3)
The course offers a detailed study of a specialized subject area that will vary based on
student/faculty interest. The topic, course structure and instructor will be announced prior to pre-
registration. There are no prerequisites.

POL 437 Special Topics (3)
This course allows for a special investigation of a topic in political science that is not adequately
covered in any of the courses listed above. It may be repeated if the topic is different.

PSYCHOLOGY

PSY 100 General Psychology (3)
Introduction to fundamental concepts of psychology, including memory, development, learning,
personality, and abnormal psychology.

PSY 111 Statistics (3)
Introduction to descriptive and inferential statistics with applications to educational and
psychological research: frequency distributions, probability, binomial and normal distributions,
graphic comparisons, correlation, chi square, analysis of variance, and distribution. Prerequisite:
Gwynedd Mercy University Mathematics Assessment Test, Level 3.

PSY 150 Social Psychology (3)
Study of human behavior as influenced by group situations, interpersonal relations, attitudes, and
opinions; groups and group conflicts, language and communication as social products. (May be
taken for sociology credit.)
Prerequisite: PSY 100.

PSY 200 Developmental Psychology (3)
Theories, issues and research concerning changes in physical, intellectual, emotional and social
development across the life-span are examined and applied to specific social issues.
Prerequisite: PSY 100 or permission of instructor.

PSY 202 Human Development for Nursing (3)
This course provides an introduction to the theoretical perspectives of human development and
fundamental concepts concerning the brain and behavior, memory, motivation and emotion,
personality development and social behavior. In addition, it examines changes in cognitive,
emotional and social development across the life span and how they are impacted by the social
environment. Enrollment in this course is restricted to nursing majors. This course may not
be substituted for PSY100 General Psychology, and PSY 200 Developmental Psychology,
in programs that require these courses.

PSY 204 Psychology of Sport & Motivation (3)
This course examines the application of psychological principles of human performance as they
relate to athletic abilities and life. This course studies the history, growth and connectedness to
applied science and kinesiology, the development/execution of mental skills training, the emotional
knowledge, skills, and ability required for excellence, and the understanding of assessment and
prevention of cognitive, emotional and behavioral inhibitors to performance.

PSY 205 Forensic Psychology (3)
This course focuses on the application of psychological theory, concepts and principles to civil and criminal justice systems, with a focus on the practice of forensic psychology.

**Prerequisite**: PSY 100

**PSY 209 Dementia: Awareness, Understanding and Best Practices for Care (3)**
This course defines dementia and identifies characteristics of Alzheimer’s disease and related dementias. In addition, it examines the many different aspects of dementia: assessment and diagnosis, communication and behavior management, and end-of-life care. It also, focuses on best practices for care and provides practical resources for working with individuals with dementia that can be applied to professional careers in the field of geriatrics.

**Prerequisite**: PSY 100, 200

**PSY 210 Abnormal Psychology (3)**
Study of abnormal personality development and psychopathology; includes etiology, diagnosis, prognosis and treatment of disorders.

**Prerequisite**: PSY 100.

**PSY 211 Fundamentals of Biopsychology (3)**
An introduction to biological bases of behavior in humans and animals. Topics include basic neuroanatomy, neurophysiology, information transmission, neuropathology, sensory-motor functions, biochemical processes, and psychopharmacology, with applications to human behavior and intervention.

**Prerequisite**: PSY 100.

**PSY 212 Counseling and Communication Skills (3)**
The course is an integrated approach to the study of communication styles, communication skills, basic counseling skills and elements of helping relationships. It includes exploration of the nature and dynamics of the helping encounter, interpersonal communication, and opportunities for increased self-awareness and skill development.

**Prerequisite**: PSY 100, 200.

**PSY 213 Psychology of Diversity (3)**
This course is designed to explore the impact of culture and cultural diversity on research, theories and practice in the profession. The complexity of diversity in our lives from how we relate to others and how our worldviews are formed to how we respond to societal differences on the individual, group, organizational and global scale are examined. Topics include diversity, prejudice, stereotypes, gender issues and our role in societal change is a focus of this course.

**Prerequisite**: PSY 100

**PSY 221 Child Psychology (3)**
Study of the successive stages of growth and development from conception through adolescence: social, emotional, intellectual, moral, perceptual, behavioral, and physical development. (Cross-referenced – See EDU 221)

**Prerequisite**: PSY 100.

**PSY 222 Adolescent Psychology (3)**
Learning and personality theory of adolescent period; emphasis on problems arising out of physical development, sensory changes, mental growth and emotional maturity. (Cross-referenced – See EDU 222) (Fall course)

**Prerequisite**: PSY 100.

**PSY 232 Psychology of Gender (3)**
An analysis of the male and female personality; special consideration given to biological, intellectual, motivational, and achievement characteristics; current role dimensions with home and community examined. Prerequisite: One of the following: PSY 100, PSY 200, PSY 221 or PSY 222.
PSY 246 Issues in Gerontology (3)
(For description see SOC 246.)
**Prerequisite:** PSY 100.

PSY 260 Death and Dying (3)
(For description see SOC 260.)

PSY 285 Therapeutic Activities for the Elderly (3)
This course is designed to acquaint students with various forms of activities structured to meet the physical, social, and intellectual needs of the aging population. (May be taken for Sociology credit.) **Enrollment limited to behavioral and social gerontology majors.**
**Prerequisite:** PSY 100.

PSY 299 Selected Topics in Psychology (3)
This course provides students the opportunity to explore topics selected by the instructor. Course may be repeated if the topic changes.

PSY 301 Educational Psychology (3)
(For description see EDU 301.)

PSY 303 Career and Vocational Counseling (3)
Students will examine the role of psychology in career and vocational counseling by exploring the relationship between career choice and personality, the use of interest and aptitude assessment, and research related to vocational choice and career change.

PSY 305 Health Psychology (3)
Students will study the application of psychological principles to health and wellness. Topics will include illness perception and prevention, health enhancing and health compromising behaviors, the effects of stress on health, patient provider interactions, factors influencing utilization of health services and the management of chronic illness.

PSY 306 Psychology of Special Populations (3)
This course will examine the relationship between diversity and psychological processes of interacting with individuals who are different. Students will examine individual and societal perceptions of cognitive, emotional and physical disabilities as well as perceptions of the elderly. Issues of stereotyping, prejudicial beliefs and discrimination will be examined. The social, political and economic implications of the challenges and strengths of special populations will be examined.

PSY 307 Family, School and Community Psychology (3)
This course introduces students to the diverse needs of the child within the context of family, school and community. The interplay of culture, race, language and socio-economics are examined along with current family life issues (parent education and involvement, family and community lifestyles, child abuse and neglect). Students will determine their professional role as advocate in supporting the child and family through the identification of evidence-based practices. A review of resources available to effectively implement multi-tiered family, school, and community partnering in supporting the success of all students will be explored.

PSY 312 Research Methods (3)
Examination of aims and methods of behavioral and social scientists; theory and practice in the techniques of scientific research and scientific writing.
**Prerequisite:** PSY 100 and 111 (Fall course).
PSY 313 Coaching and Positive Psychology
This course provides an introduction to the field of coaching with a focus on the application of Positive Psychology theory and techniques. Students will learn about the historical and theoretical foundations of coaching; the inter-relationship of the concepts of coaching, mentoring, counselling and training; and the role coaching plays in a variety of contexts. Topics to be covered include: coaching models, elements of a coaching session, basic coaching concepts of awareness & responsibility.

PSY 314 Ethical Issues in the Behavioral and Social Sciences (3)
Study of major current ethical and controversial issues in the behavioral and social sciences with emphasis on providing a framework for the development of an appreciation of the issues and the ability to evaluate the issues analytically and critically. (May be taken for Sociology credit.)
Prerequisite: PSY 100 (Fall course).

PSY 320 Experimental Psychology (3)
Introduction to fundamental techniques of psychological experimentation; theoretical and laboratory examination of processes underlying behavior.
Prerequisites: PSY 100, 111 and 312 (Spring course).

PSY 321 Group Processes (3)
Introduction to group dynamics with focus on the theory and practice of group models in education, community health, and mental health settings; includes a review of best practices and ethics in group work, and opportunities for the student to examine personal behaviors in group interaction and to participate in group leadership (required course components). (May be taken for Sociology credit.).
Prerequisite: PSY 100 or PSY 202

PSY 322 Psychology of Personality (3)
A study of the normal personality including structure, dynamics and theoretical approaches, exploration of patterns of adjustment, and the methods of personality assessment.
Prerequisite: PSY 100.

PSY 331 The Middle Adult Years (3)
Survey of the psychological and social aspects; examination of selected topics: perspectives and theories of adulthood, tasks and lifestyles of the young adult, transition to middle age with its tasks and characteristics, preparation for later maturity. (May be taken for Sociology credit.)
Prerequisite: PSY 100.

PSY 341 Social Psychology of Aging (3)
(For description see SOC 341.)
Prerequisite: PSY 100, SOC 100.

PSY 350 Counseling Theory and Practice (3)
An integrated approach to the study of basic helping relationships utilizing theory, practice, and case applications; exploration of the nature and dynamics of the helping encounter in addition to strategies and interviewing techniques. (Spring course)
Prerequisite: PSY 100, 200, 212.

PSY 370 History of Psychology (3)
Comprehensive investigation of historical antecedents of contemporary psychology. Philosophical roots and major theorists and paradigms are examined. Enrollment limited to juniors and seniors psychology majors.
Prerequisite: PSY 100.
PSY 435 Psychology Practicum (3-4)
This course is designed to afford senior psychology majors a practical experience in the application of psychological theory and research. With the recommendation of the psychology faculty and the approval of the program coordinator, students may work in a 40-hour-per-credit practicum opportunity. The practicum setting must provide a learning opportunity consistent with the learning outcomes of the program. Students must consult and meet with the program coordinator during the semester prior to the semester when the practicum will be completed to have the practicum site approved.
Prerequisite: Permission of the program coordinator.

PSY 437 Special Topics (3)
Investigation of a selected topic or topics designed to integrate and deepen the students’ comprehension and application of psychology.

PSY 439 Independent Study (1-3)
Qualified advanced students may arrange independent study in areas not covered by existing courses. Registration is with consent of involved faculty and permission of the Chairperson, the Dean of the School of Arts and Sciences and the Vice President for Academic Affairs.

PSY 450 Research Seminar (3)
Research under the direction of a faculty mentor on a topic chosen by faculty and/or students. Work is reported orally and in writing.
Prerequisites: PSY 215 and permission of the instructor.

PSY 4000 Capstone (3)
Regular class meetings will involve reading and discussing seminal works in the field. Under the direction of the faculty member, students will select a topic relevant to their discipline for in-depth research and report the results of their work orally and in writing. In addition, students will be required to engage in a service project congruent with their research. (Psychology majors with senior status only.)

RADIATION THERAPY

RTS 100 Introduction to Radiation Therapy (3)
This course will acquaint the student with the history of radiation therapy and the terminology associated with diagnosis, evaluation and treatment of the cancer patient as well as those terms that relate to radiation dosage and radiation protection. 3 hours’ lecture/lab per week.
Prerequisite(s): Acceptance into the Radiation Therapy Program; BIO 107, 107L 108. 108L; CIS 101, MTH 141 or 142.
Corequisite: HS 100.

RTS 101 Orientation to Clinical Education I (2)
This course is designed to provide the aspiring radiation therapist with a general overview of the day-to-day activities in a modern radiation oncology department as well as observation of diagnostic imaging procedures pertinent to the practice of radiation therapy. 7.5 hours per day, 2 days per week. One-hour recitation is scheduled per week.
Prerequisite: HS 100; RTS 100.
Corequisite(s): RTS 107, 308; PHY 111.
rts 107 principles of medical imaging (3)
This course will introduce the student to the fundamentals of medical imaging and radiographic positioning. Topics covered include: various imaging modalities pertinent to radiation therapy, accessory equipment, body planes/sections, and digital imaging as it is related to radiation therapy procedures and related terminology
Prerequisite: RTS 100; HS 100
Corequisite: RTS 101, 308; PHY 111

RTS 110 Orientation to the Clinical Education II (3)
Continuation of RTS 101 with emphasis on patient care, simulation and treatment procedures performed daily in the Radiation Oncology department.
8 hours per day, 5 days per week.
Prerequisites: RTS 101, 107, 308; PHY 111

RTS 200 Radiation Biology (3)
This course covers cell biology and the biological effects of ionizing radiation on cells in culture, small animal models, and humans, including the factors that influence and determine cellular radio sensitivity.
3 lecture hours per week
Prerequisites: RTS 110.
Corequisites: RTS 202, 203, 204, 208, 209, 307

RTS 202 Principles of Radiation Oncology Patient Care (2)
This course will provide the student with concepts and principles of patient care to include: assessment and evaluation of patient vital signs; types of treatment reactions; care of treatment reactions; pharmacology; psychological needs of the patient; venipuncture; emergency care.
2 hours lecture/lab per week
Prerequisites: RTS 110.

RTS 203 Principles of Technical Radiation Therapy (2)
This course introduces the student to factors governing the choice of modality for treatment as well as principles of simulation. Also, includes factors affecting dosage delivery from both the physical and mechanical standpoint. 2 hours lecture.
Prerequisites: RTS 110.

RTS 204 Clinical Education I (3)
Orientation to the clinical area with particular emphasis on patient care, simulation techniques, treatment positioning, charting, and setting of treatment parameters on console. 8 hours daily, 3 days per week. One hour of recitation is scheduled per week.
Prerequisites: RTS 110.

RTS 208 Technical Radiation Therapy I (3)
This course covers the technical aspects of radiation therapy treatment techniques, as well as a review of relevant clinical oncology. Includes: site specific simulation and treatment set-up parameters; treatment reactions; procedure specific treatment aids. 3 hours’ lecture/lab per week. Prerequisites: RTS 110.
Corequisites: RTS 200, 202, 203, 204, 209, 307
RTS 209 Clinical Oncology I (1)
This course covers the clinical aspects of radiation oncology and the multidisciplinary approach in the treatment of the cancer patient. Topics covered are: site specific epidemiology, etiology, clinical work-up and diagnosis, anatomy & physiology, histopathology, staging and grading, rationale for treatment selection and prognosis. 1.5 lecture hours per week.
Prerequisites: RTS 110.

RTS 303 Clinical Education II (3)
The student therapist engages in the daily activities of the radiation oncology department while participating in the medical dosimetry, brachytherapy, treatment unit and simulation rotations. 8 hours per day, 3 days per week. One hour of recitation per week.
Prerequisite: RTS 200, 202, 203, 204, 208, 209, 307.
Corequisite: RTS 304, 305, 306.

RTS 304 Technical Radiation II (3)
Continuation of Technical Radiation I. The technical aspects of radiation therapy treatment technique as well as a review of relevant clinical oncology are discussed. 3 lecture/lab hours per week.
Prerequisites: RTS 200, 202, 203, 204, 208, 209, 307.
Corequisites: RTS 303, 305, 306.

RTS 305 Clinical Oncology II (1)
Continuation of Clinical Oncology I. Clinical aspects of radiation oncology and the multidisciplinary approach in the treatment of the cancer patient are discussed. 1.5 lecture hours per week.
Prerequisites: RTS 200, 202, 203, 204, 208, 209, 307.
Corequisites: RTS 303, 304, 306.

RTS 306 Applied Radiation Physics I (3)
This course covers the basic principles of classical and modern physics including atomic structure, electrostatics, electrodynamism, magnetism and electromagnetism. Concepts of matter and energy interactions and radionuclide decay, principles of radiation protection and radiation oncology treatment modalities are discussed. 3 lecture hours per week.
Prerequisites: RTS 200, 202, 203, 204, 208, 209, 307.
Corequisites: RTS 303, 304, 305.

RTS 307 Principles of Medical Dosimetry (3)
This course covers basic calculations in detail, methods of contouring, beam modifying devices and immobilization aids. The student is instructed in all aspects of treatment planning to include contouring, hand-drawn isodose summations and calculations of dose. This is augmented by computerized treatment planning in the clinical area. 3 lecture hours per week.
Prerequisites: RTS 110.
Corequisites: RTS 200, 202, 203, 204, 208, 209.

RTS 308 Cross-Sectional Anatomy (2)
This course will introduce the students to the cross-sectional and topographic anatomy of the specific body systems and will discuss the relevance to the practice of radiation therapy. 2 lecture hours per week.
Prerequisites: RTS 100, HS 100.
Corequisites: RTS 101, 107; PHY 111.
RTS 320 Clinical Education III (3)
The student therapist engages in the daily activities of the radiation oncology department while participating in treatment unit, simulation, mold room and patient care rotations. 8 hours per day, 4 days per week
Corequisites: HS 208.

RTS 400 Technical Radiation Therapy III (1)
Continuation of Technical Radiation Therapy II. The technical aspects of emerging radiation therapy techniques and adjuvant therapies are discussed. 1.5 lecture/lab hours per week.
Prerequisites: RTS 320, HS 208.
Corequisite: RTS 402, 403, 404; HS 305; PSY 111.

RTS 402 Applied Radiation Physics II (3)
Sequential continuation of Radiation Physics I, dealing with quantity and quality of ionizing radiation. Physical concepts of radiation dosimetry are covered in detail as well as methods of calibration of treatment equipment. 3 lecture hours per week.
Prerequisite: RTS 320; HS 208.
Corequisite: RTS 400, 402, 404; HS 305; PSY 111.

RTS 403 Clinical Education IV (3)
The student therapist engages in the daily activities of the radiation oncology department while participating in treatment unit, simulation, dosimetry and brachytherapy rotations. 8 hours per day, 3 days per week.
Prerequisites: RTS 320; HS 208.
Corequisites: RTS 400, 402, 404; HS 305; PSY 111.

RTS 404 Advanced Medical Dosimetry (2)
This course covers dosimetry of complex treatment planning and brachytherapy. Topics include: 3-D treatment planning, TBI, electron beam IMRT and irregular field calculations. 2 lecture hours per week.
Prerequisites: RTS 320; HS 208.
Corequisites: RTS 400, 402, 403; HS 305; PSY 111.

RTS 406 TQM in Radiation Oncology (1)
This course will discuss the development and implementation of quality control programs in providing quality patient care. 15 lecture hours.
Prerequisites: RTS 400, 402, 403, 404; HS 305; PSY 111.
Corequisites: RTS 407, 408, 409, 410; HS 403.

RTS 407 Clinical Education V (4)
The student therapist engages in the daily activities of the radiation oncology department while participating in quality assurance, quality management, advanced treatment techniques, simulation and brachytherapy rotations. 8 hours per day, 4 days per week
Prerequisites: RTS 400, 402, 403, 404, HS 305, PSY 111.
Corequisites: RTS 406, 408, 409, 410; HS 403.
RTS 408 Applied Physics of Advanced Treatment Techniques (2)
This course will cover the physics of advanced radiation oncology procedures. Topics include: HDR brachytherapy, stereotactic radiosurgery, TBI, CT simulation, conformal radiation therapy and advanced treatment techniques. 2 lecture hours per week.
**Prerequisites:** RTS 400, 402, 403, 404, HS 305; PSY 111.
**Corequisites:** RTS 406, 407, 409, 410; HS 403.

RTS 410 Capstone Seminar in Radiation Therapy (2)
A review of radiation therapy concepts included in the American Registry of Radiologic Technologists certifying examination. Concepts covered include: radiation protection, quality assurance, treatment planning and delivery, and patient care, management and education. Students are required to successfully complete a comprehensive examination in radiation therapy to complete their program of study as well as submit a portfolio of their work. 3 lecture hours per week, 8 weeks.
**Prerequisites:** RTS 400, 402, 403, 404, HS 305; PSY 111.
**Corequisites:** RTS 406, 407, 408, 409; HS 403.

RTS 4000 Capstone Research Project (3)
A research course for students designed to demonstrate understanding of the malignant process and its control. Students will be required to research a randomly selected RTOG Clinical Trial, write a paper and give an oral presentation on the subject to their classmates and the ACR personnel. Additionally, they will write a reflection paper of the experience and how it will impact the practice of their profession and their patients. 3 hours per week
**Prerequisites:** RTS 400, 402, 403, 404, HS 305; PSY 111.
**Corequisites:** RTS 406, 407, 408, 410; HS 403.

**RADIOLOGIC TECHNOLOGY**
Radiologic Technology courses are only open to junior and senior student who have been accepted into a JRCERT accredited certificate based School of Radiologic Technology. RDS courses are offered off campus. A grade of incomplete (I) will be recorded until the affiliate sends a grade report for courses, which are not completed at the report time. The final transcript will have grades according to the following courses and credits.

RDS 300 Orientation/Introduction to Radiologic Technology (2)
This course is designed to provide an overview of the foundations in radiography and the practitioner’s role in the health care delivery system. Principles, practices and policies of the health care organization(s) are examined and discussed in addition to the professional responsibilities of the radiographer. An overview of the AMH or other program policies, functional components of healthcare delivery systems and radiology administration are also introduced.

RDS 301 Patient Care (3)
This course is designed to provide the basic concepts of patient care, including consideration for the physical and psychological needs of the patient and family. Routine and emergency patient care procedures are described, as well as infection control procedures using standard precautions. The role of the radiographer in patient education is identified.
RDS 302 Radiographic Procedures I and Related Anatomy (3)
This course will prepare the student to perform routine radiographic procedures of the chest, abdomen, upper extremities and shoulder girdle in the clinical setting. This will be accomplished by presentation of the required anatomy and discussion and demonstration of the radiographic positioning. The student will be assessed on competency on performance of the procedures.

RDS 303 Film Screen Image Acquisition and Processing (3)
This course is designed to provide a knowledge base of factors that govern and influence the production and recording of radiologic images. Film, image production, and related accessories will be discussed. In addition, a basis for analyzing radiographic images will be provided. A discussion of imaging standards, problem solving techniques and factors that affect image quality using actual images will be included.

RDS 305 Radiographic Procedures II (3)
The student learns to perform routine radiographic procedures of the bony thorax, pelvis, hip and spring. This will be accomplished by presentation of the required anatomy and discussion and demonstration of the radiographic positioning. The student will be assessed on competency on performances of the procedures.

RDS 306 Digital Image Acquisitions and Display (3)
This course is designed to impart an understanding of the components, principles and operation of digital imaging systems found in diagnostic radiology. Factors that impact image acquisition, display, archiving and retrieval are discussed. Guidelines for selecting exposure factors and evaluating images within a digital system assist students to bridge between film-based and digital imaging systems. Principles of digital system quality assurance and maintenance are presented.

RDS 307 Radiation Physics (3)
This course provides the student with a comprehensive study of radiation physics covering atomic structure, electricity, magnetism, electromagnetic radiation, electric motors, operators, transformers, generators, rectification and the x-ray tube. Also includes an in depth study of the production of x-radiation and it's interaction with matter.

RDS 309 Clinical Education II (2)
Continuation of clinical education rotations in general radiography and fluoroscopy occur in this course. Observation and application of the principles and procedures introduced in general radiography and fluoroscopy are on-going throughout the course with opportunities for the student to perform initial competencies in the areas of chest, abdomen, upper extremities and shoulder girdle.

RDS 310 Clinical Education III (3)
Continuation of clinical experience rotations give the student the opportunity to gain knowledge and practice in performing the radiographic procedures learned in the classroom. The student will continue to gain confidence in their skills. The student is required to demonstrate competency in lower extremities, bony thorax, pelvis and spine.

RDS 311 Clinical Education I (2)
Students participate in clinical education in an affiliate hospital performing procedures in accordance with the clinical competency evaluation system. Beginning rotations occur at the front desk, transportation, general radiography and fluoroscopy areas of the department.
RDS 320 Radiation Physics II (3)
This course is a continuation of Physics I. This section will deal with the principles of operation for radiographic equipment and the electrical circuitry.

RDS 321 Ethics/Medical Law/Human Diversity (3)
This basis of ethics and ethical behavior will be introduced, as well as, solving ethical dilemmas found in the clinical setting. An introduction to legal terminology and concepts will also be presented. Informed consent and proper documentation is presented. Human diversity is addressed with the idea of promoting better understanding of patients and their families in order to provide better patient care.

RDS 402 Radiographic Procedures III (3)
This course will provide the student with the ability to perform skull and facial bones studies in the clinical setting. Anatomy and positioning of the skull and facial bones will be presented. In addition, instruction will be given about pediatrics, trauma and mobile exams. The student will be assessed as to competency on performance of the procedures.

RDS 403 Radiation Biology and Protection (2)
Principles of radiation biology, including the interaction of radiation with living tissue and the methods used to protect the patient, radiographer and others are the major topics covered within this course. Radiation effects on molecules, cells, tissues and the body as a whole are presented. Factors affecting biological response are discussed, including acute and chronic effects of radiation. An overview of protection is presented. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies and health care organizations are incorporated.

RDS 404 Advanced Imaging Techniques (2)
This course is designed to provide radiography students with principles related to Computed Tomography (CT) imaging and sectional anatomy.

RDS 407 Clinical Education IV (3)
Continuation of clinical education rotations gives the student the opportunity to gain knowledge and practice in the procedures learned in the classroom. The student will continue to advance in their skills and confidence. At the conclusion of the semester, they must demonstrate competence in the following exams: skull, arches, nasal bones, facial bones, orbits, mandible and TMJs.

RDS 408 Radiographic Pathology (3)
This course is designed to provide the student with an introduction to pathology related to medical-surgical diseases and injury. Diseases that are demonstrated using radiographic procedures are the primary focus. The various modalities used to demonstrate pathologies are also discussed.

Prerequisites: RDS 302, 303, 305, 306, 402, 403, 404, 406
Corequisites: RDS 403, 409, 413

RDS 409 Advanced Imaging Techniques II (3)
This course is designed to enhance the knowledge base of general radiographic equipment requirements and design. Included topics include: Image intensification, viewing and recording systems, digital fluoroscopy, linear tomography, mobile units and AEC devices.

RDS 410 Radiographic Procedures IV (2)
Various forms of contrast media and its delivery are reviewed in this course. The procedures involving the digestive, urinary and biliary systems are studied in detail.
RDS 413 Clinical Education V (3)
Continuation of clinical education rotations gives the student the opportunity to gain skill in the procedures learned in the classroom. At this point in time, the student should be confident in performing all basic radiographic procedures. Routine contrast media exams of the urinary, digestive and biliary systems are required competencies at the end of the semester.

RDS 415 Clinical Education VI (3)
Continuation of clinical education rotations gives the student the opportunity to ensure that a broad knowledge and comfort level in performing all radiographic procedures has been attained before graduation. The terminal competencies are required at the conclusion of the semester.

RDS 420 Pharmacology and Drug Administration (2)
This course is designed to provide basic concepts of pharmacology. The theory and practice of basic techniques of venipuncture and administration of contrast agents and/or intravenous medications is included. The appropriate delivery of patient care during these procedures is emphasized.

RDS 4000 Registry Review - Capstone (3)
A culminating course for students in the Radiologic Technologic Program designed to prepare students for the American Registry of Radiologic Technologists (ARRT) examination. Preparation for this examination is a crucial part of the Radiologic Technology program. Review of all five sections of the examination will be reviewed utilizing learning aids from all previously taught courses in the professional curriculum as well as two recent editions of Radiography Prep workbooks. Students enrolled in this capstone course will review the general education and science courses including professional development and lifelong learning as it relates to healthcare. Research, image analysis and review of case studies will also be discussed.

RELIGIOUS STUDIES
Requirements for baccalaureate degree: RS 2000 and one elective religious studies course or one upper-level philosophy course.

RS 2000 Encountering Sacred Writings (3)
This course introduces students to the issues involved in reading and understanding sacred texts, whether one reads texts as a believer or not. Given the nature of Gwynedd Mercy University, the biblical texts of the Old and New Testament form the core of the course. To provide comparisons and contrasts with the Judeo-Christian biblical tradition, some selective writings from other major religions will be examined in a limited manner.

RS 101 Introduction to the Old Testament (3)
Various religious themes are examined, such as covenant, messianism, eschatology, redemption and prayer. Students are encouraged to appreciate the various writing genres of Old Testament literature, such as its creation stories, prophetic literature, apocalyptic and wisdom motifs expressed in Hebrew poetry.

RS 102 Introduction to the New Testament (3)
Situating New Testament books within covenantal expectations is established as a foundation. The various genres of New Testament literature are explored, such as gospel writing, letters, and apocalyptic and theological history. Religious motifs from the various genres are selected for deeper analysis, such as justification in the Pauline letters.
RS 105 Life and Meaning of Jesus (3)
A portrait of the historical Jesus provides the foundation for the course. From this basis, various theological doctrines are studied, such as the nature of resurrection, explanations of redemption and salvation and the ecumenical implications of Christological statements.

RS 111 History of Christianity (3)
The course examines the development of Christianity from after the New Testament period until the present century. It will focus upon the major events, persons, and doctrines that have shaped this development and which also explain the current situation of separated churches within Christianity.

RS 112 Sacraments & Spirituality (3)
The relationship between the Christian spiritual life and the sacramental and liturgical life of the Church is examined. The differences between Protestant and Roman Catholic understandings of sacraments are explored for ecumenical implications. The course concludes with the implications of sacramental life for moral decision-making.

RS 115 World Religions (3)
The six major religions of the world, Hinduism, Buddhism, Judaism, Christianity, Islam and the Chinese religions are examined in a comparative manner. The course focuses on the historical developments of each religion and their respective treatments of common themes, such as sacred literature, moral behavior, salvation motifs and the role of prophetic figures.

RS 120 Contemporary Moral Problems (3)
The basic principles of Christian moral decision-making and their application to current issues are examined. Some contemporary moral issues discussed include sexual behavior, racism, sexism, just war theories, capital punishment, among others.

RS 147 Christian Faith (3)
This course examines the features of religious faith that are common to Protestant and Catholic Christianity. Basic Christian beliefs, characteristics of adult faith development, commitment to one's Christian faith in a contemporary world are treated in an ecumenically sensitive manner.

RS 160 Religions in America (3)
This course treats the major religions found in the United States today. Their historical developments and the large diversity of beliefs and practices are examined both in a critical manner and with their ecumenical implications.

RS 165 Foundations of Christian Spirituality (3)
Through an examination of the basic tenets of Christian faith, this course proceeds to explore the foundational elements of spirituality within a Christian context. Various themes, movements and figures from the Christian spiritual tradition across the centuries are examined and brought into dialogue with contemporary Christian living.
RS 200 Paul and His Theology (3)
The life and missionary activities of Paul the Apostle are reconstructed from both biblical and non-biblical sources. While Pauline theology is examined mainly from the authentic Pauline letters, Pauline thought from the entire corpus of letters traditionally attributed to Paul is studied.

RS 201 Writings of John (3)
The literature of Johannine Christianity, which includes a gospel, three letters and an apocalyptic work, is the primary subject matter of this course. Comparisons and contracts with the Synoptic tradition are also examined.

RS 203 The Synoptic Gospels (3)
The gospels of Mathew and Mark and the two-part work consisting of the gospel of Luke and Acts of the Apostles, provide the primary subject matter of the course. The Synoptic Problem of interdependence and the primary emphases of the Synoptic tradition are examined.

RS 218 Meaning and Practice of Prayer (3)
The three monotheistic religions, Judaism, Christianity and Islam, offer rich and varied approaches to prayer. The basic beliefs of these three major religions are examined in light of their unique approaches to prayer practices.

RS 220 The Prophets (3)
Because the prophetic literature of the Old Testament is so vast, this more specialized course treats biblical prophecy in detail. A survey of the books of the major and Minor Prophets forms the foundation of the course. Biblical prophecy and its relationship to messianic expectations are explored, as is the recurring issues of false vs. true prophets.

RS 226 Social Spirituality (3)
This course provides students with a scriptural, theological and spiritual base from which to examine contemporary social issues. Particular emphasis is given to the place of compassion in one’s everyday life, such as organ donation. Contemporary topics of euthanasia and genetic engineering are also examined.

RS 231 Morality and Contemporary Health Care (3)
This course grounds its ethical foundation on the Judeo-Christian understanding of sanctity of life. Ethical principles and practices of decision-making, as influenced by the Roman Catholic moral tradition, are applied to specific medical-moral questions.

RS 241 Theology of Suffering (3)
As an exploration of the theological issues that arise in the face of human suffering, this course addresses questions about God and the human condition. Particular attention is given to various kinds of suffering, to how people find meaning in the face of suffering and to sources of hope within the Judeo-Christian tradition.

RS 252 Contemporary Catholicism (3)
After placing into a fuller context the Second Vatican Council of the Roman Catholic Church, this course examines the significant topics that have characterized more contemporary Roman Catholic discussions and aspirations since the Council ended in 1965.

RS 256 Christian Feminism (3)
The course examines the emergent Christian feminist movement in the churches and it examines the implications of feminist theology for all persons in the churches today, both in a critical and an appreciative manner.
RS 264 Theology of Marriage and the Family (3)
In Roman Catholic understanding, the family is the basic unit of secular society and is also essential to a proper self-understanding of the nature of the church. From biblical, ecclesial and pastoral perspectives, the course reflects upon the gift and challenges of committed love, parenting, widowhood, marriage breakdown and various roles of lay ministry. The church annulment process is examined, as are various pre-marriage preparation programs.

RS 299 Selected Topics in Religion (3)
This course offers a detailed study of a specialized subject area that will vary based on student/faculty interest. The topic, course structure and instructor will be announced prior to pre-registration. There are no prerequisites.

RS 437 Special Topics (3)
Specialized topics, not covered in the range of topics above are chosen by a professor for presentation on an ad hoc basis.

RS 439 Independent Study (1-3)
Qualified students may request an independent study in areas not covered by existing courses. Initial permission from the faculty member and from the chairperson of the humanities division and Vice President for Academic Affairs is required.

RESPIRATORY CARE

RC 200 Introduction to Allied Health (2)
The core component of the course will be an overview of basic medical terminology. Additionally, it will provide an overview of the health care system, the health care professional and issues related to basic safety, infection control techniques, fundamental ethical and legal considerations and basic patient care skills and procedures.
Prerequisites: BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar.
Corequisites: all first semester RC 200 level courses.

RC 210 Medical Terminology (1)
This course will provide an in-depth study of the terminology associated with the human body. Emphasis will be placed on the prefixes, suffixes and roots associated with terminology necessary to function in today's health care environment.
Prerequisites: BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar.
Corequisites: all first semester RC 200 level courses.

RC 230 Respiratory Theory I (4)
Study of the principles and theory in the administration of medical gases, humidity and aerosol therapy, lung expansion therapy, chest physiotherapy, and basic physical assessment. An overview of basic sciences applicable to respiratory care will also be provided.
Prerequisites: BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar.
Corequisites: all first semester RC 200 level courses, CHM 111.

RC 231 Respiratory Theory II (3)
This course will continue with the basic concepts of physical assessment and include cardiac assessment and basic pediatric and neonatal assessment. It will address basic concepts of
pulmonary diagnostics and include: arterial blood gas analysis and pulmonary function testing. **Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; CHM 111; PSY 100; PHY 111; any 1 designated Signature Seminar. **Corequisites:** all second semester RC 200 level courses, BIO 111, 111L.

**RC 232 Respiratory Theory III (3)**
This course will serve as an introduction to the care and management of the patient’s airway. Additionally, it will provide an introduction to the design, development, initiation, management and discontinuation of continuous mechanical ventilation. **Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; CHM 111; PSY 100; PHY 111; any 1 designated Signature Seminar. **Corequisites:** all second semester RC 200 level courses, BIO 111, 111L.

**RC 233 Respiratory and Cardiac Physiology (3)**
This course will provide in-depth coverage of the anatomy and physiology of the cardiopulmonary system. Particular emphasis will be placed on pulmonary mechanics, control of breathing and gas exchange. General characteristics of obstructive and restrictive lung disease will be addressed. **Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar. **Corequisites:** all first semester RC 200 level courses, CHM 111.

**RC 234 Respiratory Pharmacology (3)**
This course will address the principles of cardiopulmonary pharmacology. It will address pharmacological agents used in the care and treatment of common cardiac and respiratory disease and conditions. It will specifically cover the mechanism of action, dosages, indications, and hazards of common cardio-respiratory medications. Routes of administration and calculation of drug dosages will be addressed. **Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar. **Corequisites:** all first semester RC 200 level courses, CHM 111.

**RC 240 Respiratory Laboratory Procedures I (1)**
The application of principles and theory covered in RC 230 will be provided in a campus laboratory setting. Laboratory exercises will include: administration of medical gases, humidity and aerosol therapy, lung expansion therapy, chest physiotherapy, and basic physical assessment. **Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar. **Corequisites:** all first semester RC 200 level courses, CHM 111.

**RC 241 Respiratory Laboratory Procedures II (1)**
The application of principles and theory covered in RC 231 will be provided in a campus laboratory setting. Laboratory exercises will include: a continuation of practice in physical assessment of the adult, practice in cardiac assessment, basic pediatric and neonatal assessment and pulmonary diagnostics. Pulmonary diagnostic exercises will include: arterial blood gas analysis and pulmonary function testing. **Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; CHM 111; PSY 100; PHY 111; any 1 designated Signature Seminar. **Corequisites:** all second semester RC 200 level courses, BIO 111, 111L.

**RC 242 Respiratory Laboratory Procedures III (1)**
The application of principles and theory covered in RC 232 will be provided in a campus laboratory setting. Laboratory exercises will include: care and management of the patient’s airway and extensive hands-on experiences with a variety of mechanical ventilators. Emphasis will be placed
on set up, maintenance and adapting/modifying the ventilator to specific circumstances. 

**Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; CHM 111; PSY 100; PHY 111; any 1 designated Signature Seminar. 

**Corequisites:** all second semester RC 200 level courses, BIO 111, 111L.

RC 250 Respiratory Clinical Practice I (3) 
The student will be placed in selected clinical sites to observe, practice and become proficient in the performance of skills, procedures and/or modalities addressed in the RC 230, RC 231, RC 240 and RC 241 courses. The specific competencies will entail: the administration of medical gases, humidity and aerosol therapy, lung expansion therapy, chest physiotherapy, and basic physical assessment. 

**Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; CHM 111; PSY 100; PHY 111; any 1 designated Signature Seminar. 

**Corequisites:** all second semester RC 200 level courses.

RC 251 Respiratory Clinical Practice II (3) 
The student will be placed in selected clinical sites to observe, practice and become proficient in the performance of skills, procedures and/or modalities addressed in the RC 230, RC 231, RC 240 and RC 241. The student will continue observation, practice and competency development of administration of medical gases, humidity and aerosol therapy, lung expansion therapy, chest physiotherapy and basic physical assessment. Additionally, the student will observe, practice and develop competency in the care and management of the patient's airway as well as the set-up, maintenance and adapting/modifying of the ventilator to specific patient conditions and circumstances. Clinical competency of all designated procedures, skills, modalities is a requirement for graduation from this portion of the program. 

**Prerequisites:** BIO 107, 107L, BIO 108, 108L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar. 

**Corequisites:** all second semester RC 200 level courses, BIO 111, 111L.

RC 330 Advanced Respiratory Theory I (3) 
This course will address advanced topics in physical assessment of the adult, child and newborn. It will provide more detailed coverage of the care and management of pediatric and neonatal patient. Additionally, it will address the issues of pulmonary rehabilitation, and the role of the respiratory therapist in alternative sites such as skilled nursing facilities and home care. 

**Prerequisites:** BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses. 

**Corequisites:** all first semester RC 300 level courses; PSY 111.

RC 331 Advanced Respiratory Theory II (3) 
This course will address advanced topics in critical care medicine. It will specifically cover advanced topics in airway care and management, hemodynamic monitoring and all phases of mechanical ventilation, to include: pneumatic, electric, microprocessor, fluidic, high frequency, and noninvasive ventilators. 

**Prerequisites:** BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses. 

**Corequisites:** all first semester RC 300 level courses; PSY 111.

RC 332 Advanced Respiratory Theory III (3) 
This course will address advanced topics in the area of pulmonary diagnostics and advanced cardiology. It will specifically cover body phethysmography, methacholine challenge testing, cardio-pulmonary stress testing, bronchoscopy, sleep studies and assisting in emergency interventions; such as, thoracentesis, chest tubes and advanced cardiac support.
Prerequisites: BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses.

Corequisites: all second semester RC 300 level courses, COM 101.

RC 333 Respiratory Pathophysiology (3)
This course will continue the work of the respiratory and cardiac physiology course (RC 233) and provide a more detailed account of selected cardio-respiratory diseases and conditions. It will specifically address: the definition, etiology, clinical manifestations, pathology, radiographic, diagnostic and laboratory findings, prevention, prognosis and treatment of common cardio-respiratory diseases and conditions. Emphasis will be placed on care plans and respiratory protocols.

Prerequisites: BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses.

Corequisites: all first semester RC 300 level courses; PSY 111.

RC 335 Respiratory Seminar (3)
Discussion and presentation of professional issues and topics related to the field of respiratory care. Special emphasis will be placed on preparing students for employment by engaging in job selection process, personal needs assessments, resume writing, and interviewing skills. Additionally, the course will serve as a review and a preparation for the credentialing process. Extensive coverage of computerized clinical simulations and case studies will be provided.

Prerequisites: BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; ENG 101; MTH 136; PSY 100, 111; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses.

Corequisites: all second semester RC 300 level courses, COM 101.

RC 340 Advanced Respiratory Laboratory Procedures I (1)
The application of principles and theory covered in RC 330 will be provided in a campus laboratory setting. Laboratory exercises will include: advanced topics in physical assessment of the adult, child and newborn, care and management of the pediatric and neonatal patient, and equipment and procedures employed in pulmonary rehabilitation, skilled nursing facilities and home care.

Prerequisites: BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses.

Corequisites: all first semester RC 300 level courses; PSY 111.

RC 341 Advanced Respiratory Laboratory Procedures II (1)
The application of principles and theory covered in RC 331 will be provided in a campus laboratory setting. Laboratory exercises will include: airway care, all phases of mechanical ventilation, hemodynamic monitoring and advanced cardiology. Additionally, it will address assisting in emergency interventions; such as, thoracentesis, chest tubes and advanced cardiac life support.

Prerequisites: BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses.

Corequisites: all second semester RC 300 level courses, PSY 111.

RC 342 Advanced Respiratory Laboratory Procedures III (1)
The application of principles and theory covered in RC 332 will be provided in a campus laboratory setting. Laboratory exercises will include: advanced topics in the area of pulmonary diagnostics; such as, body plethysmography, methacholine challenge testing, cardio-pulmonary stress testing, bronchoscopy and sleep studies.

Prerequisites: BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100, 111; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses.

Corequisites: all first semester RC 300 level courses; COM 101.
RC 350 Advanced Respiratory Clinical Practice I (2)
The student will be placed in selected clinical sites to observe, practice and become proficient in the performance of skills, procedures and/or modalities addressed in the RC 330, RC 331, and RC 340 and RC 341. While skill development and refinement will continue for all previously covered topics, the focus of this course will be advanced topics in physical assessment of the adult, child and newborn, care and management of the pediatric and neonatal patient, equipment and procedures employed in pulmonary rehabilitation, skilled nursing facilities and home care, and advanced topics in the area of pulmonary diagnostics, bronchoscopy and sleep studies. **Prerequisites:** BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; COM 101; ENG 101; MTH 136; PSY 100, 111; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses. **Corequisites:** all first semester RC 300 level courses; PSY 111.

RC 351 Advanced Respiratory Clinical Practice II (3)
The student will be placed in selected clinical sites to observe, practice and become proficient in the performance of skills, procedures and/or modalities addressed in the RC 330, RC 331, RC 340 and RC 341. While skill development and refinement will continue for all previously covered topics, the focus of this course will be: airway care, all phases of mechanical ventilation, hemodynamic monitoring, advanced cardiology, and assisting in emergency interventions; such as, thoracentesis, chest tubes and advanced cardiac life support. **Prerequisites:** BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; ENG 101; MTH 136; PSY 100; PHY 111; and 1 designated Signature Seminar; CHM 111; and all RC 200 level courses. **Corequisites:** all second semester RC 300 level courses, COM 101.

RC 4000 Respiratory Research - Capstone (3)
This course will address the principles and practice of performing/conducting research. The course will help the student identify, review and intelligently describe the results of selected cardiopulmonary journals and articles, as well as culminate in the provision of a comprehensive research project. Additionally, as a capstone course, it will address the following issues: health promotion, community service, ethical and professional issues, GMERCYU learning outcomes, and core values of a distinctive Mercy graduate. **Prerequisites:** BIO 107, 107L, BIO 108, 108L, BIO 111, 111L; CIS 101; ENG 101; MTH 136; PSY 100; PHY 111; any 1 designated Signature Seminar; CHM 111; and all RC 200 level courses. **Corequisites:** all second semester RC 300 level courses, COM 101.

SCIENCE

SCI 2000 From Telescope to Microscope (3)
This course is a scientific look at the natural world through the lens of social responsibility, considering the interrelationship of science, mathematics and technology in light of our stewardship of the universe and of each other. This course is research and writing intensive. Not accepted as credit towards the biology major. **Prerequisite:** ENG 101

SCI 100 The Environment (3)
This course is designed to make the student aware of the environment in which we live and its impact on the quality of life. Human influence on the environment will also be examined. 3 lecture hours per week. Not accepted as credit towards the biology major.
SCI 105 The Science in Forensics (3)
An introduction to the principles of physics, chemistry and biology, illustrated with laboratory experiences and examples from the field of forensics. Emphasis is on the scientific foundations of forensic investigation. 2 lecture hours and 2 laboratory hours per week. Not accepted as credit towards the biology major.

SCI 299 Selected Topics in Science (3)
A study of a specialized subject area which may vary based on student/faculty interest. For non-major students only. The topic, course structure and instructor will be announced prior to pre-registration. There are no prerequisites.

SCI 4000 Planet Earth (3)
This course examines the relationship between Planet Earth and its inhabitants. Drawing from the fields of astronomy, geology, meteorology and environmental science, the course looks at Planet Earth through the lens of social responsibility; it considers the interrelationship between the physical characteristics of the planet and the characteristics and welfare of its inhabitants in light of our stewardship of the universe and of each other. The course is research- and writing-intensive. Three credits - three lecture hours per week.
Prerequisite: ENG101, CHM151/152, BIO203/204, PHY241/242 or permission of the instructor.

SECONDARY EDUCATION
(See Education Section)

Signature Seminar

SEM 111 Women and the Many Faces of Imprisonment (3)
This course focuses on women which is one of the five critical concerns of the Sisters of Mercy: Earth, nonviolence, women, racism and immigration. Students will learn about the many ways in which women are imprisoned by the social conditions of our time: poverty, food insecurity, domestic violence, human trafficking and incarceration. The course will examine the experience of women and those whom the love, particularly their children. This course meets the University’s definition of writing intensive.
Prerequisite: ENG 101.

SEM 112 Sustainability (3)
Sustainability is the ability of a system to continue to function as it is. In terms of human society on planet Earth, sustainability is the ability of humans to survive in their surrounding environment. This course provides an overview of the considerations and problems of sustainability in our modern society. Sustainability and resilience will be studied in terms of science, society, economics, morality, and culture. Students will be required to use critical thinking in a dynamic systems context to discuss the diverse aspects of sustainability. In-depth discussions will be held on the topics of globalization, finite resource depletion, ecosystem degradation, social justice, education, climate change, energy, and diversity. Readings and lectures will be used to lay the foundations of knowledge, while discussions will allow students to explore their own opinions of sustainability problems and their potential solutions. During the last few weeks of class, students will work together to form step-by-step solutions to several modern issues.
This course focuses on Earth, which is one of the five critical concerns of the Sisters of Mercy: Earth, nonviolence, women, racism, and immigration. This course meets the University’s definition of writing intensive.
Prerequisite: ENG 101.
SEM 113 Non-Violent Change in the Digital Age (3)
Our current Digital World has brought extraordinary technological advances to our world and life. It offers the opportunity for change through nonviolent action both in personal and global terms. This course will provide an overview of how one navigates toward a global sense of identity that embraces compassion and respect for others through nonviolence. Students will read and discuss how digital means can be used to initiate change on both personal and macro levels. This course focuses on non-violence, one of the five critical concerns of the Sisters of Mercy: Earth, non-violence, racism, immigration, and women. This course meets the University's definition of writing intensive.
Prerequisite: ENG101.

SEM 114OL: Childhood Obesity (3)
This seminar course will lead participants through an in-depth examination of the issue of childhood obesity in the United States. It will take a multidisciplinary approach, examining the issue’s history, contributing factors, layers of implications (physical, psychological, educational, and economic) for both individuals and communities, and the effectiveness of current intervention programs. The work will culminate in a final project in which students design a comprehensive and innovative intervention plan. The class will highlight the unique impact of childhood obesity on the Latino community in the United States. In doing so, the course will focus on immigration, one of the five critical concerns of the Sisters of Mercy: Earth, non-violence, racism, immigration, and women. This course meets the University’s definition of writing intensive.

SEM 115 Examining ‘Post-Racial’ America (3)
This interactive, multi-media course will examine the idea and feasibility of the post-racial America concept through a cultural and political lens, and will challenge students to develop and write about their own related theory/belief system based on readings, videos, in-class or online discussions covered in the course. The following topics will be covered: 2016 Presidential Election, Tea Party Movement, Black Lives Matter, #OscarsSoWhite Campaign, White Privilege, race blindness. This course focuses on racism, one of the five critical concerns of the Sisters of Mercy: Earth, Immigration, Non-violence, Racism, and Women. This course meets the University’s definition of writing intensive.
Prerequisite: ENG101

SEM 162 Rise of Atlantic World (3)
Through a careful analysis of primary sources and interpretive essays, this course examines developments in the Atlantic World across four continents (Europe, Africa, North America, and South America) throughout the period from about 1450 to about 1830. It takes a comparative cross-cultural and transnational approach that emphasizes ideas and institutions. Some of the topics covered are: the origins of the Atlantic world; European colonial expansion; the Columbian exchange; migrations of peoples; Atlantic economies; religion, culture, and society; imperial conflicts; and independence movements. A colloquium approach is used rather than a lecture format. Students will actively read, reflect upon, and respond to course material. This course focuses on Racism, which is one of the five critical concerns of the Sisters of Mercy: Earth, nonviolence, women, racism, and immigration. This course meets the University’s definition of writing intensive.
Prerequisite: ENG 101

SEM 163: Immigration and Ethnicity in American History (3)
Through a careful analysis of primary sources and interpretive essays, this course examines the history of the United States as an experience of immigration and ethnicity from the colonial period to modern times. It takes a comparative cross-cultural approach that emphasizes identity, ideas, and institutions. Some of the topics covered include: settlers, servants, and slaves; citizenship and migration; European migration and national expansion; national citizenship and federal
of immigration; colonialism and migration; immigrant incorporation, identity, and nativism; and patterns of inclusion and exclusion. A colloquium approach is used rather than a lecture format. Students will actively read, reflect upon, and respond to course material, rather than merely receive information that is presented to them. This course focuses on immigration, which is one of the five Critical Concerns of the Sisters of Mercy: earth; nonviolence, women, racism, and immigration. This course meets the University’s definition of writing intensive.

**Prerequisite:** ENG 101

**SEM 191 Psychology of Spirituality (3)**
This course draws on an interdisciplinary approach to explore various spiritualties with a particular focus on women in the context of psychological and developmental theory and research. It examines the relationship between psychology, religion, and spirituality as well as various spiritual practices. This course focuses on Women, one of the five critical concerns of the Sisters of Mercy: women, non-violence, earth, anti-racism, and immigration. This course meets the University’s definition of writing intensive.

**Prerequisite:** ENG 101.

**SEM 192 Middle East Conflict: Exile & Belonging (3)**
This course focuses on the Middle East conflict in exploring issues and dynamics of exile and belonging in Israel and Palestine through the lens of religion. In exploring these issues and dynamics, we will examine alternative ideas and perceptions, particularly, contemplation of non-violence in this conflict. This will open up different ways to consider the religious problems of exile and belonging in regard to co-existence in Israel and Palestine. The course focuses on non-violence, one of the five critical concerns of the Sisters of Mercy: women, non-violence, earth, anti-racism, and immigration. This course meets the University’s definition of writing intensive.

**Pre-requisite:** ENG 101.

**SEM 213 Literature & Environment (3)**
This course explores the human connection to the natural environment, in mostly British and American literature from the eighteenth through twentieth centuries. This exploration will combine readings in fiction, poetry, and non-fiction sources to understand better our connection to the world around us and our function within it. In addition to exploring this in literature, students will be asked to develop and express an understanding of their own connection to the environment and the choices they make about it, based on the value systems studied. This course focuses on the earth, one of the five critical concerns of the Sisters of Mercy: women, non-violence, earth, anti-racism, and immigration. This course meets the University’s definition of writing intensive.

**Pre-requisite:** ENG 101.

**SEM 214 Divas of Music: From Bingen to Beyonce (3)**
This course is an interdisciplinary survey of the history of women in music, illuminating the contribution of women composers, conductors, patrons, and performers and the ways in which they have influenced Western and American musical traditions (including classical and popular music). Some key figures to be covered will include Hildegard von Bingen, Fanny Mendelssohn Hensel, Clara Schumann, Nadia Boulanger, Marian Anderson, Madonna and Beyonce. The course will investigate depictions of women in music as well as culture, reinforcing one of the five critical concerns of the Sisters of Mercy: women, non-violence, earth, anti-racism, and immigration. The course meets the University’s definition of writing intensive.

**Pre-requisite:** ENG 101.
SEM 215 The Bible as Literature (3)
This course explores the Bible as a work of literature, including its mythical, historical and cultural contexts, using appropriate critical concepts. Readings will be in the major books of the Old and New Testaments (New Revised Standard Version). This course focuses on women, one of the five critical concerns of the Sisters of Mercy: women, non-violence, earth, anti-racism, and immigration. This course meets the University’s definition of writing intensive.
Pre-requisite: ENG 101.

SEM 216 Role of Women in the Graphic Novel (3)
This course examines the roles and representations of women in graphic novels from the comic book archetypes to complex female characters and contemporary authorial voices. This course focuses on women, one of the five critical concerns of the Sisters of Mercy: women, non-violence, earth, anti-racism, and immigration. This course meets the University’s definition of writing intensive.
Pre-requisite: ENG101

SEM 217: To Boldly Go - Conflict and Peace in Science Fiction (3)
This course introduces students to the genre of science fiction literature and its unique ability to examine social, ethical, and cultural issues by placing them outside reality. Students will explore a variety of science fiction works, both literary and film, focusing on issues of non-violence. The speculative nature of the genre allows writers to depict how alternate or future histories deal with issues of violence, conflict, and peace. Can these works offer audiences a new vision of how we might approach these same issues on our home planet? This is one of the questions we will explore in this course. This course focuses on non-violence, which is one of the five critical concerns of the Sisters of Mercy: Earth, non-violence, women, racism, and immigration. This course meets the University's definition of writing intensive.
Pre-requisite: ENG101

SEM 315 Personal Finance (3)
This course introduces the student to the subject of personal finance and the importance of financial planning. The course intends to raise student awareness of the many financial challenges that will affect their lives. Proper preparation will be the focus. Key areas of credit management, insurance and retirement planning will be included the topics covered. The course will emphasize the value of short and long-term financial planning. This course focuses on sustainability/earth which is one of the five critical concerns of the Sisters of Mercy: Earth, nonviolence, women, racism, and immigration. This course meets the University’s definition of writing intensive.
Pre-requisite: ENG101.

SEM 316 Wonder Women: Guardians for the Galaxy and YOU (3)
This course will explore the seven themes of Catholic Social Teaching: Life and Dignity of the Human Person, Call to Family, Community, and Participation, Rights and Responsibilities, Option for the Poor and Vulnerable, the Dignity of Work and the Rights of Workers, Solidarity And Care for God's Creation along with the Critical Concern of the Sisters of Mercy. It will focus on non-violence, which is one of five critical concerns of the Sisters of Mercy: Earth, Immigration, Non-Violence, Racism, and Women. This focus will be achieved through the study of prophets and stories of nonviolence and how “you” can make a difference through purposeful actions and choices in your chosen career. This course meets the University's definition of writing intensive. ENG 101 is a Pre-requisite.
SEM 317 Happy and Healthy! For Whom? (3)
This course will explore the health disparities that exist in healthcare delivery systems and community-based organizations throughout the country. Through the study and understanding of at-risk populations, public health policy, and geographic location, this course will show “The Corner of Happy and Healthy” is far out of reach for those communities embedded in poverty and violence. This course focuses on racism, one of the five critical concerns of the Sisters of Mercy: Earth, immigration, Non-Violence, Racism, and Women. This course meets the University’s definition of writing intensive.

SEM 361 Embracing Individuals with Special Needs Prof Practice (3)
Current trends require the development of strategies and services to meet the needs of the growing adult populations of special needs individuals who live in the mainstream community. Meeting these needs presents unique challenges. This course focuses on the understanding, inclusion, and appreciation of people with special needs and their families in order to support the integration of people with disabilities into community life. The objectives provide for evidence-based practices that allow professionals to best meet the needs of these individuals and their families in a variety of disciplines. Since this course focuses on increasing the quality of life for an often oppressed segment of our society, it addresses the critical concern of non-violence of the Sisters of Mercy: Earth, nonviolence, women, racism, and immigration.
This course meets the University’s definition of writing intensive.
Pre-requisite: Eng101.

SEM 362 HB: Personal and Professional Ethics from a Mercy Perspective (3)
This course will focus on both personal ethics, how one lives one’s life, and professional ethics, how one functions in his/her professional career. This will all be discussed through a Mercy perspective. Students will explore how a personal code of ethics is developed and how one lives out that personal code. This course will also explore codes of ethics for multiple disciplines/professions and their impact on how one functions in his/her profession. This course focuses on Nonviolence, which is one of the five critical concerns of the Sisters of Mercy: Earth, nonviolence, women, racism, and immigration. This course meets the University's definition of writing intensive.
Pre-requisite: ENG 101

SEM 363 HB: Critical Consciousness: A Way of Understanding Ourselves and the World (3)
Living with a critical consciousness requires that we are able to examine our personal lives as well as the political, social, religious, and psychological contexts in which we find ourselves. Through an interdisciplinary course of study participants will view the disciplines of science, literature, history, education as means by which both we and the world have been constructed. Students will play an active part in the class through reading, reflecting, and responding to course material. This course focuses on Racism, which is one of the five critical concerns of the Sisters of Mercy: Earth, nonviolence, women, racism, and immigration. This course meets the University's definition of writing intensive.
Pre-requisite: ENG 101

SEM 364 Spirituality of the Child (3)
Course Description: This course explores spirituality from the developmental, creative, and present-moment perspective of the young child, with particular focus on the works of Robert Coles, Aline Wolf, and various peace educators. Concentrating on the child as spirit-in-action, we explore creativity, acceptance of difference, and non-violence as elements of childhood development that are in need of nurturing. Through our own spiritual awareness and the use of practical activities, we adults can foster this natural development of spirit in children. This course focuses on nonviolence, one of the five critical concerns of the Sisters of Mercy: Earth, Immigration, Non-
violence, Racism, and Women. This course meets the University’s definition of writing intensive. **ENG 101 is a pre-requisite.**

**SEM 407 Human Trafficking (3)**
This course draws on the work of Viktor Frankl and uses a philosophical lens to explore human trafficking in its assault on human dignity, human rights and human flourishing. We will do this through the historical, social, political and economic contexts of human trafficking. This course focuses on Women, which is one of the five concerns of the Sisters of Mercy: Women, earth, nonviolence, racism and immigration. This course meets the University's definition of writing intensive:  
**Pre-requisite:** ENG 101.

**SEM 453 Caring & Human Experience in Society (3)**
This course explores the experience of human caring through the contributions and perspectives of multiple scholars, utilizing a multicultural lens. Nonviolence, one of the Critical Concerns of the sisters of Mercy, is a central focus. Students will engage in complex examination of the meaning of human caring and human responses. Human Caring Science, humanities-based learning activities and an interdisciplinary approach will be incorporated. Critical thinking, creativity, empathy and personal development will be emphasized. This course focuses on Nonviolence, which is one of the five critical concerns of the Sisters of Mercy: Earth, nonviolence, women, racism, and immigration. This course meets the University’s definition of writing intensive.  
**Pre-requisite:** ENG101.

**SEM 454 Global Learning: Why does it matter? (3)**
This course explores global learning through a multifaceted lens incorporating a variety of social, cultural, historical, economic, ethical and political perspectives. The implications of these perspectives as well as the interconnectivity of all humanity are addressed. Selected local and global challenges are discussed. The requisite knowledge, attitudes and skills for living in a global, humane world are emphasized. This course focuses on Earth, which is one of the five critical concerns of the Sisters of Mercy: Earth, nonviolence, women, racism, and immigration. This course meets the University’s definition of writing intensive.  
**Pre-requisite:** ENG101.

**SEM 455 Women in Science (3)**
This course focuses on the critically important contributions made by women scientists of past and present. Special emphasis will be placed on those women awarded the Nobel Prize for scientific accomplishments in their disciplines. Students will acquire an appreciation of the professional obstacles circumvented by these courageous innovators who have significantly impacted the the realm of the scientific world. Science and technology are often considered to be the forte of men. However, the numerous gifted women scientists highlighted in this course are credited with crucial contemporary discoveries and inventions and are recognized by their communities of interest within the world of science. This course will also explore the influence exerted by women scientists in their ongoing contributing roles in shaping future generations of women in science. This course focuses on one of the five critical concerns of the Sisters of Mercy of the Americas, women, earth, non-violence, racism, immigration, namely earth and being merciful stewards of mother earth through responsible scientific practices. This course meets the University’s definition of writing intensive.  
**Pre-requisite:** ENG 101
SOCIOLOGY

SOC 2000 Society and Global Diversity (3)
This course is designed to expand students' understanding of the social and psychological dimensions of global communities, while learning to relate and interact with those of different viewpoints and experiences. Topics of diversity and community will be explored in light of Mercy values, such as “dignity of each person” and “social responsibility”.
Prerequisite: ENG 101

SOC 100 Principles of Sociology (3)
Analysis of basic structures of human societies in order to understand human social behavior in the modern world and in one's own society with emphasis on social institutions and social change.

SOC 101 Social Problems (3)
Analysis of social factors in the persistent problems of disorganization, conflict, and culture lag. Attention to problem resolution and social policies.
Prerequisite: SOC 100

SOC 102 Introduction to Criminal Justice (3)
(Cross-referenced – for description see CRJ 102.)

SOC 120 Cultural Anthropology (3)
Investigation of nature and function of human culture with stress on interrelationship of social institutions within cultural systems and emphasis on operation of them in non-Western societies.
Prerequisite: SOC 100

SOC 150 Social Psychology (3)
(Cross-referenced - for description see PSY 150.)

SOC 201 Introduction to Human Services (3)
This course will present an overview of the elements which define human services. The history of human services, values, and ethics will be discussed. Basic counseling techniques and an overview of the various agencies of human services will be covered providing a strong overview of generalist human services practice. This course requires a short social service volunteer experience. (Fall semester only).
Prerequisite: SOC 100

SOC 203 History and Culture of New Orleans (3)
New Orleans is an American city unlike any other in the United States. Because of its location at the mouth of the Mississippi River, New Orleans became the most cosmopolitan city in the country in the late 1800s. As a result, the city became a culture unto itself through its Creole food, its language, and through its blend of cultural music that became Jazz. This course will explore the culture of New Orleans and what makes it unique through a study of food, music, architecture, Mardi Gras, and geography, as well as its dark side of the slave trade and red light district known as Storyville. This course consists of 12 hours of classroom instruction on campus and six days in New Orleans with tours, museums, a cooking demonstration, and many jazz venues. Additional fees for travel and accommodations apply to this course.

SOC 240 Pluralism in American History (3)
(Cross-referenced - for description see HIS 240.)
SOC 241 Marriage and the Family (3)
Historical and cultural evolution of family structures and functions with particular emphasis on interpersonal relations; comparative sociological analysis of traditional and changing roles of parents in contemporary American society.

SOC 246 Issues in Gerontology (3)
Survey of current social issues regarding the aging population. Topics such as social needs, delivery of services, legislation, advocacy, and ethics and legal issues will be covered. (May be taken for psychology credit.)
Prerequisite: SOC 100

SOC 255 Law and Social Justice (3)
Constitutional principles will be examined and their relationships to selected issues of social justice in America explored. (May be taken for political science credit.)

SOC 260 Death and Dying (3)
Survey of dying as a social act; examination of selected topics; social concepts and attitudes on death and dying; social methods of dealing with death, effects of death on social groups, demographic concepts, euthanasia, legal aspects. (May be taken for psychology credit.)

SOC 280 Ethical Issues in the Behavioral and Social Sciences (3)
(For description see PSY 280.)

SOC 299 Selected Topics in Sociology (3)
This course provides students the opportunity to explore topics selected by the instructor. Course may be repeated if the topic changes.

SOC 302 Human Services Practice (3)
Principles of methods of practice in all areas of human services will be explored including techniques in casework, group work, community organization, planning and administration. Field observations will be held in various human services settings throughout the metropolitan suburban area. (Spring course).
Prerequisite: SOC 201

SOC 303 Policy and Social Change
This course examines the process by which social policies that influence education, healthcare, income and the aging are formed and how these policies affect social change both positively and negatively. Students will examine how they can influence policy to bring about social change through research, politics and advocacy.

SOC 311 Sociology of Medicine (3)
Examination of the social organization of modern science-based medicine. Emphasis on health and disease as social processes influenced by social roles, community factors and cultural values.

SOC 321 Group Processes (3)
(For description see PSY 321.)

SOC 325 Social Stratification (3)
Examination of the distribution of power, prestige, and property in modern societies; of age, sex, race and ethnicity as factors in social status; and of functions and consequences of social inequality.
Prerequisite: SOC 100
SOC 330 The Healing Journey (3)
(For description see PHL 330.)

SOC 331 The Middle Adult Years (3)
(For description see PSY 331.)

SOC 335 Human Service Administration (3)
Student will learn management and administration skills to prepare them for work in human service agencies. Course will examine the various agencies composing the human service delivery system and their administrative needs such as hiring, state and federal regulations, and team building. Areas of study will include planning, goal setting, decision making, leadership, conflict resolution, budgeting and fiscal management.

SOC 338 Global Perspectives on Women (3)
This course explores women’s issues in international law and policy, in third world development, and in cross-cultural and multi-cultural contexts.

SOC 341 Social Psychology of Aging (3)
Study of the social definitions of and responses to aging as they relate to personal adaptation, changing family patterns, quality of life issues, retirement, and reactions to loss and death. (May be taken for psychology credit.)
Prerequisite: PSY 100 and SOC 100

SOC 400 Social Research Methods (3)
A critical examination of research methods found in both quantitative and qualitative sociology. Foundations of research, including research design, ethics, conceptualization, measurement and the logic of sampling, leading to the creation of a proposal for original research by the student. Outside exercises also familiarize students with different research methods, techniques of observation and the reading and evaluation of published research. (Offered Fall semester only.)

SOC 410 Social Data Analysis (3)
This course introduces the logic and practice of secondary data analysis in social research. It focuses on five topics: (1) how to formulate research problems based on literature review; (2) how to turn research problems into hypotheses that are empirically testable; (3) how to test research hypotheses through statistical analysis of survey data; (4) how to use a mixed methodology with both interview and survey data, and (5) how to present research findings in written as well as oral form.

SOC 435 Sociology – Human Services Practicum I (4)
(For description, see HSV 435)

SOC 436 Sociology – Human Services Practicum II (4)
(For description, see HSV 436)

SOC 437 Special Topics (3)
Investigation of a selected topic designed to integrate and deepen the students’ comprehension and application of sociology.

SOC 439 Independent Study (1-3)
Qualified advanced students may arrange independent study in areas not covered by existing courses. Registration is with consent of the involved faculty and permission of the Division Chairperson, the Dean of Arts and Sciences, and the Vice President for Academic Affairs.
SOC 442 Gerontology Field Placement I (3-4)
With the permission of the chairperson, senior students will participate, under supervision, in a direct experience in selected facilities/programs/agencies serving older adults. The field experience aims at increasing the student's knowledge of facilities, programs and agencies serving older persons, developing the student's interpersonal relations with co-workers and supervisors and enhancing the student's personal and professional growth.
Prerequisite: Permission of the instructor.

SOC 443 Gerontology Field Placement II (3-4)
See description of SOC 442. Permission of the instructor.

SOC 4000 Capstone (3)
(For description, see HSV 4000).

SPANISH

SPA 101 Basic Spanish I (3)
This beginning course introduces the Spanish language. The four basic skills of listening, speaking, reading, and writing are taught. No prerequisites.

SPA 102 Basic Spanish II (3)
This continues to build upon the basic foundations established in SPA 101. A more in-depth study of the grammatical structures and how they function in the language is emphasized.
Prerequisite: SPA 101 or prior study of the language.

SPA 205 Intermediate Spanish I (3)
This is an intermediate Spanish course designed for students with basic knowledge of the Spanish language; for those that have completed SPA101 and SPA102 (or its equivalent). It focuses on the development of the four basic language skills: listening, speaking, reading and writing.

SPA 206 Intermediate Spanish II (3)
This is the second half of an intermediate Spanish course designed for students with beginning intermediate knowledge of the Spanish language and who have completed SPA101, SPA102, and SPA205 (or their equivalents). It focuses on the development of the four basic language skills: listening, speaking, reading and writing with a focus on expressing one’s views and opinions. The purpose of this course is to continue to develop the ability to communicate in Spanish with ease and proficiency, and to learn about and appreciate Hispanic cultures. Spanish will be the primary language of instruction though English may also be used on limited occasion as deemed appropriate by the instructor. The major course objective is to prepare students for increased proficiency in Spanish communication.
Prerequisite: SPA101, SPA102, and SPA205

SPA 210 Spanish for Health Personnel I (3)
This course emphasizes basic communication necessary for medical personnel. Listening, speaking and pronunciation skills will be the primary concern. Topics to be covered include: the human body, foods, illnesses, patient’s medical and personal background, and useful expressions. Students must have a command of basic Spanish to take this course.

SPA 299 Selected Topics in Spanish (3)
This course provides students who have completed SPA 101 and 102 or the equivalent the opportunity to explore Spanish language, culture, literature, history and other topics as selected by the instructor. Course may be repeated if the topic changes.
Prerequisites: SPA 101, 102 or the equivalent and additional courses as indicated by the instructor.

SPA 400 Advanced Spanish (3)
This is an advanced Spanish course designed for students with intermediate knowledge of the Spanish language and who have completed SPA101, SPA102, SPA205, and SPA206 (or their equivalents). It focuses on the development of the four basic language skills: listening, speaking, reading and writing through a focus of expressing one’s views and opinions. The purpose of this course is to continue to develop the ability to communicate in Spanish with ease and proficiency using advanced grammar and exploring complex topics. Spanish will be the primary language of instruction though English may also be used on limited occasion as deemed appropriate by the instructor. The major course objective is to prepare students for "real-life" communication in Spanish with an advanced level of proficiency.
Prerequisites: SPA101, SPA102, SPA205, and SPA206

SPA 439 Independent Study (3)
Qualified students may arrange independent study in areas not covered by existing courses. Topics are to be determined by consultation with instructor.
Prerequisites: SPA 101 and 102.

SPECIAL EDUCATION
The competencies in these courses are reflective of the professional education standards for special education certification candidates set forth by the Pennsylvania Department of Education.

SPE 205 Exceptional Person (3)
The course will require students to demonstrate knowledge of the fundamental concepts of teaching students with cognitive, behavioral and/or physical health disabilities ages 0-21. This will include: philosophical, historical and legal foundations of education, current identification criteria, legal and educational definitions, etiology, incidence and prevalence figures, as well as cognitive, behavioral and physical characteristics for students with disabilities. The course will present models and theories of typical/atypical growth and behavior across age groups, as well as disabilities. Field experience is required.

SPE 215 Exceptional Person for Secondary Education (3)
This course requires students to demonstrate knowledge of the fundamental concepts of teaching students with cognitive, behavioral and/or physical health disabilities in the seventh through twelfth grades inclusive setting. This includes: philosophical, historical and legal functions of special education; current identification criteria; legal and educational definitions; etiology; incidence and prevalence figures; cognitive, behavioral and physical characteristics for high school students with disabilities. Field experience is required.

SPE 231 Mild/Moderate Disabilities (3)
Educational and medical definitions, etiology, identification criteria and current incidence and prevalence rates for students with learning disabilities, emotional/behavioral disorders and mild mental retardation are presented. This course will review major theoretical models associated with the study of these conditions. Field experience is required.
Prerequisite: SPE 205.

SPE 232 Students with Complex Needs in the Educational Setting (3)
This course presents the causative factors, atypical cognitive, physical, psychological, medical, psychological and psychosocial conditions of students with complex needs. Collaborative
relationships within the educational, rehabilitative, social welfare and medical systems; as well as with professional organizations and advocacy groups are stressed.

**Prerequisite:** SPE 205.

**SPE 240 Foundations of Autism Spectral Disorder (3)**

This course examines the characteristics of individuals diagnosed on the Autism Spectrum according to the Diagnostic Statistical Manual (DSM5). An introduction of the current trends of assessment and interventions will be presented.

**SPE 331 Implementing Inclusionary Practices for the Mild/Moderate Population (3)**

Applications of fundamental concepts for teaching students with mild to moderate disabilities are presented. Students will examine norm-referenced, criterion-referenced and curriculum-based instruments and procedures for assessing and diagnosing students who are experiencing learning and behavior problems in school. Students will conduct curriculum-based assessments to identify students’ academic strengths and weaknesses. Students will also learn to create an environment conducive to learning through an applied behavior analysis perspective.

**Prerequisites:** SPE 205, SPE 231.

**SPE 332 Assessment and Instruction for Students with Complex Needs (3)**

Authentic and alternative assessment techniques used with students with complex needs are presented. The assessments are the basis for the development of best practices in curriculum development and instructional delivery, including IEP and SDI construction. Emphasis is on identifying strengths and needs and monitoring the progress of students with complex needs. Students will develop a systematic approach to the modification/adaptation planning for instruction within a curriculum. Practical, ethical, legal and philosophical approaches to inclusion are included.

**Prerequisite:** SPE 205; SPE 232.

**SPE 405 Research and Field Experience in Special Education (1-3)**

By pre-arrangement with the Coordinator of Special Education, a student may be awarded up to three academic credits for participation in activities and completing related research. This experience allows students who have demonstrated competencies in other required courses to enhance their professional knowledge and skills on an advanced level.

**Pre-requisite:** Permission of the School of Business and Education through the undergraduate coordinator of special education.

**Teacher Assistant Program (TAP) (No Credit)**

The Gwynedd Mercy University teacher assistant program (TAP) schedules time for all freshmen, sophomores, juniors and transfer students to assist in classroom management and to observe teaching techniques in local schools weekly.

**SOCIAL WORK**

**SWK 100 Principles of Sociology**

Analysis of basic structures of human societies in order to understand human social behavior in the modern world and in one’s own society with emphasis on social institutions and social change.

**SWK 201 Introduction to Social Work (3)**

This course will present an overview of the elements which define social work. Social work history, values, and ethics will be discussed. Basic counseling techniques and an overview of the various agencies of social work will be covered providing a strong overview of generalist social work practice. This course requires a short social service volunteer experience. This course is open to all students interested in exploring social work as a major or career.
SWK 202 Human Behavior and the Social Environment I (3)
Human Behavior and the Social Environment is a professional foundation course for social work majors. This course explores how social context affects human behavior. Optimal human development will be discussed as well as the consequences of the development being interrupted by individual and societal issues. Students will explore biological, psychological, sociological, cultural and spiritual developmental tasks across the life span. A variety of developmental theories will be examined along with their variabilities by race, class, ethnicity, sexual orientation, and spiritual beliefs. Utilizing the social work strengths model, the course will discuss resiliency and self-determination within the context of poverty, education, racism, sexism, ageism, and other contextual areas that contribute to unjust social problems.
Prerequisite: SOC 100 and PSY 100

SWK 203 Difference and Diversity (3)
This course is a socio-historical look at diversity and difference and the corresponding disadvantages and/or privileges assigned to various groups—race, class, education, sexual orientation, gender, and age. Students will explore systems that maintain unequal access to power and privilege while marginalizing large sections of the population. By understanding one’s own place within the system, this course intends to support the knowledge and skills necessary to support culturally competent social work practice.
Prerequisite: SOC 100. PSY 100

SWK 205 Human Behavior and the Social Environment II (3)
A continuation of HBSE I, this course will emphasize the influence of groups, communities, and organizations on human behavior. Students in HBSE II will explore the framework, values, and skills to attend to individual and family needs through work groups, communities, and organizational resources. A service-learning assignment studying a local non-profit is a major part of this course.
Prerequisite: SWK 202

SWK 212 Counseling and Communication Skills (3)
The course is an integrated approach to the study of communication styles, communication skills, basic counseling skills and elements of helping relationships. It includes exploration of the nature and dynamics of the helping encounter, interpersonal communication, and opportunities for increased self-awareness and skill development. Students will develop beginning competencies in working with individuals, families, and groups.
Prerequisite: SWK/HS Majors: SWK 202; NSG Majors: PSY 202; All other majors: PSY 200

SWK 241 Marriage and Family Systems (3)
This course will explore socio-cultural aspects of families and how they are shaped by ethnicity, sexual orientation, income, and education. Family types will be viewed through the life cycle model and will explore a variety of family forms including two-parent, single-parent, adoptive, divorced, same-sex, remarried, and step-families. Several models of family intervention will be discussed and practiced in role-play sessions.

SWK 301 Generalist Social Work Practice (3)
Principles of methods of practice in all areas of social work will be explored including techniques in casework, group work, community organization, planning and administration. Field observations will
be held in various social work settings throughout the metropolitan suburban area.

**Prerequisite:** SWK 201

**SWK 304 Social Policy and Administration (3)**
This course provides an awareness of societal response to social problems. It will explore how political, economic, and institutional thought contribute to public response by the social welfare system. Students will explore societal response on the micro-level by designing an agency to meet various societal needs, exploring management skills and administration in human service agencies. Students will learn about various agencies and their administrative needs including hiring, state and government regulations, and team building. Areas of study will include planning, goal setting, decision-making, leadership, conflict resolution, budgeting and fiscal management.

**Prerequisite:** SWK 201

**SWK 305 Mental Health Practice (3)**
Utilizing the strengths model of social work practice, this class will address common mental health diagnosis and their evidence based treatment models. Utilizing the Diagnostic and Statistical Manual of Mental Disorders IV (DSM V), students will learn diagnostic categories and how to accurately diagnose various mental health issues. Students will understand the long-term ramifications of having a diagnosis and will learn that the diagnosis is only the starting point for developing a positive and measurable treatment plan. Various modes and settings of psychotherapy will be discussed as well as the use of psychotropic medications and the importance of working in multi-disciplinary teams.

**Prerequisite:** PSY 100, SOC 100

**SWK 400 Social Work Research Methods (3)**
A critical examination of research methods found in both quantitative and qualitative methods of research in social work. Foundations of research, including research design, ethics, conceptualization, measurement and the logic of sampling, leading to the creation of a proposal for original research by the student. Outside exercises also familiarize students with different research methods, techniques of observation and the reading and evaluation of published research. This course will emphasize the use of research in social work practice and understanding the use of evidence-based methods in social work practice.

**Prerequisite:** PSY 111, SWK 201

**SWK 435 Social Work Field Placement I (5)**
After consultation with Director of Field Placements advanced students will be provided direct experience in selected supervised settings in social work agencies and programs. The field placement aims to provide a service to the community and enable the student to acquire the skills, experience, and knowledge necessary for the choice of a career. (Senior level social work students only by permission of the field director)

**Co-requisite:** SWK 445

**SWK 436 Social Work Field Placement II (5)**
A continuation of SWK 435. After consultation with Director of Field Placements advanced students will be provided direct experience in selected supervised settings in social work agencies and programs. The field placement aims to provide a service to the community and enable the student
to acquire the skills, experience, and knowledge necessary for the choice of a career. (Senior level social work students only by permission of the field director)

Co-requisite: SWK 446

**SWK 445 Social Work Field Seminar I (1)**

Students in social work field placements will meet weekly with the Field Director to discuss their experiences in the field. Students will discuss their journal entries, their experiences, and work on areas of growth.

Co-requisite: SWK 435

**SWK 446 Social Work Field Seminar II (1)**

Students in social work field placements will meet weekly with the Field Director to discuss their experiences in the field. Students will discuss their journal entries, their experiences, and work on areas of growth.

Co-requisite: SWK 436

**SWK 4000—Social Work Capstone (3)**

The mission of the Bachelor of Social Work degree program is to develop professionals who are competent in the skills and knowledge necessary for work in the various fields of social work. This capstone class is designed as a way for students to demonstrate social work skills, develop an e-portfolio of their work, and contribute to the community through a service project. Through writings, role plays, lectures, e-portfolio development, and a service project, students will demonstrate their mastery of the program goals of the social work degree program. Medical Laboratory Science

St. Christopher’s Hospital
For Children

Susanne Dannert, MS, MT(ASCP), Program Director
Judy Pascasio, MD, Medical Director

Pennsylvania Hospital

Jean Buchenhorst, MS, MT (ASCP) Michael Husson, M.D.

Reading Hospital and Medical Center

Tiffany Smith, MS, MT (ASCP), Program Director
William Natale, MD, JD

Radiation Therapy

Christina Blake, RT (T)
Rose Catrambone, BS, RT (T), ARRT
Maria Clark, RT (R) (T), ARRT
Theresa Clark, RT (R) (T) ARRT
Karima Cooper, RT (T), ARRT
Betsy S. Cramer, RT (R) (T), ARRT

Lori Hanson Denittis, AAS, RT (R)(T) ARRT, CMD
Kellyann Flach, RT (r) (T)
Jodi Goane
Emily Gores, BS RT (T)
Dionne Graves, RT (R) (T) ARRT
Rodel Hidalgo, RT (R) (T), ARRT
Paula Hinton, RT (T), ARRT
Modesty Hofmann, BS RT (T), ARRT
Thomas Hofmann, RT (T), ARRT

Robert Hogan, AS, RT (T) ARRT
Daniel Jenkins, AS, RT (T), ARRT
Kathleen Kelley, RT (R) (T) ARRT
Niki N. Marcino, BS, RS, RT (T), ARRT
Judith McDonald, RT (R) (T), ARRT
Kathleen McElvenney, BS, RT (R) (T), ARRT
Denise Melvin, AS, RT (T) ARRT

Respiratory Care

Christopher Anderson, BS, RRT
Lauren Diduch, BS, RRT
Katie Engler, BA, RRT
Peggy Hager, CRT, RPFT
Veronica Jamison, RRT
Tom Lamphere, BS, RRT

Monica Purcell, BS, RRT
Roseann Rappa, MS, RRT
Kathy Sebastian, RRT
Rodney Simcox, BS, RRT
Randy Solly, BS, RRT
Margaret
Ada Matthews, MS, RRT  
Kenneth Miller, Med, RRT-ACCS  
Honey Pezzimenti, Med, RRT, NPS  
Paul Swietlik, BS, RRT  
Edward Tollick, BS, RRT
